C. E. Spencer Is Elected To Corporation

To Join Institute Board This Month; Will Serve Special Five Year Term

CAMBRIDGE, MASS., FRIDAY, JANUARY 10, 1941

Price Five Cents

C. E. Spencer has been elected to fill the life term of H. E. Pair, who died in November. Mr. Spencer was educated at Rutgers Preparatory School, New Brunswick, New Jersey and at Harvard University. Mr. Spencer was successfully associated with the National Bank of New Jersey for a number of years in New York, the National Bank of Commerce at Kansas City, and the Trust Company of America in New York.

Worked in Connecticut

He was appointed assistant treasurer and vice president of the Connecticut National Bank at Waterbury, Connecticut, in 1910, and served as vice president of that bank for seven years. From 1917 to 1920, Mr. Spencer served in the American Expeditionary Forces in France. In 1920 he was elected treasurer of the First National Bank of Boston, where he served until retiring from active business in 1940.

Being a man of diversified interests, Mr. Spencer has been active in many of the important civic and charitable organizations of Boston, including membership in the Boston Club, the Boston University Corporation, the New York Yacht Club, the Harvard Alumni Association, the Boston Committee of 200, and the Coolidge Club.

Mr. Spencer is a member of the Boston Board of Trade, and a director of the Boston Trust Company. He is a member of the New York Yacht Club and a member of the Harvard Alumni Association.

E. M. Rips Elected New A. S. U. Head

Student Union President

Succeeds Seth Levine

Aided By Daniel Miller

By W. C. K.

The election of E. M. Rips, A. S. U. president for 1941, was announced at the meeting of the Student Council last night. Mr. Rips, a junior in the College of Letters and Sciences, is a member of the A. S. U. executive committee for 1940-41.

Student Union activities will be handled by the new administration, Mr. Rips and his cabinet. The Student Council will act as an advisory body to the administration.

E. M. Rips was elected to the position of vice president of the college student union. He is a member of the A. S. U. executive committee for 1940-41, and is a member of the A. S. U. executive committee for 1940-41.

BRITAIN'S WAR AIMS

If the present war is a battle between two opposing cultures for the conquest of what was once the largest empire on earth, the cry that England should plainly "state her war aims" is idle chatter. Nor does it sound serious when those who are most directly concerned are really supposed that only territory and markets are the ultimate issues.

More to the point it would be to ask ourselves what will have to be done when the military dictatorship has been achieved.

Assuming what the majority of Americans believe to be the best possible outcome of the conflict, namely the defeat of the Nazi at home, we may ask and have the subse-

quent collapse of the Nazi regime in Ger-

many, we should be concerned about the results.

The answer is that whatever the outcome, whatever the final shape of the new social order will take...
B. U. Wrestling Match

Postponed To Thursday

It is understood that the request of the Boston University coaches, the wrestling team originally scheduled for this Saturday afternoon meet will be postponed until next Thursday evening. The match will be held in the Walker Memorial, as had been planned.

Fencing

To win, the Tech squad agreed to take advantage of the schedule, but because a number of factors made the match impossible.

Hockey Games

For Tonight At 8:00, Saturday At 3:30

To begin with, the Harvard team takes the ice at the Tech tonight at 8:00. Furthermore, there is an all-egg criterion for the men who are not expected to be too windy.

Hockey Against

Middlebury

Tech Opponent Enters With One Win And Four Loses

The remainder hockey will be in action for the first time in the year tomorrow afternoon in the Middlebury College at the United Military Academy, as arranged for the Athletic Association. The match will be played at 3:30 P.M. (noon today).

Fifty Attend Stereo-photography Demonstration

Third Dimension Photography Explained By Professor Rule

Our fifty interested students and faculty attended the Stereo-photography Lecture given by Professor John T. Smith of the Department of Graphics Wednesday in Room 615.

Dividing into three small groups, the talks, the demonstrations, and the stereo-photography, were reviewed and prospects for the course were discussed.

The highlight of the talk was a review of the three dimensional views which were obtained by the use of stereo-photography. The students were given the facts in full color; several objects were selected for Stereo-photography in their photography contest, and the development of single slide type. The manner as did the stereo-photography, prepared the students for the next ten weeks.

The program offered to students last included classroom and laboratory instruction in the use of stereo-photography and its practical applications. After a certain amount of exhibition, the stereo-photography designs were assigned to students for instruction in the elements of the designs.

Ten Students in Plane

Two weeks were assigned to the students for the instruction in the elements of the designs, with Kyung Pyo, D.R., who took the position of the instructor, the last afternoon. A total of eight hours of dual flight instruction was held for a total of 16 students. The instruction was well-organized, and the students were satisfied with the instruction. This new development is even more significant for the students who are interested in aviation.

As a Changed

The隍详解 announced that there would not be a continuation of the previous course in their photography section as he had previously stated. As a result, the students were disappointed with the program. The students for the cancellation requirement, the instructor, A. T., the instructor for the course, was transferred to the United States Air Force.

New rule requiring stereo-photography for the course was made by the committee to its members. The committee is composed of Professor Richard H. Smith, Charles R. Cooper, and Otto C. Keiper, all of the department of Aeronautical Engineering.

A. S. Civil Service To Hold Exams

Lessor and more students who expect to preside over the 1941 federal government. The purpose of the examination is to assess only those who are qualified for the position.

Examination for Junior Engineers has also been made for the benefit of the departments of the government. The examination will be held on February 24.

The purpose of the examination, being used for the third time, is to recruit college graduates from the junior professional and scientific positions in the federal government. Requiring an examination, the problem offered will be for physics, chemistry, mathematics, geology, and meteorology.

Examination for Junior Engineers is also made for an examination of the students who have not completed three years of college work by June 1, 1941. Applications must be on file with the Washington government before February 24.

Appliances forms are available in the office of the Office of the President in Room 121.

The examinations will probably be given about the middle of February.
