An unusual affair sponsored by the M.T.V.A., many Tech students and their dates took the oppor-
tunity to be photographed while the canvas just has discovered one couple fleeting a pipe from the barrel labeled Naughty Naught.
The case was then tried at the court provided for such misdemeanors. The right picture shows another of
the couples who at the moment are managing to keep out of trouble.

Am. Architecture Exhibition Begins Mon. in Building 10

Institute's 12th Annual Exhibition of American Architecture opens to the public Monday at 10 a.m., and will remain on view from January 22, through February 14, in Utchfield Lounge. One of the activities, the Public Relations Com-
mittee, which thus obtained a legal charter and authority to conduct the Tech Show and Combined
Professional Societies are present.

The Committee will consist of a chairman, to be a senior, two vice-
chairmen, and eight associates, to be divided among the upper three
classes. Freshmen will aspire to be members of the Executive Committee, and
shall not be excluded on the ground of nationalities.
President Truman Latest Victim Of Hoax On "Harvard Crimson"

By Han Finch

Once again the little man who dwelt in the red brick buildings up near the Charles has shown that he is capable of more than mere deceit. This is not the best of times for President Truman, the once and still somewhat beloved, although somewhat unknown, villain. In the light of a sad, sunny day, the government's president showed himself powerful sufficiently in his office setting the day's agenda that the government's president was receiving the hearing he deserved. Realizing its nationwide significance for the press conference, the White House passed the newsman's office with the starting messages. It was an invitation to all and sundry to be a honorary editor of daily newspaper, or something like that.

In the spring a young man's fancy turns to love, when he can go home.

Presidents are red, roses are blue.

So were his words.

Institute policy is beginning to prevail over one the D. Department. The other day in class we were shown a chart on which all reading was written in yellow and red tape. The purpose of this chart was well explained by the Major after several questions had been made by our comrades-in-arms. It seems that the Army believes in teaching us something the moment we spring each new session upon us, and that we recognize this in each of our own, always vary.

Let's wife was turned into a pillar of salt, but not of our coeds.

As we crossed the Great Court the other day a scrap of paper was seen flying about with the words of our odorous wind. Further investigation disclosed that the cause was contained; three definitions. \[\text{Editor's note for your edification:} \]

Student: a seeker after knowledge.

Professor: the holder of wisdom; also known to the American Indians as a person who could read and write.

Graduate student: one of the few people on campus who will stagger out of the Institute, but it is not expected that he will possess the patrician that he has come back for.

We feel that the younger men are growing up too rapidly. To support our hypothesis we offer the following definitions. We are on a board form, we see; \[\text{“Jane L. has an emotional problem for Johnny.”} \]

Stone walls may not a prison make, but they close it too.

What is the next best thing in Heaven, but Heaven is easier to reach.

Hitchhikers, Techmen have never given a chance to be let go, their jobs terminate even before they are out of a course. The grade system seems pitifully inadequate for the job, and the final class presentation of subject matter but are often, the result of sleepless nights and much-maligned “hard work.” Professors have a tendency to think a student is capable of understanding a point they are trying to make. Questions which are not too difficult for the student to answer are expected to be answered correctly, and so are questions which are not too difficult for the student to answer. The faculty of the department was then canvassed and found willing to submit to the idea that they should carry on from there.

Instructor ratings were used to assure the actual survey conducted a

absolutely anonymity for the student. Only in this way could objective views be forthcoming. The points on which the survey was to be based were<div>Questionnairenaires will not be turned over to the instructors until the beginning of next term, the results of this experiment in progressive education will not be apparent for awhile. It seems almost certain, however, that the faculty of the Chemical Engineering Department, will be influenced by the opinions of its students.</div>
Talk Sunday To Be On Jet Propulsion

"Jet Propulsion and Jet Propulsion Engineers" will be the subject of the second of the Society of Arts Popular Science Lectures at the M.I.T., on Sunday, January 16, at 8:30 p.m. in room 10-250. Dr. C. William, Associate Professor of Chemical Engineering.

After describing the basic principles of jet propulsion, Dr. Williams will discuss the early history of jet propulsion devices, including rocket, as well as air-breathing types. He will also speak on rocket development and applications, including the military, and aircraft, and compare the performance of space vehicles, and the various types. In addition he will be exploring some of the problems to be solved in jet propulsion, and Dr. Williams is expected to speak about future applications of jet power.

The third of the Society of Arts Popular Science Lectures will be given by Professor Anton M. Graubard, Professor of Mineral Dressing, who, on Sunday, February 6, will speak on "Getting the Most Out of a Mineral".

First-Place Tie in Math Competition

John F. Moore and Leo Sartori, both students in the Mathematics Society Freshman class, won first place in the Math Competition, held February 17, in the form of a written test. Second place went to Peter G. Nelson, and second place to the Mathematics Society Junior class, and to the Mathematics Society Senior class.

Attending the competition were David Reiner, Donald B. Baker, and William M. Miller. Reiner won first prize, $15, awarded to the winner of the competition. Second prize was $10, awarded to the Mathematics Society Junior class, and third place was $5, awarded to the Mathematics Society Senior class.

IT'S A GREAT DAY TO BE A BEAVER!!

"Tie in" the Junior High School at the Massachusetts Institute of Technology for the 1954-55 season was presented to the group. The competition was sponsored by the Institute's Junior High School Program Committee.

Prof. N. H. Frank Speaks

On Graduate Dept Work

Prof. Nathaniel H. Frank, head of the Graduate Department of Physics, addressed the meeting of the Physics Section on Monday, January 14, in room 10-430. Frank's talk, which was entitled "The Structure of Physics as it Matters to You at M.I.T.?," the lecture included discussion of the evolution of the physical sciences, the various fields, and the requirements and examinations for advanced study. The discussion was made of the unusually crowded conditions in some of the departments and possible future trends in enrollment.

On Monday, January 14, approximately 500 students and members of the Institute will participate in an organized tour through the various laboratories and research laboratories. More trips are planned to be made during the coming term, as well as during the summer.

Dorm Comm. Will Hold "Ball Session"

Announcement was made at the last meeting of the Dormitory Committee that the resumption of the Ball Sunday dinners will be scheduled for next Wednesday at 8:00 P.M. in Pricheth Hall of Walker Memorial.

In order to allow students to become better acquainted with their classmates, the dinner is open to any group of seven students living in the dorms who submit their names and the chosen professor's name to the chairman of the committee. A limit of fifteen groups, or 120 people, has been placed on the affair, with the Committee to stand the professor's dinner and half the students.

The dance committee announced that Bid Night has been postponed to play at the Acquaintance Dance on May 1. Open House in the dormitories has been declared for tonight, January 17, for the Acquaintance Dance, and on January 18, for the occasion of an informal dance to be held by the Beta Phi Pi.

The Beaver Key basketball tournament will be over this week, with Goodale still the only hall still left in the final round of competition.
The Northeastern University basketball team, the Northerners, fought hard to keep their secondary and third string players from their grasp despite the fact that the taller Northeastern team was able to work effectively in recent offensive boards.

Under the boards, the team showed through the N.U. defense to quickly place the Beavers ahead by a period with Ciccone and Watson tech came back late in the first half. Roy Devens also falls victim

to the 20 point margin of victory for Beaver high scorer. Roy Ciccone, and Lou Morton also build

The K. of C. meet on January 25 will be the first real test for the Beaver line including. Those advertised

off, Rault and Vitagliano for position on the varsity one-mile relay team; Holland, Hunt, Lobo, McMar- four: Baldwin, Behr, Ingraham, Prem- omar, Battista and Bill Raich, in the 45- howitt, and Bob Musser. This committee is now inclined to take this match in their own hands. Reasons have not been given for this change in policy but the seeming lack of progress by the team in the past couple of years may be behind this move.

Dr. Everett M. Baker, the new Dean of Students, in an interview with the Boston Traveler on Thursday, stated that "the supervision, in general, of intramural and inter-mural athletic programs, to be greatly expanded in the future, will be one of his most important jobs."

The Institute Committee President, Jack Lehman, Chairman, John Tart, Bob McElroy, Norman Mel- hagen, Jack Meyerson, and Bud Bryant. This committee is now inclined to take this match in their own hands. Reasons have not been given for this change in policy but the seeming lack of progress by the team in the past couple of years may be behind this move.

"The Committee and members of the administration are not the only ones who have evidenced the realization that something should be done concerning this matter. The Institute Committee has appointed an eight man committee to study the organization of the Athletic Association and to make a general survey of the relations between the athletic and educational programs. The committee will, among other things, take into consideration the policies of the Alumni Advisory Council. Members of this eight man committee are John Bartlett, trumpet, Jack Lehman, Chairman, John Tart, Bob McElroy, Norman Melhagen, Jack Meyerson, and Bud Bryant. This committee is now inclined to take this match in their own hands. Reasons have not been given for this change in policy but the seeming lack of progress by the team in the past couple of years may be behind this move.

There are presidents of operating telephone companies of the Bell System. They all started at the bottom of the ladder... Now years ago the Bell System first published an advertisement like this, except that there are now thirteen new faces in the pictures. These new presidents also started at the bottom.

**

The Bell System aims to keep the opportunity for advancement open to all.

One of its traditions is that its executives come up from the ranks. That has been true of the business for many years. A special inspector is not better illustrated than in the careers of the men who now serve as presidents of Bell Telephone Companies. As a group, they have put in 613 years of telephone service, an average of 36 years each. As a group, they have put in 611 years of telephone service, an average of 36 years each. intercollege tilt at Trinity several years ago, which together rank among one of the most publicized.
The Beaver medley relay team of Ben Dunn, Henry Morgan, and George Loomis scored victory in the initial competition of the meet, with a time of 3:19.8 minutes. Beth Morgan, a breaststroker, and Dana, a backstroker, have been constantly whittling down their times as the season has progressed, with a resulting improvement in the median clocking. Morgan also splashed to victory in the 100-yard breaststroke to become one of Tech's three individual winners. His time was 1:03.7 minutes.

Tech captain Jim Leonard and C. Tyler of Trinity, placed first and second in the 50-yard and 100-yard freestyles. Leonard negotiated the two lengths of the pool in the 50-yard event in the time of 24.6 seconds to eclipse Tyler, who was second. In the 100-yard freestyle, however, Tyler took first in 56 flat, with Leonard finishing in the second spot a scant one-tenth of a second behind. John McCabe placed third in the 100-yard medley.

Trailing the winner, C. Tyler of Trinity, by only three-tenths of a second, Dickie won a second place in the 225-yard freestyle, with Reserve Calihan finishing third for M.I.T. In the 440-yard freestyle, C. Tyler again triumphed, this time with Bill Russell and Paul Hurley, of Technology, taking second and third, respectively.

The 100-yard breaststroke was the event providing Tech with the highest single point grouping as Dick Pillar and John McCabe emerged up to the finals line in first and second places.

In the diving, Zigy Unuvar won second place for the Engineers to fall behind Trinity's Yeager, who was first with 77.9 points. Tech's highest single point grouping as Dick Pillar and John McCabe placed second to give M.I.T. a three-point margin of victory at the end of the meet.

### Swimming

SWIMMING

Intra-mural sport and athletic programs have usually been handled by the Beaver Key Society. Although the quality of this supervision has at times appeared very spotty, this type of activity has met with a moderate success. Owing to the fact that this type of sports requires little practice and no fixed times for the games, it could, under proper conditions, become an important part of the official intercollegiate sports program. In conjunction with this should be considered the wider popularity of the Field Day activities, in some aspects, than some varsity sports.

Taking in the overall view, it would appear that positive action will be taken. Just how soon is not known, but one cannot expect either immediate or hurried action on these vital affairs. However, with the forthcoming report of the Athletic Association Study Committee and with Dr. Baker taking an interest in承办 the student body can look forward to favorable changes.
