Tech Track Team in Good Will Meet with Athletes From Italy

17 PARTICIPANTS

Seven New England Colleges Entered in Friendship Field Meet

ITALIANS ARE MEMBERS OF FRIENDSHIP PARTY

Contestants Include World's Record Holder in 1500 Meter Run

Visiting Italian athletics and boxing teams will make part this afternoon in one of the largest track meets held in the East. The meet will have to be held in the Harvard Stadium and will start at three o'clock. Seven visiting New England colleges will enter teams, with the New England Institute team, including three of the members, being among the competitors from the American college league.

Those chosen are: Moro Jenkins, '32; Frank Lowing, '32; Al Green. (Continued on Page 3)

COMMUTERS MEET AT 5:15 SMOKER THIS AFTERNOON

Professor Robert E. Rogers to Be Principal Speaker for Occasion

CLUB PLANS BARN DANCE

Providing an opportunity for companionship and recreation, the barrel dance which will be held in the 6-Bill Club will have its first smoker this month. The barrel dance idea is one developed by the Committee on the Boston of Walker Memorial. Professor Robert E. Rogers will be the principal speaker of the occasion, and will deliver a헬로 미안 해요. 그녀의 말씀대로. 할게요. 말씀해 주세요.

Professor Grinnell Jones, of the department of physical chemistry at Harvard, was the principal speaker and the principal speaker of the occasion.

Dr. Bush Attends International Meeting of Applied Mechanics

The meeting was opened with the reading of the program, followed by the first of several addresses which will be held in the same capacity for the department of applied mechanics. Professor Bush was an address to the meeting of the occasion.

Dr. Bush attended the Fifth Year and president of the Senior Class and Institute Committee. Golden will explain this the occasion and will outline plans for the year. At the same time he will attempt to interest the freshmen in an activity.

All are invited

Everyone is invited to attend this smoker, and the affair being sponsored by the members of the club, Charles, football, and cigarette, and in the interest of club.

Announcement of the first complete day of the season to take place this year, October 15, will be made at today's meeting of the club. The Maynard's will provide for music for the occasion, and the members of the dance will be a live dancing on the dance floor for club members and students free.

Organized Last Spring

The club, organized last spring, was composed of 20 members who were on the Harvard Stadium team. The team consisted of Charles, football, and cigarette, and in the interest of club.

Dr. Bush attends International Congress of Applied Mechanics in Paris

Dr. Bush attended the International Congress of Applied Mechanics in Paris, where he was a delegate of the American Physical Society. He was also a delegate of the American Physical Society. He was also a delegate of the American Physical Society.

The world of Dr. Bush and other members of the Institute staff, as well as the World of Science, is a continuation of the work done in the past in the study of variable stars. At the University of Manchester in England, Dr. R. H. Innes is building a large telescope for the study of variable stars.

"Recent Developments in Analyzing Machines," was the subject of one of the lectures delivered by Dr. Bush, to the members of the American Philosophical Society. At the American Philosophical Society, Dr. Bush delivered a paper on "Recent Developments in Analyzing Machines," and at the American Philosophical Society, Dr. Bush delivered a paper on "Recent Developments in Analyzing Machines."

The second of a two-semester course in the subject of "Recent Developments in Analyzing Machines," was the subject of one of the lectures delivered by Dr. Bush, to the members of the American Philosophical Society. At the American Philosophical Society, Dr. Bush delivered a paper on "Recent Developments in Analyzing Machines."
In the first place they will gain much firsthand knowledge from the excellent speakers which the societies invite to their meetings. These men are leaders in their respective fields and always have a valuable message for the student. They offer opportunity to contact these men and make friends.

In the second place they permit the new student to become acquainted with the faculty members who will guide his professional courses in the near future. It brings a personal relationship which is infinitely more valuable than a mere class room acquaintance.

It also permits the younger man to meet upperclassmen in the way that he can know them at school and will know them when they have long since been graduated and scattered throughout the country.

For these reasons we urge every undergraduate to join his professional society. If he doubts our word, a visit to one of their meetings will convince him.

ANOTHER FOG DISSIPATOR

MUTINITY MAKERS

T he current congressional investigation, now in recess, of the munitions traffic can, after the opening three-week period of hearings, leave little doubt of the veracity of those startling tales about corruption in high places recounted earlier this year by a few daring writers in books and magazines. Such individuals as the de Wendels and Sir Basil Zaharoff, formerly quite unknown in this country, have had the public trade so thoroughly aired before the public that it will be a long time before they can again attain those comfortable obscurity that it has hard to keep. Giant corporations, which at least in the public mind were once epitomes of respectability, have had their prestige weakened now that the questionable way in which they developed during war times has become known.

Certainly that most vital cause for achieving reform, an aroused public opinion, is at last on the move. It should be more difficult to steer patriotic sentiments into martial channels when the people have been brought to recognize that scoff in munitions manufacturers and others who would benefit by war furnish the propagandists to disturb the peace. But public indignation subsides quickly when the feeling by which it is fed is exhausted; and there is little reason why the feeling now extend should be instrumental in effecting reforms unless it is made to crystallize in the form of definite action now.

The remedy for the evils of the munitions traffic which is so important is government ownership and operation of armaments concerns. This is part of a program of action presented in this issue by Senator Gerald Nye, the energetic chairman of the Congressional investigating committee, in a radio address. In addition to governmental manufacture, he proposed the immediate enactment of a law doubling the income tax on incomes over $100,000 raising the rate to 98 per cent on incomes greater than that immediately upon declaration of war. “See then what would the result come to efforts to stay out of wars,” the senator declared.

Such a device to make those who profit by wars pay for them would be ideal, but the chances for realizing it seem small at this time, principally because of the great influence those classes of society who would fight its adoption to which are filled with legislation bodies. In a similar manner the munitions manufacturers and others are powerful enough to block any other user is correspondingly improved.

We advertise because we have a varied service to each user. Because of the nature of the telephone business, it is our duty to inform the public continuously of the character and varied kind of service we provide.

In line with this broad plan, we find real opportunity in addressing messages to college and university people in their own publications, just as we also vary our advertising for women’s magazines, farm papers and so on. 1934-55 is the fifteen year during which the Bell System has published advertisements which take college men behind the scenes of Bell Telephone service.

Technology's nine representatives on the American track team which meets the visiting Italian star today at Harvard Stadium will have their work cut out for them in the various events. Most Jenkins, Tech's outstanding distance runner, probably will encounter the stiffest opposition in the person of Luigi Becaili, the famous Italian star. It has been announced that Becaili will attempt to break Bill Broidi's record of 15.00 meters. Even if the Italian does not succeed in his effort he will cover the distance in fast time. Jenkins will do well to stay close to the visiting fleet.

** ** ** ** **

Joe Thomas, entered in the high jump, will have to compete against George Suplee of New York University, in addition to other American and Italian jumpers. According to the event schedule sent out a few days ago, Spitz naturally is forced to carry away first honors, but last night we heard Bob Boisie, assistant track coach here at the Institute, say that Spitz might not compete.

Gene Cooper, Henry Guerke, Tom Brown, Al Greenlaw, John Graham, Frank Lovering, and Stan Johnson, the other seven Tech representatives on the American team also are certain to get plenty of opposition from their American teammates as well as from their foreign opponents.

** ** ** ** **

Those who have a few spare moments at the noon hour and who have a yen to see the game of tennis played as it should be played would do well to linger for a moment at the courts beside Walter Memorial and give eye while President Compton demonstrates at the expense of Henry McCarthy, coach of the Institute basketball team and the brain of all freshmen that take the straight F. T. course. Henry has succeeded to Dr. Compton both times the have met in the past few days. Dr. Compton, in his younger days, was a better than average player and still retains much of his old skill. Last summer he took on his illustrious brother here and handed him quite a shellacking. The Institute is fortunate in having a President who is not only a noted educator and renowned scientist but also an avid sports enthusiast.

Tenant Tourney Signs Up Close Today

Tenant enthusiasts have their last opportunity of the year to show their wares in the annual fall tournament, which will start a week from Monday. Drawing has not been made yet pending the end of signups which will definitely close tonight. It is the hope of Manager Edgar Petitions that the turnout will move along quickly to avoid the cold weather that delayed the semi-finals and finals in last year's tournament.

Gill Hunt, star of last year's crack squad, and newly elected captain, has not returned to defend the title he has won two years in succession. At present Scott Rennert, '36, who has been appointed captain by Coach Zack Summers, heads the list of players in the meeting.

The Tavern "To Be Presented Next November

Tryouts for the cast of the forthcoming Dramashop production, "The Tavern," will be held on next Monday afternoon in room 2-125. The Tavern, a farce by D. H. Wood, will be presented either on November 23 or November 24, in the Common Room of the Rogers Building.

Coming to a crossier in many small places given by the play, "The Tavern," a recent stage success by George M. Cohan, should provide an excellent medium for the college's talent.

Dr. Rice, Corporation Member, Dies Suddenly

At a dinner held by the American Society of Civil Engineers in New York City in 1933, in honor of Dr. Rice's twenty-fifth anniversary as secretary, the society made him an honorary member in recognition of his long and valuable service. On that occasion, President Karl T. Compton of the Massachusetts Institute of Technology, in which he paid tribute to Dr. Rice's distinguished career. He pointed out that during the quarter-century of Dr. Rice's tenure, the American Society of Civil Engineers, on the basis of an A. S. C. E. index increased from 2,500 to 20,000, with student branches in various parts of the country. He also noted that funds were subscribed by the engineering societies, Koninklijk Instituut van Ingenieurs, American Society of Civil Engineers, and the Biology and Public Health Society in Darmstadt in 1926.

Dr. Rice sponsored a banquet at which Baroness von Choltitz, President of the Officers' Reserve Corps, was entertained by the students. The banquet, which was attended by the students and faculty, was held in the Old South Church in Boston on November 23 or November 24, in the Common Room of the Rogers Building.

The Tavern, a farce by D. H. Wood, will be presented either on November 23 or November 24, in the Common Room of the Rogers Building.

The MUSICAL CLUBS HOLD FIRST MASS MEETING

The combined Musical Clubs held their first mass meeting in room 2-109 last Tuesday. Student members of the clubs were present, as well as the officers of the organization, which includes several trips to Night schools, the Student Concert Band (under the direction of Dr. Rice), the Glee Club, and the Falstaff School for Girls.

Bill Shanklin, coach of the Glee Club, stressed the social and cultural advantages of music to the participants and urged all men who could, even a few who can't, to come. Those who raised the tryouts held on Tuesday at 5:00 may still sign up, George Hayes, orchestra leader and coach of the Banjo Club, is still writing to more banjoists to report to the first mass meeting.

TWENTY-TYPE TYPES OF DEGREES OFFERED TO TECHNOLOGY MEN

Bachelor Degree Is Most Common: Doctor of Philosophy Runs Second

One of the best known but not least worthy reasons for Institute fame, is the great number of degrees, both scholastic and honorary, which members of the Institute in- structing staff in the various departments hold. There are approximately 424 degrees here, of 35 different types, computing these members only the highest degrees of their type awarded by the members of the staff was counted.

The Bachelor of Science degree is, of course, the most common, with 148 men possessing it. Next in number comes the Doctor of Philosophy with 195 claimants. Seventy-one personne earned their Doctor of Science degree while 17 is the number of B.A. and the M.A. degrees is only 90.

The degrees at this point becomes more interesting to the student in dis- pected by the Board of Directors for each of the departments with five awardees, while the rest of the degrees, the L.L.D., B.L., M.E., E.E., C.E., P.B., B.L., B.E., B.E., B.A., B.A., B.B., C.P., D.F., A.D., and the R.A.C. struggles in at the end with 3, 5, or 1 claimants each.

Taking the departments in the consideration of numbers of degrees given first place to the Physics Department with a total of 100. Followed by the Electrical Engineering Department with 77 degrees. The Chemistry Department is third with 54, Mechanical Engineering, with 44, and the Biology and Public Health with 21 are Fourth and fifth, respectively.

Civil, Aeronautical and Chemical Engineering are all tied for sixth place with 24 degrees each to their credit. The Department of Foreign Languages has the lowest number of degrees, but does it the smallest number of men on its instructing staff, five, this fact is readily ex- plained.

Below is the photograph of the entire world.
