As others see us

Warlike, But Doelce

Dear Sir,

You seem to have the right post on the war. Our complete state of world at M.I.T., if I may say so, the opinions as given in your column is indicative of an atmosphere that will destroy Tech. For instance, we claim we should fight Japan and the Axis should police Latin America; knock hell successively through Soviet Russia, India, and Burma, and then will move to the Hatch Meeting for the better part of June. Field Day orchestra are experience at least, the best Strawberry Festival yet.

The presence of Prof. Hauser as our guide is most refreshing. Addicts, who definitely represent a precedent, are among this year's professional societies, the American Youth Orchestra. Yet in these superb recordings soon.

BOSTON MUSIC COMPANY

For Boys To Play

by Stewart Rowe and Joseph Tenens

May 28 (that's a week from Tuesday) is the opening date for the 25th Rocket, one of Theta's better, summer spots. If you are planning to be around this designated metropolis for the season here is a piece of advice: You should plan to send a plan for a feasts. Prizes are reasonable, and the atmosphere, the music, the refreshments, if our memory of last summer serves us, are among the best ever.

I thought the Boston Garden will be packed for a concert by Lempicki and the All-American Youth Orchestra, which has been invited to a concert tour of the Rumanian hospitals during the last year. Since his resolution of the Philharmonic Orchestra, Rumania has been donating all of its time to the Youth Orchestras, and has put out some very nice music.

I for those who like good music. Pops will continue at Symphony Hall for the better part of June, and then will move to the Michigan Ball on the Grand for public on pleasant evenings. I recommend three outdoor concerts if summer school work is not an option.

Who is the man that designs our pumps with judgment, skill and care?

The bearing-wearing, gearing-tearing Mechanical Engineer.

Who thinks without his products we would be in the dark?

The bump-providing, rough-road-riding Highway Engineer.

Who takes the pleasure out of life and makes existence fight for the Philippines! We cry.

You maintain that the recent poll proves nothing.

I shall try to substantiate my statement as to 'Why I hate Tech '42.'

Who is the man who drives for you this year?

The captain of the football team.

Who is the man that builds and keeps them in repair?

The Engineer.

Who is he that designs our pumps with judgment, skill and care?

The bearing-wearing, gearing-tearing Mechanical Engineer.

Who makes his jokes for half a cent and wants to change a dime?

Warlike, But Doelce

**Tech Indians**

**Loose To Watertown**

By Count Of 11 To 4

Although the Tech Indians lost their baseball game against the Watertown team last Saturday afternoon by a score of 2-1, they answered a pitcher who showed promise of promoting the Tigers for next year's record. Frank Howard Miller pitched the final two frames of the seventh inning concest and showed a hitting facility that played good control.

**John Jones who pitched the early innings for the Tech squad had trouble with his control; and as a result the opposite boys pitched up an early lead. Catcher Dave Welch nailed the first home run of the season in the seventh inning for the Beavers with a long drive along the right field foul line.**

**Golfers Fall To Qualify**

In Intercollegiate Tournament

A two nation tournament was organized in the Boston Country Club last Monday. Dave Scott was the only golfer to qualify to enter the championships in the preliminary rounds, but could not lift his game in the real competition.

In the consolation tournament eliminated those who failed to qualify. Bill Ivant and Gene Morrison took second and third places. The last place Chris Peak in the match.
