Public Health Administration

Office of Public Health Administration

Technology of Biology and Public Health is to give a course in public health, including studies in administrative methods, epidemiology, vital statistics, communicable diseases, and public health problems from June 4 to July 3, to be announced today.

The course is expected to be of special interest to public health officials and field workers, since the organization and activities of municipal, county, state, and national health departments will be one of the topics studied under public health administration. Other subjects will be public health surveys, organization of public health campaigns, and the use of hygiene and rural health appraisal forms.

The lecture is open to the public.
UNSTABLE DIPLOMACY
THE FALL OF ETHIOPIA

W HEN Dr. Pitman P. Potter spoke before the Tech Union a little over a month ago on "Diplomatic and War Situation in Europe and Africa," he gave us to understand that the conduct of Ethiopia by the Italians was purely a political move. Securing control of the country, England would surely step in and challenge Mejili's stand before such a thing could have any hope of success.

Unconsciously we took the opinion of Dr. Potter as our own and were very much surprised to observe during the past week, the final drive upon Addis Ababa and its recent capture. It is almost impossible that in a Europe where the pride Character-Character of civilization is so very much barfaceous methods of seizure could be tolerated or carried on by even conscientiously attempted by such a weighty body.

But what seemed impossible has happened, and however incomprehensible the events of recent weeks, it will be found in the country's current diplomatic relations with Russia.

COMMUNISM ON THE MARCH
PRESIDENT TRUMAN

We are first alarmed and then puzzled at the reports of the recent election in France. Before we think of the matter over, the public seems to realize why the election should make a left swing in communistic and socialist France; France has long been known for undeniable democratic characteristics. Yet, as we make a closer examination of the facts, the recent election results are not so startling. In the election, France has gone through a period of some time had smoldering beginnings of so-called "thron% it back on the exam" attitude. There would be less of the "dish it out" discussion he will allow on the part of his associates, for more often than not they will merely be voicing the opinions of the professor. If an opinion which did not fit into the system, it was suppressed or eliminated.

DOGMATISM VERSUS TOLERATION

When a man has devoted a considerable part of his life to the study of a subject, he naturally sets himself up as an authority on that subject. Having thought about it and around it, he may have arrived at definite conditions, the legal right of his whole system of thought. It has been said that the more intellectual or informed a man is, the less plausibility he will add to his opinions. However, for more often than not they will be vacuous. There is no such thing as being wrong which he has lost sight of the value of effective criticism.

So paradoxically it may be very monstrous at times for a professor who considers himself well-informed and so-called to listen to others and include them in his classroom. At the same time, when the subject happens to be one which calls for a subjective analysis or opinion, one man's, even a student's may very well be as acceptable as another's even a profes- sional. If an opinion does not fit into the system previously built up by the professor, he will be given the same treatment as a person from another country or the atmosphere of the class room would be decidedly more repulsive. There would be less of the "thron% it back on the exam" attitude.

Frost Racquetees Trounce B. C., 7-2

Varsity Tennis Team Defeated By Dartmouth Players In Clean Sweep

Frost netters turned in their second victory of the season yesterday when they soundly trounced Boston College's fresh on the IC courts to the tune of 7-2. The varsity racketeers suffered a severe set yesterday at the hands of the wild Indians from Dartmouth who severely clubbed Dartmouth when they severely clubbed the Indians, 6-1.

The most decided of the varsity set was the first, with the Indians suffering a loss of 6-0. The frosh later on took 11-1, but the final set was the one that was most exciting. Dartmouth had won the first set but the Indians then battled back to take the second, only to lose the final set by a score of 6-2 for the frosh.

The Frosh Racqueteers turn in a thorough performance in their victory over the Varsity line-up, defeating them in all but one set. The program was as follows:

1. Rittner lost to Reischman, 6-1, 6-0.
2. Winkle and Dannenbourg defeated Dacey and Boland, 6-1, 6-0.
3. Love defeated Smith, 6-0, 6-1.
4. Marsland defeated Dobin, 6-1, 6-1.
5. Brown and Thomas defeated Copeland and Bender, 6-0, 6-0.
6. Browl defeated Colpeland, 6-1, 6-1.

The Frosh team is now tied for first place with the Varsity and is favored to take the season victory of the season yesterday.

President Compton To Visit Antioch College

General Motors Research Head
To Journey With Press

President Karl J. Compton and Charles F. Kettering, presidents of the General Motors Research Corporation, will visit Antioch College, at Yellow Springs, Ohio, tomorrow. Mr. Ket-
ttering is the donor of the Antioch Science Fund and founder of the C. F. Ket-
ttering Foundation for the study of chlorophyll and photosynthesis, one of four major research projects in progress at Antioch.

Mr. Compton will visit the Science hall and visit with members of the Antioch research staffs and the photo-
syntheticists staff, including Director G. J. Irwin, Research Chemist Paul Richard, and two physics members.

The perfection of her figure is well-known to millions of theatregoers and visit-
ers to the World's Fair in Chicago twov years ago. We doubt if Boston audiences will have the opportunity to make accurate judgments in the mat-
нер. Mrs Clarks and Phillips Holmes have the leading amateur present-
cotice of The House of a Thousand.
Candies. Rosito Moreno, Suzy Span-
nish dancer and Irving Fichet have the
chief supporting parts in this revela-
tion of the "inside working by which
many of the foreign powers maintain
their political prestige and position." 

STATE AND ORPHAN-Jackie
Cooper's latest attraction, Tough Guy, is featured with Messages to Geacise, which stocks Wallace Barry, Barbara
Shawswick, and John Ricks. Barry
is said to have given one of his best per-
fomances in a long time in his character-
ization of a toper.

Presidential Compton read a long list
of names of graduates who are now
presidents of various leading indus-
torial corporations, such as General
Electric, General Motors, du Pont,
Goodyear, and Eastman Kodak. He
tied many names of endeavor in which
Technology graduates were ac-
tive, and showed what services they
performed for the government. He
said "I believe that we have only
scratched the surface in our program
of promoting the public welfare along
the lines of our charter, which directs
us to aid generally, by suitable means,
the advancement, development, and
practical application of science in con-
nection with arts, agriculture, man-
ufactures and commerce."

Reviews and Previews

FINE ARTS—A French draze-
ation of Pierre Loti's novel, Pecque
D'Ollonde, is known to most people who
have taken elementary French, start-
ed here Wednesday. The pictures
are curiously cleverly show, and its gas
Mervi too emotional. The acting of
the principal players is, in fact, all
the other characters was impressive be-
sides the usual talent. Several
shorts are featured including the March
of Times, and a photograph-
ically, Secession of Boston.

BOSTON—This week's stage show
entitled Footlight Flashes, featured
Jimbo Savo, J. Harold Murray, and
Patrick McGee. Miss Ziegfeld beauty, is famed far and wide
as original of the fan dance. The

Presidential Compton read a long list of names of graduates who are now presidents of various leading industrial corporations, such as General Electric, General Motors, du Pont, Goodyear, and Eastman Kodak. He named many names of endeavor in which Technology graduates were active, and showed what services they performed for the government. He said "I believe that we have only scratched the surface in our program of promoting the public welfare along the lines of our charter, which directs us to aid generally, by suitable means, the advancement, development, and practical application of science in connection with arts, agriculture, manufactures and commerce."

**The only machine of its kind**

500 camsharts can be inspected every hour by a automatic machine which has been designed and built by Ford Motor Company. It is the only one of its kind. It has a gaging accuracy of one ten-thousandth of an inch.

It gages Ford camsharts at 25 points. Any dimension not within the specified limits causes electro-
ic and mechanical devices to reject the camshaft as it leaves the machine.

There are ten inspection stations. The camsharts are placed in registered position in carriers mounted on an endless linked conveyor and carried into the machine. At each station the conveyor stops momentarily. Au-
tomatic devices engage the ends of the camsharts and hold them rigidly.

Then 50 floating gage heads lower automatically, mea-
sure the shafts, then rise. As the conveyor moves the shafts to the next station, other mechanical devices pass or reject them.

The gage heads contain hard-
ally-dipped measuring plungers which are linked to amplifying \(H\) and \(V\) shafts. Variations in shaft size beyond set limits, close a set of contact points which operate two solenoids. One sets the rejection mechanism; the other raises a centering marker plunger which puts a dash of copper sulphate solution on the shaft where the dimension is over or under size.

When shafts come out of machine they are automatically passed or rejected. All told, there are 54 inspections on every Ford V-8 camshaft.
