England's campaign in the English Army was to allow the British to hold the field while the American forces were exhausted. The British then used their superior tactics, led by Lord Cornwallis, to defeat the American forces at the Battle of Cowpens in January 1781. This victory effectively ended the American Revolution and secured victory for the British.

The Battle of Cowpens was a crucial turning point in the American Revolutionary War. It marked the end of significant American resistance against British forces and paved the way for the eventual independence of the United States. The American forces, led by Colonel Banastre Tarleton, were outnumbered and outmaneuvered by the British forces, led by Major General Banastre Tarleton. Despite these disadvantages, the American forces fought bravely and were able to repel the British attack.

The Battle of Cowpens took place on January 17, 1781 at the Cowpens area near the South Carolina border. The American forces were led by Colonel Banastre Tarleton, who had been a hero of the British forces during the Revolutionary War. The British forces were led by General Cornwallis, who had been a hero of the British forces during the Revolutionary War.

REGISTRATION RESULTS

Last Wednesday almost all men in the country who had completed their twenty-first year and had not completed their thirty-fifth, including some 1,000 Technology men, registered for training in the armed forces of the nation.

What does this action really signify? What is behind this enrolling of sixteen million men for possible military service?

It is, primarily, a good example of a democracy, American style, in action. This, first of all, because it is a spontaneous reaction to a mere legal act. But because military training is one of the most definite, individual philosophies of outlook; it is not itself militarism which is a fact that in a short time he may be required to fight for him or his family. Democracy today places man for possible military service?

The President himself kept quiet about the thing. But recently he, too, succumbed to the temptation to wave this snappy bit of Hitler holocaust under the American people's collective noses. He came up at a press conference with a New York Times dispatch Rome with these lines emphasized, "It is self-evident that the Axis is out to beat President Roosevelt is the shrewdest politician in the world. If it needs fighting for, can become a protector and extension of democracy at home."

On the other hand, since, as it was pointed out, thePrimitive, the German dictator's announced preferences, whichever way they run, are of no possible value to an American campaign. The people of the United States are better fitted than Hitler to decide what is best for their country.

Stupid and irrelevant as the Nazi choice for an American president may be itself, the political cat-calling over this "issue" is even more childish.

Mr. Harry Wallace and New York's Gov-

or Lehman started the ball rolling when they decided, and publicly announced, that Hitler would like nothing better than to see Mr. Roosevelt defeated. Several other political leaders have joined the attack, declaring that Hitler is infinitely more afraid of Willkie than of Roosevelt.

A Favor Injury Weakened
Tech Soccer Squad

Six men had their legs cut out to the
north because of injuries, the Varsity
squad will include the good play
of the injured. Presently for the
Tech for the first time in two
weeks is a matter of history,
the team is well balanced with
no outstanding star. Coach Leiserson
wishes to substitute soccer for P.T.

The Varsity looked good in their
first game against the Fresh patrol;
the Tech squad stated, however, that
they would be a squad of equal
quality that was well balanced in the
games. The wish of the players was
not realized, their and the
Tech's was to substitute soccer for P.T.

Medical Aptitude Tests

To Be Given November 8

All students who plan to enter a medical school in September, 1941, must take the Medical Aptitude

Tests which have been offered during the current year, viz.: November 8, 1940, in Room 3005.

All desiring to take these tests should notify Dean Present. Room 3005 before October 10. Announcement of the tests has been posted on the official bulletin board near the Gashier's Office, and on the main bulletin board in the Department of Biology and Public Health.

C. A. A. Training Begins

This semester students from Technology are enrolled in the freshman and advanced

flight training courses being offered this year by the Civilian Aerobatic Authority. This week are

the opening of the basic courses, and the advanced training program will not be opened yet.

Because of the increase in the number of those taking training, coverage in the basic courses are

of those in the basic courses are

Technology men know this piece of apparatus as the 10BA Amplifier. It is an "exploring amplifier," developed by Bell System engineers to iden-

tify pairs of wires in telephone cables—some of which contain as many as 42,42 wires.

The cable man explores this mass of wires with the pencil-like probe. A tone sounding in the headphone tells him when he has found the right pair.

Ingenuity—special equipment—attention to details—play an important part in making your telephone service the clearest and fastest in the world.
