can believe were but one degree above the Devil.

That is the frame of mind which can get us into an unnecessary and disastrous war, and which is going to do so unless it is altered. The combination of screaming hatred against Germany and Nazi Germany, and the notion of the French and British as our good and sensible friends, is the channel through which the ignorant, incomprehensible, and possibly dangerous, currents of thought pass, which are not only not helpful, but may be swiftly and, against our bright promises, result in a revival of the same old public spirit.

We report: Such a balance of values is neither scientific or evil.

SCIENCE IN BRIEF

by Arthur M. York, '38

TELEVISION IN THEATERS

Last month television started a forward notch in its development when the entire British Empire in its world championing broadcasts was transmitted from the arena and rereceived to three moving picture theaters in London. The picture acted as a new place for those unable to be admitted to the arena. However, the use of 15-foot screen made those in the arena enjoy a clearer view of the stage's view. As a result of this new performance, three German films of the same kind have been ordered by the British Broadcasting Corporation for foreign distribution. This is the first time that a television program has been made outside of the United States.

NEW HAVEN, Conn., May 17—The television program was received by the British Broadcasting Corporation for use in other parts of the world. The program was transmitted from the Kodak College in New York City, and was received by the British Broadcasting Corporation in London, England, and by the British Broadcasting Corporation in Paris, France.

MURDER AT HOME

There are more murders from domestic quarrels than there are gunshots deaths in this country. These are usually made by men of strong arm and give them a better hold in the soil.

The human race progresses, or at least appears to move forward by steps that are macroscopic and small, and which are based in life and in moral and physical uplift. This is just as true of the human race as of the growth of a child. When a child grows, it is well planted; it is destined probably to an ineffectual end, but nevertheless it frames an inestimable end.

The tapestry, however, to one of the most of the arts, real and imagined, local and international, lies in the conditioning and emphasis in the place where the world of the world is brought up. By the time a person has reached high school the basic mental and spiritual foundations of his life have been laid, and from that time on very drastic action can alter appreciably those foundations. But an unpaved road can be found to bring up human beings so that they are conditioned from the first recollections to a social climate which can improve human beings, and attempt to improve humanity seem foredoomed.

Still, water can wear away the hardest stone during the slow passage of ages, and since the uproot of mankind is as yet beyond the power of man, the ancient attempts at improvement seem foredoomed.

The water can wear away a stone during the slow passage of ages, and since the uproot of mankind is as yet beyond the power of man, attempts at improvement seem foredoomed.

THE READER SPEAKS

To the Editor of The Tech:

Your letter is written in reply to your two previous editorial proclamations that "... campus and country are being worked up into an hysteria against democracy. . ." I am referring to the two days on Page 13, Tuesday, March 13, 1939.

Your objections as set forth are entirely untenable since they are based on an either/or or proof-by-contrary dislocation of some very plainly written facts.

You say that "no country is entirely bad," implying that the statement that world democracies (corresponding and commentators have said that certain countries have been so bad, that the American press reports on world affairs is ridiculous. What has been said is that the rulers of these countries are inhuman, degenerate, brutal, dictatorial, and murderers, and that the American press reports did not relate or cover such happenings. That these people did not or could not apply the terms to themselves by their words and deeds, but in the distinction between a people who were pathetically, falsely, who use these words against the people who were not guilty of such deeds.

You say that Hitler and Hitler have pulled their own country up by the bootstraps from social regression to a nation which is better than it was in many ways than our own. How could that be true in America? The American government is certainly not in the business of making people better, and the German government is the business of maintaining the nation.

The problem is that the American people are the greatest moral nation on earth. The German people are the greatest moral nation on earth. The American government is the business of maintaining the nation.

As for your cliche, well, as the French would say, "It is to laugh!" You say, "It is our right to voice the fact that we must pull ourselves up by the bootstraps in order to live." You apparently do not realize it. You are the people who have the eyes and ears of the world. Your reports must be accurate, and the world must be informed of the terrible things that are happening in Germany and in Italy. It is to be desired.

It is this unnatural and dangerous emphasis which is being placed upon unethical actions of Germany and Italy, and which is actually working this country into a frame of mind similar to that of the War years, when all Germans in the Ameri-

Team Also Defeats Ten Others
In Unofficial Match

INTERCOLLEGATES FRI.

Continuing its winning streak, the Tech rifle team defeated New York University again in New York last Saturday to assure itself of the coveted trophy. There were ten other matches that were competed this week and Tech won all.

P. T. Competition At End Saturday

Brady Leads Competition While Silva, Ford and Schults Are High

Eugene Brady leads the P. T. competition in the final competition which will close this season. Brady's final score of 962 points is 6 points ahead of the second and third finishers. Silva, Ford and Schults are in the top five.

The competition has closed, and the scores of the top six competitors are:

1. Silva, Ford and Schults: 962 points
2. Brady: 956 points
3. Ford: 950 points
4. Schults: 945 points
5. H. Brown: 938 points
6. Ford: 932 points

The P. T. competition will be held in February of next year with the stars graduating this year. The squad will be greatly strengthened by the addition of some of the most outstanding track stars expected to be found in a Tech squad.

Dorm Robber

The Dormitory Committee met in the lounge and discussed the matter of the dormitory being robbed. It was decided that the dormitory should be locked at night and that the residents should be more careful in the way they handle their belongings.

SIX STEPS TO MORE SMOKING PLEASURE

AGING—Chesterfield's mild age is a characteristic of the way the tobacco is made, and is evident in the way it will burn and the way it will smoke after it is cut into cigarettes.

PAPER—Every Chesterfield is made with the finest cigarette rolling paper. The quality of the paper is evident in the way it will burn and the way it will smoke.

SANDING—Almost human!—the way the tobaccos are sanded and the way they are packed into the cigarette.

BLENDING—There is only one Chesterfield Blend and it is evident in the way the tobaccos are blended and the way the cigarette mixture is made.

PACKAGING—The packaging of the cigarette is evident in the way the tobacco is packed into the cigarette.

MAKING—Almost better than the rest can follow! Chesterfield's are made in a way that is evident in the way the tobacco is packed into the cigarette.

PACKAGING—The packaging of the cigarette is evident in the way the tobacco is packed into the cigarette.
