Senior Ball Is Final Function of Senior Week

Class of 1942 Dresses to Music at Hotel Statler Thursday Night

Concluding their long week-end of festivities, the Class of 1942 dressed to music at the Hotel Statler Thursday night and continued into the early hours of Friday morning.

The dress event was highlighted by the selection of Lawrence B. Johnson, '42, as the new captain of the Statler College football team. Colonel W. F. Bryant, who has been associated with the Statler College, presented Mr. Johnson with the captain's letter. Mr. Johnson is a member of the Class of 1943 and has been a member of the Statler College football team for three years.

In addition to the Statler College football team, the Statler College band, under the direction of Mr. Johnson, also participated in the dress event. The band played a variety of songs, including "Yankee Doodle," "The Star-Spangled Banner," and "The Battle Hymn of the Republic.

Governor Talks At Exercises

Tells Graduates This Is Their War

Levett Hamilton, Governor of Massachusetts, gave the commencement address at the Baccalaureate Services for the Class of 1942, held in Moriss Hall of Walker Memorial.

Governor Hamilton emphasized the role of the educated man in this war. "The type of struggle that you face," he said, "is not a struggle that you can shirk. It is a struggle that you must engage. It is a struggle that you cannot avoid." Governor Hamilton, who is a native of Massachusetts, has been associated with the Statler College for many years.

Chemistry Head Resigns Position

A.C.S. To Give Him Special Course Honors

Dr. Frederick O. Keesey, head of the department of chemistry, has temporarily relinquished his duties in order to accept a special post of importance. Keesey, who has been associated with the Statler College for many years, has accepted the position of research associate in the United States Office of Scientific Research and Development. Keesey has been a member of the Statler College chemistry department since 1915 and has been in charge of undergraduate instruction in chemistry since 1931. Keesey is a native of Massachusetts and has been associated with the Statler College for many years.

Keesey has long been active in the American Chemical Society, and has served as president of the Eastern Section of the American Chemical Society for "distinguished achievements in chemistry." Keesey has also been a member of the American Chemical Society for "distinguished achievements in chemistry." Keesey has also been a member of the American Chemical Society for "distinguished achievements in chemistry." Keesey has also been a member of the American Chemical Society for "distinguished achievements in chemistry." Keesey has also been a member of the American Chemical Society for "distinguished achievements in chemistry."
Cosmic Rays

We have once again caught the imagination of many people by the announcement of Dr. Robert A. Millikan and William H. Bragg of the California Institute of Technology. Cosmic rays, which these gentlemen have been investigating, are high energy photons, or gamma rays, which have been detected by a cloud chamber in the stratosphere. The rays are believed to be produced by a cosmic ray generator, which is located in the stratosphere.

Quarantined

Northampton is soon to deliver the first great wave of the epidemic that will gently glide hands of Harvard, spare the easy-sitting and slop Harvard Crimson. Perhaps a hundred students who have been only last week released from an extended period of quarantine—mumps and scarlet fever, which swept Northampton, has apparently run its course in the total social isolation. News of the virus has been kept from the townsfolk through the girls, who according to Dr. Compton's instructions, form a "Committee to Liberate Smith from an Infected Community." In a letter to the Harvard Judicial Committee, Dr. Compton says: "We are convinced that the whole country will be not only happy to accept our precautions, but 'more will be to the taste.'"

Annual Reversal

of the college curriculum has been commenced for the enrollment of the Wellesley girls. President Mather has let it be known in a plan of the consideration of the entire college-union. This will allow for free thought and development of the students, as well as the reconstruction of the battlesworn earth into a harmonious league of nations with the aid of another golden age of science.

The Junior's Summer Problem

When the accelerated schedule for Juniors was announced earlier in the year, several problems arose which caused worry and consternation among both the administration and the student body. Careful planning and thought, however, have brought about a solution to many of these problems. The means of financing their Senior year after having been deprived of a summer's earnings has been provided for the Juniors by an expanded scholarship and loan policy on the part of the Institute. Beaver Key has decided to organize intramural sports during the summer to furnish necessary competitive exercise. Fraternity business managers have worked out budgets to carry their Junior brother through the summer. As a result, as well as the reconstruction of the battlesworn earth into a harmonious league of nations with the aid of another golden age of science.

Dean C. Prescott, Expresses Optimism On War, Dr. K.T. Compton Charges Graduates With Duties

Dr. Compton told the students that the victory can be achieved by being cooped in for months, "the defense program is a plateau" of unchanging cosmic rays. "Today, it seems to me that there is a 'Committee to Liberate Smith from an Infected Community." In a letter to the Harvard Judicial Committee, Dr. Compton says: "We are convinced that the whole country will be not only happy to accept our precautions, but 'more will be to the taste.'"

Beaver Key Track Meet At Briggs Field, May 10
The annual Beaver Key track meet will be held at 10:30 A.M. on Sunday, May 10, 1942, at Briggs Field. It was felt that, although this is rather early in the morning, it would be better to hold the meet on a Sunday morning rather than on a Sunday afternoon right after May Day festivities.

The events to be run off are in order: 100, 880, medley relay (118-130-220-440), high jump, broad jump, 12 lb. shot put, and potato race (8 potatoes—each yard).

No man on or off freshman track team, no man who is eligible for his benefit and in the meeting. "Once" shall have the power to make final decisions concerning the physical fitness and eligibility of every contestant.

All those who contemplate entering the meet are urged to get out to Briggs Field and practice.凡者 will be there to see all contestants get into shape.

Lacrossemen Lose In Williams Game; End Seasons V.H.
A lifeless Beaver lacrosse team received an eleven to two shellacking at the hands of Williams last Saturday afternoon in a game played on the Ephmen's home ground. This loss is the third consecutive defeat and leaves the team with a record of three games won as against four games lost.

Tomorrow's game against New Hampshire will be played on Briggs Field is the last game of the season and a win is necessarily necessary to retire the team with a fifty percent record.

The summary of the Williams game is as follows: Williams (11) scored 11 goals, (4) assists, (17) turnovers, (7) forfet. The summary of the New Hampshire game is as follows: New Hampshire (11) (1) scored 11 goals, (4) assists, (17) turnovers, (7) forfet.

The Tech Needs 2 Men To Deliver Newspapers
The Tech needs two men to distribute newspapers to professors and freshmen on Tuesdays and Fridays. Interested students may contact the circulation manager in the Student Building, 303 Walker Memorial.

Tech Sailors Win On Seekonk
Sarah Lawrence Crew Compiles Most Points
The annual women's varsity college sailing regatta was won by Tech sailors last Saturday, April 30, on the Seekonk at Providence, with the Brown University Yacht Club acting as host.

The second division crew from Sarah Lawrence was the best of the first, making 36 points in all. This crew won four races and was third in another.

Tech crews led the first division with 36 points, ranked fourth in the second division with 52, and pulled up a total of 56 points to lead the second place Sarah Lawrence sailors who obtained 32 points.

Williams got 46 points, Radcliffe 44, Connecticut College for Women and Pembroke 36.

T.C.A. A Forms Fellowship Group Inter-Race Council For the first time

With the purpose of binding to gather all races, the Technology Council formed an Inter-Race Commission and has appointed John M. Wilson, director of the commission. The first meeting of the group will be held Tuesday evening, April 28, 3:00 P.M., in Tyler Lounge.

"A belief that world peace can be achieved requires the cooperation of students as such a fellowship would confer enormous benefits. In order to understand each other and students of various races need the opportunity to talk to each other and learn more about each other's customs and ideas. This is the purpose of the T.C.A.'s Inter-Race Commission."

All Technology students are invited to attend Thursday's meeting at which time the various discussions are to be made and the purpose of the group is to be set forth.
