Stratton Prize Contest Closes January Ninth

Prizes Of Fifty, Thirty, and Twenty Dollars Offered

Speeches Must Be Technical, Less Than 15 Minutes Long

All Undergraduates Eligible, Practice In Reporting Aim Of Contest

Before January 9 entries for the Stratton Prize Contest, an annual feature of Class day under the supervision of the Combined Professional Societies, must be in the hands of the committee in charge. This means that the names of the authors and the topic of their papers should be submitted by January 9. Open to all undergraduates, the Stratton Prize Contest is open to all undergraduates, whether members of professional or honorary organizations. Prizes of Fifty, Thirty, and Twenty Dollars are awarded in each of the four fields. Each entry, not to exceed fifteen minutes, talks about a current subject which is suitable for papers in the Institute laboratories. The following four fields are in chemistry and chemical engineering. The other two fields, known simply as the Arthur D. Little Fellowship and the James B. Duke Fellowship, each offer to graduate students pursuing studies for the doctor’s degree in the fields of chemical and chemical engineering.

Dr. Goodwin made the announcement on the occasion of the fiftieth anniversary of the organization.

Arthur D. Little, for whom these fellowships are named, established one of the first consulting chemical research laboratories in America. Upon his graduation from Techno-

lology in 1883, foreseeing a period of almost endless need for research, this organization became one of the pillars of the chemical profession. Arthur D. Little, a man of great vision, is probably the only man to have built up one of the world’s foremost laboratories.

The Stratton Prize Contest is annual and is intended to afford an opportunity to prepare a technical report, but also to afford an opening for a future professional attitude of their fields.

Sanitation Achieved By Education, Says Turner At Meeting

Biological Society Describes Foreign Health Efforts While Delta Omegas

"In Java, sanitation by education has succeeded where sanitation by legislation has failed," said Mr. Turner, speaking on the subject of the health efforts of the foreign countries, said on Wednesday, at the annual meeting of the Delta Omegas.

Mr. Turner presented three hundred papers in 150, all sponsored by the Delta Omegas, as honorary Expediency of public health workers.

Discussing public health education, Mr. Turner emphasized the importance of health enlightenment in the welfare and happiness of a people and stated the general public health problem as requiring a scientifically selected and trained group.

In addition to describing particular sanitary efforts in England and the United States, Mr. Turner gave a lecture on Delta Omegas.

Graduate House Holds Annual Xmas Day Party

Members of the Graduate House described the first time before the new year as "a quiet but successful party" held last Wednesday in the Statler.

The entertainment, provided for the guests by the committee, was featured by a sketch by the M. L. T. Quartet, an act with aisles by Arthur G. Winn, and a quartet of pianists, H. P. B. M., all of whom are of high order.

This meeting ended with a group singing of Christmas carols, which were sung by Robert Jacobson.

5.15 Club Holds Fan Dress Ball New Year’s Eve

Alden Porter’s Orchestra Will Perform At Cabaret

The 5.15 Club holds its annual New Year’s Eve ball at 5:15 this evening in the Statler Hotel. The reception begins at 5 o’clock and dinner will be served at 6:30. A cabaret style affair will be the order of the evening.

The music will be furnished by Alden Porter’s orchestra. The entertainment will consist of the choicest musical hits of the year. The orchestra will perform until 8 o’clock.

Special Committee Created To Arrange Open House Plans

American Society Of Civil Engineers Meets

Attendance Largest In History Of Technology Chapter

The largest crowd ever to attend an American Society of Civil Engineers board last year, were present at the annual banquet of the Engineers on Stratton. The banquet was attended by more than six hundred people, a record for the Engineers and a testimonial to the success of the Engineers organization.

Dr. Goodwin made the announcement on the occasion of the fiftieth anniversary of the organization.

Arthur D. Little, for whom these fellowships are named, established one of the first consulting chemical research laboratories in America. Upon his graduation from Technology in 1883, foreseeing a period of almost endless need for research, this organization became one of the pillars of the chemical profession. Arthur D. Little, a man of great vision, is probably the only man to have built up one of the world’s foremost laboratories.

The Stratton Prize Contest is annual and is intended to afford an opportunity to prepare a technical report, but also to afford an opening for a future professional attitude of their fields.

SEVENS NIGHTS

IN A HELL WEEK

The resolution to give its "civil" support to the movement to abolish "Hell Week" taking place on the campus, was adopted by the National Interfraternity Conference at its annual session, and is of vital interest not only to every fraternity but also to all those who tend a college where there is fraternity activity which may reflect upon him.

"Hell Week" as it is known to the Institute, is a period in which an extensive physical and moral degradation takes place. It is a period of a time, when, by superhuman effort, they have survived the first term and have struggled through the second. The primary purpose of these seven mad days is to test the spirit of the Freshmen wishing to join the fraternity. Actually, however, this period merely serves as a Roman holiday for bravura uppersclassmen to exercise mass murder on poor, defenseless freshmen, still men but behind the bars.

Serious, "Hell Week" has degenerated into a very harmful period. The activities during this time do little good whatever, either to the fraternity or those taking part or to the reputation of the college which they attend.

Still, that fact the suggestion of abolishing "Hell Week" comes from the "old grads" who are supposed to be concerned about the sedative tendencies, only a period after the freshman have passed, the evil of its practice is to the extent of wishing to see its passing.

There are some fraternities at the Institute, although, we are sorry to say, that we can name them on the fingers of one hand, who have already taken steps to abolish the evils of "Hell Week" and have been extending their help to such humane and effective forms as Freshman "citizenship" week. However, this is not the case, nevertheless, the requisite uniting and fraternizing qualities.

Technology has long been a place where things get done and get done well. The taking of initiative by the remaining 25 or so fraternities on the campus is, we are led to believe, the apparent discrepancy between today's date and the date listed in the catalog, just re-issued, on the Technology campus custom to ignore that other custom of starting vacations in the middle of the week. Quotas have been postponed, classes cancelled or moved back to this week, and those students who do not attend the "lame duck" sessions Monday and Tuesday do not expect to accomplish very much.

Quizzes have been postponed, classes can get along without, and in addition to the 54 girls who are on spring vacation, there are an unknown number of Fraternity girls who are on spring vacation. The bevy of coeds and special students, including Arthur A. DiStefano, Richard Shelton, Ashley and Ware, Vivien Peterson, Ellin Stone, and Jim Sadler, in Green and Alvey Court. The cinema bills call the girls of the show programs.

"Moving shot on the screen is Miss of College, adolescents, "I do not think it is done for the American Public," as "The Woman of the Year." As this is not her first time, it is already known that there is not enough, the lucky innocent people can read any of the articles on anticipation and participation.

Meanwhile unspecified and unknown, Professor Penny Roberts now sniffles no more than 10 cents a minute and does not as perfect as that of the president of Liberty a center behind advertised, "Two movies in ten years" declares "in that, for you a part, the Institute schedule- New York, December 17, 1936

IN A HELL WEEK

The resolution to give its "civil" support to the movement to abolish "Hell Week" taking place on the campus, was adopted by the National Interfraternity Conference at its annual session, and is of vital interest not only to every fraternity but also to all those who tend a college where there is fraternity activity which may reflect upon him.

"Hell Week" as it is known to the Institute, is a period in which an extensive physical and moral degradation takes place. It is a period of a time, when, by superhuman effort, they have survived the first term and have struggled through the second. The primary purpose of these seven mad days is to test the spirit of the Freshmen wishing to join the fraternity. Actually, however, this period merely serves as a Roman holiday for bravura uppersclassmen to exercise mass murder on poor, defenseless freshmen, still men but behind the bars.

Serious, "Hell Week" has degenerated into a very harmful period. The activities during this time do little good whatever, either to the fraternity or those taking part or to the reputation of the college which they attend.

Still, that fact the suggestion of abolishing "Hell Week" comes from the "old grads" who are supposed to be concerned about the sedative tendencies, only a period after the freshman have passed, the evil of its practice is to the extent of wishing to see its passing.

There are some fraternities at the Institute, although, we are sorry to say, that we can name them on the fingers of one hand, who have already taken steps to abolish the evils of "Hell Week" and have been extending their help to such humane and effective forms as Freshman "citizenship" week. However, this is not the case, nevertheless, the requisite uniting and fraternizing qualities.

Technology has long been a place where things get done and get done well. The taking of initiative by the remaining 25 or so fraternities on the campus is, we are led to believe, the apparent discrepancy between today's date and the date listed in the catalog, just re-issued, on the Technology campus custom to ignore that other custom of starting vacations in the middle of the week. Quotas have been postponed, classes cancelled or moved back to this week, and those students who do not attend the "lame duck" sessions Monday and Tuesday do not expect to accomplish very much.

Beaver Hockey Team
Blanked by Harvard
Capt. Mother Stars For Tus
In 8-0 Defeat

Measuring an experienced and powerful Harvard center, the M. I. T. hockey team was defeated by the Beavers last night at the Arena Tuesday night.

In the second period of the game, the Beavers nevertheless gave their opponents a tough battle, kept the puck in the Crimson end of the ice, but were unable to score. The first half of the previous games, holding the Crimson reserves scoreless.

In the third line of Capt. Ford, Forst, and Harding accounted for all of the goals scored in the third period. Harding credited with goals and an assist.

This combination held together from last year and did not disappoint the Engineers' fans.

**Physics Society To Hold Meeting At The Institute**

**Metals Scientists, Physicists, Chemists Confer On Research Methods**

**Will Be Held Jan. 25 and 26**

The society of cooperation in research in the field of metals, physicists, metallurgists, and chemists will be discussed by leaders in these fields at a meeting to be held at the Institute on January 25 and 26 under the auspices of the Institute and the American Institute of Physics.

The forthcoming meeting emphasizes the prevailing trend toward more productive type of research in which technical workers bring to problems of fundamental interest the specialized knowledge and methods of their several fields. The very important results of joint research are no more evident than at the Institute, where many investigations and brought to successful conclusions through interdepartmental co-operation.

The purpose of the meeting is to discuss thoroughly the recent developments in the physics and chemistry of metals, as well as the implications to workers for still greater advances through the cooperative efforts of workers whose knowledge may in some part contribute to problems of mutual interest. From a half to one hour each well be allowed for presentation of the important papers and ample time will be given for discussion and exchange of views.

**Some of the more general papers to be presented are:**
- "Research Problems in Light Metals in the Steel Industry," by Dr. E. C. Bain, United States Steel Corporation.
- "Electrical Properties of Aluminum and the Age Effect," by Dr. A. B. Kissel, Union No. 16.
- "The Development of the Steel Industry as Seen From the Institute," by J. C. Slater, Head of the Institute's Department of Physics; "Corrosion," by Dr. W. H, Braun, Head of the Institute's Department of Chemistry; "Electroplating of Perforated Alloys," by Dr. W. H. Bennett, Chief of the Electroplating Laboratory; "The Implications of Nuclear Science to Industry," by E. N. Krivobok of the Allegheny Steel Corporation.

In another group of papers various techniques and their applications are discussed, including the third group some especially complex scientific problems, which are in many cases al ready being investigated.

continue in activities worth more than an alloted number of points was in-structed by George H. Temple, chairman of the Walker Memorial Committee. Wemple explained that the six men who have shown capable of carrying out these activities without detrimental to the activities or to themselves. The canceling of the exception of the Institute Committee constitutes an an addition of an exception to the rule limiting the number of points of extracurricular activity in which any one individual may engage. The rule was originally intended to prevent men from taking on too many activities for the good of themselves and for the good of the activities.

Five of the six men named by Wemple are members of the Institute Committee. They are William R. Bennett, '37, 38 points, James E. Miller, '37, 16 points, William J. McCune, Jr., '37, 18 points, Philip E. Peters, '37, 21 points, and Herbert A. Zimmerman, '37, 18 points. The sixth man is Robert B. Hadley, '36, with 18 points. The maximum number of these men which have exceeded is a total of 12 points for Seniors and 10 points for Juniors.

**Outing Club Refused Allocation**

The request of the Outing Club for a monetary grant was denied by the council. The council presented a sheet of paper that such a grant would result in inefficiency, and hence the council voted, however, to allot a sum of fifty dollars to the Union. The council's action on the request of the Union for the allocation of an exception to the rule of thirty tickets a year for the Oouting Club is the highest with $70,000 as the minimum. The tickets sold last year, about 175 going round, were about the average. The council's action was necessary to prevent the increasing demand for tickets and hence the possibility of the sale of tickets for the price of $100.

Indian Students Hold Dinner For Moni Sen

Moni Sen, visiting Indian student, who lectured recently on "America Through the Eyes of a Visitor," was the guest of honor at a dinner held Tuesday evening by the Indian students at the Institute under the auspices of the T. C. A. The affair was held at a Boston restaurant, where the group enjoyed a native Indian dinner.

Research In The Scientific Fields Encouraged By Meetings Of Sigma Xi

Sigma Xi, national honorary society for the encouragement of original investigation in pure and applied science, was presented with a trophy by the members of the society at the meeting of the branch at Union College. As an added incentive to original investigation, three prizes, of fifty dollars, thirty dollars and twenty dollars respectively, are awarded annually at Technology for the best thesis submitted.

Walton Lunch Co.

Merry Christmas.

You'll be off for a vacation trip, without a worry, if you'll arrange your tickets aboard the train and enjoy the scenery. You'll be off for a chance to see and be with relatives and friends, to visit those places you have never seen, to eat the good meals and sleep in the comfortable cars of the modern railroad. You will have the time of your life.

Indian Student Wins Pair Of Pilots;
Edgerton Movies Show

Sophomore and faculty members of the Mechanical Engineering department met at the Hotel Westmoreland Tuesday morning for an informal breakfast, both to get acquainted and to discuss plans for the future.

Course II Sophomores Meet With Faculty

Hansaker Wins Pair Of Pilots; Edgerton Movies Show

Sophomore and faculty members of the Mechanical Engineering department met at the Hotel Westmoreland Tuesday morning for an informal breakfast. Since then, both to get acquainted and to discuss plans for the future, the group met again in a given course will be invited to meet with faculty members. The plan for counseling freshmen on choice of course will be conducted very informally and all other questions about the courses. In this way, students who enter the college will have a clearer conception of the courses, and those in doubt as to which courses seem to promise may have a fairer opportunity to choose.

The proposed service will supplement, not supplant, the present student advisory service.

Details of the plan require that the courses be organized to meet with interested students. The courses which is close to the present is not so the group will not be able to do the counseling it is intended to follow since they do not desire.

Shortly after the beginning of the academic year, a committee of students representing all branches in a given course will be invited to serve as members of the faculty of the course. This committee will be composed of the graduate students from that course will be selected to serve as members of the committee of the course, and those in doubt as to which courses seem to promise may have a fairer opportunity to choose.

The preeminent of the plan is that the courses will be organized to meet with interested students. The courses which is close to the present is not so the group will not be able to do the counseling it is intended to follow since they do not desire.

Technology Students To Represent Italy
Will Impersonate Delegation To League Of Nations

Students interested in representing Technology in the Model League of Nations session to be held March 18 and 19 at Harvard and Radcliffe, met yesterday evening at 5:30 in room 3130 to discuss their impersonation of the Italian delegation to the League.

Paul A. Vagel '37, working with Professor Smith of the English Department on arrangements for Tech's participation, stated that the session was being held to determine who student interest. It was intimated that if the interest was great enough, Technology might represent more than one nation.

Professor Smith, who is an authority on the League of Nations, is planning to give a series of lectures to the prospective members of the delegation to instruct them in the history and procedure of the League.

Record Number Are Going Home Xmas
Sale of Air Tickets Greater Than Ever In Past

More Technology men are traveling home this year than ever before during the Christmas vacation. Over 4,000 north of airline tickets have been purchased through E. Dickson Jones, 59, in the T. C. A. office, an increase of 1,500 percent over those of last year. The air ticket sales this year are only $40 dollars after the canceled sales of all types of tickets last year.

Among those traveling far distance home are students from California, Cuba, Texas, and Canada. Ticket agents will be in the T. C. A. office daily from 10:30 to 1:45 through next Tuesday, selling all, roll, and steamship tickets and reservations.

Prince Albert

It's easy to please all the pipe-smokers on your list. Just give them mellow, fragrant Prince Albert—the National Joy Smoke—the Prince of Pipe Tobaccos. "P. A." is the largest-selling smoking tobacco in the world. It does not "tute" the tongue. Prince Albert will wish your friends and relatives the merriest Christmas ever.

Camels

There's no more acceptable gift in Santa's whole bag than a carton of Camel cigarettes. Here's the happy solution to your gift problems. Camels are sure to be appreciated. And enjoyed! With mild, fine-tasting Camels, you keep in tune with the cheery spirit of Christmas-tide. Enjoy Camels at mealtime—between courses and after eating—for their aid to digestion. Camels set you right!

This year, there's even more EXPENSIVE TOBACCOS—Turkish and Domestic—than any other popular brand.

Indian Student (Continued From Page 1)

You emphasize social life even in religious. I expected to see the religious side emphasized in the Y. M. C. A. and Y. W. C. A. but in your home, a dance was given in my honor when I visited your home.

In speaking of the political side of university life Mr. Sin said that the American students are almost all interested in the world east of New York or west of Hollywood. Of causes of social political security, the American student is sure of the rest of the world," he continued. Mr. Sin then closed by saying that the democracy in the government in our country is invincible.

Mr. Sin has been the guest of some Fifty-five universities and twenty proper schools traveling through the United States, in Europe and from March 1, 1937. Each group will meet and choose three contestants for the semi-finals. The Faculty Committee intimated that if the interest was great enough, Technology might represent more than one nation.

The list of course advisors is as follows: Course I, Prof. John D. Miles; Course II, Prof. Carl L. Sweeney; Course III, Prof. Frank E. Foster; Course IV, Prof. William E. Sanders; Course V, Prof. M. S. Sheridan; Course VI, Prof. W. H. Timble; Course VII, Prof. S. C. Prescott; Course VIII, Prof. J. A. Brandt; Course IX, Prof. E. R. North; Course X, Prof. T. H. Carter.
