The recent comments of this paper concerning the Refugee Committee have now been printed with the plan calling for the creation of "the facade of our loyalty to generosity of idealism门窗 generous purpose of action."

They have been printed, rather, with the intention of guiding students in countries where democracy is under attack. As students in countries where democracy is under attack, we must not be derelict in the cause of maintaining the world's peace.

We are faced with the situation in which there are refugees seeking aid. We have the opportunity to aid such refugees directly and we must do so if we are to maintain the world's peace.

The money now being sought to aid the refugees is very definitely a need. It could be used to aid American democracy, a more far-sighted and farsighted need can be found nowhere else.

In conclusion, I believe that the plan will stand a better chance of working if it is directed towards a better understanding of the need for cooperation in the establishment of a better understanding among the people of the world.
