Cosmo Festival Tomorrow In Walker Meml.

175 Girls Invited From
Local Colleges. Music
By Ken Reeves' Orch.

The Commonwealth Fes-
tival, sponsored by the East and West Associa-
tion and the International Club, will be held tomorrow night in Walker Memorial from 4:00 P.M. till mid-
night.

The festival will open in Pritchett Hall at 4:00 P.M. with varied enten-
tainment which will include select-
ions of Indian dance and dance
by a group of Indian students.
Latin-American exhibition dan-
cing, and music, Chinese chorus
and instrumental music by a group
of Chinese students, piano solo selections, and folk dan-
cing by different national groups.

Sheriff will be served in Pritchett Hall at 6:18 P.M. and will include
samples of Indian, Chinese, and En-
tre-coursed to Negro girl students.

Family concerned. ‘

With the culmination of the war will bring about a solution mentioning.

None of the earlier ones accomplished anything worth on such. This is the extended Class A status, due recognition.

The availability of important scientific knowledge and engineering communications. The former is nature’s contribution and the latter, man’s.

Climate is one of the main reasons why we would discard Boston or New England as a location. It may be all right for spinning mills, but for humans it is too humid in summer and too wet. The inland country is too subject to temperature extremes, so all that is left is somewhere on the east coast where it is neither too hot nor too cold and humid. Air-conditioning could be used to improve indoor conditions, but we can never air-condition the great outdoors. The men of the UNO would be engaged in especially serious work, and, obviously, need an especially picked atmosphere.

Newspapers, radio stations, etc., make plain, there is going on in London a discussion of where the United Nations Organization Headquarters should be. The real question is whether the country wants the headquarters here because of the prestige it would bring and the somehow intangible feeling that we could see something was being put over on us just as naturally, Boston is putting in her two-bits worth.

For the real advocates of improving indoor conditions, the latter question is of great importance. Just as much as technology has advanced, so has the availability of important scientific knowledge and engineering ‘know-how.’

The matter of putting up buildings, and transporting and supplying personnel, is basically a matter of communications.

We feel that climate and communications should be the important factors in deciding where the UNO Headquarters should be located. The decision must be based on logic, and not on the persuasive ability of the various speakers who present the case of their cities or countries.

DUE RECOGNITION

Last night, at its bi-weekly session, the Institute Committee extended Class A recognition to the Outeing Club. Possibly this is the first time that many people have realized what a large and active organization the Outeing Club is. The members of this organization have earned their new status through a great deal of work and useful service. We should like to congratulate them on their attainment of Class A status, due recognition of their efforts.

WALKER AGAIN

At yesterday’s meeting, the Institute Committee appointed a new class of ten members to the “goodwill” of the Walker Memorial Dining Service. This is the latest of a series of attempts to improve the quality of the food served and lower the prices on it. None of the earlier ones accomplished anything worth mentioning. It is hoped that an intelligent ‘approach’ coupled with the culmination of the war will bring about a solution which will be satisfactory to the large number of the Institute family concerned.

TODAY

The regular Institute Committee meeting was held yesterday at 5:00 P.M. in Litchfield Lounge. The following business was transacted:

Investigating Committee

A special meeting of the Investigating Committee was organized to investigate conditions at the Walker Memorial Dining Service and to submit recommendations for their improvement. The members present were David O. Black, 2-46; Edwin T. Bean, 2-46; David Curt, 10-46; Harvey E. Freeman, 10-46; Harbert J. Russell, 2-46; Birnum N. Hillman, 10-46; Howard V. Perle- man, 1-46; Peter L. Richmond, 10-46, and Maina P. Trimm, 10-46.

Outeing Club

The Outeing Club was granted permission to conduct Class A recognition after the report of a special committee, headed by Philip D. Jones, 2-46, was heard and discussed. The Outeing Club will report in one year on its activities to obtain permanent recognition.

Class Elections

The motion to hold elections for the Senior, Junior, and Sophomore classes in March was amended so that only the Senior Class (10-46) will do so, and was subsequently carried. The arrangements for the elections will be made by the Institute. The by-laws provide that the candidate for Class President be nominated by the students. The by-laws further provide that the President of the Class shall be the head of the Class.

Reorganization of Activities

The Committee approved the motion on the procedure for those students who wish to reorganize activities, a procedure which is not yet defined. The procedure is outlined in the By-Laws of the Institute. The Institute Committee, Article VIII, Sections 1 and 2. Each group reorganizing may obtain, upon application, purposes upon approval, and approval of the Walker Memorial and Budget Committees.

Western Electric

The Bell System, through its Western Electric, is a source of supply for the Bell System.

In the Spotlight

The Bell System, through its Western Electric, is a source of supply for the Bell System. But it takes more than just telephone to provide service. It takes cable, central office equipment vacuums, and many other complex items that cannot be produced and fitted into the telephone system overnight. On these things, too, production is steadily increasing.

Western Electric, supply unit of the Bell System, is hard at work on the biggest peace-time job in its history. Furnishing materials and equipment to meet the System’s immediate needs—and to carry out the System’s $2,000,000,000 war program—promises record peace-time volume and a high level of employment.

Sav-all the Victory Bonds you can—and save them!
Harvard and Tech soccer teams main before the Harvard goal. The game tied, score 2-2.

Coach McCreary has been studying practice against the Harvard team, and he thought the team well worth of having any place in outside independents last season...the results were encouraging.

Eighty minutes of last year's action are back again this season.

Of these, Captain Ted Bachman, Chuck Wellard, and Jack Allen were regular, while Conner, D. Merrots, Kran, and Clark were also on the squad. After a period of extensive training men were added to this year's squad. They are Diowitz, Dunmire, Frenz, Hanks, Whitlock, Murphy, Waldren, W. Kirthick, and Smith.

The following are returning from last year: Craig, Honnold, Murray, and Smith. Atlatics are candidates for the first team. It is uncertain when this team makes its first appearance against the Elis on December 5th.

After playing Harvard, the team will play Yale and Tufts in their first home game against Tufts. The season, which extends through April 15th, is scheduled for a total of ten matches.

Next A.A. Meeting To Be Held
On Monday, December
The first meeting of the season of the Men's M.I.T. Athletic Association, will be held Monday, December 8th, at 1:20 P.M. in the M.I.T. Athletic Field House, Walker Memorial.

All members are urged to attend.

Civilian Swimming Announcement
Coach Gordon Smith has announced that he will be with the Harvard team from July 15th to August 25th. In an undated letter, he reports that these two hours are all that the Navy has at its disposal for the M.I.T. team. As you will see, Dublin is an extremely hard problem for the Navy's attractive team. The first match will be the third game against them.

Squad Team Drops First Two Matches
In the past week M.I.T. squad teams participated in two meets. The first was against the Massachusetts State Squad teams, which were defeated by a score of 20-21. The second was against Harvard, 3-2, which put us in the black.

In the second match, the team was defeated by a score of 21-17. In the third match, the team was defeated by a score of 20-17. In the fourth match, the team was defeated by a score of 21-18. In the fifth match, the team was defeated by a score of 20-19.

Prof. Aalto

porous openings in the roof with a sufficient disposition of datums in every part of the steam. One of his notable achievements was the design of the Stella Brite Mills, a manufacturing plant for fiber spinning. He has been a long-time resident of the Big Finnish industries and the general public. His work included construction of an entire group of workers and other institutions for a laboratory experiment in the field of chemistry.

Thousands of Americans are familiar with Professor Aalto's work in city planning and traffic control. He is a member of the Junior Prom Committee. In fact, he has so many friends that he cannot remember all of them. When thinking back, he could not recall whether or not he had been a member of the Junior Prom Committee.

A student in Course 2-E, he is an active participant in the American Society of Civil Engineers.

B.K. Football
In Final Round
P.K.S. S.A.E., Hayden, Theta Chi favored
The Beaver Key football league went into its final round this week, marked by a few key contests and one spectacular upset. Walcott, formerly unexposed were by knocking the Phi Gams, 28-10 in the season's climax, out of the running, giving them by a score of 28-10.

The game was hotly contested from the way, Walcott scoring twice as long on a very poor showing. The Phi Gams were held to a 2-2 tie after apparently being headed for the fifth marker. The game tied, score 2-2.

Kappa to the tune of 34-6. Glen sputtering and stalling through a series of mile relays, sponsored by the Tech Athletic Association and was welcomed by the Elections Committee. A.T.A. Announces

Prof. Levine Gives Talk On Experimental Psychology 
In Leadership Conducted By Colleagues

Sponsored by the T.C.A., Prof. Walter K. Levine gave a talk entitled "Experiments in Leadership Techniques." Monday, November 26, at 3:00 P.M. in Room 2-46 of the administration building, the professor addressed three groups of students. Each leader conducted his club in one of three manors which have been conveniently named: "autocratic," "democratic," and "laissez faire." The autocratic leader made all plans for the club but did not describe them to the boys, gave order, and maintained an all-powerful discipline; the democratic leader asked for suggestions made known his ideas for the future, and entered into the work of the club; the laissez faire leader did nothing to assist the boys.

Each group was subjected to each kind of leadership but in different perimeters. In this way the effects of the different conditions were "controlled out" and also the effect of the order itself could be determined. Careful records were kept of the behavior and productivity of the groups as units and of the individual members under the different techniques of leadership. These records were put into the form of graphs, some of which were shown at the lecture.

The data of the experiment show that there is considerably more spirit of aggression under a democratic leader; in the case of the boys clubs, the boys enjoyed their interests more when they were led by a leader who paid attention to their ideas. Every time one followed was "picked out" in particular. Productivity of the autocratic and democratic clubs was good; that of the laissez faire club was low. The laissez faire club was completely discouraged, the boys "rough-housed" first but eventually became serious.

In each club observations were made when leader left the clubroom for a few minutes. At one time the autocratic club ceased work immediately only to return to importance when the footsteps of the leader were heard approaching. The democratic club continued working when left alone. While the democratic club was at work, the boys conversation followed lines quite outside of club activities; there was real concentration. There were many more interesting results.

All the boys were invited to three clubs though Professor Levine was reluctant to publicize the results of the experiment.

Cram of Sights

Mos Eisley, 246, as Director of Foreign Students, and Robert S. Adlestein, 247, as Director of Graduate Students, completes the list of new appointees as Editor of the Senior Cabinet of the Technical Student Union.
