Spare the whip

Several weeks ago, occasion was found in this column to comment on the lack of interest and downright apathy shown by the members of the Institute Committee. At that time the suggestion was made that these members either wake up or yield a seat to one of "stolid" ones, following in the footsteps of a few members who have been quite surprising to find in the regular attendance of our meetings. We strongly suggest that perhaps this sudden burst of zeal is carried over from the days of the Institute Committee, men with more influence in the undergraduate body than any other fifty men. If they would, they could use this committee to extend its interest and a great many students will suffer the loss. We are glad to see some enthusiasm concerning these. The members themselves, being activity men, have a duty to participate in their activities. The other activities can undoubtedly suggest other ways in which their interest could be extended. At present, however, the Institute Committee's method is similar to that of the man who harnessed a kitten to his mired Dominion. We strongly recommend that they act in a like manner. The Institute Committee is not the only one that has a duty to participate in campus activities. So spare us the whip; help us pull.

Spoke that rumor! The result of our belief in this is that some of you may now feel as if you are on the largest possible scale? The Institute Committee is ap- portioning, its duties in their behalf. **ASME Plans Talks On Jet Propulsion**

Prof. Keenan To Open Series Next Thursday

The student branch of the Amer- 

- ican Society of Mechanical Engi- 
- neers will present a series of three 
- lectures by prominent members of 
- the Mechanical Engineering depart- 
- ments on the theory and applica- 
- tions of jet propulsion. The first 
- lecture in the series will be given 
- by Professor Joseph H. Keenan on 
- Thursday, May 11, at 5:00 P.M. in 
- Room 6-120. Professor Keenan will 
- speak on the theory of jet propul- 
- sion from a thermodynamic stand- 
- point. On Wednesday, May 11, Professor 
- C. Richard Soderberg will speak on 
- applications of jet propulsion in 
- industry, and on Thursday, May 25, 
- Professor C. F. Deshler will speak on 
- the applications of jet propul- 
- sion to aircraft. All of the lec- 
- tures are open to anyone.

**T.E.N. Celebrates 25th Anniversary**

The Tech Engineering News an- 

- niversary issue will come out in ap- 
- proximately two weeks. As its name 
- suggests, it is going to be a rather 
- special issue and many new features 
- and interesting articles are planned.
- The cover contest which received 
- some publicity around school was 
- never won by anyone because ac- 
- cording to Curt R. Bok, 9-45, no “enlightened snitches were corrected” 
- Thus the magazine staff had to 
- design a cover by themselves.
- Since this is going to be a su- 
- per-pirate issue not much news about it 
- can as yet be released, and the 
- newly elected Managing Board is 
- rather tight-lipped about it.
