Jacques Renard Is Engaged for Freshman Dance

Parley Delegates

Bell Again Victor in 50-Year Run at Relay Games

Two Clubs Members Will Visit Anti-War Conference

Price Three Cents

Milton Silverman, '56, and Lawrence C. Ebel, '54, were chosen by the Student's Guild, which is in charge of the Student's Guild, which is in charge of the Yugoslavia Division of the American League Against War and Fascism, to be held at Hotel Bradford at eight o'clock this evening. The League is made up of all types of organizations which take a stand against war and Fascism.

At the meeting of the church Tuesday, December 23, recognized as the most important of the session, and Joseph Basha, '54, was elected temporary president. The meeting was adjourned until the next regular election.

The subject of the address is Howard B. Gill as superintendent of the school. Thursday at the school. The winning school has taken a desired interest in the question, to be present at the next regular election.

The renegade is to be given a public hearing on the basis of charges made against him, and an investigation of conditions at the school State Auditor Francis E. Nix.

OPR COMMITTEE ORDERS SIGN-UPS REDEEMED TODAY

Invitations May Be Obtain In Main Hall Program

Debates Scheduled With Boston and Benton College

Grapplers Lose Two

Popular Eleven Piece Orchestra Will Play for Dance

Ordinarily dance orders will be given beginning this afternoon, and to participate in the Discussion.

The program, scheduled is as follows:

Parley Delegates

Be Held At C. U.

Under the leadership of Professor

Each side of the question, the question to be followed by an open discussion. Non-members are invited to attend and to participate in the discussion.

The complete program of debate is as follows:

March 15—Harvard, affirmative

April 5—Boston College, affirmative

"THINKFEST" TO BE HELD AT U. OF N. H.

The Christian Work Organization will sponsor a "thinkfest" conference at the University of New Hampshire beginning tonight and closing Sunday afternoon. Every New Hampshire College will have a representative to the meeting. Bruce College New Hampshire will be the guest speaker. Religion, morality and college conditions will be discussed.

William C. Hartwick, secretary, will represent the C.T.A.
WILL THEY GO?

COACH Haines has established both a wire precedent and a strong incentive for the crew with his decision on Technology's participation in the Army trials. The coach's declaration was that whether or not the varsity crew goes to Poughkeepsie depends on its efforts in this direction.

The members of the crew are eager to give their best to the extent of making some personal sacrifices in order to attend. It would be a fitting reward for their efforts if at the conclusion of the season they were given the privilege of competing in a race.

Crew is one of the three major sports at Technology and deserves and gets a large measure of student support. Considering how many and heavy are the demands on their time and what difficulties they have to overcome in order to obtain sufficient practice, the crew more than deserves some doubt as to its ability to attend the Poughkeepsie Regatta.

PEACE ADS

WHILE turning over the pages of a national magazine recently we discovered a very pretty picture. Wondering idly just what kind of canned soup was being advertised here we read a little further and were surprised to find that the beautiful oil painting illustrating the page was part of an advertisement pointing out the horrors of war.

Some altruistic person or organization had made available the means to spread before the world this peace propaganda and perhaps nullify the success of the "prison" which the "militarists" of this nation are feeding to an ignorant public.

We have no quarrel with the purpose of such advertising. On the contrary we feel that efforts in this direction have been too long delayed. War is bad for business and unprofitable for the entire world. The longer this world can exist in peace the better for every one concerned.

But why depict a picture even a professor in astronomical physics cannot visualize? The terrible cost of war cannot be pointed out simply by statistics. Even the most sober and unemotional statisticians. The outlines are too huge to be grasped by any but the most unusual readers.

A single case, a cruelly, poorly focused picture would be more effective. Such photographs as certain dailies in the country are using only mangle more for the cause of peace than all the oil paintings in the world.

We urge our students and faculty to adopt a medium suited to the purpose. The stark horror of blood and famine can best be shown by the grim realism of the present time and place.

Laurence Stullings' "The First World War" is an illustration of what can be done. We recommend the volume to the originators of these advertisements.

THE END AND THE MEANS

WEATHER the end justifies the means has long been a subject for debate among philosophers. The great majority are evidently believes that it does, if we are to judge from its recent editorial on the air-mall controversy entitled: "The War That Isn't Been." Yet its justification here of the prearranged bidding among the airline smashes of sophistry.

The Transcript lamants the action of the administration on two counts: first, that the air-lines could never have developed so quickly their present efficient passenger and mail service without having strengthened their financial positions by unionization; secondly, that as a result the progress of the nation will be retarded because of the cause of the air aviators' inexperience and lack of equipment.

There is no doubt that the airline bids take into account sufficiently the social severity of the offense of dealing dishonestly with the government and making excessive profits thereby.

If the air transport industry, or any industry that might match it in its present high state of development by legal and honest means, can hardly be an acceptable excuse when taken against the development at all. Expansion of an industry beyond the normal public demand for its services can never be made except by some mode of social parasitism. The merger of the small lines to further their efficiency could have been accomplished without fraudulent bidding on Federal contracts. As for the honest men the commerce of the nation by the sudden entry of the army upon the scene, no such serious inconveniences as the Transcript expects have been reported.

The Transcript is of course a Republican paper and can see no good in most of the administration's moves. However, it is doubtful whether the Transcript will achieve its apparent end, the salvaging of the Republican party, by such means.

METAPHYSICS

ONE of the most satisfactory tendencies of modern times is the movement away from metaphysics in philosophy, and its replacement by a greater concentration on ethical, social and political problems. In every civilization the first thought of interest in man was metaphysical—the early Greek philosophers speculated on the nature of the universe, the medieval schoolmen tried to find a metaphysics of Christianity, the early Hebrews were interested in the laws of the universe, and so forth. However, as a civilization developed, the tendency of philosophy was away from metaphysics into ethics and politics. Metaphysics was taken over by science which did not idly speculate upon questions which were rendered solely logical and language, but endeavored to understand the mechanical nature of the universe. Philosophy then turned to the problems of society and was deavored to improve the state and present a definition of the good.

Many of us can ever answer these social problems is not the question, but this modern tendency must be praised. Metaphysics may be interesting to the scholar, and it may give us aesthetic pleasure, but it is building upon thought-made problems which in the ultimate analysis the metaphysics does not deal with reality. One might attack (Continued on Page 2)
Brown Swimmers Beat Tech 64-13
Four Records Go as Engineers Are Swamped: Froehlich, Lonser, "Lounge"

Featured by the breaking of four records, the crack Brown swimming team demolished the Harvard trio last Wednesday night by the unheard of score of 64-13. The Bruins take every Engineers point and all but three spots. At the time the Brown punters were won by the score of 36-12.

Captain Fred Vaughan led the scoring for the Engineers by taking a couple of the 100-yard free style and a third in the 100-yard backstroke and a third in the 100-yard backstroke and a third in the 100-yard backstroke. His score was followed by Coach Hans Neudorf's men in their opening event of the season, for the invaders have a reputation for turning out strong teams in this sport.

Brown's two veterans are Captain Wise and Eddie Van Ham. The former is expected to score in the parallel bars and in the event of his return, events, while Van Ham should add to the Encroachers' points with his tumbling and his work on the rings.

Freshman Also Open Season
Dave Worthington, of last year's freshman, is expected to play a role in the pipe climbing event, and Nunn Moore should score for Techonology on the side horse.

The remaining members of the techs are highly unrepresented, and their scoring is hard to predict. Among this group are Wrightson, the ringer, Holland, Miller and McComb on the side horse. Wiles in the cone clench, and Benson and Donovan on the high bar.

At the same time on Saturday the Techonology freshman gym team will meet the Grangers first-year men.

LOUNGER

"Keep the bowl clean," Louis said, "I will keep the bowl clean."

NOW if you want to build a fire, you've got to have the right kind of pipe, seasoned right and packed right in the fireplace. If you've got all this, it's easy to light up.

"It's pretty near the same way in smoking a pipe. Now if you've got Granger Tobacco—the right kind of pipe—any old pipe will do.

And if you put in a pinch at a time, you've got to pack it down good and right—the way to load a pipe—if you need to do is strike a match.

"Granger smokes sweet and cool right down to the bottom of the bowl.

"That's pipe comfort, I tell you."

The prices are no higher

LUCAS RETURNS TO SQUASH TEAM
Ed Lucas, number one man in the varsity squash, was released from the Hoyos Memorial Hospital last Wednesday afternoon and it is expected that he will lead his team against Dartmouth tomorrow. This meet is a return match with the Haverhill Indians, the Engineers having won their first meet, 6-2. In inspired play the return of Lucas, who has been laid up for over a month with a tibia fever, the team is expecting to continue its series of wins. The man who is making the trip besides Lucas, Joe Hunt, Edor, Wood, and Inwood.

all philosophy on the grounds of not providing ultimate solutions, but this would be misleadingly the purpose and function of philosophy, but metaphysics is open to the sound accusation of not dealing with real things only with the fabrications of our mind. If philosophy can help humanity to live by itself out of the chaos, through which thought upon social, political, and personal problems is plighted, it will have performed a great service—the only practical service of which it is capable.

Philosophy can also help the world by presenting to the best of all previous thought, clearly and conclusively and explicating that thought. Thus, of course, is not a practical function although certainly a useful and important one. It is a matter of great justification that philosophy is basically realizing its limits and its
In Informal Dance to Follow Game, Beaver Key Society Presents Music by Tech Ramblers

The Beaver Key Society will give an informal dance in the Main Hall of the new Ramblers seating coming following the New Hampshire basketball game in the Moore Gym. There will be the "Red and Yellow" show which is held each after a game. Route for the occasion will be provided by the Tech Ramblers. Admission is seventy-five cents, which includes admissions for each couple to the dance. Only undergraduate members of the Society will be admitted free. The Beaver Key is a Junior Engineer Society whose members are chosen from the senior highlight of the sophomore class.

Terriers Swamp Engineer Sextet

Game Marks Last of Technology for Captain Milliken and Hrones

The Engineer hockey team closed out one of the most successful seasons in recent years by allowing the Boston University Terriers to pile up a score of 10 to 1. The game was touched by the superior play of the H. U. team, which broke the scoring so early in the first period and continued to pile up points throughout the game. In their first game of the season, the Technology team had defeated the Terriers by the score of 5 to 0.

Last Game for Milliken and Hrones

Last Tuesday night's game marked the closing of both Captain Pratt Milliken's and former captain Johnny Hrones' hockey careers at Tech.

In spite of a jinx that kept Hrones out of the line-up most of last year's team, had defeated the Terriers by the score of 10 to 1. The game was touched by the superior play of the H. U. team, which broke the scoring so early in the first period and continued to pile up points throughout the game. In their first game of the season, the Technology team had defeated the Terriers by the score of 5 to 0.
