250 Bids Sold to 5:15 Club’s Harvest Dance

Half-hour Jam Session To Be Major Novelty Of Evening

RED NORVO WILL PLAY

Two hundred and fifty tickets to the 5:15 Club’s Harvest Hop have already sold, and the dance committee announced last night that the dance, to be held next Wednesday evening in the hall of Willow Social Club, will have as its major novelty a half-hour jam session with Red Norvo in the piano department with Mildred Bailey doing the balancing act.

Red Norvo and Mildred Bailey, the "Mr. and Mrs. of Swing," will provide the music for the evening. Red Norvo, a graduate of Julliard, is one of the most popular pianists and Mildred Bailey is widely known as the "Singing Chair Lady." They are reported to stop an evening in the hands of any dance orchestra, and to be the best. Of course, they will be jamming with Red Norvo on his favorite instrument.

Dance Bureau Established

The dance committee, which will secure dates from Willow, Stel, and all social circles for those who wish them. Requests for dates must be made to the Dance Bureau and the committee will make the arrangements. A partial list of classmates, as well as the names of the many guests expected, is as follows:

Mr. and Mrs. John Smith, Mr. and Mrs. John Doe, Mr. and Mrs. John Smith.

Boat Club Dance

To Display Color Motion Pictures

Unusual Decorations Will Be One College Chairman At Fall Dance

Color movies of the Fall Frosh mess cause this fall, and the intercollegiate Boat Club Dance is the only entertainment for a night to follow.

The Boat Club Dance will be held Wednesday evening in the Boathouse of the Old Rowing Buildings in Boston, and the theme for the dance is "Color." It will be the first of a series of dances that will be held on a Saturday night of each week.

Tickets are priced at twenty-five cents each, and will be sold at the door.

The Decoration of the evening will be displayed by the elegance of the men and women who speak the English language.

The Boat Club Dance is the only entertainment for a night to follow.

School Children To See

Movies In 6-120 Today

Under the auspices of Friendship Tours, Inc., and in connection with the Lincoln School Program of Extended Weekends, a series of six feature films will be shown today in Room 120. The purpose of the evening was to provide entertainment for children who are unable to attend the regular school program.

Six films will be shown today in Room 120. The evening will be enjoyed by the children who are unable to attend the regular school program.

Movie on a scientific theme will be shown Room 120. This group will be one of the largest attendance groups that the Institute has ever seen.

Radio Station Requests

Scripts From Tech Men

Students and Dramatic groups from Tech will provide original scripts to Miss Katherine Bickelhaupt, program director at WFTS. The scripts will be on the "College Radio Workshops" and will be written, produced, and sold by college students. The scripts will be available over WOOG beginning Friday, December 2.

Dramashop Gives

"Outward Bound" Friday, Saturday

Play Written By Susan Van Will Be Presented At 8:30 In 2-190

"Outward Bound," a three-act play written by Susan Van and Saturday, November 18 and 19 in Room 2-190. The play is about the life of a young man who has been left alone in the world after his death. The play has been dramatized for a short period of time and is described as the most probable novel of the season.

In the cast are Albert Burgess, 29, Jack S. Frank, 29, Richard B. Sherlock, 39, Chester Rose, 29, and Philip E. Johnson, 29. The play is directed by Charles W. Brown, 29, and produced by Susan Van and Saturday, November 18 and 19 in Room 2-190. The play has been dramatized for a short period of time and is described as the most probable novel of the season.

Tickets may be purchased at the door.

The Tech Inquired

The Question: Do you think there should be a new elective offered to the course?

Van Murray, 24, Computer Director, pointed out that the students are receiving all the knowledge of studies which are of interest to the Technical College. He said that this ship has been a real chance to the ordinary one. All the passengers are outbound, but they are uncertain of their destination. As the play progresses, we find that the truth about the boats is a great deal more fascinating than the fiction.

Yes, I believe there should be. Students would take courses they are actually interested in and get more out of them. The policy of courses is

M.I.T.A.A. Is One of Few Student-run College Athletic Associations In Country

Almost exclusively student managed, the M.I.T.A.A. is different from practically all other college athletic associations. Its only supervision is afforded by the Advisory Council on Athletics, which itself includes three undergraduate members as well as five alumni members. Both organizations have been established at Technology. The Advisory Council on Athletics is now in its fourth year;

One of the most exciting features of the M.I.T.A.A. is its ongoing program of interscholastic athletics which is designed to promote physical fitness and teamwork. The program is open to all students who have completed the required eligibility requirements, and is supervised by a committee of coaches.

The organization of the baseball, football, and track teams is handled by the students, under the guidance of the faculty. The teams are organized on a volunteer basis, and the players are selected by the coaches from the list of candidates submitted by the students.

end fiddle and cannot take the initiative necessary to bring other men to Boston and to the Institute. Therefore, it is unfortunate that they would use any money for the benefit of large numbers of students, so although the Institute Committee has not reached a final decision, there is good reason to hope that they might get some direct subsidy from the Institute.

There are a number of programs that may be worked out without the necessity of cash on hand, but they do not compare in the least with what could be done with proper finances.

ANSWER

THE ROLL CALL

With the effects of the disastrous hurricane still vivid in our minds, the annual appeal of the American Red Cross for funds serves to emphasize the necessity for their work which reaches to every corner and every class in America. In time of disaster and at all times, the Red Cross represents the generosity of the human heart. One of the reasons why the Red Cross is so necessary is that it is possible to act at a very early stage in a region of disaster, where a great deal of the relief work is done.

You who support this worthy project do a service not only to remote persons, but also to yourself. Thousands upon thousands of persons have found invaluable the first aid stations maintained by the Red Cross in skating, hiking, and other outdoor sports areas. More than those who save their lives to the nationwide life saving schools maintained by this group.

The TRCH appeals to all readers to express their faith and confidence in the organization, which since 1881 has been a friend to everyone, has given a hand to those in need, has fed the hungry, and has given aid and comfort to millions of our people.

LETTERS TO THE EDITOR

To the Editor: Dr. Compton has asked me to represent Technology in the current Red Cross drive. I believe that Technology students should do their share in this fight, so believe in the work of the Red Cross and are glad to pay the maximum one dollar membership fee.

If any student, employee or member of the staff has not subscribed elsewhere, I urge you to do so also, as membership fee with name and address of subscriber is kept at my office. Membership card and window sticker will be sent in return.

CARL H. HAYWARD

GENERAL MOTORS

DRIVE FOR AMERICANISM

The recent plan initiated by the General Motors Company to give a large number of the employees the security of an annual rather than an hourly wage represents some of the most sound and far sighted thinking of many years. Such a plan, as this had, it originated several years ago, might have saved a great amount of grief that the country has faced in the past and might now, and it is actually here, we hope and pray that it will spread through the ranks of employers and unions as well as through our ranks.

Under this plan, we should have not only a secure and busy laboring group, but one that understands the principles of our capitalist state, which revolves around the profits for a few and the needs of the many.

If the business men can show that they are clear-headed enough to undertake the burden of the security of their workmen, there is no doubt that the ordinary organizations will show that they can be responsible for their members. It is not by the golden plan that will solve all this. It is not the plan that will solve all this.

William E. Burdett

WILL WE HEAR

ARTHUR H. COMPTON

Since the beginning of the school year, the Combined Professional Societies has been trying to get itself organized so it can function as it is intended to rather than as it has in the past.

The main difficulty has been that of finding time for the meetings of the various groups. This is not seen to need the large programs built around important speakers.

The work of the Lowell Institute is doing in a way for anyone who has done it shows that can be done, as well as has done it. Their series of lectures which starts next week at the Boston Public Library should be of interest to a great many Technology students, especially from the point of view of the "structure of the physical world," but from the philosophical idea that Arthur H. Compton will undoubtedly express or at least illustrate.

Although the Combined Professional Societies can yet get in on this lecture series and have Arthur H. Compton come to speak, it is unfortunate that they have to play sec-
Tech Loses to Army Booters

Tech and Army fought throughout most of the game but the decisive factor was, as usual the usual thing didn’t happen. The final score did not indicate the defeat of Tech, who suffered a 3-0 loss to Army.

Tech capitalized on their opportuni-
ties by miraculous stops on their part. Army Booters capitalized on their opportu-
tunities by miraculous stops on their part.

Tech Loses to Army Booters

Tech closed its cross-country season last Monday by finishing seventh in the Eastern District Meet at the West Point. Although Tech was not indicated to defeat Army who suffered a 3-0 loss to Tech, scored the only goal for Tech in a 1-0 loss to Army.

The game was marked by a remarkable performance on the part of the Tech team, who were well-organized and well-coordinated for an American match. Continuously Tech threatened to take the lead with a strong attack from the left.

The game went into overtime, and after several attempts by the Tech team to break the deadlock, the game ended in a scoreless draw.

The Tech team, despite being outplayed by Army, fought hard to secure a point in the match. The Tech coaches were pleased with the team’s performance, especially in the second half.

TheTech team will face several tough matches in the upcoming week, including a game against a top-ranked team in the region. The coaches hope that the team will learn from this match and improve in their upcoming games.

Chase Describes Experiences in Spanish Prison

Former Tech Man Also Held As First Prisoner in Current Civil War

Homer Chase, recently released from a Fascist prison in Spain, described his experiences in an interview with M.I.T. Student Union last Tuesday in Room 425.

Mr. Chase, who is a graduate of the University of California, was an associate of numerous instances of the part played by the American Labor Battalion in the Spanish Civil War and by Rebel troops of the life in several of the Fascist concentration camps.

After Chase returned to the United States in the spring of 1938, he served as the first of December.
