Compton Approves Plans For A.S.U. Peace Meeting

Council of Student Delegates Will Make Plans for April Meeting

Letter Is To Be Circulated Among Undergraduate Groups

Asks Co-operation for Giving Expression To Feeling Against War

Approval of a council of representatives of Institute student organizations which will make plans for an all Technology Peace Conference to be held this April was recently expressed by President Compton.

The MIT chapter of the American Student Union is sponsoring this plan in an endeavor to perpetuate the feeling for Peace which was expressed at the Peace meeting held last year under the auspices of Tech Union and The Tech. "The policy of this action is, however, an attempt to determine the type of meeting which the student organizations, through their representatives, believe will be most effective," stated Joseph Shill, '40, president of the organization.

Compton Says "Excellent" President Compton, commenting on the appeal which the A. S. U. is sending to the various organizations, wrote, "It seems to me to be excellent and I hope that it will meet with a cordial response."

A letter which is being presented to various student organizations follows:

"In the past few years the American student has established a new A. S. U. (Continued on Page 4)

Executive Committee Names Officials for Senior Week Comms.

Names of Executive Committee Members Announced; McCune Chairman

The Senior Week sub-committees were announced at a meeting Tuesday in Walker. Selections were made by the executive committee, the membership of which was also made public.

The executive committee consists of William J. McCune, Jr., chairman, George B. Wemple, secretary, John Cook, Junior Member and treasurer, David S. McLellan, ex-officio, Phillip H. Hetas, and Walter T. Blake.

The sub-committees which are to draw up tentative plans and budgets to be submitted to the secretary by Friday, April 2, consists of Banquet Committee; H. Arthur Zimmerman, and James M. Ewell; Pops; Robert Y. Jordan and Max S. Kendzur, Baccalaureate; Rutherford Harris; Class Day, George B. Wemple, Jarvis C. Webb, and Gilbert C. Mott; Tea Dance, William B. Burnet and David Fulton; Ball, G. Richard Young, Ralph B. Chapin, John R. Ferguson, Jr. and Winthrop A. Johns; Sales, Phillip H. Peters, Duane O. Wood, and Clifford A. Lytle; Publicity, Walter Blake, Edwin L. Hobson III, and Horace B. Van Dorn.

Electrical Students Inspect Radio Plant

A turnout of eighty-five men, almost twice the number expected, made the trip of the Technology branch of the American Institute of Electrical Engineers to inspect the plant of the National Company, of Malden, an unprecedented success. Leaving the main lobby of the Institute early Tuesday afternoon, they spent the rest of the day surveying the entire plant, the only restriction being that they could not take any pictures, since the National Co. is manufacturing signal equipment for the U. S. Army.

Dormitories Welcome Spring With First Riot of Season

Spring was unofficially welcomed Wednesday night by the Institute Dormitories with the staging of a mild riot. Connoisseurs of such things, when interviewed, remarked disparagingly that Wednesday's 'disturbance' was insignificant, hardly worth the name in fact, and promised better things to come.

The most permanent effect of the 'welcome' is now on display on the first floor hall of Bemis, where some youthful celebrant, doubtless intoxicated by the excitement of the occasion, fired off a wastepaper basket full of zinc and sulphur. As a result there is a burnt area on the ceiling four feet in diameter and the paint is scorched off the walls and doors. Some other individual distributed some mercaptan on the third floor of Wood. Mercaptan has an odor similar to that of an aroused skunk.

All.F.C. Dance Options Reserved

Reapportionment of Options Among Fraternities Announced

Within half an hour of their release, all of the options for the I. F. C. dance on April 30, have been reserved by fraternity and dormitory members. Forty-five tickets were given to the dormitories, and over a hundred disappointed dormitory men were turned away.

To meet the shortage of tickets among fraternity men, Alfred Busch, '37, chairman of the dance committee, last night announced that a reapportionment of those options unsold in some fraternity houses among other houses that had not received their quota was taking place.

In a statement to The Tech, Busch pointed out, "Since the fraternities bore the entire financial risk of the affair, the fraternity men were entitled to preference in the sale." He said, "I wish to express regret that it became impossible to meet the demands of dormitory men and commuters because of the limited facilities of the Hotel Statler."

C.P.S. Shows Pictures On Steel and Welding

Automotive Development in Army Next Subject

C. C. Snyder, metallurgist and research engineer for the Republic Steel Corporation, illustrated his talk on "Stainless Steel Production and Application," last night in 10-250 with motion pictures. A General Electric film on "Automatic Arc Welding" was also shown.

Last night's lecture was the second in a series being presented by the Combined Professional Societies, the first being a talk about Boulder Dam, given by Col. Charles R. Gow.

The third lecture in the series will be presented on Tuesday, April 27. Colonel Lewis, in charge of technical development in the Ordnance Division of the United States army, will speak on recent automotive development in the United States army. Only United States citizens will be permitted to attend this lecture.

Chem. Society Hears Transmutation Talk

"Radioactive Chemistry" was the subject of an address by Mr. John W. Irvine, Jr., to the Chemical Society at a meeting on Thursday evening. Irvine spoke on the transmutation of elements and suggested that the field of Physical Chemistry would in the future contribute new elements to those already known.

Dr. Compton Hints Of Super Machine For Library Files

Friends of Technology Library Hold Dinner Meeting and Discussion

70 Distinguished Men Attend

A thousand library references per second was suggested by President Karl T. Compton as being "not unreasonable" last night in his talk at a dinner meeting of the Friends of the Technology Library.

This possibility might be attained through an extension of techniques already in use for the automatic control of machinery by electronic devices. Said Dr. Compton, "The task of running down information in a library may be put on the basis of a thousand selections per second. Thus a student who wished to know what information was available in the library on any given subject would have at his disposal a card catalogue of every article bearing directly on this subject within a minute simply by pressing certain keys. Contrast this with the service in some of the famous European libraries where it is commonly a day's task to obtain a particular book."

Dr. Harlow Shapley Presides Chairman at the meeting, at which there were some 70 distinguished guests, was Dr. Harlow Shapley, Director of Harvard Observatory. The principal address was made by A. A. Edward Newton, of Philadelphia, noted bibliophile and author, who discussed groups whose aims are similar Library (Continued on Page 4)

Wellesley Spellers Will Meet Tech Team On N.B.C. Broadcast

Two Fifty Dollar Prizes Given For Best Individual Performances

Can you spell fifty dollars worth? The National Broadcasting Company has invited students of Technology to participate in its series of spelling contests between the country's leading colleges, which are broadcast on a nation-wide network on Saturday afternoons. Prizes of fifty dollars are offered to the best spellers on Saturday afternoons. Prizes of fifty dollars are offered to the best spellers on each team.

A team from Wellesley College has been proposed to meet the Technology men for the broadcast at 4:30 o'clock on Saturday afternoon, April 24, at Spelling (Continued on Page 4)

3 Soviet Engineers Visit the Institute

In U. S. To Supervise Shipment Of American Machinery

Three Russian engineers, visiting America, were shown around the Institute Wednesday afternoon. Employed in a metallurgical plant in the Donbas, important Soviet mining and industrial center, they have come to this country to supervise the shipment of a large consignment of American machinery.

The visitors spent most of the day at Technology. Accompanied by I. B. Kroll, of the Amtorg trading company, they were shown over the dormitories and Walker Memorial, visiting the main buildings after lunch in Walker cafeteria. According to Mr. Kroll, who acted as interpreter, "they liked the food."

Interviewed, the guests seemed rather reluctant to answer questions, but showed a keen interest in American schools and student life. They were pleased with the institute, saying that its equipment compared favorably with that of the Russians (Continued on Page 4)

Tennis Made Free For All Students By Institute Action

Simmons and Tech Present Noel Coward's "Hay Fever"

Combining with Simmons Dramatic Club, the Dramashop presents an annual play, Noel Coward's comedy "Hay Fever." The members of the cast are; Rosalind Gould of Simmons, playing the lead, Judith Bliss, Philip H. Weatherill, '39 as David Bliss, her husband, Anna Curran as Sorel Bliss, Daniel Horn of Northeastern as Simon Bliss, Janet Patterson as Myra Arundel, James Emery, '38 as Richard Greatham, Jean Coleman as Jackie Coryton, Lawrie Fabens, '39 as Sandy Tyrell, and Mildred Kaarfen as Clara. Miss Judith Matlack an Instructor of English is the coach, and Frances V. Albert is the prompter. The play will be produced Saturday, May 1 in the Repertory Theatre and will be followed by dancing.

6 Finalists For Stratton Prizes

5 Seniors, 1 Junior Selected To Make Final Fifteen Minute Talks

Six finalists in the Stratton Prize competition were selected in the concluding semi final trial last night. Professor Frederick G. Fasset, Jr., of the Department of English, Professor Harvey W. Shimer of the Department of Geology, and Mr. Wallace M. Ross, General Secretary of the T. C. A., selected the six competitors from seventeen semi finalists.

The finalists are: Edward C. Peterson, II, '37, who spoke on "The Development of Rod Rolling"; Mortimore H. Nickerson, V, '37, speaking on "Gasoline and Gasoline Substitutes"; Bernard Ross, VII, '37, "Recent Advances in the Study of Vitamin D"; Anne A. Person, IV, '39, "Use of Glass in Architecture"; Duane O. Wood, VI-C, '37, "Television"; James D. McLean, VI-A, '37, "Design of Remote Broadcasting Equipment."

Dr. Samuel W. Stratton originated the competition in 1931 to stimulate interest in the art of verbal expression among Technology students. Any member of the Undergraduate Professional Societies is eligible to compete for one of the three prizes of fifty, thirty, and twenty dollars offered for the best fifteen minute speeches on any technical subject.

Col. David S. Boyden Addresses Engineers

Colonel David S. Boyden, president of the American Society of Heating and Ventilating Engineers, was guest of honor at a dinner given in Walker Memorial on Tuesday evening by the Massachusetts Chapter of the Society. Colonel Boyden is head of the steam heating department of the Edison Electric Illuminating Company.

Professor James Holt, president of the chapter, presided at the dinner; the guests included about fifty members and their wives. They entertained by a showing of the high speed movies developed by Professor Harold E. Edgerton of Technology, and a lecture by Mr. Merwin Horn of the Institute's photographic service. A film of the Austrian Alps was also shown.

Move Follows Resolution Sent by Institute Committee

Students, Faculty to Have Preference Without Charge

Others Will Pay Forty Cents; Bursar's Letter Tells of Change

Charges for the use of the Institute tennis courts by Technology students and staff have been dropped, according to a letter from Bursar Delbert L. Rhind read at the Institute Committee meeting last night.

The action, the answer to a resolution passed at a meeting of the Committee on March 11 and sent to Horace S. Ford, Treasurer of the Institute Corporation, also provides for the payment of a \$40 per hour fee for non-Technology players.

Courts to be Reserved Rules for court reservations, as revealed by Dr. Rhind's letter, provide for signing-up through Mr. Pung in the basement of Walker Memorial not more than two days in advance or for more than a one hour period per day. Bursar's cards or tuition receipts must be shown when making reservations.

Use of the courts by non-Technology Tennis (Continued on Page 4)

Technology, Radcliffe Tilt In Debate Over Courses In Marriage

Harvard Is Classed As Girl's College By Speakers For Institute

Whether or not women's colleges should prepare their students for matrimony was the subject over which the Radcliffe and Technology Debating societies clashed last night. The latter team, composed of Peter M. Bernays and Nicholas Shoumatoff, both '39, took the affirmative against Virginia E. Jones, '38, and Rosalind K. Lewis, '39, while Robert Treat, Jr., '38, presided. Professor William C. Greene made a number of pertinent remarks afterwards, in which he criticized the arguments.

Bernays opened the debate by stating that the twentieth century man realized that college girls needed training in matrimony, in order to know "what to do when a nice man came along." Just then the Tech coeds entered the room en masse, and from then on, the case of the college girl began to lose ground.

Marriage Course for Harvard Strengthening their argument, the affirmative pointed out that several woman's colleges among them Harvard, had already instituted courses in matrimony. To this their Radcliffe opponents retorted, "They would!" Courses in "Family and Future" and "How to Avoid Men" were suggested by Technology. "Of course," added the Engineers, "we would teach the physical side, but would not put too much emphasis on it."

College Girl Not Prolific It was further stated that it was "the duty of every girl to produce 5.44 children." Since the average brood of a Vassar graduate is 2.7, Barnard 2.31, Wellesley a mere 1.79, and Radcliffe "a lapdog," the college girls, they said was apparently deficient and needed a course in matrimony. Professor Greene, however, amended this statement in his criticism, saying that it didn't take much of an education to produce children. He declared the debate a draw.

ELIMINATE THE LAME DUCKS FROM THE INSTITUTE COMMITTEE

LAME ducks are as inappropriate in Technology's legislative system as they were in the national system. The Institute Committee at present harbors a number of these "invalids." Two very definite benefits would be derived if these members were replaced by their already-selected successors.

The committee members referred to are those representing activities which elect new officers at the end of the first term, to take office in February. For example, the T. C. A. and some of the publications use this system. Although these new officers take control of their own activity in February, the general managers do not become members of the Institute Committee until it is reorganized in June for the following year.

The first disadvantage of this system is that for one out of two terms, or one-half of the school year, the activities affected have no real representation on the Institute Committee. The people who are nominally their representatives no longer are taking an active part in the affairs of the organizations. They are not familiar with the problems of the activity they are supposed to represent. They are in no position to speak for the organization in committee meetings. During the "lame duck" term the organization does not have the representation which is the sole reason for placing one of its officials on the Institute Committee. For one-half of its existence, then, the committee is not even fully representative of the Institute activities, as it is supposed to be.

A second reason for making this change is that it would provide some continuity from one Institute Committee to the next. At the present time the number of carry-overs is small, being limited to the class officers who happen to be re-elected. If this number were increased by having some members take office in February, the new Institute Committee would have a sufficiently large number of experienced members in September to start its work without the handicap of inexperience that it usually suffers. Technology men have shown that they have little familiarity with parliamentary procedure, and most of the members of the I. C. acquire that experience by attending committee meetings. It would therefore help the committee to have a large number of experienced men on it at all times.

Now is a particularly opportune time to effect the change. If it is made in the middle of this term, the retiring general managers will have been members of the Institute Committee for a term and a half, and the new members will be on the committee for a term and a half. Thus the loss of one term that is unavoidable under this plan would be split up. It would improve the efficiency of the Institute Committee if it made this constitutional change.

LEAGUE OF NATIONS PREPARES FOR WAR

IT is interesting if ironic to notice that the League of Nations Palace in Geneva has just made preparations for meeting a sudden air attack. The "Palace of Peace", according to news dispatches, has finally been reached by Europe's wave of preparation. Now all the lights in the League building will be able to be extinguished within a second or two. Then the dogs of war will be unable to harm the dove of peace.

This little news item is one indication that the League has been pretty much of a failure as far as peace is concerned. All the post-war ideals of disarmament have failed pretty miserably. Disarmament conferences instead became conferences to decide upper limits of armaments, not to discuss lowering of armaments. The League became in a great many ways merely a toy in the hands of the larger nations, which were trying to use it to serve their own ends. It is true that there are definite accomplishments which backers of the League can bring forth in its favor, but essentially these accomplishments were in smaller matters, while in the larger matters the League failed almost completely. It is only necessary to mention the Italian conquest of Ethiopia to see how the policies of the individual nations worked against the aims of the League. In all the diplomatic wrangling one fact seems to stand out—the country that could bluff the best could do pretty much as it pleased despite League obligations. Witness Germany, Italy, Japan.

Now the situation is so "peaceful" that the League headquarters, along with the rest of supposedly neutral and safe Switzerland, must prepare for air attack. Next, perhaps, the Peace Palace will have to mount anti-aircraft guns to protect the diplomats arguing on peace. The lesson this should teach us is that the diplomats are unable, probably because of training, to solve a question like that of peace. Some other solution is necessary.

CONFLICTING MEETINGS ARE UNNECESSARY

WITH all the meetings that go on at Technology, occasional conflicts are inevitable. However, there is no excuse for the triple conflict that occurred last night, when the Combined Professional Societies, the Chemical Society, and the Debating Society all had simultaneous meetings.

There were a considerable number of students who would have liked to attend all three events; there were an even greater number that wanted to attend two of the three. It would require only an elementary sort of cooperation to avoid a conflict between the C. P. S. and the Chemical Society, which is a member of the C. P. S. To avoid conflicts with organizations like the Debating Society would require some "clearing-house" arrangement.

In Walker Memorial this function is carried out fairly effectively by the Walker Memorial Committee, which assigns all rooms and can therefore call attention to any impending conflicts. In the Institute, however, apparently no attempt is made to reduce conflicts to a minimum.

This function should be brought under the Walker Memorial Committee, or some other provision should be made by the Institute Committee. Conflicts like yesterday's are unnecessary and easily avoidable.

ELECTIONS

The Tech is pleased to announce the election of the following freshmen to the position of Reporter: Ruth Berman, John Burr, Robert Claiborne, Robert Deutsch, Alvin Gutttag, Robert Hess, Wylie Kirkpatrick, Seth Levine, Robert Prince, Frank Vos, and Russell Werby.

ISSUES

By Richard G. Vincens, Jr.

THE FERRET IS SICK PHYSICALLY and of all prudes who shout, "Don't print that." So he asked me to write the column while he tries to reconcile his religion with T. C. A.'s Dr. Link.

IT WAS THE PURPOSE OF THE Interfraternity Conference this year to present one large open dance that would be an important, if not the most important, social event of the season . . . in extending the dance to include all undergraduates, the Conference has shown to non-fraternity men a spirit of welcome and congeniality, and has set a precedent for future relations between the fraternities and non-fraternity men," said Jack Orchard, committee chairman, in 1935.

Today, the commuters learn that no I. F. C. tickets can be had. And the carriers of the brown brief cases will grumble, if they can spare the time for that.

Forty-five out of more than 150 applications (options) were sold in the Dormitories. Although the riot last night went along just for the hell of it, fact remains it started by people using I. F. C.'s name in vain. Yes, much has been done to cement feeling between Dormitories, Commuters and Fraternities.

Busch suddenly found that a dance can be too popular. I'd hate to see anyone dissatisfied by his good efforts. Someone's idea that an armory be hired, at least, didn't make matters worse.

MOST COLLEGES HAVE HOUSE-party week ends. Will all the fraternities have house dances Saturday night after I. F. C.? Will the Dormitory Committee or 5:15 Club sponsor a dance Friday in Walker? The Dorm Comm showed that it can run as good dances as anyone. They might even sell the remaining options to the fraternities.

MY HAT IS OFF TO FRANK Kearny for dropping in at a Senior Week Committee meeting last Tuesday with a proxy for the Institute Committee meeting yesterday.

The house that doesn't run at least one dance in a hotel this year is rare. Every one likes them better, even the stags. All of which only shows more John T. Smiths find it easier to send J. Titherington Smythe, Jr.'s more, in spite of the democrats.

Reviews and Previews

SHUBERT—A new Rodgers and Hart production "Babes in Arms" began an indefinite run at the Shubert last night. If previous playwrighting efforts are any criterion of merit, this promises to be one of their best shows.

The Cinema

KEITH MEMORIAL — Beginning today, Franchot Tone and Katharine Hepburn are starred in Sir James M. Barrie's famous play "Quality Street." On the other half of the program is Joe E. Brown in "When's Your Birthday."

REKO BOSTON — "The Soldier and the Lady"; based on Jules Verne's famous novel, Michael Strogoff, and "Cafe Internationale," a new musical revue, share the bill at the Boston for the coming week.

UPTOWN — "Green Light," with Errol Flynn and Anita Louise, and "Criminal Lawyer," with Lee Tracy, are the features, with the latest issue of "The March of Time" as an added attraction.

PARAMOUNT AND FENWAY — The double feature program this week includes "Swing High, Swing Low" with Carole Lombard and Fred MacMurray and "Penrod and Sam" with Billy Mauch and others.

SCOLLAY—Dick Powell and Madeleine Carroll in "On the Avenue" and Edward Arnold and Gail Patrick in "John Meade's Woman" feature the bill at the Scollay this coming week.

MODERN — The two features are "A Doctor's Diary" with John Trent and Helen Burgess and "John Meade's Woman."

BEACON — Sunday, Monday and Tuesday brings Errol Flynn and Olivia de Havilland in "The Charge of the Light Brigade" and Jack Haley and Betty Furness in "Mr. Cinderella."

FINE ARTS—"The Life of Saint Don Bosco" in Italian dialogue with English titles is the Easter presentation of the Fine Arts.

WASHINGTON ST. OLYMPIA — Beginning Saturday, "Black Legion" with Humphrey Bogart shares the bill with "Stolen Holiday" starring Kay Francis and Ian Hunter.

TREMONT — Showing Friday and Saturday is "Captain Blood" and "Seven Sinners." Sunday, Monday and Tuesday, the billing is "Winter-set" and "Student Tour."

EXETER — Billings for the first half of the week beginning Sunday are William Powell and Myrna Loy in "After the Thin Man" and Richard Arlen and Virginia Grey in "Secret Valley."

Swordsmen Attend Intercollegiates

Twelve Colleges Send Fencers To Championship Bouts In New York

Closing a successful season, Technology's swordsmen meet top notch teams from eleven colleges today and tomorrow at the Intercollegiates in New York. The other teams participating in the meet are from Columbia, Cornell, N. Y. U., C. C. N. Y., Princeton, Harvard, Army, Navy, Hamilton, Yale, and Rollins.

Although several of these teams have defeated the Tech team this year, the fencers have a good chance to come out near the top, as the meet is run on the basis of individual bouts. There are three strips, or divisions, in each of the three weapons. Each college enters nine men, one in each strip. If a man is victorious in his strip he wins a medal; however, men fighting in one strip do not meet men fighting the same weapon in another strip. Each bout won by a man gives his college a certain number of points; the college compiling the most points is the team champion.

Captain Leo Dantona is fencing on the first strip in both foil and saber. His chances in the latter are excellent, as he has won almost all of his saber bouts this year, including a good portion of those fought against Columbia, C. C. N. Y., and the Yale

Sigma Chi Enters IFC Finals By Defeating Delta Upsilon

With the defeat of Delta Upsilon last night by a score of 26-19, Sigma Chi entered the finals of the I. F. C. basketball tournament. In the lower bracket Phi Delta Theta advanced to the quarter finals opposite by Kappa Sigma downing Phi Gamma Delta. The winner of the quarter-final game will play Phi Mu Delta which has already taken its place in the lower bracket of the semi-finals. Delta Kappa Epsilon winner of last year's tournament, was eliminated by Phi Mu Delta in the quarter final round.

J. V. Dave Bartlett, who made a splendid showing last weekend when he took all of his foil and epee bouts against Union, will fight on the second strip in both these weapons. The dashing Frenchman, Andre Laus, will take his place on the first strip in the epee and the third strip in the foil. Completing the group are Dick Rosenberg, who will fight epee on the third strip; Jerry Salny, and Emile Mallick, who will fight second and third strip in the saber, respectively. The substitutes making the trip are Bud Shaler and Bob Wieser.

The field is composed of so many good men that it is difficult to predict the outcome; however, the swordsmen are optimistic and promise at least to revenge themselves against Harvard.

Tech Lacrosse Team Looks to Good Year

Beaver Squad to Open Season Against Boston Club On April 3

Promise of a fighting Lacrosse team was made this week by members of the Technology stick-and-net squad when they took stock of their prospects after three weeks of practice for their season which is to open next month.

Boasting some twenty-five varsity aspirants, the Technology aggregation seems in good form for the eight regular and one practice matches which have been scheduled in April and May. It will get its first baptism of fire on April 3 when it meets the Boston Lacrosse club on the Coop field.

Some seven or eight of last year's varsity men, led by Captain Bill Tucker, have returned to wear the scarlet and grey jerseys. In addition to Tucker, the deRaismes twins, Goodwin and Robert, have shown much promise. A strong infusion of last year's powerful freshman team is also expected to have a beneficial effect on the Varsity's chances.

The first match to follow the Boston Lacrosse Club event which is in the nature of a warm-up session, will be held on April 10 against Brown. Thereafter, the team will face seven leading eastern schools in the New England Intercollegiate Lacrosse circuit.

P.T. Competition Shows New Talent

Marks In Competition Exhibit Promise In Track and Field Events

As the freshman P. T. track competition goes into its last two days, the leaders are changing rapidly. Henry T. Wirth still holds the top-flight position with 465 points out of a possible 800, but George E. Coorsen is now pressing him closely with 458. Edward J. Lemanski, second last week, is now third with 408. Fourth is George W. Clark with an even 400, and Joseph L. Shill is fifth with 399. The rest of the first ten are ranked as follows: Frederick K. Loomis, 385; Edward D. Crosby, 369; Vernon Kyllonen, 359; Frank E. Hoffman, 345; Hilme F. Sheref, 341; and Olaf S. Rustad, 341.

Up to the present, none of the P. T. records have been broken, but one has been tied and several others escaped being discarded by a narrow margin. Coach Oscar Hedlund should have a good sprint team for the next three

Visit our Ladies gown rental dept.

Frosh Sharpshooters To Meet Ex-Soldiers

The freshman rifle team is going into its last shoulder-to-shoulder match tonight against the Yankee Division Club with a clean slate. So far, the Technology tyros have won every match which they have entered, and need only to win this one match for a perfect season.

years, for five of his freshmen have tied the P. T. record of 5.6 seconds in the 50-yd. dash. So far Wirth has the best time this year in the mile, his 4 minutes 39.8 seconds is barely above the record of 4:38.2. The shot put record, however, is in no danger, Crawford's 42 feet 9 inches being far off the mark of 47 feet 4 1/2 inches; nor is there much hope for a record breaking half mile, Wirth's 2:06 being the best to date as compared to the record of 2:02.

players is strictly supervised; according to plans, alumni and others will be permitted to use the courts only when they are not being used by students, at forty cents per hour per court. The courts may not be reserved in advance.

Text of Letter

The text of the letter as received by G. Richard Young, '37, Secretary of the Institute Committee, follows: Dear Mr. Young:

With reference to your letter of March twelfth to Mr. Ford regarding the recent resolution of the Institute Committee, the following plan for the operation of the tennis courts has been arranged:

Effective this spring and until further notice, the Institute tennis courts are to be available to all registered students and staff members of the Institute without charge.

Reservations will be made as usual only through Mr. Pung in the basement of Walker Memorial not more than two days in advance or for more than one hour per day. Students must show their Bursar's card or tuition receipt when making reservations.

Alumni and others may use the courts only when they are not being used by students, at forty cents per hour per court, and may not be reserved in advance.

I trust this plan meets the spirit of your Committee's resolution satisfactorily and will prove beneficial to the student body.

Sincerely yours,
D. L. RHIND, Bursar.

Gillis Resigns

James M. Gillis, '38, resigned from the Elections Committee of the Institute Committee, it was announced last night. In addition to this action, amendments to the Constitution of the Army Ordinance Association were approved.

tradition in student life. He has begun to express his sentiment against war, a sentiment which has steadily grown since the end of the World War. This expression has taken the form of an annual demonstration in favor of peace which takes place on the anniversary of our entrance into the last war.

"It is almost unnecessary to point out the danger of war today, a danger which compels us to do something concrete to make the universal sentiment against war effective. With this in mind, we are asking you to send a representative of your organization, who will have equal voice with the representatives of all other participating groups on a committee which is being set up to plan some means of giving this feeling a practical expression.

"A great deal of individual effort has been expended in trying to maintain peace, but it must be our object to unify this effort in action to express our convictions."

Boake Carter speaking:

"Luckies don't catch your throat—they're easy and smooth"

"The thing I prize most is my reputation for saying what I think. Here's what I sincerely think about smoking—it's one of the greatest pleasures in the world, but it can be utterly spoiled by throat irritation. My job's tough on the throat and I have to be careful to keep my voice clear. Long ago I found that Luckies are easy and smooth and don't catch your throat. That means everything in a job like mine. Next time you hear the usual 'Cheerio' at the end of my broadcast, you can picture me reaching for a Lucky an instant later."

Boake Carter

An independent survey was made recently among professional men and women—lawyers, doctors, lecturers, scientists, etc. Of those who said they smoke cigarettes, more than 87% stated they personally prefer a light smoke.

Mr. Carter verifies the wisdom of this preference, and so do other leading artists of the radio, stage, screen and opera. Their voices are their fortunes. That's why so many of them smoke Luckies. You, too, can have the throat protection of Luckies—a light smoke, free of certain harsh irritants removed by the exclusive process "It's Toasted". Luckies are gentle on the throat.
