

CAMP ATTENDANCE HITS PEAK

Moch To Meet New Crewmen At Boat House

Interested Men Invited To Attend First Rally Despite Inexperience

With the rejuvenated Technology crews officially starting practice Monday afternoon, Head Coach Bob Moch is now extending a cordial invitation to all men interested in crew for a personal meeting at the boathouse at that time.

Last year the crew had its best record in years. The lightweights missed winning the American Henley by a few feet, being edged by Harvard. The freshmen lost only one race. Chances this year are very good and the crews should go a long way under the able guidance of Bob Moch. Most of these men have been practising for the past two weeks.

Row Until Freeze-up

After the rally on Monday, the teams will go on with their practice and the freshmen will start. They will continue fall practice until weather conditions no longer permit rowing; at the end of that period they will undergo a 3 mile time trial which will be a good gauge of the teams' form at the time.

No meets will be held this fall, but arrangements for the Varsity spring schedule are already completed. The crew will race in four big meets, the first against Harvard, B. U., Rutgers, on the Charles; the second against Harvard and Princeton, also on the Charles; the third against Princeton, Penn. and Columbia, at Princeton; (Continued on Page 2)

Field Day Teams Meet Tuesday

Football, Tug-of-War, And Relay Candidates Gather At Field House

Practice for the 1940 Field Day teams is scheduled to start at 5:00 P.M. Tuesday, October 1, at the Briggs Field House, when candidates for the football, tug-of-war, and relay squads will meet for the first time.

Peter L. Sibley, '42, has been appointed as head coach of the freshman football team, and will be assisted by John A. Finger, '42. The position of manager for the freshman team, open to all members of the Class of '44, is still free and all interested are requested to report with the team candidates on Tuesday.

Coach Oscar Hedlund will train and choose the relay teams of both classes. The varsity track mentor expects all freshmen with previous experience in track to turn out for the class team.

James S. Engel, '42, has tentatively been selected as freshman coach for the tug-of-war team. All husky freshmen are urgently requested to turn out for the team, since the Class of '43 has an exceptionally strong squad. There is also an opening for a freshman manager in this event.

Tryouts are now going on for the dinghy team and according to Sailing Master Jack Wood, the Class of '44 can win this event if enough freshmen turn out for the trials.

All coaches, managers, and members of the winning teams receive their class numerals.

Fraternity Rushing Ban Placed On Frosh Camp

The Interfraternity Conference announces that no rushing activities will be carried on at Freshman Camp. It is explicitly understood that no fraternity will provide freshmen with transportation to or from camp. This policy has been adhered to at all previous camps and will continue to be supported. The Tech will cooperate with the fraternities by publicizing names of all freshmen and houses violating this rule.

—I.F.C. Chairman

Coop Increases Dividends Issued On '39-'40 Bills

Dividends to members of the Coop for purchases during the fiscal year ending June 30, 1940, have been increased to 12% for cash purchases, and 10% for charge purchases according to recent announcement.

The dividend, which was previously set at ten and eight percent, will be paid on all purchases of twenty-five cents or more made at either the Technology Store or its branch office in Harvard Square.

Checks Ready Oct. 14

Checks are to be ready for distribution on Monday, October 14, and will be mailed upon request to members living outside of Cambridge. Checks will be issued to payees showing their 1939-40 membership cards as identification.

Class Of 1944 To Be Welcomed At Tech Smoker

Activities Discussion, Movie To Be Featured; Denison May Not Sing

The official welcome to the Class of 1944 will be extended by President Karl T. Compton at the All-Tech Smoker in Walker Memorial Monday evening, September 30. The dinner will break all precedents by being served family style which will necessitate all freshmen arriving promptly. Following the banquet and Dr. Compton's address, faculty and student representatives will address the freshmen on extra-curricular activities at the Institute. Dean Harold E. Lobdell will speak on the place of such activities in the average Tech man's life.

Athletics to be Discussed

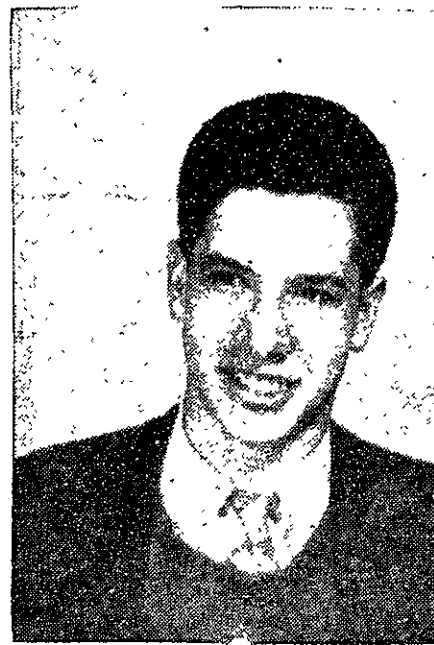

Mr. Henry E. Worcester, member of Advisory Council on Athletics and president of the alumni association, will follow with a discussion of Technology's athletic policies. Professor Frederick G. Fassett Jr., of the English Department, is to speak on publications. Professor Robert S. Harris, of the Biology Department, will discuss the various musical clubs. Professor Albert A. Schaefer, of the Economics Department, will act as toastmaster for the banquet.

The premier performance of a col-

Record Army Of 380 Leaves For Massapoag Today At 2:30 P.M.

SOPH PRESIDENT

Robert S. Reebe, '43

Reebee Plans Frosh Escape

Soph President Hopes To Deceive Freshmen In Peculiar Disguise

Preparing to uphold the sacred dignity of the class of '43 by escaping the "presidential plunge" at the hands of the freshmen, Robert S. Reebe, '43, Sophomore class president, has been leading the life of a hermit in order to avoid recognition by alert freshmen. Reebe has undergone a series of plastic surgery operations which will completely change his appearance in the hope that he will escape the traditional ducking in the frigid waters of Lake Massapoag.

Disguised

His hair usually auburn colored has been dyed to a sandy blonde color. Therefore it seems likely that anyone with sandy hair may be the soph president and should be surreptitiously dunked.

The old disguise of wearing glasses will be ignored by the president of (Continued on Page 4)

Shore School Session Attracts More Than 150

Over 150 entering students turned out for the first session of Shore School, which got under way last Monday at the Sailing Pavilion. The large number of men insure the prospects of the freshmen for the sailing meet with the Sophomores on Field Day.

For those new men who missed the first session of Shore School another similar session has been planned for the early part of next week. Notices will be posted by the Nautical Association telling of the exact details of the next session.

Jack Wood, Sailing Master, and James K. Tyson '41, Commodore of the Nautical Association, will be at Freshman Camp to give any information. Movies of sailing at the Institute will be shown and two dinghies will be available for use at camp.

Frosh To Be Advised In Short Addresses By Faculty Members And Class Presidents

One thousand pounds of newspapers have also been secured to help make the cots warmer for the campers. In spite of this protection Titzler advises all freshmen to sleep in their clothes, not only for additional warmth but also for readiness against midnight forays by marauding sophomores.

Hay and Straw Ordered

A ton and a half of hay and one ton of straw have been ordered and will be on hand as a filler for the bedsacks, and as a midnight snack for hungry newcomers. Tardy campers will probably find the supply of mattresses exhausted and will have to stuff hay and straw into sacks for ticks to sleep on.

To feed the small army of 440 which will be on hand at Camp Massapoag, the T.C.A. has rented 300 knives, forks and spoons. Even Walker dining service had to loan two huge ten gallon stew pots to augment the camp supply of cooking utensils.

Excluding the Sophomore fifth column, 380 incoming freshmen, the largest group ever to camp at Lake Massapoag, will leave for the T.C.A.'s 15th annual Freshmen Camp at 2:30 P.M. this afternoon from the front of Walker Memorial.

During their stay at the camp, freshmen have opportunity to meet their classmates in group sports including baseball, football, basketball and swimming. They will also receive short addresses from captains and managers of sports and officers of the various activities who will later answer questions of interested freshmen.

Director Hard Pressed

F. B. I. Arrests Two Tech Students As Fifth Columnists

A lot of tall stories and strange experiences are being told lately but here's one for the detective magazines and the fellows who tell it swear it's the truth. It seems that these two Tech students had agreed to drive a gentleman's automobile from the West Coast to New York City in order to meet him when he arrived from the Argentina, South America.

They were cruising along nicely until a highway patrolman in Iowa stopped them for passing on a hill. They were asked to show their operator's licenses which they did, but when they were asked for the owner's certificate they were at a loss, as the owner and the certificate were far, far away. Their explanation only aroused the officer's suspicions for they were promptly searched.

Suspected of Murder

Some letters written in German were found on one of the fellows; this just about clinched the case for the patrolman, and he turned the two over to F.B.I. agents as probable fifth columnists. The car was eventually searched and because several suitcases belonging to the owner were (Continued on Page 5)

(ADVT.)

Have you lounged in the new Lounge Bar yet? If not, why not? In fact, you don't even have to lounge. You can sit down.

But before we go any further, let us now state very firmly that this is not an advertisement for the Walker Dining Service. Rather, this is an attempt to draw the students' attention to a place on campus where, for the first time, they may get sodas, soft drinks, sandwiches, even Bromo-Seltzer, at reasonable prices.

Even the atmosphere of the Lounge Bar is conducive to eating. In fact, should you have an acquaintance, male or female, whom you are showing about the Institute, it might be well to stop off and have a snack or two at the bar. Or if you don't, stop off anyhow—it's pretty fine.

THE READER SPEAKS

Perhaps it is a bit premature to offer any comment on the pending treaty between Japan and the Axis powers, but with a national election approaching, it would be appropriate to evaluate the fruits of the foreign policy of the present administration.

Franklin Roosevelt's consistent opposition to Japanese expansion, both commercially and politically, in the Far East has resulted in the establishment of a virtual "defensive" alliance aimed at the United States. To quote an AP report of the treaty's context ". . . it is expected Japan would actively support Germany if the United States should enter the European War. . . . the Japanese Government finally is convinced that the United States is unalterably opposed to 'legitimate' expansion in the Orient." This is the first time that any military alliance has been specifically directed against the United States, and Franklin Roosevelt is the first president to lead the United States into such a position.

Now we stand alone and friendless except for a British Empire which is desperately striving to maintain its own existence.

We, with an army admittedly weak and a navy too small to support a foreign program opposing great military powers, find ourselves committed to oppose all of the powerful military expansionists.

The United States is losing ground in the fight for survival. We are making enemies faster than could ever be compensated for by our national defense policy.

The protection of our Latin American and Far Eastern markets against the economic expansion of Germany and Japan may be used by some as the basis of an argument for the support of our present foreign policy. However, we have a far greater economic loss in prospect if Germany wins the war. Our entire exports to Europe and Asia will be under the direct control of three powers against which we have often and loudly proclaimed ourselves. Our government can well school itself in judicial economic diplomacy by studying the past procedure of Great Britain. Never, until now, has England found herself on the losing side of a war where large spheres of influence and trade areas were at stake. Possibly because of coincidence, and her military and naval power, was England the undefeated master of the world for over a century and a half, but the same result may have been the result of discreet diplomacy. Ideologies are fine things to fight for, but one cannot eat a doctrine, nor can one live in a house of ideals. American foreign policy should take a practical turn, rather than a necessarily moral one. We need not switch to support Germany and Italy in their war, nor need we give Japan a helping hand in the "China Incident", but our actions should be tempered with caution, unless we are prepared to back our demands with action on the spot, rather than letting them accumulate until we are presented with hostile military alliances. Our past policy has not been to lend military support to our diplomats, and unless we would do an about face, we must abandon the expensive and useless program being followed at present.

WELCOME, FRESHMEN

Before the end of next week you freshmen will have been Officially Welcomed to the Institute a great number of times. You will undoubtedly hear repeated at each Official Welcoming much advice and information, nearly all time-tested on the eighty freshman classes preceding '44.

You will be told that Technology is a tough school—a place "for men to work and not for boys to play." Yet warnings against becoming a brownbagger will be the main point of most speeches. You will be asked—almost pleaded with — to try for every imaginable variety of activity and sport. In fact you can expect to become beautifully confused and hopelessly bored by all the advice, information, and warnings given without your even asking.

The Tech therefore takes this opportunity to bore you and hereby extends its Official Welcome to all freshmen, transfers, etcetera.

NATATORIUM

As most of the returning students have already noticed, we now have a swimming pool.

That, in itself, is an understatement. For the newest addition to the Technology athletic plant is not the ordinary swimming-hole type, but, as is befitting an engineering school, a stream-lined chromium-trimmed pool, with adjustable diving-boards and all that sort of paraphernalia.

Hours, too, have been made very liberal, with plenty of time for Joe Student to do his paddling, while the swimming team and others have certain specific periods set aside for them. It might be needless to mention that mixed bathing is allowed on Sundays.

All these innovations are well and good so long as the student body appreciates the value of its latest acquisition and treats its use with regard by observing the regulations and health rules posted about the Institute.

Grid Squads Turn Out Soon

First Practices Monday And Tuesday To Include Members of All Classes

The football season will get under way at Tech early next week, as members of all four classes turn out for rallies and opening practice. With the opening game of the Junior-Senior schedule less than three weeks away, and with only a month to Field Day, there is stiff work ahead for every man out.

Sergeant George C. Hunt of the Military Science Department has been chosen to coach the Junior-Senior team. Sergeant Hunt played football at West Virginia State; in addition to acting as assistant coach to the Institute pistol team, he has had previous coaching experience while in the Army in other sports.

Junior-Seniors Monday

The new mentor announced a meeting of all upper-classmen interested in the team for 3 P.M., Monday, in the Briggs Field House. Practice starts Tuesday. Because of the heavy program of outside games that has been arranged, the coach is hoping for a large turnout.

With rivalry between the two lower classes headed towards unheard-of heights, a record number of candidates is expected for both the Sophomore and freshman class teams. The first meeting of those out for the freshman team will be held on Tuesday at 5 P.M. at the Coop Field. The Class of 1943 will open preparations for Field Day hostilities the

DIVIDEND TOO

Announcement . . .

IMPORTANT to FRESHMEN

JOIN the Coop and SAVE Money on Your Purchases

By joining the COOP you become a store-keeper for yourself, just as if you rented a store, put in a stock of merchandise, and employed salespeople.

The Stockholders, all members of the Faculties of M.I.T., Harvard and Radcliffe, hold the capital stock in trust and receive no dividends upon it. The stockholders from M. I. T. are Dean Harold E. Lobdell and Professor Erwin H. Schell.

On the Board of Directors the M. I. T. representatives are J. H. Hollomon, Student Director, Carroll L. Wilson, Alumni Director, Walter Humphreys and Horace S. Ford, Secretary and Treasurer, respectively of the M. I. T. Corporation.

The COOP prices are never higher than elsewhere, and in many cases for the same quality much lower. In addition, a dividend is credited on all purchases of 25c or more.

Checks not exceeding one hundred dollars are cashed for members between the hours of 8.30 A. M. and 3 P. M.

Charge Accounts for members only.

Join before making a purchase, for dividends cannot be credited on purchases made previous to taking out a membership.

The TECH-COOP is the official distributor of all your supplies. The material required for all freshmen has been passed upon by the Faculty and approved by them.

Every TECH Man should become a member without delay. The Membership fee is one dollar.

Dividend at the rate of 12% on cash purchases and 10% on charge purchases, year ending June 30, 1940.

All memberships start July 1 and expire June 30.

A Membership at the Technology Store Also Makes You a Member at the Harvard Sq. Store

Reebie

(Continued from Page 1)

'43, as he feels glasses will arouse the suspicions of wary freshmen. As a result anyone wearing glasses should not be molested, and then again, why not? The president has even changed his height by wearing a pair of special arch support shoes. This will probably bring his height to about five feet four inches.

Flash:—Imposter!

It has been rumored in informed circles that Reebie will exchange places with Norman M. Karasick, '41, Voo Doo representative in tent 43, because of the striking resemblance between the two after Reebie's face lifting. Of course the soph president will deny these accusations, so in order to make certain that he is ducked, the freshmen should throw any such impostors in the Lake.

All Tech Smoker

(Continued from Page 1)

ored motion picture, taken last spring and depicting athletics at the Institute, will conclude the program. Fathers of the incoming freshmen will attend a reception held by Dr. Compton in Pritchett Hall following the entertainment.

"O.B." May Not Sing

The only sour note of the affair, according to William R. Ahrendt, '41, chairman of the All-Tech Smoker Committee, is the fact that O. B. Denison, alumnus and traditional singer of songs at past Smokers, may have to decline this year's invitation.

previous day, at 2 P.M. at the Briggs Field House.

Sexton, Sibley Coaches

John Sexton, '41, will coach the Sophomore squad. He was the skullman of the team which represented 1943 last year. Peter L. Sibley, '42, and John A. Finger, Jr., '42, will cooperate in trying to produce a freshman team which can stand up against the onslaught of the class of 1943.

Freshman Camp

(Continued from Page 1)

have been hard pressed to make the necessary arrangements for this record camp turnout. Transportation, bedding and feeding problems were especially difficult to overcome. No other means of transportation than the 12 chartered buses is to be permitted.

The toughest task was to obtain enough bedclothing for all campers. With the help of Sergeant McDonnell, 1,500 blankets, 9 tents, 3 cots, 175 mattresses, and 250 bedsacks were obtained from the local National Guard in addition to the regular supply.

Chesterfield

THEY'RE COOLER, Milder, BETTER-TASTING

All over the country, more smokers are buying Chesterfields today than ever before because these Cooler, Better-Tasting and Definitely Milder cigarettes give them what they want. That's why smokers call Chesterfield the Smoker's Cigarette.

Smokers like yourself know they can depend on Chesterfield's Right Combination of Turkish and Domestic tobaccos for the best things of smoking. Chesterfield smokers get the benefits of every modern improvement in cigarette making.

BETTER MADE FOR BETTER SMOKING
Here as seen in the new film "TOBACCO-LAND, U.S.A." is Chesterfield's electric detector. Twenty mechanical fingers examine each cigarette in a pack and if there is the slightest imperfection a light flashes and the entire pack is automatically ejected.
