

CHEM. RENTAL FEES ABOLISHED

Board Disapproves \$2500 Appropriation For Tennis Lighting

Inst. Comm. Grant Overruled For First Time

Gridiron Receives Only \$650 While \$2,832 Is Given A. A.

Rejection of the appropriation of \$2,500 for the construction of lights on the tennis courts near Walker Memorial, passed by the Institute Committee at its Feb. 15th meeting, has been voted by the Undergraduate Budget Board of the Institute Administration.

This is the first time in recent years that a grant recommended by the Institute Committee was turned down by the Budget Board. The \$2,500 appropriation was made by the Institute Committee, along with \$2,832 for athletic equipment and \$650 to provide darkroom facilities for the undergraduate publications, at the February 15th meeting.

Two Provisions Passed

These second two were passed and the money is now available to purchase the needed equipment. The Board decided that the lighting of the Walker courts this year would be an unnecessary expense. Considerable debate preceded the passing of the motion at the Institute Committee meeting. The main objection was to the use of activity funds for athletic purposes.

In the regular procedure of granting of activity funds, the Institute Committee makes recommendations subject to the approval of the Undergraduate Budget Board.

Frosh Will Hold Formal May 10

Council Names Committees To Arrange Orchestra, Refreshments

Plans for the annual freshman formal to be held on Friday, May 10 were formed at a meeting of the Freshman Council held in the East Lounge last Friday afternoon. Committees were appointed to arrange for the choice of orchestra and to make plans for refreshments and publicity. Tickets for the dance which is to be held in Walker Memorial will cost \$3.00 per couple. They will be sold by section leaders and at a desk in the Main Lobby. An attendance of 250 couples is being planned for and the money which will be saved by holding the dance in Walker will be used for refreshments and for obtaining a better orchestra.

Scouting Fraternity Will Entertain Former Scouts

All former scouts have been invited to the campfire meeting of Alpha Phi Omega, honorary scouting fraternity, to be held tomorrow in the Faculty Room of Walker at 8:00 P.M.

The evening program will include camping songs and story telling. Plans will also be discussed for the program of the remainder of the year. Campfire refreshments will be served.

Spring Informal Will Be Held On March 29

The Second Annual Spring Dance, sponsored by the 5:15 Club and the dormitories, is to be held on Friday, March 29, from 9:00 P.M. until 1:00 A.M. in the Main Hall of Walker Memorial.

Tickets for the informal dance, priced at \$1.35 per couple, will go on sale in the Main Lobby of Building 10 on Tuesday, March 19, from 12:00 to 2:00 P.M. Members of the committee in charge of the affair will sell the tickets. Roy Elwood and his twelve-piece orchestra will supply the music.

Bartlett Heads English Dept.

Col. C. T. Marsh Placed In Charge Of Military Science Dept.

Professor Howard R. Bartlett was appointed head of the department of English and History according to an announcement of the annual staff appointments and promotions last Saturday. Professor Bartlett has been acting head of the department since the retirement of the late Professor Henry G. Pearson.

Mr. Nathaniel McL. Sage, Placement Officer of Technology has been appointed director of the Institute's Division of Industrial Cooperation. He has been acting head of the division since the death last September of Professor Charles L. Norton, former director.

Col. Marsh to Lead Military Science

Colonel Clarence T. Marsh, of the Coast Artillery Corps of the United States Army, will come to the Institute from duty in Panama to head the department of Military Science. He relieves Lieutenant-Colonel Charles Thomas-Stahle who was called to Washington.

At the same time announcement was made of the retirement of four prominent members of the faculty who will leave active service with the title Professor Emeritus. They are Professor James R. Norris, Director (Continued on Page 2)

Large Audience Sees Production

Technology's Dramashop presented Edmond Rostand's play "Cyrano de Bergerac" last Friday and Saturday nights at Brattle Hall in Cambridge. The production played to a capacity house on both nights, with about 500 persons attending performances.

The title role of Cyrano de Bergerac was played by Louis A. King, '41, who, by popular acclaim of the audience, gave one of the most outstanding performances of the production, while Janet Norris, '42, portrayed the part of Roxanne. Ragueneau the humorous baker was played by Joseph E. Dietzgen, '41. The play was produced under the leadership of Professor Dean M. Fuller, who also played the role of the Cardinal.

Prof. Bunker Will Replace Dr. Goodwin

Present Dean Of Graduate School To Retire In June

50 YEARS ON STAFF

Dr. John W. M. Bunker, director of the biology research laboratories and professor of biochemistry and physiology, has been appointed dean of the Graduate School, President Karl T. Compton announced last night.

Dr. Bunker will succeed Dr. Harry M. Goodwin, Dean of the Graduate School since 1932, and professor of physics and electrochemistry, who will retire in June after a distinguished career of 50 years on the Institute staff.

Developed Graduate Studies

As professor of physics and electrochemistry, Dr. Goodwin has been active in developing the Institute's graduate courses. He was appointed dean of graduate students in 1926 and in 1932 was made dean of the newly created Graduate School, becoming, at the same time, a member of the Institute administrative council. He is also chairman of the faculty.

Dr. Goodwin began his staff career in charge of the laboratory instruction in general physics. In 1909 he organized a new department and course leading to the degree of Bachelor of Science in Electrochemistry, the first of its kind in America.

Dr. Bunker Joined Staff in 1921

Dr. Bunker joined the Institute staff in 1921 as assistant professor of physiology and bio-chemistry, and then as professor in 1924. He has been a member of the committee on the graduate school since 1921.

After graduating from Brown University, and spending some time as an instructor in sanitary biology at (Continued on Page 4)

Osborn Is Picked For T.C.A. Award

T. C. A. Chooses Sophomore As Cabinet Honor Man For Year 1940

Robert K. Osborne, '42, has been elected 1940 Cabinet Honor Man by the Technology Christian Association, it was announced at the annual elections luncheon last Saturday.

This award is made annually to the department manager of the T.C.A. who has increased the scope of his department most during the preceding year. The name of the winner is inscribed on the plaque in the outer T.C.A. office.

Killian Speaks

Mr. James R. Killian, Jr., executive assistant to the president, was the guest speaker at the luncheon. His subject was the current trend in universities towards more social life and extra-curricular activities, and less emphasis on the class room.

Miss Madelaine Balch Is "Queen" Of The Dance

Miss Madelaine Balch of Dorchester, Mass. was chosen "Queen of Spring" at the annual Spring Acquaintance Dance of the Technology Catholic Club held last Friday evening in Walker Memorial.

Miss Balch was selected for this honor by the Dance Committee, headed by Paul O. Jensen, '40.

Corporation Removes Laboratory Profits From 1940-41 Budget

Graduate School Dean

Staff Photo

Dean John W. M. Bunker, who succeeds Dr. Harry M. Goodwin as head of the Graduate School.

Action Advocated by The Tech For Some Time

Chemistry Students May Save Ten Dollars Yearly

All chemical laboratory rental charges were abolished and the entire profit of the Division of Laboratory Supplies has been cut from the budget for the coming fiscal year, 1940-1941, by the Institute Corporation at a recent meeting.

As far as Mr. Arthur C. Melcher, manager of the Division of Laboratory Supplies, can determine, this action will involve no change in his department's personnel or work, and will definitely not mean any increase in the price of other materials or supplies.

No Amounts Specified

When asked exactly what this reduction will mean to the average student, the manager of the Laboratory Supplies replied that no one could determine in dollars and cents the difference in cost for each student. The only factor which could be considered in an estimate would be that the upperclassmen rent material over a longer period of time and would profit most.

In round figures this new policy will reduce the average freshman's fee about one dollar and the upperclassman's costs about ten dollars, according to Mr. Melcher.

This action has been advocated by The Tech during the past few years in a series of editorials climaxed last January 5, with a detailed comparison of the Technology laboratory costs against the similar costs of 22 other universities and colleges.

Tech Camera Club Holds First Salon

Photographic Contest Open To Undergraduates; Ten Awards

To encourage undergraduate interest in photography, the M.I.T. Camera Club is holding its first Annual Salon during March and April.

The competition is open only to undergraduates, but faculty members and graduate students are invited to submit prints for exhibition. The better pictures will be on exhibition during the Institute's Open House.

Ten Awards

Pictures must be entered under one of the following classifications: scenes, still life and portraits; action and candid photographs; and technical pictures. Three awards will be made in each section, as well as one best-in-show award. The prints will be judged on general excellence and interest.

All prints must be 5x7 or larger on 16x20 mounts, except pictures in sequences. The name, class, and address of the photographer, the camera used, classification of the picture and other remarks are to be written on the back, while the title, if any, is to appear on the front.

Peace Society Makes Changes

Constitution Is Amended; Kunreuther Made President

At the largest meeting of its history, the Technology Peace Federation yesterday amended its constitution and then elected an entire new slate of officers.

The meeting was recessed after elections until today at 5:00 P.M. when it will be reopened in the West Lounge, Walker, when plans will be made then for future activities of the Federation.

Kunreuther Elected President

Frederick Kunreuther, '41, representing the Chemical Society, was elected president by a large majority. Also elected were Wilson M. Compton, '41, of the Elections Committee as vice- (Continued on Page 4)

Colored Photos Now On Exhibit

A collection of more than 100 photographs and full color transparencies, taken by Mr. Henry B. Kane of the Institute, are on exhibition in the photographic studio in the basement of Building 11.

Many pictures included in the exhibit have previously appeared as illustrations in Canby's "Works of Thoreau", in a number of children's books, and in many magazines. The exhibit has been shown at the American Museum of Natural History in New York, and the Photographic Arts Society in San Diego, and other places throughout the country.

Wild Life Pictures

While there are a large number of flower and scenic pictures in the exhibit, the emphasis has been placed on animal subjects. Most of the pictures were taken with a Zeiss Maxima camera, equipped with a f4.5 lens.

that group found it advisable to reject a proposal from the Institute Committee.

This action detracts tremendously from the prestige of the Institute Committee. That body would do well in the future to consider very carefully the opposition to a motion of appropriation before passing the motion.

WIDE OPEN HOUSE

Classes should be cancelled on April 27, the day of the biennial Open House. The Institute Committee and the faculty advisory committee on Open House have already recommended the above to the Corporation. We stand behind them in their proposals.

Congestion would be lessened, and the program consequently made more attractive to the public should the doors be opened at, say, nine instead of in the afternoon. More students would be able to participate in the day's program if the classes were entirely suspended.

Let not the Institute officials be conceited enough to think parents come to Boston merely to visit Technology. They undoubtedly have other things to do, and probably would appreciate the company of their sons as much as possible in so doing.

THE READER SPEAKS

To the Editor of The Tech
 Dear Sir:

During the past few years there have been complaints by individuals and by small groups that the honorary societies, particularly the three class societies and Beaver Key, have not only failed to fulfill their stated purposes, but that they have consistently neglected to choose all their members on an impartial basis.

The Institute Committee at its last meeting appointed a committee to investigate the aims and policies of all the honorary societies at school. Material from students not satisfied with any existing features of any of these societies will be welcomed by the committee, as will any suggestions for improvements. It is very unlikely that there will be another investigation for several years so that this work should be supported by conscientious objectors. Material may be sent to me at Walker Memorial by next Monday.

Sincerely yours,
 WYLIE KIRKPATRICK, '40
 Committee Chairman

Editor, The Tech:

Certainly, starving people, war, and unemployment are academic subjects. Such unfortunate circumstances are problems with definite causes, economic or psychological. They must be handled by reasoning, by strict adherence to 'academic' laws, when these laws are known. Any deviation from reason leads to blind emotionalism, which certainly will not solve problems. It is very well to wring one's hands and weep over "those poor unfortunate people; we must do something for them"; but those people will be best helped by sound logical analysis of the situation and the application of methods of relief reached by this analysis. And I speak of long-run relief, not merely temporary alleviation, which, of course, is also necessary.

The time for temporary measures is past; and the time for fundamental correction of the problem of unemployment is at hand. Government bounty is not a fundamental correction; there is little argument here.

The main fault with government relief, aside from the point that it is an expedient, is in the attitude which it is liable to foster. There is, I agree, little fault to find with the aims of the N.Y.A.; the fault is in the means for attaining these aims. This country has been built on the principle of self-sufficiency; by application of this principle it has, in general, attained a level of personal income and comfort equaled by no other country. Are we now to abandon this principle, which has built the country? Temporary relief is well enough, but the permanent installation of a bounty system, a system by which anyone may, regardless of his merits attain an object merely by applying is contrary to this principle.

It is the attitude which is now being fostered which is bad. People are coming to feel that the country and the government owe them a living. No one feels that his neighbor owes him a living; why then the government, which is only the collective voices of one's neighbors.

One thing more, nothing is accomplished by introducing personalities into an impersonal discussion. To call a statement silly and nonsensical expresses nothing but the inability to refute that statement. May I be permitted to deviate from his principle which has just been stated, that I may bring it to the attention of my correspondents. We are discussing facts, not our personalities.

JOHN G. BURR, '40.

Appointments

(Continued from Page 1)

of the research laboratory of Organic Chemistry, who will retire next January; and Professors William T. Hall, of the department of Chemistry; Charles W. Berry, of the department of Mechanical Engineering and Harold K. Barrows, of the department of Civil and Sanitary Engineering, who will retire in June.

Macomber on Executive Committee

John R. Macomber, chairman of the Board of the First Boston Corporation, was appointed to the Executive committee of the Institute Corporation at a meeting of the corporation last Wednesday. He succeeds the late Philip Stockton on the Executive Committee and has been chosen to act as chairman of its finance committee.

Other appointments are those of Orson C. Shepard as Visiting Associate Professor in Metallurgy, and Professor Roland D. Parks, an authority on mining economics, who will join the department of Geology. Professor Lawrence B. Chapman of the department of Naval Architecture and Marine Engineering, has been appointed to take charge of the course in Marine Transportation, and Donald P. Severance, '38, has been appointed Assistant to the Registrar.

Professorship Appointees

The members of the faculty promoted to the grade of Professor are Dr. Raymond D. Douglass and Dr. Dirk J. Struik of the department of Mathematics; Dr. Avery A. Morton, department of Chemistry; Dr. Sverre Pettersen, department of Aeronautical Engineering; and Professor Albert A. Schaefer, department of Business and Engineering Administration.

Promoted to the rank of Associate Professor are Dr. William P. Allis, department of Physics; Dr. Avery A. Ashdown, Dr. Stephen G. Simpson, and Dr. Ralph C. Young, all of the department of Chemistry; Dr. Charles H. Blake, department of Biology and Public Health; Dr. Samuel H. Caldwell and Dr. Arthur R. von Hippel, department of Electrical Engineering; Professor W. Rupert Maclaurin, department of Economics and Social Science; Professor John R. Markham, department of Aeronautical Engineering; Professor John D. Mitsch, department of Civil and Sanitary Engineering; and Dr. Douglass V. Brown, department of Economics and Social Science.

Assistant Professor Promotions

Those members of the faculty promoted to the grade of Assistant Professor are Dr. Isadore Amdur and Dr. Lawrence J. Heidt, department of Chemistry; Allan T. Gifford, department of Civil and Sanitary Engineering; Charles Kingsley, Jr., department of Electrical Engineering; and Richard F. Koch, department of Modern Languages; Dr. Herman P. Meissner, department of Chemical Engineering; Dr. William MacG. Murray, department of Mechanical Engineering; Augustus R. Regowski and Dr. John L. Trimmer of the department of Aeronautical Engineering; Dr. Reinhard Schuhmann, Jr., department of Mining Engineering; and Dr. Gerald B. Tamm, department of Business and Engineering Administration.

Promotions to the grade of Instructor include Edward L. Bartholomev, Matthijs G. J. Boissevain, Frederic R. Evans, Ascher H. Shapiro, and Malcolm S. Stevens, all of the department of Mechanical Engineering; Delbar P. Kelly of the department of Aeronautical Engineering, and Dr. Clark C. Stephenson of the department of Chemistry.

Leaves of Absence

Leaves of absence were granted to Professor Edward E. Bugbee of the department of Mining Engineering who has been appointed to an exchange professorship at Stanford University for the next academic year; Professor John L. Reid of the department of Architecture, who will go to California for a year of professional practice; and Professor Olin Ingraham of the department of Economics and Social Science.

FINALE

The No. 1 thorn in the Tech man's foot has finally been extracted.

For years students have complained of the excessive cost to them of taking courses which required the use of the Division of Chemical Laboratory Supplies. Particularly, have the members of Courses V and X, and The Tech, crusaded against the system. And in recent times nearly everybody had joined them in agreeing that a severe injustice was being dealt out to students—undergraduate and graduate.

But now it's all changed. Rentals on apparatus have been abolished, and the profit stricken from the Division's budget.

Although it's been a long time in coming, the action recently passed has righted a wrong, which is after all what really counts. Retribution ought not be flaunted by time.

AS YE SOW

Steamrolled into office, the new officers of the Peace Federation have a job on their hands. Whether that society shall serve the cause of peace with dignity and efficiency, or whether it shall relapse into its recent somnambulism, is now up to them.

The new men were elected by representatives of activities which rarely, if ever, have sent men to be active in the affairs of the Peace Federation. Such organizations as the A. A., the Musical Clubs, Chi Epsilon, and even the Tech Boat Club answered to the roll call.

It is to be hoped that these societies really were interested in the Peace Federation when they appeared yesterday. On this assumption, we commend them for their attitude and urge that they continue their representation.

But if such be not the case, then the blame for any ensuing difficulties lies directly upon the shoulders of everyone who voted at yesterday's meeting.

TENNIS LIGHTS

Rejection of the \$2,500 recommendation for lights on Walker's tennis courts looks like a kick-in-the-pants to the Institute Committee from way back here where we're sitting.

Several weeks ago the Institute Committee passed the recommendation. It then came up before the Undergraduate Budget Board for approval. For the first time within years

THE STORE FOR MEN—STREET FLOOR

BEAVER TALES

By Jack Quinn

Letters from sports fans are perhaps the best way in which opinions other than those of your sports editors can be expressed. Following this precept, therefore, we again ask for comment addressed to the Sports Department. That section will do its best to print these expressions of Beaver feelings about any sporting topic at the Institute. Constructive criticism, of course, would be the ideal type of comment. You may remember that the idea motivating this column is increased interest in Beaver sports to be gained through a better understanding of the men who play them, coach them, and manage them. Those teams are representing you, fellows. Let's hear your ideas about the way they are doing it.

Steady nerves once again proved invaluable to members of the pistol team as that body finished off another Technology team record this week. The score, shot in a postal match, was 1363 points. Don't forget, also, that this mark is ten points better than the count with which the Engineer marksmen blasted the West Point team earlier this season. That Technology could beat a service school seems to be an indication of hard work on the part of the team members and their coach, Major Kirke B. Lawton, director of the Signal Corps R.O.T.C. course and drill officer for "B" Company. In fact, the pistol team owes its present existence to the efforts of the Major. It was chiefly through his interest that pistol was recognized as an Institute sport two years ago. Accredited as the best shot on the faculty team, the present Range Officer has also been constantly working for more pistol practice for the average student. Range hours for anyone interested in shooting are now scheduled as follows: Mon. 5:30-10:00 P.M.; Tues., 11:00-12:00 noon; Wed., 1-3 P.M.; Thur., 2-5 P.M.; Fri., 1-2 P.M.

Best individual record this year was made by Johnny Murdock last night when he shot a 283, one point short of Dick Henry's all time record made last year. In the slow fire bracket the "Arizona Kid" posted a 94, which, however, equalled Gil Clark's record, likewise shot last season. All of the one-man records are divided among the four "Big Shots", though, Ed Owen having boosted the time division mark to 98 last week. In this four seconds per shot section, however, we wouldn't be surprised to see a perfect score very soon. You see, records have been voided quite often this season. The main reason probably lies in the standing rivalry among Clark, Henry, Owen, and Murdock. "Texas" Clark did his part two weeks ago with a phenomenal all high 97 in the rapid fire division. A bright spot in this story is the fact that all these men are Juniors. After they have practiced this summer, Technology may well expect more record-shattering marks next year.

Not content, however, with merely having a good team, the Beaver pistol squad is now working for the adoption nationally of uniform challenge blanks. At the present time no two of these tickets are alike. Tech, for instance, stamps a target, tacks it up, and requires that it be used in the record count. Some other schools, however, select the best of ten targets for the record. Capt. Henry and Assistant Manager Ed Thode have been the main impetus behind this drive, we are told. With the formation of a nation-wide intercollegiate pistol league as the ultimate objective, this project, if successful, would supply a striking deficiency in the lives of the pistol shooting students of our colleges.

Lacrosse Team Holds Practice For First Time

Beaver Squad Will Practice Against Tufts And Boston Club

Lacrosse sticks beat the air last night at the first practice of the season for that sport outside the Barbour Field House. Led by Capt. MacPhaul about thirty men turned out for the session; most of them, however, have already represented the Institute in lacrosse games.

According to Coach Bob Maddux, a practice game has been scheduled for Wednesday with Tufts in the Tufts cage. If the weather permits there will be another practice game here with the Boston Lacrosse Club on Saturday.

Frosh Are Experienced

An unusually large percentage of the freshmen who reported, it was learned, have had previous experience on high and prep school teams. The first Plebe game is scheduled for April 26.

The first match for the Varsity is planned for April 6 with the Boston Lacrosse Club. Games with Stevens, New Hampshire, Springfield, Harvard, Dartmouth, Williams and Tufts, are also on the season's program.

In addition to MacPhaul, the following men turned out: Fraser, Morehouse, Leiserson, Given, Gander, Sibley, Leghorn, Turansky, Halstead, Gabel, Augusterfer, Evans and Schuchard.

Princeton Downs Gymmen 38 To 16

Keyes Is High-Scorer Again; Gymnasts End Season With 6 Losses

Paced by Schouler, Bigelow, and Condit, the Princeton gym team blasted the Technology aggregation by a 38-16 score last Friday night in Walker Gymnasium. Raymond E. Keyes, '40, once more led the Beaver performers as he garnered one first and three third places.

John C. Quady, '40, started things rolling when he took third on the horizontal bars. Edward K. Miller, '41, and Keyes followed up with a first and third place respectively on the side horse.

Keyes, Michelson Place

Keyes and Louis Michelson, '40, were ranked first and third in that order on the parallel bars. Keyes concluded his performance with a third place on the flying rings.

Third places went to Henry Brewer, Jr., '40, in the tumbling event and to James J. Holley, '41, in the rope climb.

Intercollegiates March 23

With the Tiger match, the Technology gymnasts completed their regular schedule with one victory over Dartmouth and six losses. They will enter the Intercollegiates at Army on March 23 with Keyes as their main hope for a showing.

Howard Wins Diving Crown

Next Championship Meet To Be Held In New M. I. T. Pool

Displaying clean-cut form and perfect control Dave Howard nosed out a classy field to win the New England Intercollegiate diving crown in a championship meet staged at Williamstown on Saturday. As a team the Beavers placed sixth in a field of eleven.

Howard was the only man to score for Tech, thus keeping up his reputation as iron man of the swimming team. He gained that title this season by his consistently good diving and freestyle work in the 440 and 220-yard events.

Counts in Required Dives

In the diving competition he started off well by winning one heat by a large margin, while Christys of Amherst won the other. In the final, Howard built up a good lead in the five required dives. He had the highest score in each of them, gained by beautifully executed front and back dives, and by his graceful back jackknife and half gainer. His running half twist was acclaimed the best dive of the evening.

In the alternative dives, Howard did not do as well as in the regular section, but he held his own, choosing to do a 1½ somersault, a back slip, a full gainer, a 1½ cutaway, and a half gainer with a twist. All were difficult dives from the low one meter board used. His style throughout was superb and he came out victor with 99.6 points against 92.6 by Christys.

Jarosh Elected

At a meeting of the New England Intercollegiate Swimming Association after the meet, John J. Jarosh was elected president of the Association in recognition of his work as swimming coach at the Institute and also for his work on the executive committee of the Association.

It was also decided at the meeting that next year's New England Swimming Championship would be held at M.I.T.'s new swimming pool, presently under construction.

Rifle Team Vanquished By Coast Guard Cadets

Tech's rifle team lost another close decision last Saturday when it dropped a tough match to the United States Coast Guard Academy by a score of 1337 to 1332. This score was well below other recent scores turned in by the Institute riflemen.

The rounds were fired at the Technology range at 2:00 P.M. As usual, the Beaver team was led in scoring by Manager Joseph H. Myers, '41, who has been high scorer in most of the team's matches this year.

Tech Fencers Defeat Bowdoin D'Artagnans By Score Of 24 To 2

Quintet Holds Banquet Tonight in Grad House

The Technology basketball team will celebrate its recently completed season at a banquet to be held in the Dutch Room of the Graduate House at 6:30 o'clock tonight. The season record stands at six wins in ten games.

A captain for the 1940-41 season will be elected after the dinner to succeed the present leader, Thomas F. Creamer, '40. Awards are to be presented to both varsity and freshman players.

Boxing Contest Begins Tomorrow

Two Weight Classes Have No Entries As Deadline Approaches

Postponed one week because of the high school basketball tournament, the Technology Golden Gloves boxing tournament will be held this Wednesday and Thursday, March 20 and 21. Thirty men have already entered, while several others are expected to sign up before the beginning of the tourney.

Contestants have checked in for only six weight classes. The two lowest brackets have no entrants. Coach Rawson announced that weigh-ins may be made any time Wednesday, and that the preliminaries will begin Wednesday afternoon at 5:30. Bouts will be arranged by draw. After the eliminations Wednesday, the finals of the tournament will be held Thursday night. Although last year's winners are barred from the classes in which they triumphed, several other contestants from that year will box.

Adelson And Bech Sweep Matches With Ease

Beaver Fencers Allow The Polar Bears Only Two Matches

Bouncing back from last week's defeat at the hands of a powerful Columbia team the Technology fencers tore into a weaker Bowdoin aggregation, crushing them to the tune of 24-2 last Friday afternoon in the Walker Memorial Gymnasium.

Without the services of Ed Sherburne, ace foilsman, the Tech team swept the foils matches as well as the sabre tilts, 9-0, and captured handily the epee matches, 6-0. Sophomore Johnny Hinchman replaced Sherburne in the foils and sabres lineup and handled himself very creditably, capturing six bouts.

Davies Scores Convincingly

"Cap" Adelson and Johnny Bech came through in fine form to win all their matches in the foils and sabre divisions. Captain Bech, however, retired from his last bout in favor of Davies, second string sabre-man, who picked up a convincing victory by the score of 5-2.

In the unpredictable epee battles, the Tech fencers allowed Bowdoin their first scores. Sheeby and Barton, the only two Polar Bears to break into the scoring column, defeated Baldwin and Kellogg respectively in close and exciting matches.

Kreiger, the other Technology entrant in the epee, came out the victor in his three matches to complete the Beaver scoring in this division. There was one bout omitted from this section because one of the Bowdoin men failed to arrive on time.

Every day people the world over stop a moment...enjoy an ice-cold Coca-Cola...and go their way again with a happy after-sense of complete refreshment. *The pause that refreshes is a real idea, really refreshing.*

Chemical Society Plans New Party

Mr. E. P. Stevenson To Talk On The Opportunities For Research

The Spring Party of the M.I.T. Chemical Society will be held Friday evening, March 22, Arnold Arch. '40, secretary of the society, has announced.

Mr. Earl P. Stevenson, president of A. D. Little, Inc. will address the group at 8:00 P.M. in Room 6-120 on the subject of "Research in Industry".

Mr. Stevenson's talk, will describe the various opportunities for research men in the field of manufacturing and commerce. After the discussion the society is sponsoring a dance which will be held in the 5:15 Club Room. Refreshments will be served at the dance to which the society invites all members.

Peace Federation

(Continued from Page 1)

president; Joseph E. Dietzgen, '41, of the Dormitories, as treasurer; Richard A. Van Tuyl, '41, of Phi Gamma Delta as secretary.

Robert J. Fay, '42, T.C.A. represen-

tative; John J. Quinn, '42, Chi Phi representative, and John M. LeBolt, '42, representing A.I.Ch.E. were elected to the executive committee.

A majority of activity groups was represented at the meeting to approve the amendment introduced by Paul W. Witherell, '40, to change the constitution of the Peace Federation so as to allow the elections to be held at once. After a heated discussion, the proposed amendment was approved 29 to 9 and the elections were held.

Kunreuther newly elected president, expressed the hope that in view of the fact that more interest was shown yesterday than at any other time since the inception of the Federation the organization will become more useful in furthering peace movements at Technology.

Dr. Bunker

(Continued from Page 1)

Harvard, Dr. Bunker became a member of the firm of Browne and Bunker, sanitary consultants. In 1910 he was analyst to the Rhode Island Shellfish Commission, and consultant to the Rhode Island State Tuberculosis Sanatorium. The following year he took charge of the biological division of the biological survey of the Genesee River at Rochester.

First Source of Culture Media

As director of the biological division of the Digestive Ferments Company, Detroit, he established the first source of supply of dehydrated bacteriological culture media now used in bacteriological laboratories the world over.

Dr. Bunker is one of the authors of a volume on "Hygiene For Nurses", and has written numerous scientific papers on bacteriology, sanitation, biophysics, and vitamins.

Igor Sikorsky Will Speak In Room 10-250 Today

An intermission has been planned for the talk, "The Work of a Pioneer in Aircraft," to be given this afternoon by Igor Sikorsky, in Room 10-250 at three o'clock. Since the lecture open to all students is scheduled to last two hours the recess at four o'clock will allow those not able to attend the entire meeting to enter or leave without interrupting Mr. Sikorsky's discussion.

He heard about "Eastern's" low round-trip rate, so he's sailing away for an Easter vacation!

N. Bonaparte, Strategist

NAPOLEON liked to take a hill before he took the enemy. From this vantage point he could view the countryside, and call his shots. A little strategy goes a long way.

The engineer who comes to Lafayette for his radio requirements is using strategy, and saving money. We make every nickel count—for more! Our complete line of 1940 radios, parts, tubes, amateur equipment and cameras is "tops" in the field, yet priced surprisingly low. We've even got the hard-to-get items. Everything guaranteed. Try us first. Have you a copy of our 188 page FREE catalog?
