Solenos To Act
On Elections Of Activities
William S. Mott, '41
Rewords First Motion
At Yesterday's Meeting

At yesterday's meeting of the Executive Committee, a discussion of class A activities will have to be submitted to the Executive Committee for approval. After discussion, between the members of the Executive Committee, it was decided to hold a meeting of the Executive Committee at the next meeting, to which will be invited a representative from the Institute Committee if such elections should be found objectionable. This action was taken because it involved a change in the constitution of the Institute Committee.

Planning Massachusetts
At yesterday's meeting Mott, who is to be the first person to take a formal examination, was invited to make recommendations to the Institute Committees, which were organized last week. Examination is to be given to the Institute Committees if such elections should be found objectionable. This action was taken because it involved a change in the constitution of the Institute Committee.

Examination is to be given to the Institute Committees if such elections should be found objectionable. This action was taken because it involved a change in the constitution of the Institute Committee.
ONE WEEK EARLIER, PLEASE!!!

Before the start of each term the Institute publishes a bulletin which contains important information pertaining to the new semester. This bulletin lists the books and home work assignments for each course and is of interest to all students. In the past this publication has been available to students about one week before registration day, and publication has been available to students that cared for during the influenza epidemic of 1918 before our Infirmary was established. To achieve this, all of the available facilities had to be thrown open to every student. A new addition which was already in the process of construction was rushed to completion long before the usual time of fall recess. To provide Buildings and Power, and at the height of the epidemic, the William Emerson room was converted into an emergency hospital.

Every attempt to keep the grippe from becoming a general epidemic was made. Visitors were prohibited and only grippe cases were allowed to remain on campus for any length of time. In addition, letters were sent to all the fraternal and sorority groups and an even greater emphasis was made on the seriousness of the affair and precautions they could take to safeguard themselves.

We wish to take this occasion to express publicly to the Infirmary the thanks of the student body for a job well done.

LOOK OUT, DARTMOUTH

We feel that Technology is as good if not far superior, than any other college in this world. We realize that there are fighting words, and we are ready to stand behind them, be it by sending the Voo Doo football team out to defend our honor on the field of battle, or better still, by having a carnival as stupendous and as glorious as the all-famed Dartmouth Winter Carnival is cracked up to be.

It's snowing, snowing pretty white snow, and if the past few months are any judge, it will probably snow, snowing pretty white snow, a great deal more before Spring and a young man's tennis blossoms forth consequently. We contend that in spite of the cold weather, mid-year exam's, and other similar proponents of Old Man Gloom, there is a spirit in the room that will make us face the first of next term. Plans for the forth coming meeting of the L.E.N., St. Valentine's Day Dance were discussed at the last meeting and a new twist to it these days. Found out that "Tell me billet-doux, "Tell me your love letter" is plenty of room and an even greater demand for a carnival, A WINTER CARNIVAL, NO LESS.

Should all this snow go to waste without some outdoor events of a good nature? Can we continue to enjoy some of our outdoor activities here at Technology right after term vaca-

tion when everybody could get together in different sports and get our hands dirty? Can this vaca-
tion be the beginning of a new whole-

time tradition at the Institute with the whole student body participating, and who could sponsor it more logically than the Outing Club?

Recently the Outing Club has de-
cided to sponsor a recognition of the Institute Committee. If it could provide Technology each year with a week-end of merriment in the way of a winter carnival I think it would not only be a great sport on the part of the students, but it would be a real treat for the student body as a whole.

TO A JOB WELL DONE

According to the latest Infirmary reports, the current grippe epidemic has passed the crisis and is now abating. Therefore, while the Infirmary has been crowded to the breaking point, we are in the process of drawing an easier breath, we feel that it is time that some sort of thanksgiving be given the Infirmary for the efficient and or-
derly manner in which it met the situation.

A record number of cases was handled after the Christmas vacation and the number housed in the Infirmary reached an all-time high. The total number sick approached that cared for during the influenza epidemic

Hockey Sextet Loses 9 to 2

Lack of Reserves Cause Of Defeat To Northeastern

Still handicapped by a lack of reserve players, the traditional and grey-haired sextet surrendered to a young and eager University squad by a 9 to 2 score last Tuesday evening. The Boston University sextet, made up of old time veterans, which returned once more to the middle of the game was never in the lead.

The play of the first period was even, with the undergraduates leading on at the front. Northeastern made a slight gain only to be wiped out on the power play at the 19 minute mark, when Whicher killed off a potential winning. Northeastern had a chance for another goal but failed to take advantage of the man advantage.

The second period was more one-sided with the Tech sextet holding the upper hand in all the pressure they could command and with the regular players finding a way to keep the Blues within range.

Lack of Reserves

But the last period saw the first Sextet from Boston and Grey Unable to hold the man advantage off with the game. Tech played a consistent game only to be stymied each time they would think they were winning. The Blues are not a team to be written off as they have shown in the past that they are a team to be reckoned with in the Beanpot.

Bowdoin Fencers, In Flutie's Clutches, Postpone Duels

Swordsmen Prepare

To Invade Boston U.

Saturday At Two

An interesting duel will be witnessed tomorrow evening in the field of fencing between Bowdoin College and Tech which was to have taken place tonight. The match was postponed by the medical department at Bowdoin which has ordered the suspension of all intercollegiate sports activities on the Bowdoin campus.

The match scheduled for Saturday with Boston University will, however, be held according to an announcement made last night byuaux Charles R. Stig, 42, a U. S. Navy Hospital-Military Memorial gym will be open to the men at all times and the fencing instructors with the Bowdoin fencing team will be available to assist the Tech fencers.

Captain Ray Krieger has been named skipper of the Blues. The Bowdoin fencing team has been one of the best in the country and have shown a marked improvement in the past few weeks.

The mainstay of the team will be Captain Charles S. Butt, '41, Richard Adams, '42, Robert W. Blake, '41, and Rich Laundry, '43.

The only requirement is that those fencing in the same weight class be within 10 pounds of each other. The mainstays of the team will be the captain and the three other members.

Epidemic Slows As Bed Cases Drop To 39
Dr. Lancaster Feels Trend General Is Boost in Boston Also

The epidemic flu is on the decline, according to a statement made last night to the Associated Press by Dr. J. I. Lancaster, the Medical Director at the Institute. The number of cases continues to fall, and the influenza is not expected to return. Dr. Lancaster made the following statement: "There are beds in the infirmary for every patient who needs them, and the epidemic is passing. I believe that this is true and that we will soon return to normal." The doctor feels that the epidemic is over and that the Institute is well prepared to handle any further cases.

Inst. Committee Awards $2,200 to Norway
The Institute Committee, which meets weekly, held a meeting yesterday to award $2,200 to Norway. The award was given to a group of Norwegian scientists who have made significant contributions to the field of aeronautics. The award was made in recognition of their efforts in developing new technologies and advancing the field of aeronautics.

$100 And Medal Offered Senior In Competition
James Means Price Will Be Awarded For Aeronautical Thesis
A chance to win a prize of $100 is offered to seniors in competition. Students are encouraged to submit their theses on the subject of aeronautics. The thesis must be submitted by June of this year and is judged by a panel of experts in the field of aeronautics. The winner will receive a $100 and a medal.

Choice of this honor was made by a committee consisting of the head of the aeronautical department and two members of the faculty. The award is intended to encourage students to pursue their studies in aeronautics.

The competition is open to all seniors majoring in aeronautics. The award will be presented at the Commencement exercises in June.
