The impressive way in which the Federal Government is being waged by a small body of Federal agents of the Bureau of Investigation, as indicated by the Justice Department's Bureau of Investigation, would indicate that the holding of a Dormitory Dance at this time is a departure from our present position or one of the former position. For some obscure reason the Bureau of Investigation is in a position to make a name for itself as "the men who are breaking new ground in the field of investigation." The Karpis gang have been brought to trial, and it would be a great injustice if we were to prevent the holding of a Dormitory Dance at this time.

If necessary, let our suggestions of possible reasons for the holding of a Dormitory Dance be considered. However, we must not forget the case of the student who, after studying a good part of the night, went to bed and slept right through the examination for which he was preparing. It is also to be considered that a case might come up in a subject, but for such a case the examination for the final examination is to be considered. Attendance at a dance such as the coming dormitory dance, which is intended to suit the convenience of the students, is a matter of opinion. The amount of time required by participation in a dormitory dance is of a suitable brand.

The Dormitory Dance is of a suitable bland. When we see others around us wholly absorbed in the suggestion of sparing a few hours from a study program, we cannot help feeling that the idea wasn't so bad after all; the idea of raising a $300 bond by cramming for it as it is to slack in the exam period begins. Attendance at a dance such as the coming dormitory dance, which is intended to suit the convenience of the students, is a matter of opinion. The amount of time required by participation in a dormitory dance is of a suitable bland.

When we see others around us wholly absorbed in going through the motions of a dormitory dance, we cannot help feeling that the idea wasn't so bad after all; the idea of raising a $300 bond by cramming for it as it is to slack in the exam period begins. Beaver Golfers End Season With 3 Wins

The Tech golf team finally hit its stride and finished up the schedule with victorious wins over Tufts, Boston College and Bowdoin. At another early this past Tuesday, the team comprised of Body, Ouel, 39, Dietz, 63, Zeller, 27, and Wolff, 25, defeated Tufts, 2-1. Each of the victims scored under 90, Proctor being low with 74.

A week ago yesterday, the team took Boston College by a score of 9 to 1. The poor weather conditions caused the score to be 94, being the highest for Tech. Ouel, Sullivan, Proctor, Beck, Goulston, 96, Norman, Stewart, 28 and William Sewell, 38 were the winners.

Last Friday, on a windy course, the team stretched its victories to three straight by defeating Bowdoin, 2-1, Ouel, Proctor, Goulston and Sullivan all shot the course under 85.

The Technology 15ths were to start their race at 8:45, but they were held up half an hour. Nevertheless, after the race failed to start the lightweight jumped into the lead and slowly increased it over the course of the race. The first-year men won by two and a half lengths. At last chance had very little competition in winning this race over the calm Charles.

Beaver Boxing Coach

Tom Rawson, Beaver Boxing Coach Boxer for Thirteen Years

Coach Tom Rawson has added another year to his long experience as a director of the sport. It was around 1928 that Coach H. P. McCarthy asked him if he would take the job. He was here at Tech then.

At that time Mr. Rawson was interested in boxing. He decided to try the sport. His brother had a job in Carbon. He got a kick out of teaching first-year men. He was interested in the sport as both a physical and moral development. He has always been interested in both.

As long as he can remember, Coach Rawson has been interested in boxing as a sport. Even at a very early age he and his brother put on the gloves together and picked up some of the points of the game. It was in 1924 that a more by mere chance he entered a tournament in the Boston Athletic Association. A fellow who worked with Mr. Rawson in bridge-building and buying contracting decided to take him up for the boys and knock on doors of colleges. What happened to Tom Rawson substituted for him and met localfellows. It was at that point that he started teaching.

So that when the ring from them until he was forty-one which is very old for a man in the boxing profession. He is now 54, a shining example of his theories of physical culture are certain theories proven in his own family. Robby and his brother put on the gloves and they will be home as soon as you are. No other man has yet the right there in the ring with every one of his boys. He believes in the physical and moral development.

who is the star runner at that college.

Nestor Sabih and Gene Cooper will

run the half mile. Cooper is coming best now and should be just right for the meet. George Hadley who tied against Brown for first place in the high jump has found himself and with the new water falls has achieved a new record with several inches. He has little wind and a smooth surface. The negative heat is said to be the cause of the D-sen's sudden desire to dunk.

Tau Beta Pi Chose

Next Year’s Officers

At a recent business meeting, Tech-
ology's chapter of Tau Beta Pi, hon-
orary engineering fraternity, elected
and installed officers for the coming
year. The new officers are president
Philip E. Peters, '37; vice-president
John C. Robbins, Jr., '37; recording
secretary, John B. Pitkin, '37; corre-
sponding secretary, Karl P. Goodwin,
'37; treasurer, Paul W. Allen, '37; and
cataloger, Rol-Ching Li, '37.

An educational survey, which has
occupied the local chapter for two
years, has just been completed by
the Tau Beta Pi chapters throughout
the country, and the results obtained are
paving of great value to faculty
groups of engineering schools in mod-
ifying teaching methods.

One of life's most enjoyable experiences is the pleasure
Camels add to eating.

You have surely noticed how much more you enjoy eating when your
mind is free from worry. No mental
strain or hurry slows down the nat-
ural flow of digestive fluids.

Many of the best inventions are yours when you smoke Camels. Smok-
ing Camels increases the supply of
alkaline digestive fluids...so neces-
sary for zest while you use and
digestive well-being afterward.

In Camels, you find tobacco at
once rich, mild, and perfect in taste.

Camels are made from finer, MORE
