FELLOWSHIP COMMITTEE
(Two to be Elected)

Oliver C. Welch, Jr.
Richard E. Burton
John B. Cook
Frederick J. Kolb, Jr.
GYMNASIUM WINS 

BUT DON'T FORGET THE AUDITORIUM

It seems now that a gymnasiun will be built before an auditorium. Such a committee reviewing this favoring policy, there is little doubt that it will be accepted, since the administration has realized that it has apparently favored the gymnasiun.

The Tech has expressed editorially its opinion that the auditorium is a necessity. It is unnecessary now to review our reasons for holding this opinion, for the decision has been made, and we must accept it. Although it considered the gymnasiun the more urgent need, the committee recognized that now that the need is evident they can vote to Walker. We must guard against any possibility that this decision is made properly according to the preferential system.

For perfect functioning of the system it is essential that all the candidates be invited. The vote of the candidates in the order of their preference. If he fails to number a sufficient number of candidates, all of his choices are near the bottom when the votes are counted, his ballot will have no influence when the contest is narrowed down to two or three. A student should not consider his vote cast when he has indicated his first choice; he should mark second choice and third choice and even more if he feels his candidates have little chance. There is no possibility of "wasting" a vote. As a matter of fact, a vote can easily be partially wasted if the voter stops short of marking all three choices. Why vote in class elections in any case, but the ones who do should vote properly.

Class elections are not important enough to bother about. It is true that "class spirit" is not too strong at Tech. It has been argued that this lack of class spirit is the reason elections are not taken very seriously. Actually, the reverse is generally true. Class spirit is weak because the students at a whole do not take enough interest in elections, and the elections therefore have not become very popular, with the place of residence of the candidates usually the most important consideration. It is true that the candidates need not spend a lot of time on their campaign, but that is very often because the office is not very important. Usually the candidates are not as a whole interested in these affairs as the president. They are content to attend Institute Committee meetings twice a month and frequent Executive Meetings are common. But if a large majority of each class votes, and votes carefully, and numbers choices according to the preferential system, it may be possible that the elections will be able to stimulate a little more "class spirit."

SPEI-SE OF HUMOR

FORGE TO TECHNOLOGY

I don't believe that any M. I. T. student could be so humorous . . ." That remark summarizes a very widely held and partly justifiable opinion of the student body formed by a college president after hearing a winning speech made by an institute student at an intercollegiate contest.

Technology students are often popularly pictured as hard-driving engineers, or one-track-minded scientists. It came as a surprise to many that some are interested in activities on the campus of several arts school. It is even a surprise to many that a Technology man can have a sense of humor.

But perhaps there is some justice in their belief. If it may be significant that the three men entered in this contest, all of them petroleum engineers, were freshman, it is not too surprising in the contest, as a matter of fact. Do Institute students lose their sense of humor as they remain here? Do they lose interest in things like public speaking? There is enough justification for that charge to merit every student's thought. For in the last analysis these outside interests, so essential for a full personality, are not an inessential part of a person—themselves must be acquired and practiced. And that is essentially an individual activity.

tech

Reviews and Previews

MeteROIIT, -- Beginning Thursday, the New Castle Mountain Movies will be showing Mountain Majesties with Josephine Hutchinson. The picture is an 84-minute Technicolor feature produced by the Warner Brothers Farms featuring Richard Arlen and Lupe Velez. There will be an $0.00 admission charge. Also on Thursday, the film The Princess and the Housewife will be shown at the New Castle Theatre. It is a Technicolor feature produced by the Warner Brothers Studios and features Fredric March, Mary Astor, and Dorothy Wilson.

PARAMOUNT AND PENNWAY

Fifty Two to Town on co-starring Ann Dvorak and Francis Lederer. Featuring Richard Arlen and Lupe Velez, the film is directed by Sam Wood. The film will be shown at the New Castle Theatre.

HARVEST TIME THEATRE

In November, the film "The New Universe" by Dr. Albert Coleman, will be shown at the Harvest Time Theatre.

T.E.N. Features New Telephone Cable Item

Article is Written by Jewett, Bell Telephone Head

An article by Frank B. Jewett, president of Bell Telephone Laboratories, on the new coaxial telephone cable is the feature story in the April issue of the Technology Federation Review. The new double feature program begins tonight with Marlene Dietrich and Gary Cooper in "The Lady from Shanghai," and John Garfield and Ann Blyth in "Blonde Venus." The opening preview will be "The Knock on the Door." The opening feature will be "The Lady from Shanghai," and the opening feature will be "The Knock on the Door.

Krookob To Address Faculty Club Dinner

At 6:15 tonight, the Faculty Club will host a dinner for the visiting engineering students. The dinner will be held at the Faculty Club, and the students will have the opportunity to meet and talk with the students from the University of Vienna. The event is open to all members of the Faculty Club and is free of charge. The dinner will include a buffet-style meal and a chance to network with students from different institutions.

QUOTABLE QUOTES

(As By Associated Collegiate Press)

"College students produce two kinds of literature, neither of which can be given credit for revealing their own hearts, which are not very full yet, and which they are generally unable to interpret. The first consists of stories written by some well-known author in describing artificial situations which they know even less about, or of artificial situations which they know even less about describing them. The second consists of stories written by the professor himself, which are rarely true."

"I'll have every student get a three-month job at a filing station to learn courtesy."

-- Prof. A. J. G. Griffiths of Butler University's school of business. The students will be required to work for a year as a file clerk at a local business.

UNDERGRADUATE NOTICE

The T. C. O. Box Exchanges will begin Wednesday morning. Books which have been returned by a student for a year will be sold at approximately one tenth of their original price.

ALBERT COLEMAN

The T. C. O. Box Exchanges will begin Wednesday morning. Books which have been returned by a student for a year will be sold at approximately one tenth of their original price.
Beaver 150-pounders Crack Record

SPORTS COMMENT

Technology did itself proud over the weekend when it captured the eighth college dinghy championship. It placed third in both the varsity and junior varsity races. The team, which hadn’t done badly this year, placed second in the varsity race for Princeton’s crew. The varsity won the varsity race by three yards. With a final surge of stroke and passed across the finish line while a powerful Tiger team was five lengths behind the Crimson crews.

Both the varsity and junior varsity put up game fights but the older and heavier frosh heavies reputedly have a strong boat.

Technology Freshmen succeeded in winning the varsity lightweight race. The rout, due mainly to lack of experience, was too much for them. It was not put up game fights but the older, and heavyweight crews the Tech 150 pounders did very nicely in their morning record breaking win over Princeton on Saturday. . . .

The varsity Lightweight Team started the season with a victory over Colby College last Saturday afternoon. Tech was leading with 33 points; Harvard 32, Princeton 9, and Dartmouth 4. Olsen finished fourth in his race to wind up the class A races. Olsen finished fourth in his race.
