Freshmen Debates Pass Second Round

Nine Sections Survive, Quarterly Finals Are Ended.

The results of the annual freshman debating tournament for 1942 have been released and show that nine sections remain undefeated. The first round of competition was held at the Hotel Kenmore on April 22 and 23 and the second round took place Wednesday afternoon of that organization. John Hall, 45, and Lester Ackerman, 44, have been given honorable mention by the club for their athletic activity during the last season.}

Robert M. Sherrer, Chairman of the 1942 Course Council Committee, explained to the freshmen the significance of the reception. Those students who have already decided what course they wish to pursue will have the opportunity to meet the representatives of the departments.

James Leonard
Given "Q" Club Athletic Prize

Hull And Ackerman Also Named For Sports Activity

James Leonard, 45, has been named the winner of the "Quadrangle" Club's Award for Outstanding Service to the Club for the current semester. The winner has been selected by the members of the club based on their outstanding service activity.

The Tech, May 1, 1942

Growth Of Biological Sciences

It is gradually becoming evident that Technology, long regarded to be among the world's greatest enemies, is being accepted as an integral part of our educational system. One of the most promising fields of biological science is the area of growth which has been opened up by the study of biological material. This growth has led to the establishment of new departments and new courses in biology. The problem of how to best utilize these new resources is one that must be faced by all educational institutions. The need for a greater understanding of the basic sciences and their application to technology is becoming increasingly apparent.

EMINENT BIOLOGIST

Prof. F. O. Schmitt, pre head of the Department of Biology

L.A.S. Elections

Name B. F. Wilbur

At its last meeting on Friday, March 24, the Board of Directors of the American Institute of Architectural Engineers elected Prof. B. F. Wilbur for the next term of the office of President for the upcoming year.

M.T. International Club Will Hold Dance May 15

The Technology International Club will hold its annual dance on Friday evening, May 15, at the Hotel Kenmore. The dance will be open to all members of the club and their guests.

B. Franklin Wilbur, "Q" was elected chairman of the club, and S. R. Atwood, "R" was elected vice-chairman. The selection of these two individuals was made by the club's members based on their leadership qualities and ability to represent the club effectively.

Dr. Wm. Boose Lecture

For A.P.O. On Toxicology

Dr. William Boose, well known toxicologist, will be the speaker at the lecture on "Toxicology of Alpha Phi Omea, honorary sorority of the American Chemical Society." The lecture will be held on Wednesday evening at 8:00 P.M. in the Y.M.C.A. auditorium.

Byrd Expedition Exhibit Shown in Bldg. 10 Lobby

Through the courtesy of Rear Admiral Richard E. Byrd, an exhibit of items from the Byrd Antarctic Expedition is now being shown in the Main Building of this institution. This exhibit, which opened on March 1, contains hundreds of photographs and other items related to the expedition's activities in the Antarctic region. The exhibit is open to the public and is located on the first floor of the building.

Pamphlet Describing Curricula Is Given To All Freshmen

The Technology Inter-Race Commission has issued a pamphlet describing the curricula of the various departments. This pamphlet is available to all freshmen and is intended to provide them with information about the different courses offered in each department.

Tech. Review May Issue Out

Plywood, Glass Cloth Are Among Subjects

The latest issue of the Technology Review, May 1942, sports a cover photograph of the new development in the field of glass cloth. The photograph shows a sample of the material being used in the production of skateboards. This development is expected to revolutionize the field of skateboarding and to lead to the development of new applications for glass cloth.

The Technology Review, May 1942, is available at the Office of the Dean of Students.
This is war

That's a fact. This is a war to the finish. No peace offensive is possible tonight nor at any other time. This is not a war of escape or sweatsweat. No war can. No war can

for most of the people. But some people have never heard of the war. They do not know what is going on. They do not know that the United States is going to totalize, etc. Gorbets and Hibs couldn't do it any better anywhere. All this despite the fact that

this is war . . .

VU BOWS OUT TEMPORARILY

Faced with unfavorable conditions that have intensified the troubles that usually confront a new endeavor, VU, Technology's picture, which was not last fall's fall. The picture, which was to be a rocky road, has announced that it will cease operations at least temporarily. Tentative plans have cancelled the 1942 spring issue and will call for the next one in October, conditions permitting.

Advertising has been the main trouble of VU. The fact that VU is an unsupervised publication without a guaranteed circulation and the present uncertainty of the business world have made potential advertisers a little reluctant to invest in VU's column. Insufficient manpower and facilities may also have played a part in its failure. Of course, VU is not the only picture to be troubled by the lack of offices, VU has not been able to work as efficiently as is desirable.

This summer, however, the Senior board intends to coordinate its activities with the aid of the experience it has gained in the past year and with the object of resuming publication next fall. VU has done a good job; it has printed, in spite of adverse conditions, a first-class pictorial that has been well received by the student body. Believing that it has proved that it can hold an important position in Technology's undergraduate life, we wish VU the best of luck in its reorganization and revitalization.

Prof. Schmitt Directs Biology Dept. In Physical Techniques

Prof. Schmitt is international- ly recognized for his biological research, especially in the applica-
tion of physical and chemical tech-
niques to biological determinations. For this reason he finds Technology better equipped for biological research simply because of the well-developed departments of physics and chemistry. Prof. Schmitt has utilized x-ray, polarized light, spectrograph, and lately the electron microscope, the research with which he is associated.

His work has covered most of the field of structural research, and the most important part of it has been in biological chemistry. Almost the majority of scientists, are finding their answers in the study of the inorganic particles that constitute all matter and account for all activity.

Through the medium of organic chemistry, biology, and chemistry entered common ground and much of the biological mystery answered itself in the field of organic chemistry. Stereo of the nervous system made evident electrical phenomena in the human body, and thus the biologist and the physicist. Thus it gradually became evident that the biological was essentially a vast complexity of physical and chemical phenomena, that is, the system, that is, the system, that is, the system.

Thus, quantitative biology is a tremendous advance in

Oscar Hedlund reveals anticipated sellouts for meet Saturday.

With one victory already tucked away, the varsity track team will sail toward its last race of the season at Briggs Field at 1:30 P.M. Last year the boys put on quite a show to the tune of 42 and this year team Coley go to 49 in their first meet.

Bob Meny, splitter in the 100 and 220-yard dashes, who won these events last Saturday from Colby with times close to the record.

Raquettes Lose 3 Meets; Frock Take Crimson Cubs

Colby and B.U. Beat Beavers By 5-4 Score; Tufts Trim Tech 6-3

This past week has seen the raquettes through three varsity meets with Colby, Boston University, and Tufts, and in another meet the Crimson Cubs retrieved the feathers from the Beavers.

The Colby meet, held last Saturday afternoon on the Avon Field tennis courts, was extremely close, Colby winning 6-4 after a difficult battle in which Colby tied up the match at one set apiece. Summer and Barry played very well under the strain of the deciding match, and had the first set split 5-6, 5-6. The Colby team of Seniors Alexander and O'Donnell pulled the match over for the White Mules.

The Blue and Grey captain, Lord, beat Kats 6-4, playing really a good tennis match. Beat Godfrey 6-2, 6-2; Shaw lost to Barry 6-0, 6-0. The Crimson Cubs beat Tech 6-3, 5-6, 6-0. The most spectacular match of the match was undoubtedly that in which Spies of Tech, after losing the first set and pulling out the second one, 3-6, 6-4, found himself at Match-point. He staged a sensational comeback, winning the last set, 6-0, from Pizzano of the Blue and Grey and thus captured the last set possible.

At the Blue and Grey match Lord of Tech, who was recently chosen to the All New England team, played against Barry, who has been chosen to the All New England and All American teams. Lord is a senior and Barry is a junior. Lord played some splendid tennis, keeping Barry on the run throughout the match, and made an exceptionally good showing. Barry was defeated in his first and second singles matches, scoring three points in his third game.

Al Heckel Elected Lacrosse Captain

Al Heckel, '46, was elected cap- tain of next year's lacrosse team at MIT last Saturday because they have decided to win the races at the annual Compton Cup.

The Boy's lacrosse team, led by Al Heckel, '46, and Fred Gander during the next half of play for a 10 to 8 respite. In the overtime period Wednesday afternoon. The Tech boys, led by Heikal and teammates, lost to Colby 8-6, 8-6, 8-6, in the 1000-yard dash, 880-yard run, relays, javelin; Bob Ford, broad jump and 9 pole vault; Johnny Bavicchi, shot put. Tommy Vhay of the varsity is an American football star. The Blue and Grey Captain, Lord, was chosen to the All New England and All American teams. He is a senior and Barry is a junior. Lord played some splendid tennis, keeping Barry on the run throughout the match, and made an exceptionally good showing. Barry was defeated in his first and second singles matches, scoring three points in his third game.

The best time for the season for crew followers is that Tech was a race on Tech in the Charles yesterday. The Coast Guard Academy dinghies will be used on Saturday while the Brown University Yacht Club dinghies will be used on Sunday.

The Blue and Grey Captain, Lord, beat Kats 6-4, playing really a good tennis match. Beat Godfrey 6-2, 6-2; Shaw lost to Barry 6-0, 6-0. The Crimson Cubs beat Tech 6-3, 5-6, 6-0. The most spectacular match of the match was undoubtedly that in which Spies of Tech, after losing the first set and pulling out the second one, 3-6, 6-4, found himself at Match-point. He staged a sensational comeback, winning the last set, 6-0, from Pizzano of the Blue and Grey and thus captured the last set possible.

Frosh Tracksters Defeat Tufts

Beaver Freshman Win Over Jumbos 62-54

Taking advantage of a score of 254, the Frosh tracksters took Tufts freshmen in a meet Wednesday afternoon. The Frosh runners succeeded because of a strong supporting team. They did not come in first in most of the individual races. The final score was MIT, 35, Tufts, 20. Field totals 27 each. Middlebury, 22. Tufts, 18. Official time 1:15.

The freshmen will include: Gene Brady, 880; Norman Becker, low hurdles, Dick Castillo, 100, 220, 380, 50, Bob Cumby, javelin, Jim Gardner, high jump, two mile, Jim Hall, quarter, Bob Sneyd, 100, 220; Bob Miller, one and 1/2, Fred Flack, quarter, Larry Stewart, low and high hurdles, Charles Sill, high hurdles; Russ Thompson, 100 and 220, and George Verchago, long jump.

Coles has several crack performers to offer. Niekixen, running the 100 and 220 has run class and has repeatedly run class and is expected to be fast. The 100 and 220 and also putting up some of the best sprints--also Hemmingson has shown great ability on the hammer and javelin.

Approaching soon are the Inter- Institute Spring Meet which will sponsor the annual Intramural Spring Meet on May 9.
CALENDAR

FRIDAY, MAY 1
Fresh Prom Options Redeemable.—In Bldg. 10.

MONDAY, MAY 4
Frosh Debates, Wood vs. Kuehn.

SATURDAY, MAY 2
1:30 P. M. Track Meet vs. Bates—Bridges Field.
10:00 A.M. and 1:30 P. M. Intercollegiate Yacht Racing Association, New England Dinghy Championship Race, New London, Conn.

SUNDAY, MAY 3
10:00 A.M. Continuation of Dinghy Race.

Voo Doo Oot Noo—Features Exchanges

Voo Doo's choice for the nation's tenth best college humor magazine was presented in the May issue which made its appearance last Tuesday and Wednesday in Building 10 and many a other spots about Technology. This was in what was officially entitled "exchange issue." In addition to its ranking of the various college magazines, Voo Doo also presented cartoons and jokes which were supposed to be typical of many of these. Included among these represented were the Northwestern University "Purple Parrot", the Stanford "Chaparral", the University of California "Pelican", and the Texas University "Banger." The theme of the next issue of Voo Doo will be "Summer Session."

Here Comes Next Year's Freshman—Will Someone Say To Him—All you need to learn is to Obey Save...and Save America

Professor Schmitt

(Continued from Page 4)
with him from Washington U were two professors, one Richard S. Beer, a physical chemist, and David F. Waugh, who, following Schmitt's lead, has approached biology from a physical standpoint. These men will help to form the link between the departments of Physics and Chemistry with that of Biology at the Institute.

Save...and Save America
