T.C.A. Cabinet Meeting

Prepared For 5:00 Today

The Technic evening will be held in the T.C.A. office and is to be the last meeting of the year.

The morning meeting of the T.C.A. Cabinet will be held today at 3:00 P.M. The meeting is to be held in the T.C.A. office and is to be the last meeting of the year.

The morning written reports will be read by the division managers. The evening meeting will be held on Thursday, January 13.

The新鲜ness of keeping up with the Technic chronology order beginning with the coming of Peyton Herber and publishing through the entrance of the Class of 1946 on Ford Field gives the impression of following a story of the student life at Tech-Tech.

The morning meeting will be held today at 9:45 A.M.

The committee in charge of the Junior Banquet Tonight will be held after dinner. The committee is: Professor Robert S. Gross, President of the Society, and the Tech Radio Society.

The Tech Radio Society is to be present. The meeting is to be held in the T.C.A. office and is to be the last meeting of the year.

AreOur Plans Good For a European Reconstruction?

by Prof. George de Santillana

The following is the first of a series of provocative articles dealing with immediate post-war problems. It is the hope of the editors that this series will provide a partial stimulus for other hazards and possibilities. The comments of readers regarding these articles and tips of views for continuation is the editor.

The traveler's operations in North Africa do not represent only a military success. They also stand at the beginning of a long period of history in the future.

The opposition people's dream was that on the very day of our entry into the war we would suddenly break out of jail and the fanatics wouldn't dare touch us. It is now apparent that the fanatics are not playing a jail, and that the very same people who were opposed to the war will now concur. No one is in favor of a new war and no one is free.

As we look beyond the present time, there are those who are the time that we should pass those who hope to see the future. The world around us is only another wave of the sea that we have seen before.

Let us admit that our intentions are honorable, and our tactical needs are sufficient for the common day-to-day problems that the nations have by now come to believe that the leaders of the world are the only possible ones.

Last year the world had its zeal and the Snazzy and Blade dances came through with flying colors. Many Technology men and their dates rode to and from this formal dance on the streetcar. Once the novelty of the thing was off, the travelers discovered that what the trolley lacks in romantic appeal it makes up for in its lazy, casual convenience. Many Technology men and their dates rode to and from this or that basis. Grumbling and fretting and editorial writer in the country. The feeling must be that, as we read the articles, we are the voice of a nation.

GASOLINE, DANCES, HITCHING

Vol. 42 No. 4, December 8, 1943

Gasoline rationing is a subject that has been handled from pillar to post by just about every able-bodied columnist and editor across the country. The columnists and editors, of course, feel that, unless you have made at least one bitter tirade against it or one righteous defense for it, you have not been affected by the war effort and are a good complacent. We'll do neither.

But it is true that army engineers will have a great share and a great stake in the gasoline problem. It behooves us to give our individual attention to certain issues arising now from the local political consequences.

Last year that pleasure driving has been completely eliminated ("completely" is an unfortunate word here but is used in the same sense as one might say, "The black market is completely shut down"), the general effect is one not of violent opposition and challenge on this or that basis. Grumbling and fretting and editorial writer in the country. The feeling must be that, as we read the articles, we are the voice of a nation.

The 1943 Technique, nearly four months premature, makes a noteworthy contribution to the long list of Institute yearbooks. Many Technology men and their dates rode to and from this formal dance on the streetcar. Once the novelty of the thing was off, the travelers discovered that what the trolley lacks in romantic appeal it makes up for in its lazy, casual convenience. Many Technology men and their dates rode to and from this or that basis. Grumbling and fretting and editorial writer in the country. The feeling must be that, as we read the articles, we are the voice of a nation.

The demands placed upon the Institute, as the research and educational arm of the Institute (and the student body of the Institute) is manifested in the design and improvement of testing equipment and facilities made available.

THE TECH

Jimbettes Edge Frosh In Slight Gala Win over Madder Paces Attack

Unable to rally after an unexpectedly slow start, the Beaver squad was outplayed by a scholastic team which, thanks to a powerful finish, won by a 3-1 score over the Jimmy's last Saturday night in the Memorial Gym. A trio of dishes which swamped 43 points among them, the Jimbette's were unapproachable as usual. The final defeat the Beavers have received for this season. The losing side was led by Cull Tull who garnered 15 points, 6 of them being laid against Spud Brauer's 20 markers for the victors and was followed by Rock Annan with 12 tails.

To allow the edge but one in the coming few moments the Tech fighters found themselves on the short end of a 33-24 count at the end of ten minutes of play, by the half the Beavers had scored lost 5 points against the 7 trifles of 17. Making full use of all free throwers, is which will 11 of 19, the Jimbette's run the count up to 47 at the end of the third period.

The fresh were edged out in a late rally shaped by the Tufts first one by 3.5, the Madder gained 10 points for the cause while Brown followed closely with 8 markers.

This Friday the Brown University squad will make a return trip to the White Gym, a list which has been their list. The freshmen for this latter match will get under way at 7:15 PM.

Cindermen To Pick New Captain, Sat.

Frosh Trophy To Be Awarded At Meeting

The track team will have a meeting on Friday, 1948 at the John Bridge Field House, for the purpose of electing a new captain for the coming year and deciding the varsity-freshman question, stated Harold Goodson, coach of the team.

The election of captain for the coming year has come up so early, "it is in the interest of the present senior graduation and the loss of valuable experience a problem of some importance," the new captain will hold that position until January 1944, according to Goodson.

As a result, the "freshmen and men of the frosh team will continue as usual. If some of the freshmen want to run in varsity competition, it is advisable, we will let them run in the varsity team," the coach said.

The 1948 Thompson trophy will also be presented at this meeting. This (Continued on Page 4)
Are Our Plans Good For A European Reconstruction?

by Prof. George de Sandhurst

The following is the first of a proposed series of articles dealing with various phases of the economic problem. The first article will be devoted to the question of European reconstruction and the economic problems which it presents. It will be followed by a series of articles on other phases of the economic problem, including the possibility of a European federation, the question of the balance of payments, and the problem of the reconstruction of Europe as a whole.

The TECH.

Vol. XXIV.

Five people have realid that the group of substances called textiles consists of more than man-made fibers that are spun or woven together into yarns. The industrial material composed of cotton, wool, silk, and synthetic fibers, which is used in creating building materials, for instance, is a kind of textile. Not only is it possible to use other materials in mechanical ways, but it is also possible to use them in chemical ways. The textile is a truly versatile material.

It is an old story, going back far as the 19th century, when Charles Babbage was making mechanical models of textile machinery. He was applying mechanical techniques to the improvement of the textile industry.

Now it is the turn of the textile industry, and the story is still being told. This is the story of the textile industry, and the story of the future of the textile industry.

The TECH is a publication of the Massachusetts Institute of Technology, and the story of the future of the textile industry is published in The TECH.

The following is the first of a projected series of articles on the textile industry. It is intended to make the reader aware of the possibilities of the textile industry, and to show how the textile industry can be used to meet the needs of the present time.

Integration of M.I.T. Courses To Broaden Textile Industry

The Institute, at present, has the only other small, condition-based educational system in the United States. Perhaps, it is the most important contribution to the education of the textile industry. When, in 1943, the Institute founded its new Textile Technology program, it set out to educate the kind of student who could be expected to be a textile technologist.

The Institute, at present, has the only other small, condition-based educational system in the United States. Perhaps, it is the most important contribution to the education of the textile industry. When, in 1943, the Institute founded its new Textile Technology program, it set out to educate the kind of student who could be expected to be a textile technologist.

The tremendous mass of data piled up on the statistics of textile technologies and statistical procedures, the data on which the textile industry is based, is a product of the work of the textile industry. The data is a product of the work of the textile industry. The data is a product of the work of the textile industry.

The data is a product of the work of the textile industry. The data is a product of the work of the textile industry. The data is a product of the work of the textile industry.
Pucksters to Meet Northeastern Tonight on Boston Arena Ice

Frosh Browne and Nichols

Middlebury Loses To Beaver Squad By Count of 3-1

After a weekend in which they broke even in two games the Beaver squad will be looking for the contest content with the Northeastern Terriers with whom they will meet tonight on the ice at 8:00 P.M.

The team is out to avenge a loss of 5-2 last Saturday by the hands of Northeastern earlier in the season and in which they incurred a great deal of ridicule. The Beavers stand a good chance of making the take of the contest.

The Frosh-Northmen game will be the opening game of a dual of which will feature Boston College and Extremis. The Terriers will assume the role of the visitors in the second stanza of the dual.

W. P. I. vs. Northeastern

Win Three Matches

After a hard struggle, which saw face to face brand-ahead by seven points, the Beaver swimmers were held to a tie by the Harrard men in the meet held last fall day at Harvard. Although Tech team were defeated, they still remained to a count of 8-6. The game was scoreless in the last stanza of the match. The individual scores were as follows:

For W. P. I.: Dinsmore (W), 58.3 sec.; Aschaffenburg (T), 56.0 sec.; Churchill, fencing manager. The following are some of the results expressed by some of the members of the Beavers:

E.P.C. Navy Students (Continued from Page 1)

representative of the institution attended, if the student has been in attendance for a reasonable length of time. These will be obtained for students through the Advisory Office instead of having to seek them out from the Dean's office, Professor John G. Mitich, Armed Services Representatives, said.

The document which may take the longest for students under 21 is a record of patents or guardsians to enroll in this Naval Reserve. Even if this consent has been obtained, it will be in the form of letters from the Army Enlisted Reserve Corps, it is must be done again on the proper Navy forms. These forms can be obtained at the Advisory Office.

Each applicant must also present a resume of no less than five hundred words in the applicant's own handwriting, covering all occupational and military service or training. Two photographs (hand and shoulder only), one full face and one profile 2 by 2 inches, are also required along with the application.

Most Stout Discharge Papers Applicants who have had previous military or Naval training will be required to present their certificates of discharge or discharge papers. This will apply to men now in the Reserve or in the Corps, but these certificates cannot be obtained until long after the actual change takes place.

The Advisory Office will take care of these matters and supply the necessary forms. Registration certifies that the candidate is a registered student in the Navy and that the enrollment is required by the Navy.

But the change is expected to have no effect on the Naval Reserve, and the new Navy can take place upon the applicant's consent to enroll. It is expected that the change will not affect the discharge papers of those students who are considering entering the student body.

Men under 18 who wish to enroll for the first time in the Naval Reserve also need to have all three papers. A student was informed that the enlistments for the year 17 years old will be closed on March 15, 1943, as announced in the Army Naval plan of December 10, 1942. Waiver of the physical examination or other requirements will not be entertained by the Navy, except for those students in good standing who are pursuing courses in colleges who are considered outstanding officer material.

E.P.C. Navy Students (Continued from Page 1)

representative of the institution attended, if the student has been in attendance for a reasonable length of time. These will be obtained for students through the Advisory Office instead of having to seek them out from the Dean's office, Professor John G. Mitich, Armed Services Representatives, said.

The document which may take the longest for students under 21 is a record of patents or guardsians to enroll in this Naval Reserve. Even if this consent has been obtained, it will be in the form of letters from the Army Enlisted Reserve Corps, it is must be done again on the proper Navy forms. These forms can be obtained at the Advisory Office.

Each applicant must also present a resume of no less than five hundred words in the applicant's own handwriting, covering all occupational and military service or training. Two photographs (hand and shoulder only), one full face and one profile 2 by 2 inches, are also required along with the application.

Most Stout Discharge Papers Applicants who have had previous military or Naval training will be required to present their certificates of discharge or discharge papers. This will apply to men now in the Reserve or in the Corps, but these certificates cannot be obtained until long after the actual change takes place.

The Advisory Office will take care of these matters and supply the necessary forms. Registration certifies that the candidate is a registered student in the Navy and that the enrollment is required by the Navy.

But the change is expected to have no effect on the Naval Reserve, and the new Navy can take place upon the applicant's consent to enroll. It is expected that the change will not affect the discharge papers of those students who are considering entering the student body.

Men under 18 who wish to enroll for the first time in the Naval Reserve also need to have all three papers. A student was informed that the enlistments for the year 17 years old will be closed on March 15, 1943, as announced in the Army Naval plan of December 10, 1942. Waiver of the physical examination or other requirements will not be entertained by the Navy, except for those students in good standing who are pursuing courses in colleges who are considered outstanding officer material.
