Ceremonies, introducing the Glee Club, House Dec. 2. During the intermission, Dance, to be held atop the Parker Technology Team dance to aid in the selection of the Middlebury College Upholds. Tickets, while they are still available, will be sold by Thursday night. It is predicted that all tickets for the season to be held at 8 P.M. in the new Faculty Club at the Hotel Continental.

Tickets still on sale. 

Morris, the featured speaker of the Alumni Council dinner, November 30.

The 3. one of the features of the exercises was a huge exhibit depicting the development of the ceramic industry. Descriptions of the inventions that contributed to this development were exhibited. One of the founders of the Hobby Shop, Mr. W. H. L. Gamble, was also present.

The objective of the group is to exhibit and to aid in the selection of the Middlebury College Upholds.
WHERE IS THE SCHOOL SPIRIT?

Many of the sports in which Tech engages in intercollegiate competition are not, as they are played here in our own sports. Lacrosse, fencing, gym, soccer, cross country, and rifle are all carried on at the Institute among conditions unfavorable to the attendance of large crowds of cheering spectators. Here are no grandstands, or the games are played in localities difficult to reach.

There may be in those cases above mentioned, some slight excuse for their lack of popularity among the students, and the team's efforts, of course, may be successful. But the two sports whose seasons are about to begin, hockey and basketball, offer every possible advantage to enthusiasm, partisanship or otherwise. They are both indoor sports and played on comparatively small spaces; in both cases, the playing space is well equipped with seating capacity. Both are vivid sports, abounding in action and color, easy to follow and simple to understand.

Those are good reasons why Tech should turn out to see their teams in those two sports this winter. But it takes more than logic to make a man cheer for his team, it takes a certain amount of pride in his school's name and reputation, and a certain amount of desire to see it top its neighbors, whether in science or sports. We all have that pride that makes us get out and show it this year!

SCIENCE IN BRIEF

By Arthur N. York, '28

5000 Years' Home

So that the hạtions of the year 0002 may get an idea of the customs and possessions of the 5000-year-old present, a metal capsule is being buried in 30 feet of sand in the Wadsworth building at the New York World's Fair. The capsule, the comparments of which have been incinerated and sterilized, consists partly of objects, such as pan, owners, watches, letters, engravings, and also a duplicate of the Times Capsule is being printed with permission taken on the three jobs and placed in libraries and museums throughout the world in the hope that one or more of them will arrive the destination intact.

Improved Traffic Lights

Certain physicians believe that the nervous strain of automobile drivers would be lessened by a change in style of traffic lights. The ambition and imagination of designers has an effect on the human nervous system which is known as "skittishness" of drivers. It has been suggested that a more attractive traffic signal might be composed of lights arranged in a circle and divided into sectors, one green at the top, one red at the bottom, and two intermediate lights between the two. A single revolving light meets the eyes of the various sections in succession. With this type of signal in use, the driver of the vehicle would be able to see how much time remained before the change of the traffic and there would be no sudden while waiting for the red light to show a red light at such time.

Poppy Used Slide Rule

T. M. Peake, formerly of the Secret Service, reports that he and his colleagues have been great enthusiasts of the slide rule based on the mathematical slide rule and was the first to apply the name "slide rule" to the invention.

Government Research

Aeronautical research and engineering, primarily for national defense, consuming about 14 per cent of the research efforts of the nation's government. About the same amount is allotted to research.
