Ties Will Be Sold Monday
Quadrangle Club And Freshman Rules Committee To Sell Freshman Ties

Freshman ties—the distinguishing insignia of every entering class at Technology—will be on sale in the Main Lobby and in the freshman registration rooms all during Registration Day, Monday, September 30. Those ties are worn by all members of the freshman class, in compliance with the Freshman Rules. The colors are those of the Institute, silver gray and cardinal red.

Quadrangle Club will again aid in the sale of freshman ties, and in conjunction with the Freshman Rules Committee will endeavor to contact every member of the Class of 1936 during the proceedings on registration day. Quadrangle Club is a freshman-sophomore organization promoting good will and close relationship between the underclassmen.

Freshman Rules

A spirit of comradeship and a healthy school spirit are the ideals which the Freshman Rules Committee is attempting to instill into the members of the entering class. Through its administration of the Freshman Rules (Continued on Page 4)

5:15 Club Opens Season With Membership Drive

Reduced Dues Result of Former Profitable Seasons

Commencement will commence this year's activities of the 5:15 Club, their organization, with a membership drive on Registration Day in the Main Lobby. Dues for the coming year have been set at one dollar, which includes the club's pin. Those who already have the pin will pay fifty cents.

Low class are a result of the profitable year the commuter's association had last season, a profit was made on the New Year's Club of the 5:15 Club which will enable the officers to better outfit the room and to raise several free dances for members.

Besides the bazaar in the Lobby, solicitors will also be at a table near the freshman registration room from 9 until 4 o'clock.

Massapoag Wilds Scene of Man-Hunt; Freshmen Seek Eulogistic Soph President

Donald Weir, President of the class of 1938, is a huntsman for the next three days. For the last ten consecutive years the President of the Sophomore Class is to be immersed in the cool waters of Lake Massapoag at the hands of the Freshman Campers. Freshman are expected to go over the surrounding vicinity with a fine tooth comb trying to ferret out the embarrassed Sophomore President, and to spread an alarm if he is discovered. Tradition demands that he be accepted the generosity of the freshmen when found. He will be present at the camp but will not be within the site of anyone until he is located and given his direction.

A picture of the subject to be found elsewhere in the paper to the guide the freshmen on their man-hunt. They are warned, however, not to trust too much to appearance—these ingenious disguises have been employed by the hunted men in previous years.

Although hopefully outnumbered, the Sophomore President has promised to fight to the last breath and ditch of clothing on him. The freshman class is advised to procure a strong material to nab the victim as rope, arsenic and sheets.

TECHNOLOGY

HOW TO MAKE THE MOST OF IT

Technology as a whole stands ready to welcome the incoming class into its fold and assist them in the many additions to the Institute all succeed in their endeavors. The faculty looks forward with a keen interest to their contribution to the Institute, to the new faces, new materials, and new problems. The students who have learned to feel a part of the group, and who have been another ready set to act as guides for those to whom the Institute road map offers different vistas, will find many new faces to fill their ranks. Sports managers will soon be running up candidates. In closing, we wish you all the best of luck. In a few months we will be finding you all in the struggle the first year students, Faculty, and Alumni alike. So says the Institute. We are not above presenting Tech-technology: you have an infinite amount of fun as a freshman and sophomore old enough to fill your stomach. From the beginning of the term you can eat as much as you wish. We are not above presenting Tech-technology: you have an infinite amount of fun as a freshman and sophomore old enough to fill your stomach. From the beginning of the term you can eat as much as you wish. We are not above presenting Tech-technology: you have an infinite amount of fun as a freshman and sophomore old enough to fill your stomach. GETTING, 39

GROUN WORK FOR CLASS SPIRIT

A LITTLE tradition at the Institute, a tradition which by the way is the point of departure for freshmen-sophomore rivalry always provides a bit of engaging fun for the first year men at Freshman Camp. It would be good if the sophomore president continued his dictating in the dulcet worthy of the Massasopog.

The torus to the whole affair, which, if nothing aura states that a body of events at Camp, will probably take place tomorrow, is that class spirit among freshmen should have its roots at Camp.

Only two hundred new men out of the entering class have the opportunity of discovering the greater blood in the dance, get their true colors. They will make friends at Camp which will last four years, and perhaps a lifetime. Only two hundred new men out of the entering class have the opportunity of discovering the greater blood in the dance, get their true colors. They will make friends at Camp which will last four years, and perhaps a lifetime. Only two hundred new men out of the entering class have the opportunity of discovering the greater blood in the dance, get their true colors.

In other words, if you are not ready to act as guides for those to whom the Institute road map offers different vistas, you will find many new faces to fill your ranks. Sports managers will soon be running up candidates. In closing, we wish you all the best of luck. In a few months we will be finding you all in the struggle the first year students, Faculty, and Alumni alike. So says the Institute. Architects to See Building Erected

Architectural Office Practice To Be Studied By First Year Students

First year students entering the School of Architecture at the Institute next week will come in immediate contact with the realities of their profession in a unique course in which they will plan and supervise the construction of a modern house. The new course will for the first time bring to architecture the laboratory method which has proved so successful in science and engineering.

The new plan of instruction will include the selection and purchase of a suitable lot, making plans and specifications for a suitable house, and the supervision of every step of construction. The work will be carried out with the constant assistance and supervision of the faculty. Upon completion the house will be sold, and the proceeds used to purchase a new lot and finance the building of another house for the next year's class.

During the first few weeks of the opening term the class will become familiar with various phases of architectural office practice. They will then make a study of the various steps necessary in the operation of erection, real estate values, loans, mortgages, deeds, building laws, surveys, and methods of financing. An important feature of the course will be a series of lectures by outstanding authorities in many fields relating to domestic archi

Net Tournament Will Start October Fifth

The fall tennis tournament will commence October 5, on which date the drawing will take place. Entrants will be made by signing the list on the bulletin board in the Main Lobby. The early entry has been planned in order to finish before cold weather.

The prize this year will be a large engraved cup. This contest is open to all undergraduates, including freshmen and there is no entry fee.

The work will be further supplemented by individual research and visits to various types of real estate.

At the beginning of the second term the students will prepare preliminary scale sketches for a house to be erected on the chosen lot. This will be developed into a final plan, and the best design chosen as a basis for the house to be built by the class.

From that point on the course will parallel still further the office practice of an architect. Working drawings and specifications will be prepared for the final estimate, bids obtained, and the contract let. The house will be started, and the actual construction followed by the class in every detail. Studies of interior color schemes and landscape treatment of the grounds will complete the project. The house will be turned over to the Institute authorities for sale.

The plan is expected to do much to stimulate the beginning student's imagination and interest, and to give him a group of the many varied problems of his profession, which usually are encountered only after an architect begins his professional career.

Reviews and Previews (Continued from Page 4)

THE MOVIES PRESENT "The Broadway Melody of 1935," starring Jack Benny, Eleanor Powell, and Robert Taylor, is M-G-M's latest contribution to the musical parade. Bettie Davis and George Brent in "Special Agent" is the screen offering, while Jean Harlow, famed screen star, appears in person on the stage. RKO Boston.

IMPORTANT TO FRESHMEN

JOIN the Coop and SAVE Money on Your Purchases

By joining the Coop you become a stockkeeper for yourself, just as if you rented a store, put in a stock of merchandise, and employed salespeople.

The Coop prices are never higher than elsewhere, and in many cases for the same quality much lower. In addition, a dividend is credited on all purchases of 25¢ or more.

Checks not exceeding one hundred dollars are cashed for members between the hours of 9 A.M. and 5 P.M.

Every TECH Man should become a member without delay. The Membership fee is one dollar.

Charge Accounts for members only.

Money dividends at the rate of 9% on cash purchases and 7% on charge purchases. Year ending June 30, 1935.

A Membership at the Tech Branch Also Makes You a Member at the Harvard Sq. Store

Technology Branch Harvard Cooperative Society

Believe It or Not But . . .

THE OLD MAN

Of Activities Has NO GRAY HAIRS

The Tech, established in 1881, offers you the same things today that it offered Arthur D. Little and "Bee" Litchfield 54 years ago. Only the equipment is different.

In 1881 the Tech Provided for:

1. Enlarging your group of friends (not acquaintances.)
2. Experience in business writing, and executive work which helps men to get jobs when they graduate.
3. A knowledge of how Technology is run from the "inside."
4. One h—- of a good time.

Exactly What Can Be Had in 1935

Smoker Friday, October 4, at 5:00 p.m.
Eighty Attend Camp Massapoag For Preview of Life
At Institute

Editors' Note: This story is taken from the September 27, 1926 issue of The Tech, and describes the events at the first Freshman camp—held that year.

A group of eighty freshmen, activity leaders, and faculty members left Walker Memorial, Friday afternoon (September 24, 1926) about 3 o'clock for the Cambridge Y.M.C.A. camp at Lake Massapoag for the first freshman put-together camp in the history of Technology.

Traveling in busses, they arrived at the camp about 4:30 o'clock, and many immediately refreshed themselves from the journey with a swim in the lake. After supper several announcements were made regarding the various departments of the Institute and stressed the importance of getting interested in some form of extra-curricular work.

He also told of the "hands off" policy which the faculty had maintained for practically fifty years. There being only two instances of faculty intervention during this period, and those of a minor nature.

He stated that in many cases the Dean's office—which included Assistant Dean Harold E. Lobdell—acted as a buffer in preventing the faculty from interfering in student affairs.

The afternoon program included an athletic program. After supper John H. Field, '27, president of the Senior Class, presided. Orville B. Denison, '11, Secretary-treasurer of the Alumni Association, entertained with songs and cheers, instructing the freshmen in Technology's traditional songs.

A group of eighty freshmen, including trans-at Massapoag. When the Smoker opened Saturday morning, James A. Lyles, M.I.T.A.A., explained the nature of the work of their technology which freshmen interested in going for those who were not Technology.

Coach Will Meet Fresh Candidates

Freshman Cross Country Practice To Start On Monday September 29

All freshmen interested in going out for track and field events are to report to Coaches Heiland and Bowie at the Track House next Monday or Tuesday afternoon. Freshman Cross Country practice starts on September 29, and it is necessary that all candidates come out early and start building themselves up for the competition which they will face later in the season.

Freshman track men are given ample opportunity to compete during the school year. Every Saturday afternoon Inter-class handicap races are held, and at longer intervals during the season. Tech Fresh are given opportunity to show their mettle against other schools.

Annual Sept-Fresh Relay

The big event of the Fall is the freshman and Sophomore Relay race held on Field Day, November 1. This event is an annual custom at Tech and is featured every Field Day. Field Day, that annual day of reckoning between the first and second year men and includes all football, crew, tug-of-war, and the Annual Soph-Fresh Relay.

You'll like Camel's mildness too. Your own physical condition—your wind—your energy... the good health of your system—
is important to you. So remember this about smoking: it is a fact that Camels are made from costlier tobaccos. They are so mild you can smoke all you want. Adsense say Camels never get your wind or their nerves off key.

FRESHMEN

When you are hungry your own Dining Halls can give you everything from soup to nuts.

Technology Dining Halls

WALKER MEMORIAL

---

JOSEPHINE McKIDD, Olympic champion swimmer. "One of my head and first rules in connection with smoking," she says, "is that I always choose a Camel. Camels are such mild ciga- rretes, I can smoke them easily, and they don't interfere with my physical condition. They never bother my wind. I just walk a mile for a Camel!"

It's important to me that Camels are milder. Extra millions are spent for the health of Camels. They never get my wind or upset my nerves."

CAMELS

---

LESTER STOKES, U.S.
seeks doubles champion: "No matter how sensible I smoke. Camels are so mild that they never get my wind. And Camels have a better flavor."

---

CAMEL

---

FORTUNATE enough to attend Freshman Camp, the Smoker will attempt to give them the introduction to Tech- nology which their classmates acquired at Massapoag. When the Smoker dances with the singing of the Streak Song, the Class of 1929—after an hour and more than an uninitiated assemblies—will leave as a body bound togeth- er by all the ties and traditions of Technology.
Frosh Camp
(Continued from Page 1)
acquaint the incoming students with the members of their own class, the officials of Technology, and Technology life and activities. There are facilites for riflery, baseball, swimming, crew, lacrosse, track, basketball, volleyball, and football during the many athletic hours on the schedule, and the rest of the time will be taken up with talks and get-acquainted gatherings. Elsewhere in this issue will be found a detailed program of events.

Kinsolving will attend As has been the custom for many years, the counsellor, who this year will number thirty-five, has been chosen from among the activity leaders of the Institute. They will include the class presidents, general managers of the publications, captains of the athletic teams, and the presidents of the Tech Union, field club, T.C.A., M.I.T.A., and the Derm Committee. In addition to these and the 250 freshmen registered, there will be fifteen others among whom will be E. T. Katterfield, '25, former General Manager of The Tech, and at present a member of the T.C.A. Advisory Board. Also among the guest speakers will be Dr. Arthur L. Kinsolving, Rector of Trinity Church, Boston. This year will mark his first appearance at Technology's Froshman Camp. In the past he delivered the opening address at Deerfield Academy which tail interfused with the camp, but this year he has been able to arrange his program in such a manner as to allow his presence as Lakes Mansion.

Five Blankets Per Man In order to accommodate the group of future engineers who will attend the Cambridge Y.M.C.A. camp, the directors have arranged with the camp to furnish them 1500 blankets, 500 mattresses, 500 pillows, 180 cot, and 16 tents. This will allow five blankets per man, one more than has been the custom in past seasons.

Speeding the departure of the camp from Walker Memorial. There will be two tables at which registration takes place, one for men whose last names begin with the letters A-K and the other for the remainder of those registered.

(Continued on Page 6)
We have on hand at all times for CHESTERFIELD cigarettes upward of 350,000 bales of Turkish tobacco...

The pleasing aroma and flavor of Turkish tobacco is almost necessary if you want a good cigarette.

Turkish tobacco is more costly when you take into account that you have to pay 35c a pound duty, but we have to it to blend with our mild ripe homegrown tobaccos.

It helps make Chesterfields milder, it helps give them better taste. Just try them.
