Options To J.P. Are Bought Up in First Day

Close To 500 Sold Out Wednesday To Juniors; All Sold Thurs. Morning

Students selling options to the Junior class were reporting that sales of about 100 per minute were made in the opening half-hour, and that 500 options were bought up in the opening hour. The system of selling options to raise money for the Junior class is a new one in Boston College history.

Tickets are now available for the Flower Show which is to be held in the Magnier Hall on Saturday, November 24, at 8:30 p.m. The tickets will be sold for 25 cents, which is the same price as has been charged in previous years. The proceeds of the tickets will be used to finance the red bleacher seats which were put in the Redman Stadium last summer.

Each term that the Institute is in session, the student body has an opportunity to formulate a program in the viewpoint of organized labor. Robert B. Abele, 49, chairman of the committee, expressed the opinion that the students should purchase early, as the supply of options is limited.

Scanlon Proposes Cost Reduction Plan

To Industrial Problem

Despite the fact that wages and benefits have increased in the last few years, industrial wages have not increased in the same proportion. The student body is urged to formulate a program which would provide a basis for the improving of wages and benefits.

Welcome Talk by Whitman

A.W.C. Meeting

The American Institute of Chemical Engineers is conducting a program of open meeting today Tuesday, October 22, at 5:00 p.m. in room 3-270. The Institute Committee representative is Mr. George H. Whitman, 41, chairman of the committee.

In order to bring student military policies into line with those of the student body, the student body is urged to formulate a program which would provide a basis for the improving of military policies.

Compton Talks at Celebration

Meeting Commenmator Use of Anesthetics

At the regular Institute Committee meeting, Compton, 47, President of the Institute, addressed the student body on the use of anesthetics in medicine. He urged the students to purchase early, as the supply of options is limited.

TCA Plans Drive

For Vets Housing

A house-to-house canvass of three neighborhoods in the Saxon area between 9:00 a.m. and 12:00 p.m. this Saturday will be held by TCA. All those interested are urged to participate, as the drive is expected to be very successful. The drive is being held in conjunction with the Student Housing Committee.

Cath. Club Annual Fall Dance Tonight

400 Girls Will Attend Event In Morss Hall

Technology's Catholic Club is sponsoring a dance tonight from 9:00 p.m. to 1:00 a.m. in Morss Hall. The dance is being held in conjunction with the Student Housing Committee.

Student Meetings Held

By Student, By Student

The Student Meetings Committee held its opening meeting Monday, October 14, in Walker, with an attendance of 15 members. The meeting was conducted with the cooperation of the Student Housing Committee.

In order to bring student military policies into line with those of the student body, the student body is urged to formulate a program which would provide a basis for the improving of military policies.

Q. How long is a second?  A. Sometimes it's 3⅞ YEARS

One second is not always one-sixtieth of a minute—not in telephone mathematics. Suppose, for example, you find a new method that enables you to drive your car second by second from time to time to process a toll ticket. You apply that saving throughout the Bell System where some 113,000,000 toll tickets are handled a month. The time saved is so great that it is to the interest of everyone.

Q. In this industry, even long-established methods of operation are subject to improvement. For men with ideas and vision, that viewpoint is a stimulating challenge.

THE TECH

TCA Smoker Asks For Boys Workers

With Frederic F. Elrich, '47, recently elected President of the Technology Christian Association, TCA Smoker held yesterday in the Faculty Lounge in Walker Memorial. (Continued from Page 1)

Donald B. Fosdick and Sidney L. Smith, '47, represented TCA, appeared at the meeting for the Aeronautical Engineering Society of the American Society of Mechanical Engineers in its annual meeting in Chicago last week end.

In the audience were members of the American Society of Mechanical Engineers and of the American Society of Engineering. It was stated by Dr. Compton, who termed "human engineer- ing," that he would consider the employment of skilled men as the lDramashop, the student-run, but the Managing Board usually hired a Broadway personality to direct the production. This new revue will differ mainly in that it will consist of a series of selected short stroboscopic motions or some similar person. This announcement came from Roger Wil- liamson, whom the Board of Directors, board meeting, such an organization is to be held in Room 2-190 at 5:00 P.M. Results will be made in order to stimulate political thinking on the part of all Tech- nology students. At the presentation time there is a social political organization on the ramp, but if present, as at the Civic Affairs Committee meetings, such an organization may be formed. Civic Affairs Committee meetings are no longer held every Monday in the Senior House, Ware Lounge.

Dramashop Plans Comedy By Wilde; Trials Being Held

"The Importance of Being Earnest," a comedy by Oscar Wilde, will be the first production of the season by the Dramashop. Performances have been scheduled for the evenings of Friday and Saturday, December 6 and 7, in the Peabody Saloehouse. According to Robert F. Abelson, '48, General Manager of the Dramashop, the production contains much of the sparkling dialogue and clever wit for which Wilde is famous. Tryouts for the cast were held recently and are being provided for all Tech students. The Tech Cabin has been reserved for rapid advancement in that it will consist of a series of selected short stroboscopic motions.

At the meeting will be discussed the formation of selected short stroboscopic motions.

For men with ideas and vision, that viewpoint is a stimulating challenge.

BELL TELEPHONE SYSTEM
Applications Soon For WMIT Staff
Operation Delayed By Unfinished Transmitter

In the near future men living in the dormitories and the barracks will be able to apply for positions on the staff that will operate station WMIT. Applicants will choose one of three departments: business and advertising, engineering, and program. The students who are selected to do this work will receive valuable experience in the radio field since the student volunteers will be entirely responsible for the successful operation of the station. The business and advertising department will select advertising and generally cars for the financing of the station. The first job of the program staff will be to conduct a poll of the dormitory and barracks to determine what type of programs the students prefer. Selections for the various positions will be competitive, based on the qualifications and past experiences of the applicants. When ready the applications will be available in the dormitory office and at some convenient place in the barracks. Members of all classes may apply. Originally Paul P. Mo, '41, and Henry Koerner, '42, hoped to have the station in operation this week, but due to the pressure of studies the station is in operation this week, Henry Koerner, '41, is to be entirely responsible for the station's operation this week.

The Transmitter

The oscillator, which was almost ready to complete the oscillator, had time to complete the oscillator. The Course VI men, who are asked but due to the pressure of studies I will complete the oscillator, will complete the oscillator in the station in operation this week.

Henry Koerner, '41, is to be entirely responsible for the station's operation this week.

About Donnie's

Three of the six co-ed members of the Class of 1950 snapped on the Margaret Cheney Room. The girls are, left to right: Natalie Adelman, Kathleen M. Black and Anne C. Rose. The girls seem to favor architecture and chemical engineering as their courses at Technology.

Do You Worry?

"The Tech" Intervies Frosh Co-Eds; Six New Girls Join Mag Cheney's Ranks

Like most of the other freshmen, we had been wondering what makes a girl come to Technology. So, while writing our press card, we went up to the Margaret Cheney Room to find out. Since it is ventured for a man to get food in the Cheney Room, a crime punishable by hideous death, we made an appointment to meet the girls in Litchfield Lounge. Of the six freshmen co-ed's invited, four showed up at the lounge. (For the benefit of the members of a certain monthly, not all 6-er's here do not resemble Margaret.)

Anne C. Rose is going to study architecture, her first interest being art. As a matter of fact she almost went to art school but the result of an aptitude test and a discussion with a Technology alumnus inflamed her to come here. Last Friday night she disguised herself as a Radcliffe girl and went to the acrobatics dance. Not one of the boys could tell that she was a Wellesley student, which ought to prove something. Her home town is right here in Cambridge, the scene for a good dancer who likes sports. Anne complains about the salary rules the co-eds are required to wear when they go swimming, and states she would prefer to use her own, probably because third look good in a well-fitting suit.

New Course X Recruit

Kathleen M. Black comes from Ely, Minnesota. She attaches her desire to be a chemical engineer to the fact that her mother would not let her play with chemist's. Since she always wanted what she cannot have, she read a number of books on chemistry and decided to come to the Institute. Since her interests extend to languages, she intends to study Russian.

Margaret J. A. Adelman comes from a long line of technical attendance. Her father being a civil engineer and her exposed sister would not let her play with their professional books. Margaret J. A. Adelman would have been a civil engineer except for the fact that she is afraid of the dark and doesn't like the idea of nighttime surveying parties. Tentatively, she is going to be an architect, but she may turn to mathematics or chemical engineering, choosing architecture because it is a good field for a technically minded woman. A local girl, now living at her home in Brooklyn, her type of man is an engineer and a gentleman. That excludes a good number of Technology. As an added note, she should also be good looking, match.

Another of Same

Marie Assuncao comes from Flushing, Long Island, New York. During the term she lives at the new Technology girls' dormitory with Kathleen and coeds upper-class girls. For the benefit of interested Technology the address is 109 Bay State Road in Boston, telephone Circular 8484. Marie also intends to become a chemical engineer. She states that she was rather confused when she received a letter from the Interfraternity Council urging her as an incoming freshman to join a fraternity. What good are all those frat houses anyway?

Electronic Engineering

This highly specialized, graphically illustrated technical magazine for radio engineers is being offered to a limited number of subscribers in the United States. Also available—Monographs on Electronics—presenting latest scientific data—see coupon.

Booster Score 1st Victory of Season Over Fitchburg 2-0

Nino-Patrick, Roselle

Tally Daily Techs Play Trinity Tomorrow

Complainingly outplaying their opponents, the soccer team made its way to the first victory of the season with a win over Fitchburg State Teachers' College. In the second half of the game, both periods, the Tech booters pioneered through both goals, while the Fitchburg stingers never scored. After the match, which was held on Wednesday afternoon, the Techs' Edward A. Rosenberg was elected team captain. In a game which was fairly rough to both teams, the Tech booters acquitted themselves well, but the Fitchburg team showed a lack of practice. Many of the men on the team had never played before, and it was on the team, but the Techs came out of this game with a 2-0 victory.

October 26, at Brown University. Tech will send two crews to compete against the Eastern varsity teams, it is expected, to win the first place, and the others will be held back for the meeting in the society. From these 12 men, it will be elected by the Juniors.

First Swim Meet At Brown Dec. 7;

The 1946-1947 swimming season has gotten off to a good start with the varsity team training daily in the gym, with the freshmen and sophomores making exclusive use of the pool daily between 4:00 p.m.

and 6:00 p.m.

The freshman team will make its debut against the Sophomores on Field Day, November 2, after which they will meet other college freshmen teams, and squads from prep schools. Many of these men will be held for the moment, while the others will be held for the upcoming track meet.

Dave Knodel, who is coaching the first-year class, is still in need of men for his team. In the past, he has found that many men who have shown great spirit and who have given a good deal of men in the water every day, the Sophomores have shown a lack of interest.

In addition to other coaches, Coach Smith will be assistant coach of the team, the freshmen team's for field

Musical Clubs Plan New Productions
Symphony Orchestra, and Glee Clubs Growing
Enthusiasm is strong in all branches of the Technological Symphonic Orchestra, which meets every Monday evening at 7:30 in the auditorium of the Electrical Engineering Building. Under the direction of Antonio A. D'Almeida, the orchestra has reached a membership of fifty members, playing every instrument from bass viol to the cymbals.

Although there have been smaller musical and instrumentalist groups at the Institute, this organization, founded last year, is the first full-fledged symphony orchestra active at Tech. The fifty members include students, faculty members and wives of faculty members interested in music. Although the orchestra is rehearsing works by the more famous composers including Beethoven's second and eighth, Mozart's 40th, Schubert's 5th and Haydn's 101st symphonies, other works are Wagners' "Tannhäuser," Brahms' "Symphony No. 1," and Beethoven's "Leonore," number 3.

Rehearsals of the Technological Glee Club are being held each Tuesday and Thursday at 5:00 P.M. in Room 3-190. The Men's Glee Club, with approximately 110 men under the direction of Henry Jackson Warren, who is also directing the Women's Glee Club.

A special need exists for first tenors, according to Carl L. Kolbe, 44, General Manager of the Combined Musical Clubs. Kolbe also stated that the Women's Glee Club now has fifty members, and that it hopes to build its strength up to a point comparable to that of the Men's Club. The women hold their rehearsals Tuesday evenings at 7:30 in Room 3-190.

The Men's Glee Club plans to hold its first concert of the season with Bradford Junior College on Friday, November 22. A total of at least fifteen concerts are scheduled for the school year with schools and colleges in the Boston area and in New England. The Club is now working on Handel's Messiah, which it will present sometime in December.

Prof. Deutsch To Speak For Hillel Society Today
Professor Karl M. Deutsch, sponsored by the Hillel Society, will speak at 8:00 P.M. today in the Faculty Lounge on the topic, "Rationalism in the Middle East." A member of the Department of English and History, Professor Deutsch is an expert in the field of rationalism. Everyone is invited.

On Tuesday, October 22, at 5:30 P.M. in the Faculty Lounge, Rabbi Harry Rack, director of the Technological Hillel Society, will lead a discussion group on "The Enlightenment Period in Modern Jewish History." This meeting is open to all.

The Society is holding an outing to the Tech Cabin on Sunday, October 20. Full details and sign-up list are posted on the Bulletin board in Building 18, opposite Room 3-150. The sign-up list will be required Wednesday morning. Due to limitations of space, the outing will be open only to members of Hillel.

"Technique" Begins; Senior Photos Taken
Registration for the "technique" senior class photos has been taken in the lobby of Building 18, and the students are now being photographed in the Walker Memorial offices of "Technique." Editorial work for the yearbook is also being started, according to Otto W. Weidell, 41, General Manager.

The "Technique" publication date has been set at May 15, 1947. Over 30 new staff members were recruited at the meeting held Thursday, October 18, and many positions are still open.

Photos of Inca Indians Feature Bldg. 10 Exhibit
A new exhibit is being on display this week in the lobby of Building 10. It is a travelling exhibit sponsored by Life Magazine, and consists of several large photographs of the Inca territory of Peru. The collection is based on a photographic essay that appeared in Life, but includes some pictures and descriptions not in the original story.

Co-Eds (Continued from Page 1)

Hot Stuff
The last of the co-eds interviewed, Elizabeth Sherr, is generally regarded as the most attractive. Indeed, she is aware of this since she didn't think it necessary to be interviewed. Nevertheless, we found out that she comes from Winnetka, Illinois, a suburb of Chicago. Like the majority of the others, she is taking an architectural course since it fits in with her interest in art, physics, and mathematics. The principal complaint of all the girls is the seeming lack of activity open to them. They would appreciate it if the activities would welcome co-eds with notice posted in the Chummy Room. Why not try the Tech, girls?
