Annual Dance At Wellesley Features Hugo

Well-Tech Affair To Be Barn Dance For 200 Tech Men

Sign-ups for the Wel-Tech Barn Party, which will take place Saturday night, November 28, at 9 p.m. in the Institute, were under way yesterday. Ever since the first year's barn dance, one hundred freshmen and sophomores already on the lists. Some say the reason for this is that those interested may sign up for the T.C.A. office any time during the day.

Barbara Hug has been signed to play the dance and Morton states that Miss Hug has been engaged as the caller for the night to lead the barn dancing. There will also be some swing and mixed in with vary easy and everybody happy. In Barn Dance, every barn yard, with informal clothes, the more informal the better.

"The dance has every indication of being a huge success," said Thomas O. Morton, President of the T.C.A. Freshman Class. "All of the ladies look as if they are going hard and a very good orchestra is at hand. In addition to this, there must carry rides with them all time."

The number of women will be to present to two hours each hour. After the meal, barn dancing will begin. Another way of getting there is by the Huntington Avenue bus or the Framingham bus from other parts of the city. Military Society To Initiate 26

15 Mile Hike To End

Week Of Initiation

In the interest of military training and the Squadron and Black Society, Military Honorary Society, will start Saturday, Nov. 28, with the Annual dance which will be held at 8 p.m. The Society is in charge of the event.

Officers of the organization are:

Captain, James A. Malloch, '44; Assistant Captain, J. D. Walker, '43; Second Lieutenant, J. W. McDougall, '43; and First Sergeant, William T. Vail, '44.

Osborne Will Speak To A.L.E.

A dinner in honor of Dr. Harris B. Osborne, national president of the Institute, will be held at 5:30 p.m., Thursday, November 26, at the Northeastern University Commerce at the A.I.E.E.

At 7:30 p.m., in Richards Hall, Room 200, Northeastern University, there will be a joint meeting of A.L.E.E. with the Institute of Radio Engineers, at which Prof. Osborne will speak on the conservation of critical materials.

Rationing Greatly Increases War-time Problems of Walker

While rationing of tires and trucks last July was very detrimental to the walking of the Walker Memorial Dining Service in the "bear market" of the war, it is now becoming one of the major problems of the Walker Dining Service in their job of feeding the boys. This is not only the Dining Service and Purchasing Director, but also the person in the past, but it also has the problems of having its supply of certain foodstuffs cut.

Sugar was the first product to be rationed, as Walker's Dining Service, although the rationing of tires and trucks last July was very detrimental to the walking of the Walker Memorial Dining Service in the "bear market" of the war, it is now becoming one of the major problems of the Walker Dining Service in their job of feeding the boys. This is not only the Dining Service and Purchasing Director, but also the person in the past, but it also has the problems of having its supply of certain foodstuffs cut.

THIS ONE MUST BE PERFECT

Dem out regulations are to be enforced in earnest beginning next Monday, November 30. This semi-cooperative business of blacking out when you feel like it, and not blacking out because nobody else does, is to die a sudden death. In his latest and most stern warning to us, General Sherman Miller, Commandant of First Corps Area, has emphasized in no wishy-washy terms that the voluntary dem out imposed on the campus has not been successful, and that from next week on, Air Raid Wardens, Civilian Defense Personnel, and police are to enforce the regulations and see that our curfews are not broken by anyone, certainly not by our campers at least a quarters of the way from one half hour after sunset until dawn. All skylights must be completely blacked out.

Of all the great and little things we are to do as part of the war effort, drawing our curtains seems to be the simplest and most painless. A little thought will indicate to all of us that the army does not wish to impose an additional burden on the population, but insists on insuring us with the facts that dimming out is a wartime necessity, essential to the safety of the seamen and the ships which day and night plow in and out of our harbor, removing and bringing our goods, and taking supplies to our allies and to our armies overseas. This winter when we are especially short of oil up here in the North-east, many of our courageous seamen will go hungry this winter if we don't cooperate. It is not our responsibility to feed the army, but it is our duty to see that our lights do not en-

Air Raid Center Maintains Twenty-Four Hour Vigilance

Editor's Note:

Almost from the very first day of the war, we have been dependent on rationing as a means of maintaining the country's food supply. The system of rationing has served us well, as it has helped to ensure that all Americans have access to the essential foods that they need to survive. However, as the war continues, we must be prepared to face new challenges and adapt our rationing system to meet them.

Rationing adds to the problem of finding food, as many products are limited in supply. This is especially true for luxury items such as sugar, butter, and milk. As a result, many families are forced to make do with less. However, by working together, we can overcome these challenges and continue to provide for our nation's needs.

For Boys To Play

A series of films and activities are planned for boys in the coming weeks. The films will cover a variety of topics, including sports, history, and science. The activities will provide opportunities for boys to engage in physical and social activities.

Another Successful Prom

The Class of 1944's Junior Prom week-end passed quietly and wearily away for most of its customers last Sunday evening, but, before the final curtain had been rung down and the final step stool removed from the stage, 1944 had given us a line-up to establish the week-end as a necessary social affair in the entire undergraduate body.

This letter of resentment is not the work of any individual, but it represents the sentiment of the entire undergraduate body. It is our duty to see that our curtains seem to be the sim-

Editor: Bruce Fabens, '45

The idea of a Junior Prom week-end may, however, fall by the wayside before the present conflict is over in spite of the tremendous success that the Junior Proms have been so far in our campus. Already the Junior Prom has been designated as one of the two Institute-Committee-approved formal dances of the year. This is a great step forward for us, and we are looking forward to a successful week-end, as far off as some of us think what with the government combating exerting its unlimited war-time control over American colleges. If the worst does come, we hope that the post-war classes will refer to the Junior Proms of the Classes of 1943 and 1944 when they reorganize their social programs.

Among the products which are rationed are the dairy products, including milk, and potatoes. All milk used by the Dining Service comes in individual half pint bottles. "We serve no whole milk," said Mr. Bridges. "About 300 of these half pint bottles a day are used by the dining service. But of course the milk is being used by the Dining Service, Mr. Bridges, however, the Dining Serv-

DOO did contain a few minor technical errors, but appeared to show laudable restraint in its manner of expression. This letter never should have been written. We wonder whether the Dawn Dance will be cancelled and the proms will go on as scheduled. It looks as if they would like to be finished with the old proms and begin the new ones all over again. We are in favor of the proms because they are our Junior Prom Week-end entertainment. The Readers Speak.

This letter is without question the most candid and a directs will be broadcast by the National Broadcasting Company at the present rate of 400 meals a day, with this figure increasing steadily.

Heralded by a sell-out over two weeks of public campaign- ing, the Junior Prom retained the two-dance idea, the punch parties, and the Sunday tea of last year's edition. It added to the all-out two nationally known dance bands and a lottery of war savings bonds.

Swim Trials Foretell Keen Team Competition at Final Meet Nears

Trials Show Team To Be Well-Balanced

With the first meet scheduled with R.P.I., Dec. 5, the results of the time trials held this past week in the pool proved very interesting to Coach Gordon Smith and foretell some keen competition among the members of the varsity team.

In the breaststroke contests, Knodell and Cochran, although swimming in different heats, were clocked at exactly the same time. This should prove to be interesting competition and will probably determine the number of last year's crusty swimming team and the medley relay team that broke the pool record for freestyle. Gordon Findlay, also of last year's frosh team, has come very quickly and will be a threat, and is expected to set a new one this season.

Rudolph, Kollin, Bank in Back Rouse Fort and D. W. Smith have shown their ability in the 230 yard dash, with Jack McDonough threat-ening to place the position away from one of the two. Doc Brosselt—or rather Fischer Brosselt—will undoubtedly make a stark effort to outdo Phalen, Crouchthain, or Schierbaurn as his team-mate.

The discus will certainly prove not only very interesting, but also very satisfying to Rezse, Shum, and Larry Larmadit taking the top positions.

There is a good field out for the eighth annual track meet set for next week in Fort Rouse Fort. Put together, these make up a well balanced team. With only two 140 pounders in planning and the distance meet of December 5th, every day should show improvement, for the team has been working hard for a good three weeks.

Tech Bridge Club Plans Tournament

The Executive Committee of the M.T. Basso Club, under the direction of an undergraduate bridge tournament on Friday, December 5, '42, 8:30 a.m. and 3:45 p.m., and 8:30 p.m. to determine the championship team of the university. Further details and of the prizes to be given will be announced later. All games with service teams from Fort Fabens, Cruckshank, or Schierbaurn will be offered. All games with service teams from Fort Fabens, Cruckshank, or Schierbaurn will be offered. All games with service teams from Fort Fabens, Cruckshank, or Schierbaurn will be offered.

Hockey Scrimmage Shows Good Material For Team; Goalie Position Stronger

S.A.E.Romps Over Senior B
S.A.E. Senior A
Playoff This Week

Despite the efforts of the Junior Frosh and varsity, two of the games of the Beaver Key football tournament were played last Satur-day. Senior A fought a hard fight- ing Theta Chi football team, in a contest of the varsity, the final score being a 0-0 tie.

Although, the offensive play of both teams was good, it was the de-fense on both teams that provided the high point of the game between two thrilling goal line stands every time the ball was taken.

Hobby Shop

The same scale to produce a complete model of the entire earth.

A complete research of the geography and mountain formations of the Solomon group preceded the actual construction of the final product. As a result of this careful preparation the Hobby Shop has produced a very accurate picture for geological study. Every bit of land surface represented on the model was molded by hand. During the coming week the painting and retouching will be completed and the model will be ready for display in Building 6.

Bradley Hahn, one of the hobbyists connected with the project, plans to include a model conception of the recent Solomon Island naval battles in the exhibit. Having made a study of naval tactics and formations, Hahn has built up a complete fleet of model warships. These will be arranged in battle formation on the completed map, representing a close duplication of the actual battle positions as they were in the clash. (The exhibit will undoubtedly make appearances outside of Technology after its initial showing here, Pugh said.)
