As this academic year comes to a close I wish to report to you on plans which have been developed in the Army and Navy for the voluntary enlistment of college students. These plans are based upon the opportunities and obligations as well as the responsibilities which we are called upon to fulfill. All of you who will be sophomores, juniors, or seniors in the fall of this year are being notified of this enlistment program through the office of the Student Advisor, and all of you who are students at the present time will be given immediate notice of this enlistment program, so that you will be aware of its existence, its purpose, and your responsibility in connection with it.

One of the most reassuring aspects of our present national policy is the recognition that the supply of technically trained young men and women from our educational institutions must not be cut off in the present crisis. Perhaps we have known it all along, but in retrospect, we see that even at the present time the problem of this nation's defense in the case of a declaration of war is largely one of man power. To put it into this mighty effort we have no assurance that we will have a sufficient supply of these people unless we continue to offer them every available bit of man power to put into this mighty effort. We have no assurance that we will have a sufficient supply of trained persons and we cannot afford to take any chances of not having a sufficient supply to meet the needs of our armed forces.

The rising San Francisco, as second lieutenants. The first two questions will cover the time we are now preparing for the reserve training. During this period we will send the students on to the Reserve training center and further training before coming to this institution.

In outlining these various paths that this institution is taking, it is important to note that this is a voluntary enlistment program. It is not a case of being called to active duty. The Army and Navy have been developing these programs for a number of years, and they have not been called upon to take any active action in this program. This program is designed to provide an opportunity for students to gain experience and training in the armed forces of this country before they are called to active duty.

Students Will Be Selected by the Order of Their Selection Blank

Applications For Reserve Enlistment Will Be Made Entirely Voluntary; Prof. Mitsuo To Serve As Advisor

Speaking before the second World War II convention of the United States Army and Navy, Prof. Mitsuo, professor of electrical engineering at the California Institute of Technology, said that the plans of the Army and Navy for the voluntary enlistment of college students have been developed to serve the national interest.

There is no question that the students of this country are being called to active duty in the armed forces. The Army and Navy have been developing these programs for a number of years, and they have not been called upon to take any active action in this program. This program is designed to provide an opportunity for students to gain experience and training in the armed forces of this country before they are called to active duty.

Dr. Compton's Address  
As Given At Convocation  
(Continued from Page 1)  
...embrace the duties in the direction  
where they are needed.

The Institute has appointed Pro-  
fessor Frederick D. DeBell, '44,  
Dean of Civil and Sanitary En-  
gineering to advise students on  
these resources, and to provide  
them with the most recent  
information. His headquarters  
will be in Room 1-178. He  
will work closely with the office  
of the Placement Office, the  
Freshman and Sophomore  
Placement Board, the Profes-  
or of Military Science and  
Tactics, all of whom will be  
available for consultation with  
students who have not been  
notified by the First Corps Area  
what our Army Enlisted  
Reserve, or other engineering  
students may start enlisting.  
When this information becomes  
available, it will be passed along  
you promptly.

Educational Program  
Many students have asked whether  
we contemplate any further  
changes in our educational pro-  
gram. As you know, our present  
plan is a sort of randomized  
system in which the freshman,  
sophomore, and junior years carry  
on so much, but in which the  
course begins in June after finish-  
ing junior year and carries on  
through the summer term to gradua-  
tion. In February. No  
change is now contemplated in this  
program and we will hold to it  
in long as the educational and  
national policy permit.

Accompanying this program  
are arrangements which  
undergraduate student is expected  
to spend his summer vacation  
either in work sponsored  
the far educational program or in  
some work considered essential in  
the defense effort. The Placement  
Board has been most successful  
assisting undergraduates to find  
sum-  
mer employment. Over eighty  
percent of the Freshman and Sopho-  
more class begins in June after finish-  
ing junior year and carries on  
through the summer term to gradua-  
tion in February. No  
change is now contemplated in this  
program and we will hold to it  
in long as the educational and  
national policy permit.
