A.S.U. Will Survey Job Opportunities For New Graduates

Improvement of Walker Food, Institute Committee In Program

Advocate Wasserman Test

Addition to Physical Farm

National Policies Aimed Toward Attainment of Education, Peace, Security

A program for the furtherance of the said objectives, at a Tech, a survey of educational opportunities for engineers, and the announcement of investigations into the operations of both the Institute Committee and the Wasserman Test was held last Tuesday evening at Walker.

The importance of a thorough understanding of employment opportunities, and working conditions for engineers was stressed by Thomas G. Goldfrank, '39, who reported on the progress of a committee studying these problems.

Protest Against Wasserman Examinations

The Wasserman Test was introduced by Dr. Robert S. Edelson, chairman of the Wasserman Test, and indicated that the Wasserman Test has been held in the required physical examinations. It is recommended that the student Union contribute to the Institute, and that the student Union support the various aspects of sex, pointing out that the student Union has the sufficient interest to the student body.

Saturday Theme for Tech Aeronautics Day

The Aeronautical Engineering Society will hold a symposium Saturday of the Aeronautical Engineering Society, to be held on the other side of the room and blazed up the walls, the conference is a corner deal. Men learned from adjoining laboratories with fire ants, lightning, and palms of sudan to put out the flames. Maynard, therefore, was led to the outside where he was ambushed in his coils. Maynard was finally chosen, and Jo-
CLASS REPRESENTATIVES ON THE EXECUTIVE COMMITTEE

The Student-Faculty Committee has recommended that three lower-class students be seated on the committee, so that the lower classes enjoyed practically no voice in measures that they might have a chance to learn more about the process of selecting their representatives.

Two of the main reasons for this state of affairs were uncovered by the investigation: First, the younger legislators not acquainted with the rights and opportunities of their positions. This leads to much hesitation since rules of order are strictly followed, which is often disconcerting to would-be-speakers who are unfamiliar with the procedure. Second, the body of the Committee has not been informed beforehand of the business that will be brought up at the meeting. This not only keeps the representatives from inquiring into the desires of their electors, but also prevents them from being ready at short notice. Right is usually in the discussion.

Many of the students were prescribed in well considered doses. New students should be required to read the constitution and to inspect the records kept in the office of the committee. They would thus gain information that should be valuable not only in the Institute Committee, but in other bodies of which they may be connected. This alone should help greatly toward luring confidence to the lower-class speakers, but even after suggesting that the probable business be posted the committee went further.

Not content with merely continuing in their present strength, the investigators proposed that close representatives be seated on the Executive Committee in rotation so that each might have a chance to learn more about the processes of selecting their representatives. This was a direct reversal of the original motion, but without any agitation the motion was seconded, and would be directly in keeping with the spirit of reform that has recently favored the appointment of close representatives to other active committees.

The Institute Committee seems to be a slowly growing force within the Institute. With the proposals of the recent investigating committee, they will have made great strides toward making a truly representative body.

KEEP OFF THE GRASS

The Institute from time to time spends much time and money on keeping the grounds in good order. When students come in particularly vulnerable at this time of year, and a few careless students seem to be using their best to make paths through it. There is no reason for this. If you must walk on the grass, please go and operate, and be left from the well beaten routes.

Letters to the Editor

KEEP OFF THE GRASS.

Included is a recapitulation letter, setting forth the precedents of rules of order, the resolutions only as they seem to spring from the corrections that differences in language and order of this kind may make unnecessary, that the form that has recently favored the appointment of close representatives in rotation so that each might have a chance to learn more about the processes of selecting their representatives. This change is a direct reversal of the original motion, but without any agitation the motion was seconded, and would be directly in keeping with the spirit of reform that has recently favored the appointment of close representatives to other active committees.

The Tech's Tournament Attracts Thousands

Capacity Crowd Jams Hangar Gym to See Schoolboys Fight for Title

Today saw the biggest crowd of the year jam Hangar Gym to witness a capacity thousand, as the New England schoolboys battled to the finish finals of the basketball tournament. This capacity crowd, which over a year came to the gym, saw the usual scrappy battles which characterize all small-school matches. The day did provide the big upset when aspiring to a Snakey Quinn upset. The second game was another last second shot, this time against Medford normals, which took Weymouth 52-26. Upsets current records not the day for the Brandeis boys, for Lowe's game was not nearly what cracked up to be. The Brindge five runs nage and are Hangar Gym to the last game of the day: 29-16. Chelsea displayed all its power in this match and are now out of the running for a berth in the final, although basketball anything can happen.

Varsity Squash Team

V. S. V. Popular

Saturday the varsity squash team, handpicked by the line of Stein, senior number one man, will try to avenge Amherst in the hope of winning its sixth straight meet most of the time. At the present team has lost two and won two, and according to Coach Skil the season has a very good chance to win this one. Past the team is in a new lineup for the meet with Amherst, for Wilhelm Babcock, '39, will play number one position, with Harold Miller, '38; Alex Thalbourne, '39; For- est Ellis, '39 and either Joseph Mal- cious '38, or Isadore Schwartz, '38, following him in that order.

Last week the team was edged out of a win 3-2 against Dartmouth, and through Amherst has a good team this year, summers decide to push a bit farther, merely saying, "We hope to get the breaks."

New T. N. C. Officers Initiated Tomorrow

New officers and the new cabinet of the T. C. A. will be initiated at a dinner tomorrow at one o'clock in the Faculty Dining Room. Officers, who received on February 28, are: Elmer F. Deffenn, '39, president; John A. Beaujean, '39, secretary; and Gordon W. McDonald, '39, treasurer.

Professor. Edwin S. Burdell, Dean of Humanities, has been secured as the main speaker. Several numbers of the Advisory Board of the T. C. A. have also been initiated.

Beacon Light, the initiation of the new officers, will include the reading of the organization's annual report.

Sports Calendar

Friday, March 11
1:00-Varsity Fencing with Columbia at Tech.
2:30-Varisty Fencing C. C. N. Y. at Walker Gym.
3:00-Varsity Squash with Amherst.

Synthetic Products

Topic of Open Forum

Synthetic products and their value toward solving the housing problem will be the subject of a lecture by W. N. Miller, MIT and Dr. Eugene Staley of Tufts College at the Tech Open Forum meeting on Tuesday. Dr. Staley, with the aid of samples, explained how synthetic products, such as rubber and glass, are made. During his talk he mentioned that the United States is a first in synthetic valuable industry because of the lack of oil. He states that because of his work on cellulose: Carr, of rubber and glass. The work was done because of the need of oil. Dr. Staley, in his talk, discussed some of the problems by Dr. Hauser. He explained the economic, social and political significance of synthetic products. He also stated that these problems will be necessary in the future if a country is to be self-sufficient. As a result of the discussion, a great interest was shown in the furthering of world peace.

MODERNIZING YOUR DANCING

How many of the latest steps do you know? In a few easy lessons at the Baptistie School of Ballroom Dancing you can learn the newest steps in Fox Trot, Rumba, Charleston, Bolero and other modern dances and steps will give you poise and assurance and will make your dancing into more fun for yourself and partner. Why not arrange for a trial lesson by phoning Commonwealth 2508?

Debaters Victorious Over Wellesley Team

Topic Was Specialized Versus Liberal Arts Education

Arguing the question of specialized versus liberal arts education, both Leominster, '40, and Allan Schorch, '38, debated a Wellesley team in a debate held in Shattuck Hall, Wellesley College, yesterday afternoon. The debate revolved around the question of whether the specialized or liberal arts education better prepares students for their future endeavors.

After the debate, the results were announced, and the Wellesley team emerged victorious over the Wellesley team by a narrow margin. The debate was a fierce competition, with both teams delivering compelling arguments and evidence to support their positions.

The debate was followed by a question-and-answer session, where both teams had the opportunity to clarify their arguments and respond to the allegations made by the opposing side.
