VOTE — AND COMPLETELY

Tomorrow is election day. Officers of all four undergraduate classes will be named by the results tomorrow of the election which is the first requirement for making a "democracy work." No matter how intensely the members of the society feel toward their government, no matter how democratically the executive heads of the society administer the duties of their offices, if every unit of that society has not lent his voice to the shout which commands, its operations, the government is not physically democratic.

The class elections tomorrow, however, put one more requirement on the potential voting public. It is not enough that every Tech man should go to the polls tomorrow.

The more casting of a ballot becomes meaningless or even misleading if the voting is not done intelligently.

Technology's preferential system of balloting is responsible for this extra demand. The system depends on proper ballot marking for its operation.

Section 19 of Article IV of the Elections Committee Constitution explains the method of voting in naming the election winners, shows the necessity for complete ballot marking:

"Provide a tally sheet containing the number of votes cast, he is elected.

If there is still no choice, drop the candidate whose number of votes cast is the least, and proceed as before. Continue until some one has a majority.

If the candidates are to be elected find the man who has the highest count by the method just indicated. Then eliminate his ballots and start again with the first choice.

Essentially, the system is designed to prevent a minority candidate from being elected when a majority splits its votes between two other candidates, either of whom it would prefer to the minority man. This procedure makes it difficult for power politics to split the opposition — providing the ballots are properly according to the preferential system.

Each voter, therefore, must number the candidates in the order of his preference if the system is to function perfectly. Failure to name a sufficient number of candidates (if his choices are near the bottom when the votes are counted) will nullify the influence of his ballot when the contest is narrowed down to two or three men.

Of course, most of the voters realize the need for voting preferentially, that a vote can easily be partially wasted if the numbering be stopped too soon. Every ballot, however, must be marked completely and precisely according to the choices of the voter lest Technology's excellent system of undergraduate government become the victim of insincerity, or more tragically, carelessness.

FIRST AID

The Walker Dining Service Committee held its first meeting last Friday, with results that were neither drastic nor surprising. They were not meant to be; the committee merely met to make plans for future procedure.

One notable feature of these plans was the suggestion to hold certain conferences in More Hall. This is in line with the plans of the committee to make the students realize that it is being set up to help them, and not merely to quash unpleasant situations.

But if the students expect to be aided in their quest for food improvements, they must turn to the committee to make the students that it has been set up to help them, and not merely to quash unpleasant situations.

GRIDIRON GRIT

This fall, for the first time since before the first World War, Technology, will have an intercollegiate football team.

The team can not technically be called a "varsity," for Sophomores, according to the present arrangement, will not be allowed to compete for positions. Except for this condition, next autumn Tech could sport its first varsity grid team since 1939.

For the past several years the lobby for revival of football at the Institute has been steadily mounting. Now that the most typical American college sport is again here its effects will no doubt be closely watched. It would indeed be tragic should the zeal of the players be the cause of the sport's death after all the work and words of its creating fans. Candidates for the team should bear in mind that any scholastic slips on their part will reflect unfavorably on the new organization.

SPORT SLANTS

by HARVEY L. KRAM, JR.

The advisability of a basketball training table for next season is being considered by various members of the Beaver basketball squad. Tentative plans call for an evening drill for the team to be held at that time. The first meeting will be held at the Hangar Gym on Tuesday, November 12th.

Many Spills Mark Season's
Dinghy Season's

Harvard, Navy, and B.U. Defeated as Co.

Many spills and two seamen sur-
crooked four days of grappling in the annual All-Tech Wrestling Tourna-
mint, to be crowned champions of their respective weight classes by Mr. John A. Rockwell, chairman of the Anthony Council on Athletics and Technology, last Friday afternoon in the Harvard Gym.

Mr. Rockwell, in his short talk to the competitors, asked them to keep in condition during the interim so that Techwrestlers' season may continue for purposes next winter.

Freshmen Sweep to Win

The teams scored, as compiled by John Carlson, adopted a consensus rating for the freshman contingent. 56 points were chalked for the Class of 1941, thus making no other class so far with a chance. The outcome was due to the fact that Tech's wrestling team consists of 21 men, while the Jansens only for the freshmen. The result was due to the fact that Tech's wrestling team consists of 21 men, while the Jansens only 11. At any rates, no team compiled better than Tech's last season.

Spring Sweeps Tournament

Capturing Six Championships
