Today Is Last Time For Special Junior Prom Table Grouping

Professor Hauser Will Instruct In Skiing At Outing

Facilities Available For Those Wishing To En Route

Conditions At Hinsdale Club Excellent For Winter Sports

Wellesley Girls Will Be Able To Board Train During Five Minute Stop

Professor Ernest Hauser, noted Austrian skier and participant in the 1928 Olympics, is to give instruction to anyone who may desire to make this Sunday at the All Technology Snow Train outing. This is an excellent opportunity for those who wish to improve their skiing and for those who would like to be initiated into the mysteries of the sport.

Special arrangements have been made to accommodate students who wish to take part in the outing. The All Technology Snow Train outing, the departure of which leaves on the tracks behind the Institute at 5:00 o'clock Sunday afternoon, will arrive at Westfield at 9:00 and stop there for five minutes.

The destination of the train is the Hinsdale Country Club, where facilities for a half-hour of outdoor sport are available. Conditions at Hinsdale for skiing are excellent.

Simmons Sophomore
Perfect 1936 Date

Winners Dislike "Dutch Dates," Is Teetotaller

The "Perfect Date for 1936" was discovered this week according to the Intercollegiate Men's Society.

She is Ima Pearlsome, Simmons Sophomore. She lives at 1999 Comstock Avenue, Buckeye, California, is eighteen years old, five feet seven inches in height, and neither smokes nor drinks. Further information from the file brings out the following facts about the winner of the contest: She has brown hair and brown eyes, likes to dance, and she does not prefer Dutch dates.

U. S. Propeller Club Planning Port Here

Meeting Of Men Interested To Be Held Monday

A meeting of all men interested in the formation of a Student Port of the Propeller Club of the United States will be held at 5:00 o'clock on Monday, February 17, in I-310.

The Propeller Club recently offered the opportunity to form a Port here. Included in the membership of the Club are prominent men of the shipping and shipbuilding industries. There are Ports in thirty-five principal maritime cities on the Atlantic and Pacific Coasts.

Advantages to be gained from the club will be available

Minibrite Mortar Makes Military Men Marksmen In Chemical Warfare Unit

Chemical warfare units in the advanced areas of O. T. C. have an opportunity to aim and fire real mortars by means of a miniature range, an accurate representation of a section of the map of the area, and an elevated seat for observers. The work table will be ten feet wide and fifteen feet long, and the sections to be done are outlined in detail.

The advantages to be gained from the use of the miniature range are that the students are able to participate in the exciting sport of shooting, and technical subjects are especially included.

T.C.A. Advisory Board Holds Annual Meeting

The Advisory Board of the Technological College, the Congresional association of funds for men to cover the costs of travel, is considering the annual meeting next week in the office of the first president, Harold E. Prouty, Treasurer Emeritus of the

The report of Treasurer Walcott A. Atkins showed a small gain over the previous twelve years in the utilization of the funds for men to cover the costs of travel. The report is submitted to the Advisory Board for approval.

DuPont Company Gives Funds For Fellowships

Money To Be For Chemists in Graduate Work

Noting an increasing demand for research chemists, the E. I. DuPont de Nemours & Company has again approved the Fellowships in five graduate universities.

The amount is limited to $18,000, which is to be used for the support of students in the schools of chemistry.

Today the requirements of a technical or executive position cover not only professional qualifications but the many human qualities generally weighed in terms of character and personal ability.

While a few years ago employers had little particular stress on scholastic ratings, today they are now equally interested in the student's scholastic background and in his social life and his interest in the cultural and spiritual life of the community.

The cultural capital of the student is considered less important than his interest in the cultural and spiritual life of the community.

Junior Prom Tables Are On General Sale After 2 P. M. Today

All Group Arrangements Yet Uncompleted Must Be Made Early

Today 2:00 o'clock, table space reservations for the junior prom will no longer be reserved but will be put on general sale at 2:00 o'clock. Those who have a special interest in the junior prom must make their group arrangements are urged by the Prom Committee to do so in time to secure their desired tables.

Commencement will be held at 8:00 o'clock. In the auditorium, Prom sign-up cards can be obtained from David H. McLellan, '37, Harold E. Prouty, '31, Robert Y. Jordan, '37, Robert H. Goldsmith, '37, Franklin True, '37, and Harold M. Pierce, '37.

Tickets go on sale today, March 3, the price will be raised from 15 cents to 50 cents. The last day for sign-ups is Thursday, February 27.

Although sponsored by the Junior Committee, the Prom is open to all, and freshmen and graduates alike are invited.
Money-Back offer helps pipe smokers
find what they want

The money-back offer introduced me to Prince Albert," says John T. Norton, '28. "It's great."

Prince Albert is the mildest tobacco I've ever seen. Says Bisel. '27. "It never hurts."

Resume of Events

Alpine Type Bindings All Popular WaXes

Each puff less acid, Luckies are a LIGHT SMOKE
OF RICH, Ripe-BODIED TOBACCO

For twenty-five years the research staff of The American Tobacco Company has worked steadily to produce a measurably finer cigarette—namely, a cigarette having a minimum of volatile components, with an improved richness of taste—"A LIGHT SMOKE." We believe that Lucky Strike Cigarettes embody a number of genuinely basic improvements, and that all these improvements combine to produce a superior cigarette in modern cigarette, a cigarette made of rich, ripe-bodied tobaccos—A Light Smoke.

Each Brand has been tested (see below) and their results verified by independent chemical laboratories and research groups.

Student Union Will Hear Address Today

Miss Strack To Discuss Future Program Of Club

Miss Colacle Strack, member of the national committee of the American Student Union, will discuss in detail the organization of and the aims of the college student union to be held today in Room 4-270 at 8 o'clock.

The American Student Union has adopted a program designed to further the following aims: the democratization of education, the winning of greater economic security for the student, the combating of racial prejudice, the attainment of permanent world peace, and a correction of the militarism and irrational thinking propagated by the yellow press.

The Union was formed in order to unite all progressive students and is opposed to teachers' oath laws, discrimination against professors because of their political beliefs, and similar reactionary activities.

President Rightmeyer of Ohio University speaks above.

Standing between the student body and the merchants of Crafts, more than two hundred guests are invited to attend today in Room 4-279 at 4 o'clock.

The American Student Union has adopted a program designed to further the following aims: the democratization of education, the winning of greater economic security for the student, the combating of racial prejudice, the attainment of permanent world peace, and a correction of the militarism and irrational thinking propagated by the yellow press.

The Union was formed in order to unite all progressive students and is opposed to teachers' oath laws, discrimination against professors because of their political beliefs, and similar reactionary activities.

The rubber bands, and the plunger force the shell out through the air with enough momentum to carry it 80 feet, and the plunger is fired by dropping the shell, which is a brass slip in the shape of an actual shell, down the muzzle of the gun. The shell hits a pivot which releases the rubber bands, and the plunger forces the shell out through the air with enough momentum to carry it 80 feet. The gun is a plunger which is driven by one-half inch in diameter. Inside the tube is a plunger which is driven by rubber bands stretching from a collar around the brass tube to a collar around the brass tube. Since the 4-inch mortar, and excellent results have been obtained by putting plaster of Paris or gelatin on the gunner. Since the miniature mortar is mounted on a real 4-inch mortar, the adjustment required in aiming is effected by using the mechanism of the real mortar. The American Student Union has adopted a program designed to further the following aims: the democratization of education, the winning of greater economic security for the student, the combating of racial prejudice, the attainment of permanent world peace, and a correction of the militarism and irrational thinking propagated by the yellow press.
