

## Grippe Cases Fill Infirmary To Capacity

### 75 Respiratory Cases Handled Each Day Says Medical Dept.

The usual winter increase of colds and grippe have once again invaded Technology. It was announced last night by the office of the Medical Director.

Approximately seventy-five clinical cases are being treated daily at the Homberg Memorial Infirmary and sixteen patients are at present confined in the hospital.

Among the distinguished guests residing at the Infirmary during the Christmas vacation was Dr. Karl T. Compton, president of the Institute, who has also been bitten by the grippe germ. He has recuperated sufficiently, however, to leave today.

The hospital cases, although large in number, have not occupied all

## Hobbymen To Hear Prof. Rule Speak

### Stereoscopic Photos, New Processes And Prospects Are Theme

In line with its recent emphasis on photography, the Hobby Shop is sponsoring a talk by Professor John T. Rule of the Department of Graphics on Stereoscopic photography. The talk will take place at five o'clock tomorrow in room 4-270. Professor Rule promises that his talk will in no way resemble the D11 lectures and explains that some real fun may be had by taking stereo-pictures.

According to advance reports, the talk will cover three major topics: what can be done with stereoscopic photography, new processes, and prospects for the future. Professor Rule plans to show three dimensional Kodachromes which will be projected with two projectors and polarized light as well as the usual black and white prints. By means of a new development these two toned pictures will be projected by a single machine which eliminates the old need for two matched machines.

Photo Contest Closes Jan. 13

The Hobby Shop Photo Contest will close at five o'clock on Monday. Jan.

*(Continued on Page 4)*

## New Years Party Held By 5:15 Club

### 125 Attend Dinner-Dance At Arlmont Club

Attended by approximately 125 Technology men and their guests, the sixth annual New Year's Eve dinner dance was held at the Arlmont Country Club, under the sponsorship of the 5:15 Club. Music for the affair was furnished by Ken Reeves.

After the elaborate fried chicken dinner was served in the main ballroom, the floor was cleared for dancing which began at about 11:45. This continued until 6 A.M. interrupted only at midnight by a pause to vocalize on the strains of "Auld Lang Syne" and again at 3 A.M. by a shift

*(Continued on Page 4)*

## Missing: 1 Police Booth Found: In Goodale—Tsk!

Mute testimony of the ingenuity of the Tech Engineers it stood, nor said a word, nor breathed a sigh, nor moved, for all its three hundred pounds. Its mysterious appearance, far from its usual haunts, squatting sedately in the freight entrance of Goodale, led to rumors.

Rumors led to the arm of the law which soon made its appearance but not in the conventional nick of time. Working strenuously for one hour and one half, the Cambridge Police officers finally retrieved their much coveted traffic box which had by some mystical method been comfortably ensconced in the Technology Dorm over the New Year's Eve.

## Phi Beta Delta Pi Lambda Phi To Merge Soon

A merger of Phi Beta Delta with the elder fraternity Pi Lambda Phi was announced at the conclusion of the convention of the two organizations, held at the Hotel Biltmore in New York, during the Christmas vacation.

The Theta chapter of Phi Beta Delta at Technology will become, next term, the Massachusetts Theta chapter of the new Pi Lambda Phi consolidated group.

The local chapter founded in 1920 has enjoyed a long and steady growth, now having thirty-six active members. It recently moved into a new house at 450 Beacon Street, which was bought for the chapter during the last year.

## Dr. Schmitt, Noted Biologist To Join Technology Staff

A full fledged professor at 35, and now in charge of the program of biological engineering at the Institute, Dr. Francis Otto Schmitt, formerly of Washington University, ranks as one of the youngest of Technology's departmental heads.

Dr. Schmitt, who will join the staff of the Institute next summer, is distinguished for his researches in biology, a field in which he has shown outstanding skill in utilizing the resources of associated branches of science. He has used the x-ray, polarized light, spectroscopy, and the electron microscope and other tools and techniques of experimental physics in fundamental physics.

Noted for Kidney Research

He is especially noted for his research on kidney function, conduction in heart muscle, tissue metabolism, chemistry and physiology of nerve, ultra-sonic radiation, surface pheno-

## South American Beauty To Be Subject Of Film

Color and sound films will be presented by the Propeller Club next Wednesday afternoon at 5:15 P.M. in Room 3-270 to all students interested.

These movies will include a travelogue of Rio de Janeiro, entitled "Incredible Rio". This city, capital of Brazil and reputed to be the most beautiful and picturesque in the world will appear on the screen in true color. Also on the same program will be "Great Cargoes," a picture illustrating South American trade.

## Hardy Lectures Twice On Color

### Prof. To Trace Growth Of Color Photography For Society of Arts

Professor Arthur C. Hardy, of the Department of Physics, and an expert in the field of color analysis, will deliver a lecture on the "Development of the Methods of Color Photography" as the second of a series of four Society of Arts lectures given by the Institute. The lecture is to be given once on Saturday, Jan. 11, for high school students, and again on Sunday, January 12, for the general public.

Departing from the usual talk confined to one method of photography, Professor Hardy has planned to start back with the developments of 1885, when Maxwell hit upon the first basic principles of the three color method. Then he will trace the subsequent progress in the period of 85 years, showing that the advance was made only in the various ramifications of the original ideas of Maxwell.

Unique Slide to be Shown

Included among the exhibits to be presented by Professor Hardy will be Eastman process wash-off relief prints and the only colored Stereoscopic slide in existence.

Color Photography is nothing new to Professor Hardy who is acknowledged as the inventor of the Spectrophotometer method of color analysis. He started his career in the field of optics, color and photography during the World War when he helped to organize a school of aerial photography. This experience made him think seriously of optics and photography as his profession.

The development of his recording spectrophotometer revolutionized the color analysis methods. By automatic means, it accurately measures and records the color of any sample of any object or surface.

## Dorm Committee Votes To Assess All Classes For Field Day Damage

### 100 Sr. House Residents Refuse To Pay Fine

Rebellion among the upperclassmen against the action of the Dormitory Committee in fining all Dormitory residents blossomed last night as 100 residents signed a refusal to pay this levy.

One hundred signatures had been obtained after an hour and a half of canvassing. This statement read, "We, the undersigned, residents of the Senior House, refuse to pay any fines levied upon us to pay for the damage done on Field Day by the Class of '43."

## Two Attempts Needed To Pass Motion Which Will Cancel Plans For Exemptions

Voting to assess every freshman, Sophomore, Junior, and Senior in the dormitories for the Field Day riot damage, the Dormitory Committee last night discarded its proposed plan of charging only those directly connected with the wholesale room-stacking spree of October 31. The same motion dressed in different words had been defeated earlier in the meeting by the ballot of the chair, cast because of a tie vote.

A report of the committee in charge of exemptions recommended that everyone be assessed. Gordon P. Brown, '42, chairman of the committee, made the original motion which was defeated by the chair's vote.

Second Motion Passed

Bernard S. Brindis, '43, then placed on the floor the second motion, which will assess "every freshman, Sophomore, Junior, and Senior in the dormitories." A show of hands was all that was necessary to pass it in spite of opposition from Senior members.

In explaining the action, Willard S. Mott, '41, chairman of the Committee, stated, "The exemptions committee was not satisfied that a just decision could be arrived at in the matter of exemptions." Although no definite figures as to the extent of the damage are available, Mott said that the individual assessment would be under two dollars.

Individual appeals for exemption may be made to Professor Leicester F. Hamilton in Room 2-325.

## Gene Saunders To Supply Music At Senior Dance

### Committee To Hold Affair In Walker On Friday, Jan. 10

Gene Saunders, collegian band leader, and his orchestra will play for the annual Senior Dance to be held in Walker Memorial, Friday, January 10. A large majority of the class of 1941 are expected to attend the affair, according to the dance committee.

The Senior Dance is held annually at the Institute near the close of the first term and it is restricted solely to members of the graduating class.

Dance Reserved for '41

Charles A. Wales, '41, chairman of the Dormitory Dance committee and in charge of this affair, has announced the committee's intention of reserving the dance strictly for members of the class of 1941 who must obtain tickets for admission. Tickets are being distributed by members of the Senior Week committee.

## A. S. U. To Elect New President

### Convention Delegates Will Offer Reports To Members

In order to hear reports from delegates at the American Student Union Convention and to elect a new president, the Technology chapter of the A.S.U. will hold a meeting Thursday afternoon at five in Litchfield Lounge. The meeting, according to Ervina M. Rips, '42, vice-president, is open to all students interested.

Because I. Seth Levine, G, is leaving the Institute at the end of the semester, a new organization president will be chosen. A delegate from the International Student Service meeting in New Brunswick, New Jersey, will report to the assembled A.S.U. members. Plans will also be made to send a delegation to the American Youth Congress in Washington at the beginning of February.

## Walker Staff Sponsors Dance

A novel "Spook Dance" has been planned by the Informal Dance Committee of the Walker Staff to take place this Saturday evening in Pritchett Hall from 8 to 12. The dance is restricted to members of the staff and their guests.

This affair is the second of its kind to be held this school year, and the committee is confident of a large attendance. The committee itself is composed of Sam Fry '41, Chairman, Roswell W. Austin '42, S. Richard Childerhose '43, James W. Goodhue '43, Raymond B. Krieger Jr. '41, and Warren H. Powers '42.

## Relations Group To Meet New Men

### Student Faculty Problems To Be Theme Of Discussion

New members of the Student-Faculty Committee—Robert J. Demartini, '41; Norman Scott, G, Donn W. Barber, '42; and Warren E. Foster, '43, will attend the first meeting since appointment by the Institute Committee when that group meets in the Faculty Dining Room at 6:30 tonight.

In accordance with its function as an official liaison group between the faculty and student body both members of the teaching staff and the student members will be present at the dinner meeting. The committee will discuss problems of curricula, general scholastic topics and methods of establishing better student-faculty relations.

Other Members

Other student members of the committee are Arnold S. Mengel, '41, chairman, Richard A. Van Tuyl, '41, Walter P. Keith, '41 and Jerome T. Coe, '42.

Professor Walter M. Fife of the department of Civil Engineering heads the group of professors on the committee which include Professors K. D. Fernstrom, J. A. Stratton, R. D. Douglass, J. H. Keenan, K. C. Reynolds, and Dean T. P. Pitre.

## Outing Club Ski Party To Leave Saturday Noon

Tracking down the snowy slopes of the Arnold Arboretum under the direction of Walter H. Lob, '41, novice skiers of the Technology Outing Club will hold their second lesson in the ski school sponsored by the M.I.T.O.C. The party plans to leave Saturday at 12:30 from the Walker steps.

The Outing Club has scheduled its first date Square Dance for Saturday night, January 11, at the Hangar Gym. Alfred J. Freuh, Jr., '42, with his "four fiddlin' fanatics" will provide the music and the dance calling. Admission will be forty cents per couple and tickets may be purchased at the Outing Club office in Walker Basement.

## TWO SPEECHES

To the new Congress President Roosevelt has just addressed the first of two very important messages which he is to deliver within the next ten days. These two addresses are the one yesterday on the state of the nation and the fiscal one on the state of the Treasury.

Yesterday's speech to Congress revealed the broad development of the Administration foreign policy to meet the changing situation abroad. It was obvious that because events of the war from week to week have been so unpredictable that the President didn't indite his message until the last day or so. He was solemn and frank, presenting as fully as he could the facts which, better than anyone else, he is in a position to know, both as to the status of England and our own home defense.

On the subject of "all-out" aid to England Mr. Roosevelt neither straddled nor soft-pedaled. He made plainer than ever before that he thinks England's fight is our fight and that our destiny is linked with hers.

Almost as clear and unequivocal as was yesterday's state-of-the-nation speech is the probable context of the President's undelivered fiscal message. To Congressional leaders and financial officials in the Administration, Mr. Roosevelt has, no doubt, outlined his recommendations pretty thoroughly. And the meat of these recommendations is his demand for economy not only in the normal governmental expenditures but in Congressional appropriations for defense. Further, it is highly likely that he will urge Congress to enact additional taxes specifically to meet the defense program.

The President's stand on the nation's finances is suddenly the quintessence of optimism and idealism. Through additional taxes it is now possible, he asserts, to raise enough money not only to balance the sky-high budget but to pay for the whole armament

program within seven years. It will entail sacrifices, it is conceded, but it will not break the taxpayers' back, interfere with business, or impoverish anyone. On the contrary, it should be welcomed by those who are unable to pay, because it is the certain way of sidestepping the inflation bugaboo, of keeping the public debt in hand and the government solvent.

That has been the presidential attitude since the return from the Southern waters cruise following the election. It sounds like the Roosevelt of 1932. It doesn't sound like the Roosevelt of the last two years, who had avoided the use of the word economy and evidently forgotten the necessity of balancing a budget.

But it is a waste of time to dwell on past attitudes. What is done now is what counts. If, as is now indicated, the president in his fiscal speech comes up with the kind of financial support he is talking these days; if he means what he says about reducing government expenditures and increasing taxes, he is certain to find a sympathetic, long-lost Congress and an overwhelmingly favorable public opinion.

## SHADES OF PAUL

We note with the deepest of interest and concern an item in last night's papers to wit, that Mayor Tobin has recognized that a Traffic Problem exists in Boston! Now, gentlemen, when we get stuck, we shall be stopped in no ordinary jam; rather, we shall be held up by an Official Traffic Problem. That such a condition must have existed since Paul Revere left Charlestown is beside the point. Now our waiting shall no longer go unnoticed but will have the omniscient eye of the city fathers.

However, that Mayor Tobin, detecting the situation, wants to eliminate it disturbs us greatly. For years we have sped across Harvard Bridge at one foot per minute; it is beneath the dignity of a Bostonian to move with greater haste. We don't care if four-wheel brakes have been put on cars Paul Revere moved sufficiently fast, and what was good enough for him, is good enough for us.

## ANOTHER YEAR

Father Time has emerged from his bomb-proof shelter long enough to give us a new year. If we could say "Happy New Year" to you with the expectation that such would be the case, we would do so. But we can't, for there's going to be a lot of unhappiness in the next twelve months.

A new decade has opened. The old one was called the "Troubled Thirties." And it looks as if we're entering the "Feculent Forties."

One strange aspect of this new year is that not so many people seem to be making resolutions. Maybe they've learned that they'll break them despite everything, or, perhaps, with times moving so quickly, they fear that the good resolutions of today will be the bad resolutions of tomorrow.

Happy New Year, fellow students. Be happy that so far you haven't had to turn your lights out at seven and sleep in the Kendall Square Station.

The fourth article in Mr. Corsa's weekly series **GETTING THE RIGHT JOB** will appear Friday, rather than today as originally scheduled.

## Book Exchange Closes Season

### Owners To Be Notified To Remove Their Books Before Mark-Down Sale

Forsaking slide rules for dusters during the biennial Book Exchange house cleaning in the T.C.A. office, a committee under Raymond F. Sullivan, '43, is clearing the shelves of all books which were left to be sold by that agency a year ago. In accordance with the usual procedure, persons concerned will be notified to recall the books or ask to have them forwarded; if no reply is received to the contrary, the Book Exchange will dispose of them as it sees fit.

This disposition may take the form of a mark-down sale, the proceeds of which would be used to pay for the Exchange's expenses incurred during the year's operations.

#### Books Donated to Ships

The remaining books will be sent to the American Library Bureau, an organization which makes up boxes of books to be used in the libraries of vessels plying the coastwise trade routes.

An important addition to the Tech Cabin on Lake Massapoag is the acquisition of six more mattresses through the benevolence of the Phi Beta Epsilon fraternity. Richard H. Haas, '43, Director of the Cabin, has announced that the accommodations of the Cabin have thus been increased

(Continued on Page 4)

*Shades of Galileo*

At Harvard recently an incident occurred which is indicative of the Harvard being. A Tech man and a Harvardian were discussing a rock-climbing trip on which the Tech man had gone. "—and when we got to the top," continued the Tech man, "we dropped stones into the quarry and timed their fall to discover how high we were."

"That would be rather hard, wouldn't it?" asked the son of Rheidhart.

"Not especially," was the reply. "Well," queried the dubious Harvard man, "you would have to know the weight of the stone, wouldn't you?"

## Hockey Team Wins Series At Lake Placid Tourney

### Tech Wins First Game Of Year When Lehigh Bows, 7-2; Blanchard Stands Out In Victory

After finishing an eminently successful vacation series of hockey games up at Lake Placid, during which Capt. Bill Cadogan's Beaver sextet won twice and lost once, Coach Owen is prepping his charges for an intensive drive to vacate the cellar birth of the New England Intercollegiate Hockey League. The Tech puckmen will inaugurate the drive Saturday against Middlebury away. Tech is heavily favored although the Scarlet and Grey will be playing on unfamiliar natural ice.

#### Trounce Lehigh

M.I.T. rang up its initial victory of the season at Lake Placid December 26th. Lehigh was trounced to the music of Beaver shillelaghs smacking seven goals past the hapless Lehigh goalie. Two Lehigh goals were tallied in the final stanza as Tech eased up and coasted in to the victory. Blanchard was easily the Scarlet and Grey standout tallying twice with no help, once on an assist from Cadogan and finally assisting Small in his goal. Capt. Bill Cadogan also was a star scoring twice in addition to his Blanchard assist. Waller rang up the remaining goal. Anderson and Hilton tallied for the opposition.

Because of warmish weather the outdoor skating at the Lake was of a negative quantity. The indoor rink was only used for games. Therefore M.I.T. had to go without practice. This was evident in the game with Colgate on the 27th. Colgate though not tremendously impressive slipped over a 9-1 win over the Beavers with Arnold saving a shutout when he

## Grappers Lose Close Contest To Wesleyan Team

### Capt. Carleton, Fettes, MacKenzie Win Matches As Others Edged

In their closest meet of the season the wrestlers lost to Wesleyan 17-9 at Middletown, Conn., on Friday, December 20. Captain John Carleton, and Sophomores, John Mackenzie and Bob Fettes, each won his event.

#### Matches Lost by Decisions

Seven out of the eight bouts were won or lost by decision only. Even in the last bout when Hugh Byfield met Garrison, the Intercollegiate Heavy-weight Champion of New England, Hugh stuck with it until the end and lost only by a decision. Other men taking part for Tech were Cy Kano, Warren Schwarzmann, and Dan Schaeffer. All matches were very close and the only fall was won by the Wesleyan light-weight against Kano.

The next opponent the matmen are to meet is B. U. at Tech on Saturday. Although no line up has been made, Coach Joe Rivers feels confident of a successful meet because, he said, the boys have had a vacation, are living right, and are therefore in good condition.

scored unassisted in the middle of the final stanza. The score does not give a true value of the relative strength of the two teams.

#### Beat St. Lawrence

The final day of the tourney saw Tech win a fine closely fought battle with St. Lawrence University 3-1. Tech was never in danger.

## Squashmen Win Over Vacation

### Racqueteers Defeat Both Stevens Tech And Purdue Fives

Two successive intercollegiate wins were the outcome of the vacation activities of the Technology squash team. On Monday, December 30, the team defeated Stevens Tech, 4-1, and on December 31, the home team defeated Purdue, 5-0. Highlighting the Stevens meet was the victory of Captain Phil Freeman of M.I.T. over Captain Art Arguedas of Stevens, thus climaxing a long-standing rivalry.

#### Freeman, Arguedas Rivalry

Both Freeman and Arguedas learned to play squash here at Tech under the tutelage of Coach Jack Summers. During his freshman year, Freeman defeated Arguedas for the Freshman Squash Trophy but the following year Arguedas won the five position on the varsity from Freeman.

#### Two Meets This Week

To date, the varsity has three wins and five losses. On Wednesday, the home team meets the Newton Y.M.C.A. at Newton and on Saturday the squad will meet Amherst at Amherst.

Following are the individual scores. In the Stevens meet: Sheetz of Technology over Siliman, three straight; Oszy of Technology over Hoffman, 3-1; Corney of Technology over Sandblom, 3-0; Marvinney of Stevens over Stouse, 3-0. In the Purdue meet: Freeman of Technology over Mann, 3-1; Corney of Technology over Goldstein, 3-0; Oszy of Technology over Adams, 3-2; Stouse of Technology over Macmillan, 3-1; Shaw of Technology over Smith, 3-0.

Earlier during the vacation, Freeman, Oszy, and Stouse of Tech entered the New York Invitation Intercollegiate Squash Tournament.

## Cardinal Hoop Quintet Faces Strong Brown Five

### Coach Levis Hands Out Cigars On Birth Of Son

Joe Levis, Technology's fencing coach and ex-Olympic star, is accepting congratulations on behalf of himself and his wife Yvonne because of an eight pound boy born to Mrs. Levis yesterday.

The Beaver foilsman are planning to celebrate the coach's happiness with a competition against Amherst Wednesday night.

## Swim Records Fall As Team Improves

Varsity swimmers are breaking Technology records and steadily improving, according to swimming coach, John Jarosh. In the first two varsity meets of the season, three records have been officially broken.

Bill Denhard has broken the Tech 50 yard free-style time and the 400 yard relay squad has broken the school record twice in two successive wins over the relay squads from Amherst and Harvard.

Practice is in full swing in anticipation of the two big meets scheduled for this weekend, the medley-relay time having been already unofficially improved. Trinity College will visit the new swimming pool Friday evening at 8:00 o'clock and Wesleyan will be guests on Saturday at 3:30 P.M. The freshman meet against Brockton will begin at 2:30 in the afternoon.

## Bruin Squad Averaging Over Six Feet, Has Won Five Straight Games Favored On Friday

Meeting their strongest opposition of the season, the Beaver basketball quintet will journey to Providence Friday evening to face a Brown squad averaging six feet, one inch.

The Cardinal and Grey enter the game with a record of two wins and the same number of losses. They are hoping to leave the game with a surplus of wins. Captain Howie Samuels has lost all effects of a leg injury which hindered him earlier in the season and expects to lead a team in top-notch condition into the fray on Friday.

#### Glick Scores

Last night in practice the team looked a little sloppy, but this was probably due to the long lay-off over the vacation. Tech's starting five men will be picked from among Artz, Glick, Marakas, Dolan, Whalen, Coe and Samuels. In last night's practice Glick was high scorer, but a team made up of second string men and alumni pressed the varsity five.

#### Brown Wins Five Straight

The Bruins from Providence have won their last five games and despite an early season loss to Harvard are one of the strongest teams in New England. Fisher, Padden, Wilson and Schiff are the mainstays of the team which is determined to repeat its last season victory over Tech. On the other hand, according to Captain Samuels, the men of McCarthy are determined to avenge the loss so that a close, hard-fought game is predicted.

### T.C.A. Work

*(Continued from Page 2)*

to make room for thirty-four overnight guests.

**Two Positions Open**

The Boy's Work Division of T.C.A. announced that there are two positions of club leaders available, one as leader of a group interested in model railways and a second, in explaining the intricacies of a new Ford V-8 engine donated to the Elizabeth Peabody House by the Ford Company for such work.

### New Year's Ball

*(Continued from Page 1)*

from the music of Ken Reeves to the music of the 5:15 Club's records.

**Elaborate Decorations**

Elaborate decorations of the traditional New Year's style were strewn all about the dance floor, with confetti and streamers so thick that the floor was a complete galaxy of color at the end of each dance. Noisemakers of all types were distributed at all the tables during dinner.

### Hobby Shop

*(Continued from Page 1)*

uary 13. All photographers are urged to enter their pictures before that date. Rules and entry blanks may be obtained at the shop, room 2-051.

Photos of all types are being accepted this year: equipment for making stroboscope pictures is available to anyone desiring to use it. The equipment includes two single flash units, one microphone and photocell trip, and one recently completed multiflash unit.

### Prizes for Winners

Cash prizes await the winners and all entries will be exhibited at the galleries of the Tech Photo Service. Judges this year are Professors Frederick G. Fasset, English department; Harold E. Edgerton, electrical engineering department; and John T. Rule.

### Dr. Schmitt

*(Continued from Page 1)*

don, England, and at the Kaiser Wilhelm Institute in Berlin.

**Head of Department at 36**

He was appointed assistant professor of Biology at Washington University in 1929 and associate professor in 1934. He was advanced to a full professor in 1938 and became head of the department of zoology in 1939.

### Catholic Chaplain Delivers 4th Talk

Father William Daly of the Holy Cross Cathedral of Boston and chaplain to the Technology Catholic Club, will deliver the fourth of a series of lectures on "Catholic Ethics" tomorrow evening from 5 to 6:30 in Room 10-275.

### Grippe Cases

*(Continued from Page 1)*

available beds. A new ward which will open Wednesday increases the bed capacity by eight. A corps of carpenters, under the direction of Mr. Albert V. Smith, Superintendent of Buildings and Power, working overtime made it possible for the ward to be completed far in advance of schedule.

### Preventative Measures Suggested

The Medical Department advises students to cover the nose and mouth when coughing and to report to the infirmary at the first symptom of a cold. Any student who is ill should not attempt to remain in his fraternity house or dormitory because of the danger of epidemic.

The infirmary also advises "that the fewest possible number of students visit patients in the infirmary and request that friends stay away as much as possible."

For a little more than a month and a half Father Daly has been chaplain of the Technology catholic group. The officers, according to custom, soon plan to invite the chaplain to dinner with them.

Plans for the Catholic Club's annual Charity Ball are moving forward with great speed. Scheduled for January 17 in the Morss Hall of Walker, this dance will attempt to provide some contribution to a worthwhile charity.

### The traveling-est man we know

THE ARROW STYLE SCOUT skips all over the world looking for new shirt ideas. The fruit of his journeying is right here on our shelves: the handsomest patterned shirts you ever set eyes on, perfectly tailored by Arrow. Come see them today.

# It happens everywhere— Chesterfields

give smokers what they want

It's the cooler better-tasting...milder cigarette

MARY JANE YEO and JO ANN DEAN of New York's Skating Hit "It Happens on Ice" at the Rockefeller Center Theatre

It's called the SMOKER'S cigarette... Chesterfield... because it's the one cigarette that gives you a COMPLETELY SATISFYING smoke. You try them and find them COOL and PLEASANT. You light one and find they really TASTE BETTER. You buy pack after pack and find they are MILDER.

Do you smoke the cigarette that Satisfies... it's the smoker's cigarette

When the game ends... pause and Turn to Refreshment

Two words describe ice-cold Coca-Cola... delicious and refreshing. Delicious, because it is always a pleasure to taste. Refreshing, because it leaves a delightful after-sense of refreshment. So when you pause throughout the day, make it the pause that refreshes with ice-cold Coca-Cola.

YOU TASTE ITS QUALITY
