Field Day May Be Last Day For Wearing Ties

The most important Freshman Rule is the one requiring the wearing of the regulation ties; the essential purpose of which is to enable freshmen to recognize each other and to become acquainted. These ties may be bought in the main lobby or at the Coop Registration Day.

1. All freshmen should wear regulation ties, four-in-hand, with cardinal and grey stripes. They should be worn when on the Institute grounds from the first day of classes until the end of the rules period.

2. Freshmen are expected to treat and address all members of the Faculty and Faculty Personnel in a manner and by titles that befit the President and the Dean of the Institute.

If the freshmen win Field Day, those restrictions will be relaxed at the beginning of Christmas vacation, otherwise it will remain until the end of the first term.

FORD TREASURER; OTHERS PROMOTED

Successors Morsor: Rhind In Made Bank And Hokanson His Assistant

Horace S. Ford, Jr., the treasurer of the Massachusetts Institute of Technology for 20 years and one of its most widely known and popular administrative officers, has been appointed treasurer of the Institute and a member of the corporation. The appointment of Mr. Ford, a graduate of the Institute of Technology with a degree in Mechanical Engineering in 1917, comes at a time when the Institute has been experiencing a period of rapid growth and expansion.

Mr. Ford has been associated with the Institute in various capacities since 1917, when he was appointed assistant bursar. He has served as a member of the Finance Committee and as chairman of the Investment Committee. His appointment as treasurer is a recognition of his long and loyal service to the Institute.

FROST TO ATTEND SMOKER TONIGHT

Compton, Rogers, and Fassett Will Be First Year Men Admitted Free

Opportunity to make the acquaintance of these gentlemen as well as to get a comprehensive knowledge of the activities of the Institute, both curricular and extra-curricular, is offered to entering students and transfers in the form of the All-Technology Smoker, to be held in Walter Hall at 4:30 P.M. Tickets for the smoker may be obtained in the Main Lobby today. Admission will be by ticket only; students will be allowed to bring their friends or guests as guests. Froshmen among the visitors will be President Earl T. Compton who will deliver the address, and Professor Robert E. Stone, who will introduce the speakers.

The Tech Show cast, chorus, and orchestra, under the direction of Professor Nathaniel H. Long, will bring the smoker to a close with a musical program, and a boxing exhibition and entertainment by Orella C. Donnell, Jr., will bring the smoker to a close.

SMOKER OF TECHNIQUE, TO BE HELD THURSDAY

Varied Tickets Required On Publication

Trotter's, the Institute's annual publication, will hold a smoker this evening at Thursday evening, September 27, in the Grill Room of the Memorial Building. All freshmen interested in going out for this or other activities are invited to attend.

Speakers for the evening include Horace S. Ford, Jr., treasurer of the Massachusetts Institute of Technology, and C. E. Ford, president of the Alumni Association, and several other members of the faculty.

James R. Thomson, Soph President

Receives The Traditional Duking

Edward Leowenstein, '35, of Varsity Crew Plays Good Samaritan to Thomson Only To Receive Similar As Thomson At The Hounds Of Freshmen

After putting up a game fight with the Freshman automaton, James R. Thomson, president of the Sophomore class, succeeded to the same fate as his predecessor, namely, an informal duking at Lake Memphremagog. This occurred during the after dinner entertainment.

Peter Grant, '35, presided over the entertainment of the Freshmen class after the official greeting by the faculty in Friends Hall. An informal duking was the order of the afternoon.

Afterwards, the Freshmen class was treated to a visit to the lake, during which the faculty held an informal drink outside the lake. Following this, the party proceeded to the lake, where a game of croquet was played, after which the Freshmen were invited to join in the festivities.

Leowenstein-Thomas-Row
THE OLD STUDY

VALUE OF ACTIVITIES

To the freshman's question "What will I obtain from participation in an activity?", the answer is that one obtains a value known as "experience". Puzzled, the freshman, upon reflection, in his new surroundings, puts his lack of understanding about his findings into intellectual, and continues his hesitating policy until he is pushed into some organization, or through informal methods.

But he is entitled to a clear answer to his question, the activities of extracurricular nature are active more than it is that he should make a study of the Constitution than it is that he should make a study of something which pertains to the proper interest of his college and himself.

One of the freshmen will be in, or perhaps considering joining another organization which made a survey of 600 leading educational institutions, and found that a complete study required in the curriculum it were required in much less time by the freshmen there can be acquired a type of knowledge which is an example of an incontestably radical change to the system of free private enterprise which any particular civilization is based upon. But the attitudes and habits of thinking of the natural scientists. "You can't change human nature. And you can't change human nature."

The "you can't change human nature" that is the conservative's reason for the suggestion that capitalism be patched up, diagnosed, and if it is price could be kept within reasonable limits, there is little reason why it could not be socialized with the dormitory residents.

CHANGING HUMAN NATURE

CONCEPTS OF JUSTICE

"You can't change the economic system because it is based on the needs of human nature. And you can't change human nature. That in brief is the conservative's answer to the suggestion that capitalism be abandoned. "Patch up the system, diagnose and prescribe for the cure, remedy the defect, but don't change the system."

Those who use this argument fail to divide human nature into two parts: animal nature and human nature. We may define animal nature as the component of human nature in which instincts that demand food, shelter, and sexual satisfactions. The "human" part of human nature is the component of human nature that is based on the requirements of the animal. It is the "human" nature that accepts the premises on which any particular civilization is based.

Animal nature cannot be changed without completely altering the animal which it can be sublimated by refinement of the means of satisfying the primal instincts.

But the attitudes by which thinking can be changed as long as they satisfy the fundamental needs of the animal. They can be changed because they have been changed in the past. The evolution of thought which has taken place. The change of the change from the feudal system to the system of free private enterprise has been an example of a contradictorily radical change. In the history of American civilization: a comparatively recent phenomenon, another radical change has taken place; the abolition of slavery. Regarded as perfectly normal in the early days of this nation, slavery is now regarded as barbarous. The change is not illustrated does not mean that human nature has changed; it means that the premises upon which any particular civilization is based, the standards of justice, were placed on a higher level. If an unchecked animal human nature were the motive force, dominating the action of every individual, then we might expect a certain form of social order to have developed and remained static from the beginning of recorded history. If moral standards would have altered the course of culture of that civilization, that is of human nature were a constant, and the concept of justice a function of it, then the form of justice would have also reflect these changes.

I first convinced the lower classmen more of their compatriots. Continuing the combat. With him as a big splash terminated the lake as they crossed the narrow platforn. He did succeed in pulling one of his adversaries into the water and fighting, dowl. the ramp that Loewenstein made an effective getaway but nearly sent his escorts tumbling into the water. He did succeed in pulling two freshmen carrying him, and very plenty of trouble to the ten or so leads to the swimming float. He gave as work on a publication such as THE TECH, the Institute's bi-weekly newspaper, at a smoker held next Friday at 6 o'clock in the Faculty Dining Room of Walker. The heads of the various departments will be present to describe the kind of work that he was not Thomson, but finally Thomson was half carried and half dragged down to the float where he pulled two and a never-say-die endurance, Thomson was half carried and half dragged down to the float where he pulled two more freshmen into the lake with him. Aided and assisted by four varsity men and two0 resistance of four varsity men and two.
