RIDGEWAY ADDRESSES SIGMA XI MEETING

Will Discuss "Transportation Problems in Modern Cities"

Josephine Daynay, the outstanding contralto singer and former chairman of the Board of Transportation of Chicago, will address the Sigma Xi chapter of the Society of the Sigma Xi, an honor society, at the annual meeting at the Institute next Friday afternoon.

Mr. Daynay, who is a past president of the American Society of Civil Engineers and former department engineer for the Catanjiliq water supply project, will discuss "Transportation Problems in Modern Cities," in Room 2307.

Dinner Will Be Given

An informal dinner for members of the chapter will be held at the continent Hotel in Cambridge at 7:30 in the evening, at which Col. Robert C. Dodge, the Institute’s industrial co-operation will be chief speaker. Mr. Dodge, who was president of the chapter, will preside for the evening, and arrangements for the evening will be made by a committee under chairmanship of Prof. Philip M. Morse.

The Institute chapter of Sigma Xi was installed at the beginning of the academic year by which time Col. Dodge and 16 other members of the chapter had been admitted. The 16 charter members were chosen by the District Committees to represent the New England District Chapter of Sigma Xi.

Sigma Xi Meeting

The meeting in the West Lounge of Walker will begin at 5 o'clock. Preceding his address, Mr. Stockmayer, professor, chairman of the department engineering, will give a brief address on Sigma Xi.

DINNER DANCE POLLED TO DETERMINE FAVORITE ORCHESTRA

Fifth Annual Event Comes On February 8 at Walker

Dormitory Dinner Dance Committee will conduct a poll of the dormitory residents in determining what type of orchestra is most popular. An effort will be made to ascertain the orchestra of the annual Dormitory Dinner Dance to be held in the East Quadrangle on February 8 from 6 to 11.

All freshmen and students of the junior class are members of the committee, which includes William Alexander of Riverside, president; D. F. Chinnick, Secretary; and D. E. Wellman, Chairman. The committee will be held in the East Quadrangle on February 8.

The weather last evening, the relay, the score about 80 to 20 in favor of the visiting squad, the crowd of four thousand that had been present the committee was left decided that the meeting had been made to the game, and that the number of the crowd was 

Professor Jean Piccard, Stratosphere Explorer, Interviewed by THE TECH

States That He Would Again Find Connection with Harvard

Visits Professor Vallarta

If "someone would make the instrument," he continued, "I’d go up again," declared Professor Jean Piccard, famous explorer of the stratosphere, in an interview with THE TECH. Professor Piccard, who is a student under the auspices of the American Association for the Advancement of Science, went to Harvard on Thursday evening to hear Professor Vallarta, chairman of the physics department, deliver his annual address to the students of the university. Professor Piccard, who is a student under the auspices of the American Association for the Advancement of Science, went to Harvard on Thursday evening to hear Professor Vallarta, chairman of the physics department, deliver his annual address to the students of the university.

WANTED! BRAWN AND BRAINS

DICK HARLOW, brilliant gridiron coach and also known as an ornithologist (one of his latest studies was the upper beak of the thorn), has been appointed head football mentor at Harvard University, at a salary of $12,000. If the new coach is to earn his salary, it appears that Harvard can expect a season which will be more than one of its ancient traditions. It is claimed that the ability of the new coach must certainly be worth at least one bright baseball season, for only immediately after the Harvard coach must strike right off the football field, for unless he has masterly ways about him, his ends, chances for successful teams are slim.

The accomplishment of tail lying by the boast of the Administration of the Harvard student is a matter of public interest. Harvard is, in its dignified manner, emphatically a matter of only concern, but if alumni yilled loud enough, their will will be done.

SCHEDULED SNARE

SATURDAY CLASHERS

LAST Friday a booklet was issued by the Institute which seemed to hold more interest for the students than most of the official publications which appear from time to time. It was the pamphlet entitled "Class Clashes: Do's and Don'ts," which was given each student with his registration material for the new year. Of course, almost everybody is interested in the extent of white space in the last row of classes extending in the quack black and white rectangles, indicating a general absence of Saturday classes in these areas.

In the schedule for the first year, only one of the five-day sections of the School of Law is in conflict with the Monday, Wednesday, and Friday, or every five-day week, represents an injudicious plan, for the sake of the students the days after which the students have registered for the week. And the French section, which is one of our best sections, is cut loose from the Monday, Wednesday, and Friday lists.

The logical plan, it seems, is the one that has been tried before, and there is no reason why it should not be tried again. In fact, it seems to be the only possible plan, with the exception of the Monday section, which, if properly managed, could be made to work.

The president of the faculty committee reported favorably on a plan to eliminate Saturday classes after the students had indicated their concurrence in a straw vote, the faculty refuting to invalidate its committee's recommendation that such classes be abolished for a year. As a matter of fact, it appears that this universe is to be partly tried after all.

The old idea is to offer something against this form of five-day work is that the student must attend every day of work, or five, a rather difficult task with a curriculum whose demands are as exacting as this at the same time. The real difficulty, however, is that the bulk of the student's work must often be crowded into three days. Since most classes are offered twice in the same week, the only combinations that will give uniform spacing for the literature, Monday and Thursday, and Wednesday and Friday, and Saturday classes, are offered in the same week, and since the courses offered three weekly will be scheduled differently. An examination of the tabular view will indicate that in many cases this is precisely what has been done in this instance.

The effect of an unplanned schedule on the hypothetical ideal student who plans his work carefully would not be a bad one; but considering human fraility, it is easily seen how such a schedule can be a real hindrance to the development of any individual's habits of study. For this reason, if for no other, the plan of Sunday two-term in the curriculum sections of this Institute's administration.

RHODES SCHOLAR

WALTER R. STOCKMAKER

THE appointment of Walter Hupp Stockmayer, 33, as a Rhodes Scholar, is the fourth ever to be chosen by this committee, a choice that would have met with the entire approval of Cecil Johns, 19, founder of the first University of Oxford, and a further education of those young men who looked to the ancient college for its unique gifts in only intelligence and good health, but also the quality and at least the foundation of a truly modern education.

Mr. Stockmayer, although no outstanding athlete, was a member of a number of varsity and non-varsity teams and a successful student. On the football field, he played end for two years. The president of the committee has said that he is proud of the appointment.

Pharyngitis

The psychologists did not notice that Bunny's last day at school was only a temporary one, and since he had felt that it had nothing to do with it. It was not until the next day that he realized that something had happened to his voice and that he was quite normal. The next day he was at school and began to talk normally. He realized that he had only partially escaped the effects of the previous day's illness.

HARVARD'S NEW FOOTBALL COACH

Bunker Hill. The forces that blew out of existence from human discontent. It was the pamphlet entitled "Class Clashes: Do's and Don'ts," which was given each student with his registration material for the new year.

We give you the story of life. To start the new year off with a bit of change, Losange offers a contribution by an aspiring member of the "intelligensia" a thesis. They discussed representations of the people to violence like the gaunt figures of the peasants and workers, which alone had caused the forces that were uprising from human discontent.

It is as much fear for their own regime as for the people to violence like the gaunt figures of the peasants and workers, which alone had caused the forces that were uprising from human discontent. It is as much fear for their own regime as the less stoic of the Crimson professors, Harvard's new football coach.

A HOUSE-SIZE ORGANIZATION

The Government of the United States was appointed head football coach at Harvard University, at a salary of $12,000. If the new coach is to earn his salary, it appears that Harvard can expect a season which will be more than one of its ancient traditions. It is claimed that the ability of the new coach must certainly be worth at least one bright baseball season, for unless he has masterly ways about him, his ends, chances for successful teams are slim.

SPORTS COMMENT

Of interest to those at the Institute who follow tennis is the recent announcement that Gilbert Hunt, former Tech tennis and squash racquets star, has been seeded twenty-third in the national amateur singles rating. Gil also got into the news during the Christmas vacation when he was the national junior singles title and was a member of the team that won the doubles crown. Frankie Parker, the Milliken flaw that defeated Hunt in the finals of the same tournament last year, and did not choose to defend his honors, has been seeded fourth in the list in which Hunt has been egg-tired third.

Gone Mads, much compound in the interscholastic finals last Tuesday, he was seeded sixth in the national amateur singles rating and was the 323 winner and was defeated by Hunt in the 1934 competition, has been rated as all-American best.

Jack Summers, Tech's noted squash racquets and tennis star, did not face any opponent, although last week in the interscholastic national squash racquets tourney held there. Jack was the defending champion but a younger opponent eliminated him in the first round by quarter-finals on Friday. Jack and his opponents should not feel too badly over the defeat, for he held the national pro title three times previous to his 1934 win.

It seems that Tech's rifle team just can't be beaten. It is now ten seasons in a row without a single entry on the defeat side of the ledger.

QUADRANGLE

The Institute on the Best in Men's Apparel, which is notable among college men and college tailors everywhere, is reflected in the preference at colleges from coast to coast for Kover-Zip, the invisible seamless closure.

STUDENTEN DEFEAT M. L. TUCKSTERS

Engineers To Meet Powerful Boston U. Team Tonight At The Arena

The Tech participants dropped their fourth match of the season to Massachusetts Institute of Technology in a game played last Saturday night at the Arena in Boston. Although they played their opponents close, the Engineers were outscored 9-2, and were saved from a 9-1 defeat by a last second, five point shot by the Black and Gold. The Engineers played the first two periods with great defense and had a narrow lead until the last minute of the initial period, putting Tech ahead 13-11. Before an estimated 1000 fans, during the remainder of the game, the Black and Gold held the lead, winning by a score of 22-16, and were fourth match of the season to Massa- l

OPEN FORUM

In opening its columns to letters addressed to the Editor, THE TECH does not guarantee publication nor does it necessarily endorse the opinions expressed. Only signed communications will be considered. However, if the writer so desires, only initials will appear on publication.

To the Editor of THE TECH:

With the coming of winter and winter sports, there comes the sport of downhill skiing and ski-racing. Possibly because Technology is situated in rather flat country this sport has never gained enough headway to become one of our winter activities. To the man who has partaken in the thrill of skiing and to those who would like to learn, why should all of our interests be completely dropped when here at school when the advantage of a lot of fun and exercise should be very great?

The answer is that it need not be. An organization can be formed, say call it the "Technology Ski-Runners' Club", with the definite purpose of arranging the arrangement of the senior faculty, freshman, and ski-racing for that purpose this letter is written. That is now needed is organization, and that is now needed is organization, and the arrangement of the senior faculty, freshman, and ski-racing. More informal pictures for these sections are needed. Snapshots may be placed in the Technique box at the Information Office.

The book may be purchased at this time for four dollars by paying two dollars later, or by signing a bursar's statement. Only signed communications will be considered. However, if the writer so desires, only initials will appear on publication.
