Tech Tourney

This week 27,000 fans, a great many of them high school students, flocked to the Boston Garden to root for their respective teams in the 19th Annual Tech Tourney, which has been directed through the years by Henry P. McCarthy, Institute Physical Director, in cooperation with the M.I.T.A.A.

A feature of the Tourney is its completely non-profit, and today after 3,500 dollars has already been deposited in a safety fund, the excess is to be turned over to the high school principals for their disposal to benefit school children. It is needless to say that the tournament is a helpful outlet for the boundless energy of the school boys which has been diverted from the streets. I

DOWN WITH BROWN'BAGGERS

The Navy smoker tonight starts the Activities Open House Week, with its program of smokers designed to acquaint not just freshman, but also interested students, with the various organizations and activities of Technology's undergraduate body.

These smokers should be of interest to each and every student, not for the entertainment they afford, but for the opportunity to take part in a phase of college life which no one should miss, but which far too many do.

A large portion of the student body feels that the Institute is cold and hard, and totally devoid of social activity. This is the so-called "brownbagger" element, which finds no

"Brownbagger" Photography

A collection of photographs, "One Hundred Years of Portraiture Photography," is now on exhibit in the Lobby of Building 10. The collection is circulated by the Mu-

useum of Modern Art in New York City.

The collection features many fa-

mous politicians who have been prominent in the history of the U.S. Among these are some
time-view photographic portraits of Abraham Lincoln, General Robert E. Lee, and General Grant. Literary figures include Walt Whitman and Gertrude Stein. There is also an outstanding four-color halftone print photograph of George Bernard Shaw, as well as a striking

protection of Albert Einstein.

The exhibit is in the Lobby of Building 10 from 1943 through 1944. This feature cannot compare with the others, but it offers an excellen
