Music By Allan Band Features Girl With Twelve Piece Band

The Buddhophones Series A will be held on May 21, 1946, in Morse Hall. William A. Williams, assistant director of the union, will present a ten-piece ensemble from the union. The tickets will be sold at $1.25 for each ticket, of which approximately 300 people will be expected.

In charge of the social function is William Ayers, Class of 1-'48, with Charles Brown, Class of 1-'49, as financial and Publicity Chairman, respectively. These representatives of the Buddhophones committee have charged to have the dance in honor of "Dimethyll Ethyl Gluime," the Indian! With this July that the town of Cambridge will feature cocktails and dancing.

Everyone seems to take the attitude that the union is not the solution. "The trouble," said William L. Whalen, "is that the selection of Claude Augenblick, Jr., was not clearly the best choice. The election of Claude Augenblick, Jr., was not clearly the best choice.

A questionnaire has been sent to all students, and the Student Union has asked that the ballrooms be turned over to the Student Union for student use.

REPORTS

Reports for the Spring Term 1946 will be mailed to the term addresses on the roll. All students are urged to have their reports sent in before May 30.

WESTBROOK AND THE POPS

Last Saturday night the Technology Glee Club presented a concert in connection with the choral society of the West-
brook Junior College and Seminary in Portland, Maine. Trans-
portation to and from Portland and accommodations in the
East End Club were most generously provided by Westbrooks,
as well as a pleasant evening meal. Individual expenses were,
consequently, cut down to a minimum. Despite all this, twenty-five men appeared to partici-
pate in the concert. Fifty-five of the seventy-man club had
expected to be present was sent up to the Westbrook club.

The President of Westbrook expressed himself to be sorely
resentful to the outsider as an institution of higher learning. This
experience reflects on the Institute the group.

Mr. Henry Jackson Warren, director of the Glee Club,
was placed in a most embarrassing position, with a very disillusioned impression of Technology.

The Glee Club has, in the person of Mr. Warren, one of the
finest college-group conductors in New England, and not only
respected by all, and we bear the chagrin of the Musical
Club, and as a rep-

Without the interference of the I.F.C. and to the posi-
tion of festivities going on this weekend, it is only right that this

glissade of one full night's sleep (eight hours or more) before he gets out of

The Tuesday night program consists of a Band and a dramatic presentation, in which

Now we have a great deal of pride in our school, not only
for its accomplishments and achievements, but for what it rep-

ments to the outsider as an institution of higher learning. The
kind of publicity hurts, for we like to see our school admired
and respected by all, and we bear the chagrin of the Musical
Club managers in any equal hazards.

On Saturday, June 1, the Glee Club expects to participate
in the annual Tech Night at the Pops. There are only six more
scheduled rehearsals before the event takes place, and it is likely
without saying that if no more interest is shown in the club
that the Glee Club and the Institute the group reflects on the Institute

The Glee Club, in the person of Mr. Warren, one of the
finest college-group conductors in New England, and not only
is it understood that he will give them his time and efforts on a
seemingly futile undertaking, but it is an insult to him as a
musician to ask him to prepare a decent program for voices and
instruments, in which the only foundation material has at his disposal.

Tech Night at the Pops has been one of the most popular
events of the season in the past years because all Technology
participates in the event, which is sponsored by Compens, Inc. It is bad enough that
the Glee Club has disgraced itself before strangers, but before the "Tech Family" the
dishonor would be inexcusable. The Glee Club should come on and prove your worth to
the Club and to your school, and let's give them a standout per-
formance on June 1.

### Tufts Nip Tech, Javelin Throw Decided Victor

**Engineers To Face Crusaders, Eagles**

**Saturday Afternoon**

The fate of this meet hung in the balance throughout one point on the last event of the last event. As the last event, the javelin throw, was being contested between the two teams, a strong wind made it difficult for both athletes to throw. However, as the wind subsided, the javelin thrower from each team took turns to claim victory. In the end, the javelin throw from the Engineers proved to be decisive, winning the meet for their team. The Engineers went on to win the meet, 8-6, over the Crusaders and Eagles.

Chipman Heads Metallurgy Div.

Succeeds Dr. Williams Who Retires on July 1

Dr. John Chipman, Professor of Metallurgy, has been named head of the Metallurgy Division of the Institute. He will succeed Dr. W. E. Williams, who retires on July 1 after 44 years of active service as a member of the Institute's staff.

Dr. Chipman directed the Institute one of the early metallurgy conferences in 1928, and has been associated with the Metallurgy Division since 1937. His research in the field of the metalurgy of iron has been recognized by the award of the American Society for Metals' Gold Medal in 1943.

The decision of the Yalta, Potsdam, and Moscow conferences is one of the main elements in the establishment of a united front toward this goal. The decisions of the Yalta, Potsdam, and Moscow conferences, with their violent hatreds of other nations, their militarist traditions, and their contempt for the democratic nations, must be the final position of the now isolated U.S.A. and of the U.S.R. in collaboration with the free nations.

The vast majority of the Soviet people, being essentially white ballots and the organizations, particularly when broad interests are under consideration, are not properly able to represent the interests of the peoples of the U.S.R. The Constitution of the Soviet Union, as approved intact, is free of proposals which that organization properly busy itself with the activities of the Association.

In the unique arrangement that has been brought about by the granting of a much larger unit and by the organization of lectures and forums on issues of interest and value, these activities must not be mistaken for elections, which are also properly have clear-cut representation, particularly when broad interests are under consideration. A motion that an election be held at a joint dinner meeting with the Technological Secretaries being guests of the A.V.A. was decided to remove C.P.S. from the Constitution of the -South.

The major speaker of the evening was Ernest K. Bloss, Supervisor of the New England section of SAX, who talked briefly on Society activities and value. But, these activities must not be mistaken for elections, which are also properly have clear-cut representation, particularly when broad interests are under consideration. A motion that an election be held at a joint dinner meeting with the Technological Secretaries being guests of the A.V.A. was decided to remove C.P.S. from the Constitution of the -South.

The Institute Veterans' Association Agrees Upon General Functions

The primary function of the Veterans' Association here should be to represent the interests of the student-veteran on two general levels. First, in the local level represented by the student societies and the Veteran's Administration in the Boston area. The other level covers the relationship of the student-veteran to the community and the country.

The first-mentioned level is one in which the association can be both specific and active. There are three distinct groups involved in the unique arrangement which has been brought about by the granting of educational benefits under Title IV of the disabled veterans. Two of these groups are represented clearly and unequivocally by designated officials: the Veterans Administration unit in Boston and the Federal Government; the President of the student and other officials of the Massachusetts Institute of Technology. The third party, the student-veteran, should also properly have clear-cut representation, particularly when broad questions of policy affecting his interests are under consideration.

The second level on which the Institute Veterans' Association has a much larger unit and by the organization of lectures and forums on issues of interest and value. These activities must not be mistaken for elections, which are also properly have clear-cut representation, particularly when broad interests are under consideration. A motion that an election be held at a joint dinner meeting with the Technological Secretaries being guests of the A.V.A. was decided to remove C.P.S. from the Constitution of the -South.

Planning for Today and Tomorrow?

Our plans include young men, men with college degrees who wish to...

CHEMISTS

CHEMICAL ENGINEERS

ELECTRICAL ENGINEERS

MECHANICAL ENGINEERS

The American Viscose Corporation was America's first commercially successful producer of rayon. Ever since our first plant was established in 1910, we have continued to pioneer the development of rayon. Today, with seven plants located in Pennsylvania, Virginia and West Virginia, and eight plants being designed, we continue to be the largest rayon producer.

The ever-increasing demand for our products, especially among young men who are interested in research, development, and the production of rayon in a chemical processing industry, is increasing so rapidly that we must add new workers. If you are interested in learning more about our company, contact your college placement bureau or write to us.
