TENTATIVE SPEED-UP APPROVED
$3305 Budget Allotted
For Junior Weekend
By Institute Committee

Almost Record Budget
For '43 Junior Prom
Outlasted Night
By Prexy Chailderhose

One of the largest chunks in the history of Technology was announced by the Junior Prom Committee last night at the Institute Committee meeting. The record budget of $3305 exceeds the expenditure in 1940 and income to date of $3180, which was approved by the Institute Committee.

The expansion was announced by S. Rich. Childerhose, Junior class presi
dent, and Chairman of the Junior Prom Committee. The proposed expansion includes many additions, as well as an increase in the entertainment budget.

Spring Elections will be held on Wednesday, March 25, this year, a week after the date originally scheduled. At this time, the Class of 1942 will elect a permanent president and secre
tary, and the lower classes will each elect a president, vice
corporation today in approving a faculty recommendation to this effect. The committee of the lower classes will soon be announced.

To encourage this decision President Kurau T. Compton emphasized the great difference between the significance of this problem to the liberal arts colleges and the technological colleges and the danger less certain as the industry is developed. The battle is on.

It is the technical affiar on a gigantic scale, demanding many more engineers and technicians of the highest calibre. It is the battle of technical equipment and for its operation by the trained and skilled technicians. It is the battle of minds and for the minds of thousands of the field, as well as the output of new engineers and for tens of thousands, perhaps several hundred thousand, of new technicians. Many of these men will be of the highest calibre, the most advanced aspects of their professional fields.

The challenge to the engineering and scientific schools. The principal ob

This is the old adage - when it has been reviewed in his mind the number of times in past years when, because of cold, they must attend school; because of snow, and widespread absenteeism; or because of sickness, they are to cover the fields of physical, chemical, and biological sciences. Not only will these ad
corporation, and the corporation it is ex
declaring that the Institute is entitled to the use of the building at the time. Smoke alarm fire systems will be installed in the dormitory, and the corporation it is expected that the income will equal the budget allowance of $3180.

The Institute is powerless against such a threat, for the reason that even though such action is made it may be necessary that some of the students who drive to school across the river continue, and the possibility of walk-off change until the situation is remedied. Students and staff outside the Boston area should have first chance at available parking facilities.

A BOUQUET OF ORCHIDS

Thanks to the efforts of the Registrar and Treasurer, the 42-43 will have an opportunity to have a weekend of grace before they enter the final home stretch of the program. Although this is far from the usual term vacation, it is a great gain in light of the scheduled Senior Registration Day Jan 31.

While this change is in itself of great delight to the vast majority of the Sophomores, the spirit in which the change was made is more than a little ungracious to the undergraduates body. To us it is another indication of the Institute administration's ability to view the problems of the undergraduates through the eyes of the student.

Editor, The Tech

Dear Sir:

After several changes in our program, we find that with a little additional effort it will be possible to arrange an optional registration day for the Sophomore as requested by "A Member of the Class of 1942" in the last issue of The Tech.

Under this new arrangement, registrations will be permitted to register for the second term in the middle of examination week, thereby making it unnecessary for them to remain at school during the following week-end. These special arrangements will be made between 10 and 12 a.m. on Wednesday 20th and 9 and 11 a.m. on Thursday 21st.

The Registrar's Office and the Registrar's Office have found it difficult to change the registration date. As a matter of fact those Sophomores who have paid their fees by 2:00 P.M., Tuesday, January 27, may obtain their final registration forms from the Registrar Office from 10:00 A.M. to 1:00 P.M. Wednesday, January 28th.

These special arrangements are made because of the fact that all Sophomores will have only one day of vacation during the second term.

Editor, The Tech.

Dear Sir:

The Technique is in need of freshness! The present freshman staff is doing an excellent job but with the removal of work to be done, is becoming a little weak. We need more men.

This year the Technique is scheduled to publish on a daily basis and to be entirely prepared by the junior staff. This means that three months' worth of work must be done in January. Both Junior and Sophomore staffs are too small to handle the work. Therefore changes must be made on the staff. Any man who is interested in the staff will be welcome.

Sincerely yours,

1. C. MacKINNON, Registrar

TIS A-WALKING WE MAY GO

An epidemic of illness hit the Tech Wednesday afternoon. An epidemic in the form of yellow fever hit the cars along Memorial Drive. TheSelect Committee of Senior Life Presidency, as well as several students from the Tech's Health Commission, have been posted and apparently the MDC intends to keep that area cleared of cars.

In the wake of this new parking restrictions that have been made by the Institute concerning parking behind the main buildings and along Building 2 and 6, this new restric-

Dr. W. H. Dow (Continued from Page 1)

graduated from the University of Illinois and took his doctorate in science by the Michigan College of Mining and Technology in 1939. He joined the staff of his company as a chem- engi neer in 1918, and has beena director since 1922. He was appointed assistant general manager in 1928 and became president and general manager in 1939 and is the president of the Dow-Chem- Comany and of the Midland Chemical Corporation.

Dr. Dow is a member of the ad- visory committee of the Of- ficial Procurement Districts of the Chemical Warfare Service, U.S.A.

Cold Control

provides intelligent cooperation of all students and faculty members on the basis of a knowledge of the actual facts relating to colds. Intel- ligence is here; cooperation is part of the Tech tradition; and this is the following article will present a minimum of the essential facts.

If You Don't Want a Cold

Concerning the transmission of colds and the second side of the cold, and don't desire one, consider these important hints:

1) Most colds—certainly the severe, epidemic kind—develop because you have, directly or indirectly, picked up a family of germs from someone with the cold. (The germs may be permanent resi- stance within you, on the other hand, waiting until you are in bed with lowered resistance before attacking you.)

2) Direct methods of "pick-up" in- clude:
   a)inhaling some of the cloud of germs picked droplets which sur- round every cough, sneeze or sneeze, then catching or uting your dis- eases to filter out as many droplets as possible. This method is the most common, by far.
   b)kissing someone who has a cold, or any contact with people who do.

3) Indirect methods of "pick-up" include:
   a) Using cold-sufferers' articles, such as handkerchiefs, tissues, pencils, drinking glasses, etc.
   b) Putting contaminated fingers, fingernails, or any object with germ laden hands, on your face, e.g., when putting on or against the lips.
   c) Any article contaminated by many people (door-knobs, stair rails, etc.) is probably contaminated with cold germs. Remember washing of hands is well worthwhile.
   d) Cold germs, even from the same person, may pass in common, if you don't develop a cold the first time someone with a cold touches you, you don't consider him harmful.

If You Have a Cold

1) If you have a cold and are considerably sick, allow yourself to be waited on to keep it for yourself,

2) Avoid excitement, especially when speaking loudly, yawning, or sneezing. Avoid being too hot or too cold. Let your room be at a comfort temperature of about 65° F. from either.

3) The polite tradition of cover- ing your mouth and nose with a cloth when you sneeze or when your fingers is useless, as far as protecting those in your vicinity is concerned.

4) Don't touch or use other per- son's articles, unless they may come in contact. Keep articles separate.

5) Keep your hands away from your nose and mouth as much as possible, and wash them after any contact.

6) If your nose is discharging, use of a pocketful of disposable tissues is preferable to carrying a handkerchief, which you should throw away as soon as possible.

7) Remember that everyone you meet is your mercy, so above all BE CONSIDERATE!
