Freshman Communicates With Home By Radio; Uses New Static Eliminator

A short-wave, portable radio transmitter and receiver, with a novel static eliminator attached, is used by William G. Talley, a freshman in Course VI-A, to communicate with his home in Rutherford, New Jersey.

The apparatus is completely self-contained and is carried in a crystal-controlled oscillator and grid-amplifier, with a two-way speech amplifier and modulator. It is powered by a storage battery which is recharged from a 110 volt outlet of the transmitter and receiver.

The design is such that small and inexpensive receiving tubes can be used and has been found useful in connection with radio transmitters. However, the circuit has sufficient power to communicate between Boston and New York.

The portable crystal superheterodyne is augmented by a newly developed amplifier, designed by James Lewis of the American Radio Relay League in Morristown. Only last month, Mr. Lamb, who will not seek to patent his invention, announced the results of his research and presented his designs to the country.
DISTRUST
NATIONALISM IN GERMANY

The formal breaking of the Versailles Treaty by Germany under Hitler, its re-negotiation, now a completed stage in the process of disintegration, and the re-establishment of the "Watch on the Rhine" while all the powers, so long as we are in a world in a feverish state. Fears have been expressed for the peace of the world despite the fact that Hitler, after his compulsory education, advanced to France a treaty promising non-aggression for twenty years. This latter offer was bound to be thought of lightly, of course, for it was made in the same breath that broke completely another solemn international agreement, the Locarno pact.

To the outsider these actions seem best upon no other purpose than the fostering of inter-European and to the average man, to the average man in Germany. One fact often lost sight of is that Germany, under its new conditions, has taken the lead in the attempt to regain its self-regard. Naziism, in this form, is based on the support of the more thoughtful people that have a subject such as English is of trivial importance, and simply an opinion of others. Today the "manly" objective courses which they didn't know before in their day when his Required English courses and his attitude toward his work in English tended, the student's pride suffers a severe blow. His work assumes the appearance of a complete waste of time. The continual schacht, do not seem to realize that this attitude of the Library. Situated as it is in the middle of the city, it is naturally a very convenient place for the student body to go and do what they want, but the students, who are relatively few, are less tolerant than the faculty members. The result is that when a student enters

If a course in Shakespeare or the earlier national relations through ordinary diplomatic means is of trivial importance, and simply an opinion of others. Today the "manly" objective courses which they didn't know before in their day when his Required English courses and his attitude toward his work in English tended, the student's pride suffers a severe blow. His work assumes the appearance of a complete waste of time. The continual schacht, do not seem to realize that this attitude of the Library. Situated as it is in the middle of the city, it is naturally a very convenient place for the student body to go and do what they want, but the students, who are relatively few, are less tolerant than the faculty members. THE TECH

Sports Comment

Some more on the support of baseball at Tech are to be found in an independent news report. Evidence is being marshaled by the Athletic Council, and it is believed that the Athletic Council has already taken the necessary steps to ensure that the baseball program will continue.

Providance Defeated By Beaver Swordsmen

Technology To Meet St. Johns Here Tomorrow

Baseball Teams Meet Wednesday

Independent Varsity Organized; Practice Starts April 1

Oiling Field

Baseball enthusiasts met Wednesday in Room 10-227 to organize the 1936 Interclass Baseball League and to form an independent varsity team. Although the Athletic Association normally sponsors the Interclass League, no varsity baseball team has been organized this year.

P. T. Competition In Track Races Fierce

With about a week more before the seniors' physical training competition will come to a conclusion, the fight for first place is very close, with only a difference of about 10 points in the following eight track events.

Basketball Captains Elected At Banquet

Lynn English also sends some gymnasts. The novice representatives will be sent from Dartmouth tomorrow afternoon to compete in the Olympic tryouts. Twelve men will be chosen from the sport and the selected contestants will come to the Olympic Committee to be judged. The opinion of one girl, the best event of this year's competition in the novice class is over the country, the winner to be named the Olympic team.

Charles Curtze, Technology graduate student, is expected to star in the tryout, and with several other representatives from the area, he can make the high bar and parallel bars. Ineligible for the Tech gymnastics team, he is majoring in aeronautical engineering and is a good prospect for the Olympic Committee.

The Olympic tryouts are to be held all over the country, the winners to be named to the teams in New York in June. The Interclass Competition in the novice class is returned by students from many colleges and will present a jolt in the events in which they compete.

Technology expects to enter thirty-three men in the novice tournament. Twelve representatives were selected from the varsity to compete in the Olympic tryouts and several of these will send some gymnasts.

The novice class will not remain unchallenged by the seniors, and the event will be decided on the final day of the competition.

The Independent Varsity has already scheduled one game with the Independent St. John's College on May 16, and a tentative schedule is in the making for the Independent Varsity. It is expected that this game will be scheduled with Westwoth Institute, Northeastern, and Boston University.

Last year's Independent team under Captains Thomas C. Torrence, '37, and member of the National and Olympic Committees on wrestling, was unable to assemble an independent varsity team for the first time during his connection with the school. But, with Dr. Robert Carthy, physical training director, was at his side, the glee helped with the advisability of mixing athletics with studies. Although a student should not concentrate on a sport to the exclusion of his books," he said, "no matter what the event, "execution will result in more points in the final tally."
Fraternity Freshmen Outrank Other Undergraduates

Institute Average Shows No Variation From Last Year's

Theta Delta Chi Leads List Of Fraternities; Twelve Houses Exceeding Undergraduate Average Rating

Fraternity freshmen ranked higher in scholastic standing than the general average of all freshmen for the first time in a number of years, according to the accompanying chart recently released by the Dean's Office. The general average of all fraternities was 2.88 point over last term's standing, but remained below the general average of the Institute by .03.

Calculated as 3.18, the general average of all undergraduates represents a drop of .06 from the second term of last year, although it is exactly equal to the general average of February. Likewise the general average of all sororities dropped .06 from last term, although it increased .07 over last year. From the fact that the sorority average stood at 2.97, and the fraternity average at 3.16, we may gather that the co-eds, who form the largest single group at the Institute, hold their academic record lower than either the dormitory or fraternity men.

Theta Delta Chi fraternity registered an outstanding gain, moving to third place last year and from a five-year average position of eighth to first among all the twenty-three fraternities reporting. This fraternity increased its average .11 over last term, and also increased the rating of the fraternity average by .01.

In twelve fraternities, the house standing exceeded the undergraduate average, eleven falling below this level and the fraternity average also falling below. Last year, only eight fraternities ranked higher than the undergraduate average and the fraternity average stood .10 below the all-Institute average.

Fraternity freshmen lacked .01 of the average of all the fraternity men, but the average of all fraternities exceeded it by .05 above the average of all undergraduates. Theta Delta and Delta Phi freshmen stood first and second respectively among fraternity freshmen, although their houses ranked fifteenth and sixteenth in terms of the fraternity average, being succeeded in these places by the Delta Chi, Chi Phi, and Sigma Alpha Mu fraternities.

Theta Delta Chi, Sigma Alpha Mu, and Phi Delta Chi fraternities entered the select group of the first five fraternities in the list. Both fraternity and sorority freshmen lacked .01 of the average of all the respective groups, being exceeded by the undergraduate average.

Comparative Standing of Fraternity and Sorority Undergraduate Groups at M.I.T. (as of end of First Term, 1935-36)

Kidnapping
(Continued from Page 1)

The Institute Committee’s resolution
condemning kidnapping,
included in Field Day Posters.

The notice to students will be in-
cluded in next year’s Field Day Post-
ers, reading in part: “Any student or
group of students who, during or after
the forefãod, seeks or detains any
other student against his will
shall thereby render themselves un-
worthy of association with
the Institute.

President Compton’s Disapproval

In a letter to John C. Austin, ’26, presi-
dent of the Delta Delta Delta sorority,
Mr. Compton stated, “I am in hearty
spirit with this action disapproving of
the involuntary detention of any
student or group of students, or of
any other act which might disgrace
the Institute or its student govern-
ment.

Fraternity Rating Not Included

Official condensation of kidnapped
was recognized at the Institute Com-
mitee meeting of January 30th, when
a resolution was unanimously passed
expressly disapproving of the involun-
tary detention of any student. At that
time it was voted unanimously in favor
of the resolution to the administration
with a recommendation asking disciplinary
action against all offenders. It was un-
derstood at the time when the resolu-
tion was passed that fraternity leaders
would not come under the terms of
the resolution, as in that case it was
assumed agreeable to both parties. It
was, however, provided that any flouting
of the rating of the fraternity was to be
acted upon as such by all students.

No More Field Day Abductions

For the first time since the 1935
Field Day Abductions, similar to the
one last year, when 60 freshmen
were taken to Lake Memphrémagog, will
come under this ruling. It was set
that the vague wording of the resolu-
tion might provide an excuse in minor
cases for personal discrimination.

Tech Men OK, Says
Princeton Preferred

By The Defender Of The
“Extradited Woman”

“I think Tech men are quite all
right,” said Margaret (“Peggy”) Connor
of Wellesley Wednes-
day night.

“Actually I prefer Princeton men to
most all Tech men—except a few of
them,” she added. “The Princeton
men are more in the"

It was revealed that each man
in the class would be requested to con-
tribute a copy to help finance the
exhibit.

President Compton stated, “I am in hearty
spirit with this action disapproving of
the involuntary detention of any
student or group of students, or of
any other act which might disgrace
the Institute or its student govern-
ment.

Each Puff Less Acid

Luckies are less acid. For hundreds of
years, tobaccos were selected—and gradu-
ales in flavor secured—by the toughest sort
of rule of thumb methods. Hence, one of
the most important innovations made
by the Research Department was provi-
sion for chemical analysis of selected tobacco
samples before purchase: the resulting re-
ports offer the professional buyer an accu-
rate guide and reinforce his expert judg-
ment based on the senses of sight, smell,
and touch. Thus extreme variations toward
sourness or alkalinity are precluded by such
selection and subsequent blending.

 Luckies— A LIGHT SMOKE—of rich,
ripe-bodied tobacco!
CALENDAR
Friday, March 20
9:00 A. E. S. Meeting, Colonel John H. Jouett, speaker, Room 2-170.
9:15 Tech Show in Kibbey Hall, Boston.
9:00-2:00 Dormitory Dance in Main Hall, Walker Memorial.
Saturday, March 21
1:00 Nautical Association Trip to Herreshoff Yards, Bristol, R. I.
1:00 Tech Show Orchestra Balcony, East Lounge, Walker Memorial.
2:00 Varsity Fencing with St. John's at North Hall, Walker Memorial.
2:00 Varsity Gym Meet with Dartmouth, Walker Gym.
3:00 Freshman Swimming with Brookline High at Brookline.
6:00 New England Olympic Gymnastic Tryouts, Walker Gym.
5:00 Banquet for Hockey Team, Silver Room, Walker Memorial.
5:45 Debate with Latyche College, Eastman Lecture Hall.
5:00 Tech Show in Recitation Hall, Boston.
Monday, March 22
Freshman Debates with Holy Cross at Holy Cross.
7:00 Inter-Fraternity Conference Basketball Games, Hamner Gym.

TICKET PRICE
Tickets cost $0.275. Dance tickets alone are $1.50. Students will be on duty in the Main Lobby for the Show and the Dance. Ticket sellers will be on duty in the Main Lobby, for $1.25 a couple. Tickets may be purchased at the Business Office, Room 10-100. The price for the Smoker is 50 cents a person and 75 cents a couple. Tickets for the Dorm Dance must also be purchased at the Business Office. Dorm Dance tickets cost $1.00.

For Digestion's sake—smoke Camel

Smoking Camels eases tension—stimulates digestion—and fosters a feeling of well-being!
