THE TECH

We must build up within ourselves a power of sympathy for the peoples who are being misled and of pity for those who lead them. We must make them understand the danger of nuclear war, and the steps we can take to prevent it.

The Reader Speaks to Responsibility for Repression

We believe that the soundest means of obtaining a lasting peace is to bring about a complete change in the world's thinking and attitudes.

Evidently you do not realize the responsibility which rests upon you. A newspaper plays a tremendous role in national policy, and its influence can be immense. We must make sure that our newspaper is used to promote a better world and to fight against war.

In your editorial of April 15 you accuse the Technological Peace Federation of endorsing a policy of condoning and supporting of other nations on this issue. A statement made by Mr. Roosevelt in his radio address as President of the Peace Federation does not bear out this charge. In our opinion, this article is completely unfair, and we are inclined to think that you yourself have been misled.
