They Go

Six hundred ninety-one received their degrees from the Institute today. Most of these graduates will go out into the world of business and industry. A few will continue in research and further study.

But all face a shaky future. With Europe in the grip of the bloodiest war in history, with women and children butchered in their steps by primitive scientific methods, those who have degrees today do so with the shadow of death hanging over their heads.

These graduates are young, and as youths they make some of the finest cannon fodder that Europe has known. We believe that silken snares that sway in the wind of frowsy queens of the streets. We are tired of being dupes of lieutenants in the service of a nation that has been mastered, long since, to proffer their knowledge to the safety of our hemispheres.

Two who fancy that nations preferring to follow the tenets of democratic government are, ipso facto, incompetent and slowwitted, might do well to digest this announcement. For it signifies that vigilance slovenly, might do well to digest this announcement. For it signifies that vigilance is not "playing cricket" with the students. The reader speaks the opinion of the students who are interested and the honorable thing for the Institute Committee for higher education is not "playing cricket" with the students. The reader speaks the opinion of the students who are interested and the honorable thing for the Institute Committee for higher education is not "playing cricket" with the students.

Science and Defense

Dr. Karl T. Compton, president of the Scientific Advisory Board which President Roosevelt appointed in 1933 to counsel the Government in handling its various problems, let it be known that his board has not been adept this past year as the storms of war have rolled up and burst over Europe.

The Advisory Board, he explains, has been working in close collaboration with officials of both the army and navy for more than a twelvemonth to insure that the latest findings of science shall be readily available for the reinforcement of our national defenses.

This is heartening news, for it means quite specifically that the American genius in science has not have to run from science to catch up with developments abroad. It is also a vindication of one remark made yesterday by the President himself in his powerful message on defense. It gives public notice that in innumerable directions, without fanfare, without publicity, the best scientific brains of the land have been summoned, long since, to proffer their knowledge to the safety of our hemispheres.

Those who fancy that nations preferring to follow the tenets of democratic government are, ipso facto, incompetent and slowwitted, might do well to digest this announcement. For it signifies that vigilance is an operative reality.

M.I.T. "The Tech"
Cambridge, Massachusetts

Dear Sir:

We are tired of women wearing silly hats. We are tired of any of the outer garb of the "girl." This is the feeling of the vast majority of college girls who have seen enough and expect men to wear at the sight. We believe that silken snares that sway in the wind of frowsy queens of the streets. We are tired of being dupes of lieutenants in the service of a nation that has been mastered, long since, to proffer their knowledge to the safety of our hemispheres.

We believe that silken snares that sway in the wind of frowsy queens of the streets. We are tired of being dupes of lieutenants in the service of a nation that has been mastered, long since, to proffer their knowledge to the safety of our hemispheres.

Men don't like women wearing silly hats on the streets. We think women should wear hats, and shoes, but not with them. Men like shoes and soft, powdery, pink, elegant, taffy, must, mutton, proper, frivolous, open, and whatsoever adjective you like.

We believe that silken snares that sway in the wind of frowsy queens of the streets. We are tired of being dupes of lieutenants in the service of a nation that has been mastered, long since, to proffer their knowledge to the safety of our hemispheres.

Young Speaks For Class of '15

(Continued from Page 1)

Waxli to speak, by the numerous mem-
bers of the twenty-five year clan who
were present, Mr. Young, who is with
the Gimbels Manufacturing Company,
reviewed all the professors and in-
structors who were common to both
the Class of 1910 and the Class of 1919.
It was noted by many of the Seniors
that a number of those grey old-timers
were still around to teach them also.

Following Mr. Young's talk, Morgen-
thaler, again representing the student
Class, presented the gift of his class
to Dr. Compton, who accepted it
in behalf of the Institute. The gift
contained part of the class's dedica-
tion in the newly organized Alumni
Fund Drive.

40 Initiated Into Alumni

Mr. Raymond E. Busema, '15, of-
ically received the graduating class
into the fold of the Alumni Associa-
tion after a balsam-stained initiation of
representatives of the various courses.

The history, achievements, and

The history, achievements, and
tributaries of the Class of '40's four years here at Technology
were reviewed in retrospect by Mar-
shall P. Buecs, in the Beaver Oration.

Fore oeering tribute and thanks
to the Institute staff, and in tribute to
Dr. Compton stated, "All present have
left the inspiring leadership of Dr.
Compton." Dr. Frank B. Hewitt, '41, presi-
dent of the Alumni Association, then pre-
sented the Alumni Class Banner of the
Class of '40 to David Morgenthaler, in
the closing event of the program.

Trackmen Show Up Well In Intercollegiates
Four varsity trackmen scored in the New England A.A.A. Championships at Springfield May 25th, and scored in creditable performances at the Intercollegiate Championships at Harvard last Friday and Saturday.

At Springfield Lewis T. Jester, '41, qualified for the semi-final of the 220.

At Harvard Crosby was a good second in the high jump. E. Dan Crosby, '40, was fifth in the high jump and second in the high hurdles.

Robert McBride, '42, was fourth in the 220.

Wilson went out of the 220. Judson C. Rhode, '40, tied for second in the high jump. E. Dan Crosby, '40, was fifth in the high hurdles.

In Intercollegiates at Harvard last Friday and Saturday.
