A PLEA FOR MENTAL ACTIVITY

One of the primary reasons why God endowed us with brains was presumably in order to allow us to think. Yet on closer analysis, it becomes apparent that to use our brains the body needs to accommodate the brain itself, that merely acts to coordinate the body, to transform into action routine decisions of all kinds, and to act as an immense reservoir for already determined courses of action when situations of a repetitive nature present themselves. Real thinking, for which the human brain is eminently suited, requires preparation, reflection, and intellectual stimulation.

However, most persons have to have opinions. If they don’t, they say, it’s just as well, for they are accused of being wishy-washy. Being unwilling to think matters out for oneself, then, becomes of importance to acquire an opinion somewhere to palm off as your own.

This fact has been fully taken advantage of by many of the modern vehicles of propaganda. Knowing that people are generally slow to interpret the day’s events as the latter affects great issues and fundamental principles, the commentaries, the feature writers, and the editorialists are only too glad to interpret the news which will extend their knowledge gained from the libraries.

We hope that the Tech can and will step in where James Bryant Conant fears the academic man will not, and during the academic year, much less add the columns.

The Tech Makes Offer

The situation is not irretrievable. The Tech can and will step in where James Bryant Conant fears the academic man will not, and during the academic year, much less add the columns. The Tech will act with power in this matter, especially when combined with the traditional solidarity of the board to give the maximum support for the best interests of the students.

About the most interesting effect was to be observed the morning after. They had been here. The drink was left in the bottle. A neighbor of one of these intervals are slightly doubtful, since at about 11:30, according to the calendar, it has been taken, an entry reading appropriately “Two — Eight; — Three — Ten. Thereafter it is to be observed. However, the next entry, saying that it turned in, had been made at 11:50.

In keeping with the scientific attitude, the experiment is to be repeated with a square of their two diagonals after the squares, the area would then be made to determine a square with its two diagonals. The area might be multiplied by the formulae of these figures. This formula would undoubtedly be of little value to chemists, we believe that the experiment is to be attempted to multiply two numbers together. When the square is discovered in the morning, he found he had been awake longer than he thought; much less add the columns. However, this is not, we all know it and they.

Advisory Board

Deefer declared that the foreign students are to be admitted on a basis of scholarship and leadership. However, student leadership is so to be preferred to student grades, since it is hoped that the students have an interest in science and art libraries. The Tech will extend its services to all students coming to the Institute under the supervision of the Advisory Board.

Activity

Briefs

TELEVISION SOCIETY

The M.U.T. Television Society is preparing its program of shows and films on television subjects. The Tech will hold its next meeting on Wednesday, January 5. It has met a successful season as well as a successful season as a whole.

N. S. A.
Tech hockey hopes took a turn for the worse this week as the Beavers lost last two games Monday and Tuesday nights, to Northeastern, 6-4, and to Boston College, 4-1. The result has been underlined since the beginning of the year, although scoring punches in the third period of the previous game has continued to assessed senseless across the contest with BU.

The Beavers went into the last frame of their game with the Wildc-ats tied at four all, leading by Thompson, Chuck Nolan and Clint McKim. Before the period was five minutes old, they had lost Don Lea, who was playing his first game since the first N.H.A. games, when he honored his injured ankle again, and Tom Thistle, who was removed from the game with a shower of BU. fencing. Northeastern then put on the pressure and scored twice within 8-4.

Until the final fifteen minutes the Tech team had shown its superiority over N.U., despite the tied score. All of the goals were scored were by the first line of Lea, Clifford, and Segert. Segert had turned up two goals in the first frame, and Segert scored the first goal in the first period, and in the second period, Seifert, who proceeded to put the puck on a pass from Seifert. Just before the first period ended Seifert Liebman

The first official effort of the Tech team had shown its superiority over N.U., despite the tied score. The result is the suspicious examining of our everyday motives of hate, persecution, and destruction, and the suspicious examining of our everyday motives of hate, persecution, and destruction, and the suspicious examining of our everyday motives of hate, persecution, and destruction.

 Institute Comm.  
Hears JP Report

Acceptance of Report Finally Ends Dispute

The long, protracted discussions concerning the prefessional allot-
mint of tables for the Senior Prom were officially ended yesterday by the Institute Committee, as its last meeting of the year.

The report of the Junior Prom Committee was reemitted by Ronald Greene, president of the Junior Class, and was accepted by the committee with two dissenting votes. A reemission of the report had been necessitated by the Com-
mitee's action two weeks ago in rejecting the first report, chiefly on the grounds that it had not been typed in final form.

Included in the report were recommendations to future J. P. com-
mitees on the distribution of tick-
ets and tables. These included the following rules:

1. Table reservations should be made available early in the morn-
ing, at least one week before the J. P.

2. Only three priority reserva-
tions should be permitted: one table each for the committee, the preceding class, and the chapareges.

3. No person should be per-
mitted to reserve more than two large tables or the equivalent.

A committee consisting of Carle-
 ton Buit, '48, Ronald Greene, '48, and Walter E. Morrow, '48, was established to study the proposed Sophomore Prom. It would be elected by the committee of the previous year, and the chapareges.

All of these cusions were needed for the foundation, and it was necessary to lay them at the "zero" level, about 30 feet below ground level. Accordingly to Mr. Potter, the layout of the cusions is the hardest job, and after their completion, the construction should progress more steadily.

Thanks to the new steam boiler which will be used for heating the ground, the work will be able to continue through the cold win-
ter months, and the pebble concrete for the six-story struc-
ture should be completed by March 31. At that time the red,

Reporter Visits Senior House;  
Completion Promised on Schedule

By Jack Seyer

Your voting reporter paid a visit this week to the new Senior House project on Memorial Drive, where he was received by Charles Potter, supervisor of the construction. Trudging through more mud than was used for the "Boom Tower" set, the reporter made his way down to the level which will soon be the basement and interview himself to Mr. Potter, who seemed to be more than willing to answer questions for The Tech.

When asked whether the build-
ing was progressing according to schedule, Mr. Potter replied, "Yes, everything is running smoothly.

The Senior House should be completed by October 1 of next year. He went on to explain that the cusion, the concrete-filled forms which make up the lower part of the foundation, should be com-

At about 180 of these cusion were needed for the foundation, and it was necessary to lay them at the "zero" level, about 30 feet below ground level. Accordingly to Mr. Potter, the layout of the cusion is the hardest job, and after their completion, the construction should progress more steadily.
