THREE DOLLARS' WORTH OF SAILING

Spring is officially here and with its arrival comes the annual debate upon the feasibility of joining the Nautical Association for those who neglected to join last fall. By paying his dues now, a student signifies his intentions of entering into the various activities of the Nautical Association. He will be given the privilege of using one of the half-dozen dinghies, provided that he has passed the necessary requirements.

While the experience of joining a new sailing experience must undergo a waiting period of about two weeks during which he is initiated into the rules of the yachting profession, and must assimilate the necessary knowledge of winds, waves, and currents before he will be trustworthy and safe. The cost for the privilege of using one of the half-dozen dinghies, provided that he has passed the necessary requirements.

A simple solution to the problem would be a reorganized registration program. The current system has many defects, but the most serious one is that the various departments, branch offices, and sales representatives have no way of knowing when a student has paid his dues or when he has used the dinghy. To overcome this, it is suggested that each student should sign a card which will be kept in the office. The card should state the student's name, the amount of his dues, the date on which the dues were paid, and the date on which the dinghy was used. This will simplify the procedure and make it easier for the officers to keep track of the students' activities.

The Nautical Association is an organization which provides its members with the opportunity to gain valuable experience in sailing and boating. It is open to students of all classes and is sponsored by the U.S. Navy. The members are required to pay a fee, which is used to pay for the cost of running the organization and to purchase equipment for the members.

INFORMATION PLEASE

With Technology now operating under an accelerated schedule, there have been many changes made about which the students, due to some oversight, know very little. There are many questions with regard to changed schedules, courses, requirements, and other policies which could be clarified very quickly if the student knew what sources to consult.

With this in mind, Tech, in cooperation with Institute authorities, has arranged to handle all of these puzzling questions through a Tech Editor column. In the past it has been the policy of Tech to print all signed letters, anonymously if desired, in this column. However, certain technical questions will be answered in a more informal manner. In each case the proper person will be consulted and the answer will be finally checked with the News Service before it is given out. Where it is impossible to do this, the question will be referred to the Tech Editor column. In the past it has been the practice of Tech to print all signed letters, anonymously if desired, in this column. However, certain technical questions will be answered in a more informal manner.

The Poisons Taken Hold...

Circulated day after day, worming and spreading, do the dastardly poisons of the frugivorous, seed-eating, vegetable-eating, and flesh-eating animals. These poisons are digested and passed on through the bodies of the animals to their offspring. The poisons are then passed on to other animals and to plants.

For most evil, the Jews were to blame. Blame is had? Labor is to blame. The Jews are to blame. Is it ever to blame? War is Hell! The British are to blame. Everybody was to blame except Hitler, the common enemy who would crush them all, and national unity was preserved by setting group against group.

Slowly, Hitler tried to deaden the combustion spirits of mass soldier by making him distrust his British ally. When the French first crossed into German territory, the French retired without firing a shot, leaving behind posters saying that they had parted in peace. When French soldiers were swayed over the German lines, the German stood up and waved handkerchiefs. Hitler convinced the French that the war would be won without fighting. "Deserter" would triumph! How often have we in America encountered that sort of thinking?

Invasion Tactics

Hitler invades only when his ground troops have been well paid. During actual invasion, the strategy of terror creates unbreakable contention and panic among civilians and soldiers. During the battle of France, German bombs and planes were equipped with streaming arrows and whistles, turning the battlefield into an inferno of sound. Stuffing French wave lengths, Germans broadcast false warnings to inhabitants of villages,巴黎人, "A victory for the French nearest populations on the roads, and capturing them so that they would be of no use to the French."

Stuffing French wave lengths, Germans broadcast false warnings to inhabitants of villages and cities,巴黎人, "A victory for the French nearest populations on the roads, and capturing them so that they would be of no use to the French."
Beaver Lacrosse Team Smashes Boston Club, Faces Tufts Tomorrow

Stickmen Win

Opener 5-2
At Medford

In the inauguration of their current season, the varsity lacrosse unit overwhelmed a strong but un-accustomed Boston College Club with a decisive 5-2 tally. The Tufts eleven bested the same team 8-2 a few weeks ago in a practice session. This furnished a close, hard-fought game with Tufts tomorrow at 3:30.

The Boston club receives none of the credit, for they were playing for the first time on a full sized field. However, the Bears had the decided advantage of ten minutes in opposition to the opponent's two.

The following five men each succeeded in shooting the ball into the enemy's net: Pete Bibby, Gene Schnell, Bill Kennedy, Al Heckel, and Ralph Leader.

The starting lineup is as follows:

Wally Jeson
Goal
Bob Green
P, C
Doug Peet
Infield
Pete Bibby
Centerfield
Bill Kennedy
Left A
Al Heckel
Right A
Ralph Leader

This game commenced a full schedule of games every Tuesday and Saturday throughout this season. The first game will be played on Wednesday this week will be a "close, hard-fought game" in opposition to Medford.

Last year the Tufts defeated the Tech boys 5-4. With a better class of games every week.

Boat Racing

First Crew Regatta Approaches

The crew is entering the final phase of their training. The annual April weather is very conducive to rowing. This late training is the most intensive and strenuous, for the crew must be ready for the River Cup Regatta on April 30. The entries will be from Harvard Stadium, the two varsity boats ready, while at the same time the O.A.M.S. downed the Fri Lambda Flota by a 17:11 score. On Saturday the Dukes shut out the Theta Xi team, 14:4, while Sigma Nu overcame the Beta's, 27:11. Among the dorm teams, senior A took the measure of Bates, 30:14, while senior B defeated Hayden. The remaining game between Phil Kappa Sigma and Theta Chi was postponed and will be played sometime during this week.

The remainder of the first round will be completed this week-end if possible, and the second round started on Sunday. Sunday's men's games will include Wood vs. Goodall, Walz vs. Phi Mu Delta, Monroe vs. Senior C, Pi Gamma Delta vs. Lambda Chi, Alpha Kappa Sigma vs. Freshman B, Kappa vs. Phi Delta Theta, Sigma Chi vs. A.T.O. and B.A.E. varsity teams.

The Delta crew are all urged to try to play their games on Wednesday, since any scheduled or before if possible because of the necessity of completing the tournaments before the seniors graduate.

In the Beaver key volleyball tournament only one contest was played over the week-end against

Informal Racing And Shore School Prepare Sailors

With informal racing, shore school, and continuous practice for college races, the varsity association is providing sport for several score students and their professors.

Many are practicing for the races scheduled soon.

The Intercollegiate racing will begin on April 1st at Brown, where the team will try for the Sharpe Trophy. The following day, part of the crew will be at Brown for the New England Association Member Championships, while another section will head up the river to Harvard to race for the Owen Trophy.

The hardships which the candidates must face are numerous, but with the instruction given, the achievements come fast. Qualify for a place on the crew; a student will, pass several knot tests, have a working knowledge of the dinghies, of the weather, and of piloting rules. A man usually becomes a crewman after about two weeks of consistent work and sailing. Later he becomes a helmsman, and qualified to take out a boat alone, and eventually, he becomes a boatswain.

New Sloop

In addition to their fleet of fifty dinghies, the sailors now have four Lawley Lobelia sloops. The fourth vessel has recently been named by the Class of 1917 as part of their class gift, and the sloop will probably be christened as the "1917." The Lawleys are 24 feet in length, sleek, and have been painted white. The other three are 27 feet long, 17-11 count. On Saturday the seniors graduate.
