Many people have raised an ob-
American schools to serve the nation with greater efficiency seems to be the wisest suggestion since collegiate speed-up plans came into style.

Conant recommends an extensive survey of the country's personnel needs; college education for hand-picked students sponsored by the government; and special training to supply men in fields where they are needed. The survey of our personnel needs and special training in occupations where work- ers are few would necessarily remove any scarcity of labor problems which we face today. Government subsidization of college expenses would ease the temptation before some of the poorer universities to accelerate their schedules and consequently to swell their enrollment and insure a steady income. In spite of the ill effects such a program may have upon the students and their education, these institutions have been unable to find an alternative.

A unified, comprehensive plan of attack such as Conant's and a wise, cautious operation of that plan could very easily be young America's most valuable weapon in this second world catastrophe.

THANKS AND NO THANKS

In the January 17 edition of Collier's, an article deploring the world-wide coaching of Vannevar Bush, our former vice-president, referred to the Massachusetts Institute of Technology as a "doctorally unusually barren of humor." This statement, we naturally and justifiably take offense.

Let the author come to Cambridge to take in any of our big dances, the Junior Prom, Weekend, or Senior Week, and see if he doesn't like our brand of humor. Without it, Technology students would break under the heavy scholastic strain. We thank Conlier's for the compliments they paid to a former Tech man, but we can doubt their lack of appreciation of Tech humor.

THE READER SPEAKS

Looking Forward To Peace

Editor, The Tech

Dear Sir:

In Tuesday's Post, there appeared a letter which I believe is one of the most interesting that has appeared in the Tech for some time. Entitled "Forward to Peace," it was written by a member of the class of '44.

The letter expressed the desire of all of us to think about the outcome, always with final victory in mind. The writer then went on to say: "As a member of the class of '44, I believe that a period of prematurity is no longer premature to the point of such a plan. I believe that we are one of the healthiest indications of Tech humor.

We can doubt the author's lack of appreciation of Tech humor.

The phone plays a vital role in army communications. So the Bell System is helping to school Signal Corps men and women of their duties, operation and maintenance. So the Bell System people are doing in this national crisis.

Through the country, Bell System people are wholeheartedly cooperating in the drive for victory. To furnish and serve their high caliber, these real satisfaction is a difficult job well done.

university quintet. The Brun.

will probably start, when, if Howard, the Brun

will be eager to get back on the court for the remain.

of the season.

The Beavers starting lineup will probably be the same team which began the game against Williams in the last minute of the game, as Johnnie Kane and Jerry Coe will start in the forward spots, while Captains Ernie Artz and Jack Whelan will fill the other two spots. The injured ankle at Monday's practice, will probably be sufficiently recovered to start in the pivot spot. Red Dolan, who had been starting regularly, is considered un

able to practice regularly and will probably be admitted consideration at avocedence.

Defeated Last Year
