Bell Will Defend Title in New York

Hoflend's Greatest Sprinter to Race in National Meet

Technology's greatest sprinter, Richard Bell, will run his last race on the track in the National Big Meet gray Monday at New York's Madison Square Garden. The meet begins at 9:30.

Richard Bell has already announced that three other Engineer sprinters will be in the championship, Stan Johnson, sophomore jumper, Walt Wrigley, outstanding junior runner, and Herb Jordan, junior distance man, who will also try to improve their standing among the trio who will accompany their boardmate to victory.

Bell has been a sensation since he operated as a sprinter back in 1931 at an African-American intercollegiate meet. In his first year he broke the mile record at 4:28.3 and set a 90-yard-dash record of 9.3, respectively.

Over the 90-yard dash, Bell outstripped all other不及格s.

As a sophomore, the St. Louis, Mo., native, went to New York and performed on the boards. His greatest achievement came in his last race of the season in 1932, when he broke the 100-yard dash record with a time of 9.5.

Since then, Bell has been a fixture on the track, breaking records and setting standards in every event. His 100-yard dash time of 9.5 was the best in the world for 1933.

This year, Bell is expected to make a strong showing in the 100-yard dash championship at the National meet.

FASCISM: A LAST RESORT?

In the course of his address at the Reper- torium in last Monday Night, Lord Dudley Marley explained the classic character of the Nazi leader in Germany. The Nazi at- traction is that he is one of a select few kinds of workers. Jews constitute only ten percent of the sufferers, despite the wide publicity given them from this source.

Wealthy Jewish industrialists and bankers not only escaped Hitler's attacks but even favored his rule. Jewish and Aryan financiers together banked the Nazi forces when the spread of Socialism and Communism was a menace to the foundations of their power and Hitler's storm troopers seemed the only alternative.

The Socialism of which the Jews were most afraid was that of the Communists. So, they supported the Nazis and the Jews suffered as a result.

Free Speech and Mammom

This republic is committed in theory to a tradi- tion of free speech and a free press, but as in a great many other institutions in the world, there is a considerable amount of hypocrisy in the theory and practice.

The stevedore can say what he likes, but he does not have the presidency of a university can say what he likes but he doesn’t; a newspaper can print the truth as it sees it but it is a rare paper which does so.

Our society has established on one hand a freedom of thought which would lead to jus- tice, freedom, and peace, and on the other hand a freedom of speech which will destroy the unity of the oppressed.

The stevedore, as an individual, does not have the right to speak against the corporation lest his words make him dependent on uncer- tain charity for his livelihood.

So, clearly and certainly is the individual on his job for the very necessities of life that he be what he will, he must keep in the good graces of his superiors, and no one is a better superior.

In many cases it is true that he must sell his convictions for his bread.

One or a few arise in the midst of millions of others who are willing and able to defy things as they are. There is the fanatic who will stand against the world in spite of hell and high water. It is a rare and fortunate being who is blessed with an unbiased mind and economic security.

Getting nearer home, there is full expression of the free and independent undergraduate publications and an illustration of our “qualified” free press. Broadly, most modern univer- sities give the editors of the various publica- tions a free hand. Only, they never all official means of restraint or punishment. Only in flagrant cases will the admiral intervene and then it takes good care to be justified.

No censor, no warning finger, but how free is the education which he proceeds to offer?

There need be nothing crude. Perhaps the student needs a loan or a scholarship in order to continue his studies. He cannot be expected to write the reading on the wall. With the present, and probably future economic situation, a recom- mendation from the college is of considerable value in obtaining a position. The student will undoubtedly give this phase of the matter a little thought, but the stevedore, the pre- sident, and the student editor are—circumspec- tive, shall we say?

ELECTIONS

Volume LXII of The Tech is pleased to announce the following elections: Milton B. Dobrin, ’36, Staff Writer; George W. Fowl, ’27, Advertising Staff; Sherman A. Ross, ’31, and Howard B. Bishop, ’37, Circu- lation Staffs beyond the

OPEN FORUM

To the Editor of The Tech:

A letter from John Hosh in the February 26 issue of The Tech expressed the opinion that the way to prevent future wars is by arming the people. We believe this is the cause of the war in the world and that we should be on the alert to prevent it.

The best way to prevent war is to have a general feeling of security and to keep the peace permanently. The movement toward peace should be supported by all people and nations.

The solution to the problem of war is not something that can be achieved overnight. However, if we work together and continue to work toward peace, we can achieve it. The efforts of individuals and organizations are important in this process.

Sincerely,

[Signature]

RICHARD BELL, "41"
GARONO LEADING IN STOCK CONTEST
Has Profit of $8,650, Margin of $1600 Over Vaughan

Bean and Sally of Wall Street held few secrets for Corporation XV men, if one is to judge by the present standings of those participating in the corporation's stock contest. The latest report, published by The Garono, V. W. '30, is heading with a profit of $8,650 over a group of five second and third place finishers. Among them were John A. Easton, Jr., '36, second, and John D. '34, third, respectively.

The contestants started with an imaginary $10,000. For each share of stock purchased, they were credited for the present value of the stock. The fourth for the next ten shares, the fifth for the next twenty shares, with the larger percentage of the total dividend being divided among the larger purchases. I. D. V. R., '34.

The performances will be open to all members of the class of Mr. Paul C. Engleman. The performances will be given at 3 o'clock.

The Drama option of E 22. The entertainment will be given at 7:30. The Dormitory Basketball team went down to a 3-26 defeat. Floren, Brown center, led the victors with ten markers. Howvever, stocks bought but not yet traded. The prize for the one making the most profit, with second and third prizes of ten dollars, respectively.

The last time standings were compiled, October 19, 1936, Vaughan had exactly the same profit. However, stocks bought but not yet traded. The prize for the one making the most profit, with second and third prizes of ten dollars, respectively.
