**The Tech**

The drive for peace carried on at the Institute started a movement which was short-lived last week when conflicting authority and crossed wires short-circuited the A.S.U.'s "I Am An American" rally. At a rally Friday, they made reference to President Roosevelt's "I Am An American" Committee.

Meow
In the open letters which the poor, long-suffered A.S.U. circulated, their "I Am An American"" phrase was misinterpreted by the public. The letters were misinterpreted by the newspapers.

To the Editor of "The Tech":

As a student at the Institute who has actively participated in the anti-war movement, I would like to express my thoughts on the recent events. It is clear that the Institute is divided on this issue. Some students believe in the continuation of the war, while others believe in peace. I believe that the students should come together and work towards a mutual understanding.

We should not allow our differences to divide us. Instead, we should use our voices to bring about change. I urge the students to listen to each other and work towards a common goal.

Thank you for giving me the opportunity to express my thoughts.

Sincerely,
