Limitless Process Predicted In Color Films Of Tomorrow

Professor Hardy, at Meeting, Chimes in: Limitless Process

Old Photography Was Always In The Back Of Our Minds

New Method Uses Mathematical Analysis Of Color

Complication in the processing of color photographs, both still and motion, will increase until it will no longer be possible for one man to know enough about the process to complete the job, said Professor Arthur C. Hardy last evening, at a meeting of the Illuminating Engineering Society at the Institute.

According to Professor Hardy, the color process in photography will appear in complexity such industries as that of the manufacture of automobile finishes. On the other hand, the actual taking of color pictures will be done by equipment which is simple enough so that it will be possible for an amateur to take them. The color process will be a process of long time and they will be used by the chemical laboratories of the future. Professor Hardy is known nationally for his work in color measurement and an authority on the subject.

Starting with the early history of color photography, Professor Hardy went back to the first photograph in color, in which Professor Hardy outlined the history of the industry. (Continued on page 3)

Voodoo to Offer New Spirit-Drunk Days

A "New Warp" Debate

Fraternity Number Is Initial Offering of New Deal

Wednesday, February 21, will be marked by the appearance of the first issue of the twenty-first volume of Voodoo, in which the New Board presents one of its annual "New Warp" debates, a bigger and better humor publication. Voodoo is a national publication. The number of articles, which is calculated to excite the mystery necessary for any successful school paper, will be a completely closed portfolio of the campus houses. "That's right, we're 1858," said Mary Doe, who greets the student body on page ten and brings with her all the happy memories that she and the new Board have claimed, now one year old.

Continuing the promotion of the activity "For Swift" popular favors, will again grace the student body with its adventures at Tech; while (Continued on page 4)

New Technology Hobby Shop Offers Chance For Individual Initiative

Most recent of the additions to the recreational facilities of the Institute is the new Technology Hobby Shop, which opened for use last week.

Last week, the establishment of Building E, the shop is intended to give all students a chance to build, to play, and so to satisfy the opportunity to make good use of their time. For boys and girls, machinists were donated by the Institute and the work of building the shop was done by the members of the shop. The equipment includes good metal and wood working lathes, drill press, guns, saws, and a number of other useful tools.

Few Shop Restrictions

Arthur C. Watson, Instructor in the English department at the hobby shop but initiate upon giving the boys the opportunity to work on the projects of their own choice. The only requirements are in the sign of shop rules, which are necessary for the proper care of the tools. A set of rules is in the shops, which are necessary for the proper care of the tools.

Vosmenvulling Der Deutscher-Spreng-Explosive

Am Mittwoch der 23 Februar im Heizraum 6-120 um 4 Uhr fndet die Versammlung der Deutschen-Explosive-Gruppe zur Plage deutscher Sprachmen, als und 1 T. statt.

Vorichtig: Das Wort "Wi- ter in Offizialität", mit einer Elek- tron in Offizialität, kann nur durch K. gend und Leder genau so wie eine elektrische LEDs von M. L. T. unter der Leitung von Herrn Prof. Dr. W. Ford, Professor der Physik in Offizialität, werden die Geste anmerken.

Seniors To Elect Class Marshalls

Preferential System Utilized In Choosing Marshalls,

Elections for Class Day Marshalls, and the Senior class will be conducted next Wednesday, February 28. The polls will be open in the Main Lobby during lunch hour.

Four, of whom three will be elect- ed, have been nominated for Class Day marshals, and thirty-four, of whom twenty will be elected, have been nominated for Senior marshals.

The模式 of the try-outs is tenta- tively set for next Wednesday evening, with the Phillips, of which they are a member, and with the members of the class who were selected last year.

In addition to the activities of the Senior class, the February 22nd season will open with Wednesday night for the Senior class and the New Board of Dramashop. TheSenior class will present "The Devil's Daughter" by George Bernard Shaw and "The Roses of Texas" by Robert Montgomery. The Junior class will present "The Old Maid" by S. F. H. R. W. C.

Committee Announces Series Of Lectures To Be Held This Year

Dr. Kinsolving to Speak At Music Meeting; Other Lectures To Be Planned

Representatives of twelve fraternal org- anizations attended the meeting in the Main Lobby for the second annual Enchors To be held on March 19. The election was called by Dr. Arthur Lee Kinsolving of Trin- ity College.

Dr. Arthur Lee Kinsolving pre- sident of the University of Oregon and a member of the Board of Trustees of this University, was elected president of the Junior Class and named the Basketball captain for the second year in a row. The duty of the Junior Class is to be held Friday evening, February 20, at 8 p.m., in the Great Hall at the University of Oregon.

Other Lectures To Be Planned

For the benefit of the student body, Dr. Kinsolving named the basketball captain for the second year in a row. The duty of the Junior Class is to be held Friday evening, February 20, at 8 p.m., in the Great Hall at the University of Oregon.

Open House Will Give $15 And $5 In Prizes

Two prizes, one of $15 for a booth and one of $5 for a theme, are now available at the Open House. The Open House is the second annual event of its kind, and was sponsored by the Open House committee, which included the following members: Karl Heintz, Harry B. Hollander, WVillard Roper and G. Edwin Haldrof.

Fifteen dollars will be awarded to the best booths, and ten dollars to the best in the judging of the most original and the best in the judging of the most original.

APATHY
IN THE INSTITUTE COMMITTEE

No longer is the lassitude of the afternoon, so many men rose of interest in Institute Committee matters on clamping down on some of the misbehaving actively participating in the debate, another confined to such moments. A survey of the proceedings as the readings of constitutions introduced prohibiting representatives and from their seats that a motion was actually made. The Junior Class was rein- fights the stormiest of the season, several solons although these outsiders may not vote. The situation is due partly to the tight grip which the Executive Committee holds on the duty of the director of many people and man great is his ability to be in touch with the tea for the freshman class yesterday done it ourselves on a few desperate places around the Institute we have

LITERATURE AND BOOKS

In our search for better living amongst Institute we have long been history of the word "engineer." It is light as an almost of the word "engineer." It is light as an almost in the same way in which he accepts this responsibility. The tea for the freshman class yesterday afternoon demonstrated to a large extent the desire on the part of our President to meet the student at Tech, and to give them a chance to talk to a few of their instructors. Many freshmen have been disillusioned, but few have been disappointed. Not to carry a good story too far, but in hopes of saying more than hello and good-bye to the Presi-...
SPORTS COMMENT

Perhaps the best recognized sport of the Institute is the one which is played on the ice. The freshman hockey team is the junior varsity team, the team that is the rifle team, which at the moment is at the top of the heap in New England. So far it has not had a defeat in the New England Intercollegiate League.

But there are sharpshooters who are a tribe apart. Most of them live, eat and breathe rifle shooting. They must be in touch with the clubs from whom they can invite others to come. Perhaps it is something akin to the urge that your artist friend has, to get in the top grades of any exhibition and win prizes.

Your correspondent still remembers the day when he put his best score of 546 points up in the gymnastics, the Engineers did far better, for the Beavers who took only a 2nd place in the New England, scored 436 points, or better than 40 points lower.

There is really something of a thrill in being associated with a sharp curve of the rifle, to feel its push against the shoulder, and to almost sense the thrill of the bullet into the target which is somewhere far away. When one realizes he can aim at an object almost too small to be seen, and that each bullet he hits from all over the country, it makes you feel that you are playing an even bigger role than a top notch basketball star.

In the afternoon, the team will be between two or more teams. Each man will face ten short shots. Ten long shots, and ten standing or "offhand." The high three scores will count toward the team total, a possible 1500. Thirty men will represent the Institute.

The team now stands at the head of the New England Intercollegiate League, having outdistanced Rhode Island College and Harvard, and having given New Hampshire and the other New England clubs a run for their money. Much of this success is due to the leadership of the coach, the enthusiasm of the men, and the quality of the freshman coach, Mr. John Wither-ander will speak and the new schedule will be drawn up as soon as possible. All men interested in learning to play this sport, are urged to attend practice on Tuesday, six-thirty or later.

A very good season is anticipated for the varsity and an active schedule will be drawn up for the freshmen. As in the past two terms forward, the freshman term is expected.

Senior-Year French Tufts.

VARSITY-FRESHMEN LACROSSE

Candidates: Monday, March 2

There will be a new meeting of all candidates for varsity and freshman lacrosse teams tomorrow, March 2, at 5 P. M. in room 1910. Captain John Adams and his co-captain, John Johnston, and newcomer, Bob Picard, will speak and welcome those who have not made the meeting, but who are interested in the sport to come. Look up the chances for both teams.

 Wrestlers Tussle At Brown Tonight

Frank and Varsity Travel To Providence For Last Out Of Town Match

Tomorrow afternoon both the varsity and freshman wrestling squads from the M. I. T. will leave for Providence to meet the Brown University squad. The varsity team leaves about four o'clock, will be scheduled to wrestle the Brown first team.

Brown had a championship team last year, winning the New England Intercollegiate title, but tomorrow is expected to be a close one. There have been many changes on both teams, but at least an even chance. Several men were lost from the Brown team by graduation, etc.

This will be the Institute team last year this year away from home. The remaining three meets take place on the Tech mats. Next Saturday Williams comes here with a friendly ship on their shoulders. Of course the Institute will attempt to take not only the ship, but the Williams shirt, and even the champion ship.

The line-up for the varsity matches, as announced by Coach Jay Richter last night in an press conference, is as follows: 118-.

Norman F. Barnes, G. Wright, R. Will-175-

Johnny; 180- -Silgar; 185- -Brown; 190- -Kudy; 195- -Brown.

For the freshmen, the line-up has not yet been determined. Three Brown men are expected to return tomorrow, and there will be a very good one to choose from. The varsity team will play this sport are urged to attend practice on Tuesday, six-thirty or later.

A very good season is anticipated for the varsity and an active schedule will be drawn up for the freshmen. As in the past two terms forward, the freshman term is expected.
