Life Of Tech Men Shown By Answers In Questionnaire

Dean Of Barnard College Says Sleep Before Exams Is Best

"Sleep early before examinations in order to be alert and ready to study or exam," says Dean Virginia Gibber,

"and depart from this way!"

This question was answered by Robert H. Brown, 83, who notes that five hours before he is in bed and has a good-desire story before going to bed. Robert noted a good one you might keep on. Read a novel in your room rate one for half an hour.

Brilliant Display An Added Attraction

The annual Moonlight Sail of the Sky Club on Saturday evening, June 6, the annual Moonlight Sail of the Sky Club on the campus of Mass., "Town of Sail" will finish the formal season's social season.

Music for the occasion will be furnished by Leon Mannay and his orchestra. There will be three groups of these, in the boat, two on deck and sail, and the complete group, in which the tickets still may be purchased for $5.50. Blanche the ticket office will be held in the main ballroom of the State Hotel, on deck and sail. The tickets are to be held in the main ballroom of the State Hotel.

Four centuries have been elected in all the results turned in.

Six Students Elected To "Honor's Group" By Electrical Engineers

Sophornes Chosen Under Plan Designed To Diagnost Studnt Ability

Six sophornes have been elected to the Honor's Group in Electrical Engineering according to an announcement of the Department of Electrical Engineering. Among the names which may be included in the Honor's Group are:

Edward Rockwell, '37; E. L. B. Ripa, '37; Elmer C. Ziegler, '37; John W. Kimball, '37; Robert C. Scudder, '37; and Gordon L. Foote, '37.

In an announcement of the Honor's Group, in which the following students are included, it will be noted that the Honor's Group is limited to 21 year old students.

Graduate Student Kimball Has Taken Miles Of Movies In Many Countries

Shooting with a camera is all the game hunting for this young man who wants to do. Curtis V. Kibb

"Student of the Year" at the institute in Physics claims that although he has taken many pictures of wild game in Africa and South America, the best pictures he has ever done is for rabbits.

Farc hundred feet of film of more than 100 feet each are all the film he could possibly shoot. The film is to be held in the sky.

"The Senior Ball will be held in the State Hotel, of course, on Sunday, June 10. In the afternoon, the President of the Student Council will give a reception. The President will also give a reception.

Senior Week Option Redeemable In Lobby

Senior week options may be redeemed in the main lobby of the State Hotel. Tickets are 50 cents for six tickets. Elmer C. Ziegler, '37; and Gilbert A. Ziegler, '37 will be the first to the individual of the picture.

I was in the sky and couldn't be in the picture. The structure is designed to originate.

"IMPRactical" SCIENCE

LEADS TO PRACTICAL RESULTS

The skeptics who used to wonder what use could ever be made of the North and South Pole explorations of Rear Admiral Byrd and the Antarctic expeditions of Sir Earnest Shackleton may today be traced back to research of an entirely different character. Transoceanic flying went through the same series of stages. Basic studies were made, and then they were put to practical use. The fact is often overlooked that co-ordination among the skeptics is the result almost solely of urgent necessity.

We are not now going to argue that the loyalty government is a democracy pure and simple. As war continues it becomes by necessity less and less democratic. But to those who want to contribute in some way to relieve the suffering in Spain—we can think of few causes more worthy—and who must choose the side to which his necessarily limited contribution must go, we feel the need of an assurance that the side which still maintains democracy to some extent, which represents the majority of the Spanish people, and whose victory would mean a Spanish democratic republic, is the one, and that people and nations and therefore less likely to cause international trouble, is the loyalist side.

The Medical Bureau for Aid to Spanish Democracy has been established at the Institute, has made that statement in lecture.

The mixed composition of the loyalists—Basques and Anarchists as well as Socialists and Communists—practically issues no outside domination claim. The cause is one of nationalities. Perhaps the sources are located in what was formerly considered inaccessible territory. Perhaps the United States will some day reap similar benefits from Byrd's Antarctic expedition.

Today I learned that Bill Haines is to be relieved of his post as head coach at Tech. I am sure that all undergraduate alumni and any freshman crew coach who has had the privilege of knowing this great, jovial, gentleman feels that young, and particularly Tech rowing, is to suffer an irreparable loss.

Bill's chief objective was to teach the fundamental skills of oarsmanship. In his hands, the men learned to scull, but he never taught them to carry their stroke or scull substitute bills. But, every man who rowed for Bill learned to scull well, and will never forget it. Certainly or incompletely, he was not the only one to learn from Bill. Bill taught us the fundamentals of true sportsmanship—fairness, graciousness, and fellowship. No one lived to win more than he, but no one knew more graciously. He had a humor that could take care of the innocuous suggestion proper and physical and mental self-discipline in defeat is of the utmost benefit.

And as Bill leaves his post, he must go with the knowledge that he has left something behind him that is worth more than his name on a long list of victories on the river. He has given the power to the future oarsman in the form of an old-fashioned, down-to-earth model for others to follow. In a word, Bill MacMahan has shown the meaning of sportsmanship. MAY THE WINNER BE TRUE.

Theodor von Holst, '38

DEMOCRACY IN SPAIN?

a LITTLE REMAINS

A committee composed of students and faculty members has recently launched a campaign to raise money to buy medical supplies for Spain. The committee has met with a reluctance to contribute on the part of many persons, apparently caused by the fact that the money is intended for use in the loyalist territory, and many of the potential contributors are under the impression that the funds are not being put to a proper purpose. This is evidently a wrong impression, and we hope that it may be corrected by active and persistent efforts directed by Moscow in an attempt to start a revolution.

This impression has been spread by our professional relations. We are aware that the situation in Spain is very complex. The fact that the money is intended to be used in the loyalist territory, and many of the potential contributors are under the impression that the funds are not being put to a proper purpose, is evidently a wrong impression, and we hope that it may be corrected by active and persistent efforts directed by Moscow in an attempt to start a revolution.

There is no question that the present loyalist government has descended by accepted parliamentary processes from that of the Republic, and that it receives an interlude of military control over civil authority, from the government elected democratically by the people. There is also a question that the majority of the Spanish people are in favor of the loyalists. Colonel Velast, former head of the Military Science department at the Institute, has made that statement in lecture.

The mixed composition of the loyalists—Basques and Anarchists as well as Socialists and Communists—practically issues no outside domination claim. The cause is one of nationalities. Perhaps the sources are located in what was formerly considered inaccessible territory. Perhaps the United States will some day reap similar benefits from Byrd's Antarctic expedition.

Today I learned that Bill Haines is to be relieved of his post as head coach at Tech. I am sure that all undergraduate alumni and any freshman crew coach who has had the privilege of knowing this great, jovial, gentleman feels that young, and particularly Tech rowing, is to suffer an irreparable loss.

Beaver Skippers Outclass Harvard Win Over Charles River Club, Muffin Races Feature Weekend

A "muffin race," a meet with Harvard and a regatta with the Charles River Yacht Club taking place the same afternoon, was the source of much activity this past weekend.

Saturday afternoon saw the novelty muffin race, which every skipper had a female or "muffin" for crew. In this event, originated last year by Bob Gilette, the fair crew entered with his mate as Skipper in the five races. John Proctor, 38, sailing with Esteen Sills champion South Shore boat from King's, was the only in which 11 boats entered.

Bob Atwater, 38, and Carroll Currier, manager of the Katherine C. Gibbs school took second. Richard Snapp, 40, and Eddie Rich from the Katherine C. Gibbs School, came third in the contest.

Six Couples In Moonlight Sail

An added attraction for members of the Dartmouth Club was a moonlight sail, in which informal races were held. Six couples took part in the races which were watched by "bathing beautifully." No official scores were kept. Participation was limited to Robert W. Vincent, president of the Dartmouth Engineering and art crew, Miss Barbara Beck, secretary to the crew. The race was won by half a lap of one of their performances.

Sailing marked in turn to move racing sailers. In the undercard, races for against Harvard, the Engineers captured victory with 250 points taken by the 257 points piled up by the Civic. Civic, 53, was high number with 73 points. Next nearest competitor for winning boat was Charlestown River of Harvard, who tallied 20 points in the six races.

Ray Henderson of Northeastern claims the last hurdle on the way to a record tying victory in the 220 yard hurdles.

SPORTS COMMENT

Among the many nice exhibitions put on Saturday at the N. E. I. C. A. A. was the two mile run by Henry Guerke, pride of Tech. We saw that amazing last lap sprint which carried him over thirteen yards ahead of the field. As was the case last year, Guerke had won the mile this year it wasn't the case this week. Coach Hedlund announced that Guerke had come up to par in the two mile last week in the New England meet instead of usual time. He also said the work of Henry Guerke had won him the mile this year it wasn't the case this week. Coach Hedlund announced that Guerke had come up to par in the two mile last week in the New England meet instead of usual time. He also said the work of Henry Guerke had won him the mile this year.

The powerful K. K. E. nine took the school intercollegiate baseball championship for the year yesterday by a win over the Grants A team. The Grants C team captured the interbaseball title by defeating the sophomores last year. The teams had a full nine men competing, it is to be hoped that there will be no nine men in each class who are interested enough to play. The sports schedule for the year is all completed with the exception of the I. C. 4-A meet next weekend. The pelt ended its season Saturday with a loss to Masachusetts Polytechnic to bring their total to three wins out of seven matches played . . .

Des Jardins Will Lead Track Team Next Year

At the annual Track Banquet last Saturday night, the announcement of the election of Paul Des Jardins as manager of the varsity track team was made. At the banquet were also made the announcements of the election of John Hiltz as next year's manager of all. Robert Toman as manager of the indoor relay team, James Thompson as president of the Track Club, Lloyd Bergmann as vice-president of the Track Club and Ken Guerke as its secretary and treasurer.

Des Jardins went to Mt. Pleasant High School in Scotch Plains, N. J. while his father Charles is a member of the varsity track team. He is the son of a country teacher last fall and was a member of the indoor relay team.

A powerful motor provided by the generator are running the powerful magnetic design wanted by the former President Bicker for the navigation of the nation and properties of the nation, which is the distortion of the sphere of the elements by a magnetic field.

The generator is also expected to be useful in the field of research in which the body will be utilized by the professor Frederick G. Haynes.

The Tech Inquires (Continued from Page 4)

idea to have school start two weeks earlier, in order to provide for a reading period before final exams. At the present time hour exam and class change has not been necessary and the concentrated study period at semester's end is entirely unnecessary.

Richard E. West, '39, 53-R, 538 Beacon Street,

"No, I would not. It is my opinion that the long summer vacation is more desirable than lengthened vacation during the school year. Although many of us enjoy the leisure of Christmas vacation, few use it for preparation for exams and it only leads to studying more difficult at a time when it is most important."

Watson Hamilton, '39, II, Dormitorium

I would rather have classes begin a week early than to have two class days the week of Christmas, as was the case this year. Thanksgiving Day alone is all right."

Small Arms Matches
 Held at Camp Perry
Three Weeks Schedule Begins
Aug. 22, Ends Sept. 11

The National Small Arms Matches will be held at Camp Perry, Ohio, this summer open to students of the Institute. The first week will be devoted to instruction and the second and third weeks to competition with rifles and pistols. The program will commence August 22 and end September 12.

Tests, building and similar supplies are provided by the camp. Rifles and pistols may be drawn for a deposit or the contestants’ own guns may be used. The government furnishes ammunition for competition and practice. Major Archibald D. Fisk of the Military Science Department was on duty last year and expects to go again this year. Joseph Keithley ’37, and Thomas Cunningham ’38, chairman of the entertainment committee of the 5:15 Club, will be captains of the 3:15 Corps R. O. T. C. rifle team.

just love flowers, seems indicative of this.

Another fact revealed was the amazing amount of letter writing that we Tech men seem to do. The only explanation offered to account for this is that perhaps some of the fellows included the postage used to send their laundry home, and that they are not really as romantic as their postage bills would indicate.
