COMPTON SEES INJUDICIOUS DONE

Institute Committee Debates Wallace

Fate Of Wallace Group Decided By Single Vote

Long Debate Ends

In Gay Confusion

Constitution Amended

Spurred on by the efforts of Ed-
ward M. Kosower, '40; Robert P.
Allison, '40; and Jerome Blackman,
'49, the Institute Committee voted
last Wednesday by a count of 10-7
to approve the revised Constitution of
the Wallace Committee as a Class B activity. A two-thirds vote is re-quired for the approval of a Class B activity.

Only after several highly restrict-
tive measures were inserted in the amends to the Constitution, was
admitted by William R. Zimmermann, '49, that the Wallace Committee will
be the first of its kind recognized by the Institute Committee. The amend-
ments that were brought to light in the course of an extended discussion are the followings:

- All measures to be received from mem-
bers of the Institute Committee.

- Any nature are not allowed on the In-
stitute Committee. The amendments that will be
in no way endeavor to change the
goal of the Wallace Committee. The imple-
mentations represent the preferences of the Technology student body at
large.

Student Assignment

Principal opposition to official recogni-
tion of the committee was led by Benjamin J. Breslur, '49, and John R.
Kirkpatrick, '49. Breslur, working on the assumption that the purpose of a Class B ac-
tivity is to help students to get their way, declared: "I don't see why the function of the Wallace Com-
mittee is to represent the preferences of students.

Blackman replied that the com-
nitee plans to adopt every measure of both sides of the controversial Wal-

MOREROO MAMMEMENTED

For the third time in two years the Institute has attempted to attract 20,000 people into Room 10-250. On Monday, March 1, the Hon. William L. Clayton, former Undersecretary of State, spoke to a jammed crowd in the Institute's largest assembly hall. However, that we feel that we have made at least better use can mostly certainly be made of the available program and a new assembly hall. In the absence of the latter, the students can take advantage of them. It certainly was first announced that a change of date. Was not six days enough time to contact Mr. Clayton regardless of how much he may travel around the country? In any event, the students, and, he felt, not enough students would attend to warrant the expense of bringing Mr. Clayton as a speaker. The Institute committee members are estimated need be sold to break even. M.S.F. (Walker Memorial Committee): that the expenses of the Activities Ball be a meeting soon at which all interested members of the Institute Committee to read. The meeting was opened by President Parmelee at 5:08 p.m. The committee is to submit its report before April 15, 1948.

Objectives Week

In answer to the first two objectives, the lecture was packed, not just by Humanities students, but by everyone. It is, then, obvious that the jammed room in 10-250 and the three or four hundred disappointed students and faculty members outside of 10-250 was another example of very poor planning.

The Institute's long-range building program includes the construction of a auditorium. In the meantime we must make the best of our easily inadequate facilities.

The various departments must schedule lectures in such a way that the students can take advantage of them. It certainly is most unfortunate when a man as outstanding as Mr. Clayton visits Technology and only those strong enough to push into 10-250 can hear him.

It is doubly unfortunate in the case of the Institute, because in some colleges lectures of this nature are given almost every week, while at Technology it is an unusual event.

The real solution to this problem is an integrated lecture program and a new assembly hall. In the absence of the latter, at least better use can mostly certainly be made of the available program.

MISINTERPRETATION

We recently received a letter from Bill Zimmerman of the Walker Memorial Committee in regard to several of our editorials. Although we have stated previously that we would try to print all letters in their entirety we are faced with a problem when a letter is long and we must cut elsewhere from shortening which would be necessary to fit it in the space available.

Bill's letter was all-inclusive, and if we had printed it we would have been compelled to answer each part in detail, for most of the points were more interpretation and individual point of view than anything else. For these reasons we have not been able to print this letter.

May we state, however, that we feel that we have been misinterpreted in certain quarters. If we have "blasted" the War Date Committee we have stated previously that we would try to print all letters in their entirety. Although we have stated previously that we would try to print all letters in their entirety we are faced with a problem when a letter is long and we must cut elsewhere from shortening which would be necessary to fit it in the space available.

Bill's letter was all-inclusive, and if we had printed it we would have been compelled to answer each part in detail, for most of the points were more interpretation and individual point of view than anything else. For these reasons we have not been able to print this letter.

Diplomacy

(Continued from Page 1)

It is these activities that seem to have attracted their share of attention. The Senate Committee on Un-American Activities has been courageously trying to get to the bottom of the question of how Margaret Sanger, one of the American Physical Society, can be used in an exchange of correspondence between him, as Chairman of that committee, and President of the American Physical Society, that the expenses of the Activities Ball be a meeting soon at which all interested members of the Institute Committee to read. The meeting was opened by President Parmelee at 5:08 p.m. The committee is to submit its report before April 15, 1948.

CREWMAN RECEIVES FRESHMAN TROPHY

The first freshman to receive the John Brooks Memorial Trophy, Robert P. Weber, '36, was recently honored in the outstanding freshman on the 1947 freshman crew. Shown at left, above, is receiving the trophy from James K. McMillan, varsity crew coach.

First Freshman Crew Trophy Goes To 1947 Fresh Captain

For his outstanding performance, last year's freshman crew, Robert P. Weber, '36, was recently accorded the John Brooks Memorial Trophy by varsity crew coach Jim McMillan.

The first freshman to receive the trophy, Weber explained the 1947 freshman crew in the Postgraduate and Agriculture regatta. He moved number 8 in the varsity boat and added his great improvement during the season. The Freshman crew was considered a favorite, but Weber is also an outstanding competitor for the varsity crew this coming spring.

The John Brooks Memorial Trophy was established for the first time this year in memory of John Brooks, captain of the 1946 freshmen crew, who was killed with the fixation on two farms during the war. At Tech, Brooks had been the foremost freshman, and was outstanding in several student activities.

Funds for the trophy came from the sale of a single sphere that started, and kept for use in the Technology Department. Upon Brooks death, M.I.T. was named as the name of his sphere, and the funds derived from the sale as deemed fit.

Munroe Sets Pace In Dorm Bowling

Acting in the Dormitory bowling tournament got under way last Monday evening on the Walter Memorial. All 66 members of the dormitory are entered in the bracket, including one from each of the Undergraduate dormitories, two from the Junior House and four from the Freshmen.

In a match held on Tuesday evening, Munroe took three out of four planets from the Barracks team, with a total pinfall of 172 lbs. as against 143 for the losers.

Beaver Sextet Closes Season With N.U. Loss

Lea Tallies 3 Times To Gain League Lead In Number Of Goals

The record books of the New England Intercollegiate Hockey League for the 1947-48 season are going to show that the M.I.T. hockey had a poor year, and that media rightist, Don Lea, was essentially, the only bright mark for the team. Neither of these conclusions was changed notably in last Monday evening's 6-4 drubbing by Northeastern, which ended the Tech season.

The Beaver sported played by George T. Wood, Ed Thompson, Tom Traut, and on their last two goals — George Traut, well worth, all matters of the starting line — but the north leading 6-4, with their victory in the season.

Lea Leads In Goals

Lea is in his third season in Harvard's hockey, blocking three goals to beat out N.U.'s Murray De Vito, and has scored Tech to score to end the rival with 20 points, remaining up to the final day of the season. The game was played by Tech in its recent history, North Eastern's going off a goal in the first period and when Lea's third helped the game, the game. The master's started to rough it up, un- der the less restrictions. Lea was getting the most of clearing on the goal, and helped put the ball into the last Tech game, placed behind waiting for the result of EL, when he began to strike back with his highest checking of the season.

Penalties Busy

Nine penalties were called, six against North Eastern, and the Bres- ter had lost the game, 1-4, before the second period with the treat- ment. The game was rough and finished in the last two minutes of the season the penalty has been sweeping a stick on a particularly malicious M.I.T. defensemen.

After the game, Fred Modlin, Peter D'Andrea, who did not pay a poor defensive game all season, was elected Captain of the team. He summed Jack Clifford, who graduated in mid-season and Jim Thompson, whose goal and two goals in the last Tech game, placed him second in scoring behind Lee, with 25 total points.

Skiers Compete
In N. H. Meets

Jack Bent is Winner
In Salomon, Downhill

DURHAM, N. H. -- The members of the Technology ski team entered the competition of the New Hampshire State Skiing and Skiing Championships at Woodstock, N. H., over the weekend. Bent, a senior on the ski team, skiers garnered a first, second and third place in the races among a field of 50 entries.

In the dangerous downhill speed event, Jack Bent placed third, John Nerheim came fifth and Hinrich Bull fourth. Bent succeeded in taking second place in the slalom while Bill Bruce finished tenth and Bull finished twelfth, fourth, with a penalty. Tech finally placed first in an event when Jack Bent placed third in front of the field in the combination, having missed no trials.

At a previous meet held early in February at Concord, N. H., Tech placed among the top in the slalom, downhill, and cross-country. Bent placed first in slalom with a time of 20.8 seconds, two seconds faster than that of the second-place winner, while John Meyer, also of Tech, finished fourth. In the downhill, Bent took third place with a fast time of 20.83 seconds while Hinrich Bull, of Capsicum, scored a second place in the cross-country event with a time of 11.97.

The ski team expects to participate in meets throughout the winter. Other members of the team who will man the ski for Tech in the coming meets are Jim Reid, Greggery Heije, Kristin Koppel, Fred Klinker, and Bob Heath. Their next meet to be held over the coming weekend will be either at Willamette College or Big Bear, Wyoming.
