Bacteria Served for Junior Prum Indifferent

Over The Hill

Mr. Maxson had a sort of hazy idea that this Dramshop society with him might at long last get his box office play reviewed. But he can be just laughed at. He himself has been a victim, so the idea is not about as attractive as a bad deal might make an interesting subject to investigate. Understand, the long-suffering audience is his play reviewer. But let him go just once more and I will be a new man. More, I will be a new man. More, I will be a new man.

Distribution of Favors Featured

The purchase of tickets to the Junior Prom is a very important part of the function of the Junior Prom Committee, and signing a note for a remaining four to be paid before the end of the April will determine the fate of the Junior Prom Committee. Whatever the size of the Junior Prom, and the function of the Junior Prom Committee, the fate of the Junior Prom depends on the final decision of the Junior Prom Committee.

The Class of 36 has been so lazing about that its function is to reestablish that its Prom Committee has been forced to plead with people to buy tickets; the Prom has been deepened by the advertising which have been successfully resisted. Valley handbills and hundreds of printed posters have been spread through the halls of the Institute. In a vain attempt to draw support from the apathetic members of the Class of 36, the Junior Prom Committee has been largely successful in the sale of tickets.

PROWLING POLICE UNDERCOVER MEN

THE Schenectady police recently appeared in plain clothes as an experiment to determine their effectiveness in combatting crime without uniforms. It is stated that this step is necessary in view of the fact that many of the police are recognized by officers at a distance and thus being in plain clothes in times of crime, a problem. Perhaps the person who issued this order did not realize one very important point; the purpose of this experiment is designed to challenge the wrongdoers but also to act as a curb on the public and demonstrate their effectiveness. Uniforms command respect from the average citizen and instill a certain amount of fear into the subconscious mind of the criminal.

The philosophy of the Schenectady department is undoubtedly that crime is committed in the cities and towns. The methods used in motor vehicle offenses are given a glaring example in this case. Police assigned to highway duty do not attempt to curb motor law offenders by making themselves conspicuous. Instead, they lie in wait at some spot offering them concealment and spring out to snatch at the offender who was tempted by the seeming lack of supervision. The officers are not allowing (a) not trying to enforce the law with the proverbial ounce of prevention but rather seeking to apply a very stiff pound of justice.

We would like to see more of the men we appoint to enforce the law and fewer of those who have succeeded in breaking it.

ELECTIONS

Volume LV is pleased to announce the selections for:

To the Advertising Department: Allan E. Schorach '37.
To the Business Service Department: William Chandler II '36.
To the Editorial Department: Charles A. Blessing IV '36, Jackson H. Cook III '36, Leo J. Gogolin '36.

OPEN FORUM

In opening its envelopes to letters addressed to the Editor, THIS WEEK does not guarantee the opinions expressed. Only signed communications will be considered. However, if the writer does not wish the initial letters to appear on publication.

To the Editor of THE TECH:

Can it be that recent editorial, "Blind Injustice," really has its basis? It is true that "staircase marking" finds a place in the Institute's marking system. We have long suspected that such may be the case and are now gratified to find that we are not alone in our conjectures. It is almost unbelievable that an institution of Technology's scholastic reputation should be undermined by such practices as are set forth in THE TECH's editorial.

In fairness to the student, such change, in fairness to the student, must be made. If the solution lies in more frequent examinations, such changes in fairness to the student, must be made. If the solution lies in smaller classes to face the issues at hand. They are not trying to meet the issue by setting themselves off in isolation from the world.

This is the outstanding conclusion we draw from the answers of a number of high college officials to the question, "What has the college learned from the depression?" printed in a recent pamphlet published by Ginn and Company. The depression and its aftermath are doing just this.

Depression and tightened purse-strings have also resulted in a critical re-examination of grading. It is known that the universities are attempting to accomplish the task of making its graduates intelligent of social issues. In many cases this has resulted in improvement over past methods.

It seems therefore, that those colleges which succeed in this endeavor by developing an intelligent orientation without sacrificing "academic" profit may be the end by becoming more aware of current problems and by learning to train students who are socially oriented, not in the sense of being an active, intelligent person in present day affairs.

NAZI NEROCRACY

Hitler's Wonderland

From England, it will be remembered, came that caustic denunciation of the Hitler regime, "Hitler, The Brown Book of Hitler Terror." Now another Britisher, Michael Fry attempts to refute some of the claims made in that volume by publishing "Hilter's Wonderland." He has done this after making an intensive survey of the German Loveland:

Dear Sir:
The Institute of Technology students are ruled by a very strict system of grading. The grades received in certain of the Institute's courses are supposed to determine the quality of their attainments in previous years. To the Editor:

It is evident to us for some time that grades given to upperclassmen in certain courses cannot be based on actual accomplishment. These grades are not averages but the scale of marking which has already been accepted very seriously by a large enough minority in England but in the German of which he has written. His work bears strong claims toward this man and his cause; his impartiality in the matter and is being recognized officers at a distance and thus being in plain clothes in times of crime, a problem. Perhaps the person who issued this order did not realize one very important point; the purpose of this experiment is designed to challenge the wrongdoers but also to act as a curb on the public and demonstrate their effectiveness. Weebb And Judd Enter National Intercollegiates At Lehigh

Technology's entries in the National Intercollegiates Wrestling Tournament were Boston yesterday for Lehigh University at Bethlehem, Penn., where the week-end over twenty-five colleges from all over the United States are entering their best men. Due to work on these, Co-explains Marsden, Owen and Oshry are not making the trip. Ben Cooper the heavyweight hurt his shoulder in the semifinals of the New England Intercollegiates, and due to these injuries will not make the trip. The only two Tech men entered are Jerry Webb, 136, and Fred Judi, 126. Webb has not had a particularly successful season but has dropped some very close matches. Judi has not wrestled at all this year since he was in the same class as Captain Judd.

Latest Results Of P.T. Competition
Des Jardins Leading Closest Race In Seven Years: Ends Saturday

This year's P.T. track competition is the best that Oscar Hedlund has ever seen. With the competition closing Saturday, every freshman is set to do his best in every event. Thursday night Paul Des Jardins was leading with a total of 480; one point behind was Bob Kelley, and one point behind Bob was Harold Coden. The competition has been run for seven years, but competition this year has been the closest ever. Sixty-nine freshmen are competing this year, and thirty-seven of these have totals of over 200 points.

“Irishbank”

Ollie and his fellow-Members of the British motor ship “Irishbank” were visitors at the Instituto yesterday. Mr. William Jackson acted as host, showing them through the plant and buildings. After lunching in Walker Memorial they were driven to their ship.

CAMEL'S COSTLIER TOBACCOS
NEVER GET ON YOUR NERVES!

SPORTS COMMENT

Oscar Hedlund's team are taking things easy for a few weeks, for it is their in-between season, so to speak. The first outdoor meet is lined for April 27, which is almost five weeks ahead. The runners will probably welcome this rest period, for some of them have been training regularly since early in January. The chief activity around the field house at present is the home stretch of the P. T. competition for freshmen. The tentative date for that is tomorrow, but it may run over into next week. Incidentally the fight for first honors is the closest one since the competition was originated.

Nearly all the spring sports have started practices, with the lacrossemen, the crowns and the golfers all conducting regular sessions now. The latter two groups have confined their activities to date to indoor work, but they will be outside shortly. As usual, Coach Bill Haisen had his eaten out on the water as soon as ice enough had cleared away.

Baseball has not started yet, but we understand that a mass meeting will be held next week or the first of the following week. It is planned to run the interscholastic schedule on half of the scale on which it was conducted last year. This is to allow for practices for an independent team, composed of players from the class league. This team will play on Saturdays against other college varsity and junior varsity teams.
CALANDER

Friday, March 22
1:00—Business and Engineering Administration Department; Lecture, North Hall, Walker Memorial.

THE LOUNGER
(Continued from Page 1)

part altogether too well, but we were impressed by the capable way in which the men—or maybe it was the moon—was shifted around and brightened or dimmed by the embryonic stage-hands. Prof. Fuller is of the opinion that Technology men do not know a thing about lighting. They can get lit quite capably.

Dear Personality
Of the rest of our impressions, only one was outstanding. We were amused, to find that certain characteristics which we had thought to be a part of the nature of certain of the cast disappeared in the play. Coming up to wonder whether those characteristics are not assumed airs. And just what they would be like if they pretended to be themselves.

Finally, we are sad to say, our identity has been discovered. Yes, the burly sea captain could not be mistaken. He knew we were the stagehands, and we couldn't convince him otherwise. But we're sure he'll keep the secret. And we'll like him to drop in on us some time down at the office. Perhaps he can give us some more advice.

Yes, the sound equipment used in the play will undoubtedly produce unusual results. Listen for it when you attend Beyond the Horizon. P. E. No, we did not get a free pass.

We predict that Denise Bair, daughter of grad student George J. Bair, playing the part of Mary, two year old daughter of the principal characters, will steal the show. She gave the star performance at the rehearsal. And incidentally, caused a great deal of ad libbing. The script calls for Mary's father, played by Jim Woodruff, to remove her shoes and socks preparatory for bed. But after one shoe was untied, it developed that the youngster wanted to wear her shoes.

Bright Star

Junior Prom
(Continued from Page 1)

That only twenty-eight per cent of those who have purchased tickets are housed is more indicative of the current look of co-operation: that only twenty-four per cent of the sign-ups were made by fraternity men is sufficient proof of the statement, made in the election of councilmen sent to fraternity juniors prior to the election of the Prom Committee, that the Junior Prom is supported chiefly by fraternity men.

The Class of '36 has maintained its phlegmatic attitude of indifference to class functions since its induction into the Institute in the fall of 1932. It is true that the seniors entered during the lowest year of the depression and that the psychological consequences of its historical background excuse, to some extent, its poor show of spirit during earlier years. But there can be no excuse for the continuance of this group of inferiority complex.
