Austin’s one vote margin rechecked six times; voting draws heavier returns this year.

With 56% at polls.

John C. Austin captured the presidency of the Class of 1936 from Francis P. McLean, last year’s holder, by a plurality of one vote, and was declared by Walter H. Stockmayer, ’35, chairman of the Institute Committee, to the Tech last night.

David S. McLellan and Donald Weil were elected presidents of the Classes of 1937 and 1938 respectively, while Stockmayer, chairman of the Institute Committee, announced in accordance with precedent, the fact that the one vote margin was later attested to by Stockmayer who also declared that the margin had been examined six times to assure correctness.

Voting. Austin’s election this year was slightly heavier than usual, with more than 500 of each class going to the polls. 129 Seniors, 272 Juniors, 206 Sophomores and 286 Freshmen cast ballots.

Robert J. Granberry

Was renominated for permanent chairmen of the class of 1935 with J. Barton Chapman elected alternate.

To the Editor of THE TECH:

I want to take this season to thank you and THE TECH for the complimentary subscription to the paper which you have so kindly sent to my office during the past year. In my work as the Intercollegiate secretary of the college Christian organizations, it is a great help to me to have access to these college papers coming across my desk the week. It gives me immedi-
ately touch with the various campuses which is im-
mensely useful to me in my work. Let me say again how much I appreciate your courtesy and generosity in granting me this subscription.

I have just finished reading your editorial on the student strike entitled, "High Alas! Worse Methods." I want to congratulate you on the attitude you take. As an observer in the strike I share your analysis of the situation and feel that you have expressed it clearly and effectively.

I feel that one of the challenges of this year is to bring the student movement into the political world. I understand that if the student committees had played its cards properly, the demonstration could have been sponsored by the Institution and carried off in a dignified and effective form. I should like to make the definite suggestion to you that THE TECH along with other regular student organizations in the Insti-
tute such as the Institute Committee, the T.C.A., etc., should act in a united front during the year and take

Next Year's Menorah Club Program

For their final event of the season, the Menorah Society is presenting a "Spring Cleaning Informal," tonight in the 5:15 Club Room. Refreshments will be served, and the dancing will last from 9:30 to 1:30 o'clock. Admission for members will be 25 cents, and for guests, $1.00 a couple.

The Menorah Society, according to Leonard A. Hobel, '27, president, has had a very active and successful season this year. An attempt to further social relationships of the members with Menorah numbers of other colleges by means of leisure meetings was the highlight of the season. Hobel stated. Two of these meetings were held during the year, with Simmons and Radcliffe respectively, and the Society hopes to continue this form of social contact next season.

**Technique Rush**

(Continued from Page 1)

Technology, and in order to do this, a few Techniques are given away free to those who are able enough to earn them. A possessed man is placed in the center of the field, and this man is to spark in the top at a height of eight feet above the ground. Those who pass these paddles and keep them until they can be depeased with the men in charge are entitled to a free copy of Techniques. This paddles are thrust from the throat. The mouth is closed, except in the instance of the man who finds that not only is entitled to a copy of the year book, but gets $10 in addition. Last year it was hidden under the split of a "jack" who later proved to be Lincoln C. Clark, Jr., 27, a member of the Tech chorus.

It is unfortunate that Institute Committee Meetings are held behind closed doors. That may account for the enigmatic mystery with which motions are carried and proposals accepted. After all who wants to expose any empty element in it is just within the bounds of possibility that the E McMahon meetings are so solemn and quiet that the average student, no matter how intelligent, is not interested.
