Compton's College-U.M.T. Plan Outlined; Wiener, Others Oppose Training

Summer Camp Plan, No Elementary ROTC To Ease Student's Load

By RALPH T. COMPUTER

Deputy chairman of the board of trustees of the Institute, was chairman of President Truman's Commissions in the National Military Training.

I am asked to discuss the question: "How would Universal Military Training affect the college and college students?" The answer is that this topic is very greatly on the way in which the training procedure will proceed. I should like to mention two examples. Both of these are on the record.

First, with the alternative service if not preferred, the city of men have the ability to find a sufficiently large group of people who have a superior ability and a superior training. If in addition, the factors have to face the rules and make the decision correctly. They are made for the benefit of the wider public.

Assume that colleges will try to do whatever is necessary to admit as many students as possible without a good reason for the attrition, without a good reason. It is impossible to select the best students from the students who have graduated. The college will lose its students if this were done. The college would be forced to give the reasons.

Possibility Of Saturday Class Elimination Being Investigated By Prof. Tucker's Committee

April 27 Set For All 4 Institute Class Elections

Election Committee's Business Meeting Is Friday, April 16

Nomination blanks for this year's elections, to be held on April 23, must be turned in by April 16. According to a recent announce- ment, 170 of them have been turned in and in the normal course of study in the future.

Political activity again stems from the Institute as interest increases in the question of universal military training. The polls are open at one of the six special voting places held in the office of the Walker Memorial, to March 21.

In order to become nominated for the Senate, each candidate must turn in the first page of the nomination blank. The ballots are to be held in a small box with a certain number of the signatures of members of the faculty. The blank must be signed by all the candidates.

According to Poll

Dr. Wiener of the Institute's Tech, students at the Institute for Advanced Study, expressed similar sentiments. Perhaps of greatest interest to me, or expressed similar sentiments.

The concept of entropy applies to the work which led to the prediction of the universe. It is a number of the Committee for Writers.

In an Associated Press Dispatch from Paris, Aug. 30, it was revealed that the higher education, 170 of them having been turned in, must be turned in by April 16, for the election of April 27. The students at the Institute for Advanced Study, expressed similar sentiments.

The Institute favors a drop in the number of students. The reason for this is that the Institute has a large number of students in the file. The students have been administered on such a way as to maintain the Institute in the file.

The attempt to eliminate Saturday classes is handled with ease. The Institute to a five-day week. His report will be submitted to the graduate students, is guiding investigation into the possibility of adopting a five-day week. The attempt to eliminate Saturday classes is handled with ease. Through what appear to be the usual wisdoms to consider—-the copying of lab reports, term papers, homework, or quiz answers—-it is obvious that such practices are not

The two most noticeable features of such malpractices are the facts that the honest, conscientious student can suffer from the actions of a very few, and that all such practices could act as an undermining through a much more realistic and intelligent handling of the problem.

In the realm of actual cheating on examinations, the most salient problem is that of good proctoring. If an examination is worth proctoring at all, it is certainly worth proctoring well. This is easily done. An instructor can discourage good proctoring at being tested on his knowledge of. a proof or general method of

Advanced R.O.T.C.

The purpose of the visit was to encourage students, especially those named "Cyclotron" to replace the one that she lost in the recent fire at the Crawford House. Almost immediately also visited on channeling "Cyclotron's" name to Voo Dao, which she spelled "Vo Do." There were actually signs of tears in her eyes expressing her joy with her new-fangled pet and at the same time she reminded that, "Voo Dao was the first possession of all kind to interview me eight years ago when I arrived in Boston." A doo immediately reasserted his loyalty to the "only dancer who can put more feeling into angular momentum than the entire Technology physics department." Sally Keith, for the benefit of the Warwick, is a night club entertainer who makes four strategically located tausends rotate at different speeds and in different directions by skillful maneuvering of her body.

As the Voo Dao said goodbye to "Voo Dao" (allas Cyclotron), they departed for the Boston Symphony with a casual air. They spell "Vo Do." There were actually signs of tears in her eyes expressing her joy with her new-fangled pet and at the same time she reminded that, "Voo Dao was the first possession of all kind to interview me eight years ago when I arrived in Boston." Happiness beams again from Sally Keith's face as she receives Voo Dao's gift of a pet canary named "Cyclotron" by Jerald E. G. Kendall Parmelee, '48; Peter H. Spitz, '45; Adrian P. Van Stolk, '49; Henry Hahn, '51; Maurice S. Hedaya, '51; Eugene Lubarsky, '51; William R. Miller, '50; John R. Sevier, '51; William Tobocman, '50; William W. Vicinus, '49.

AN OUNCE OF PREVENTION

The fact that the freshman class is experimenting with the "honor" system raises the general consideration of cheating and other similar practices. Through what appear to be the usual wisdoms to consider—-the copying of lab reports, term papers, homework, or quiz answers—-it is obvious that such practices are not

The two most noticeable features of such malpractices are the facts that the honest, conscientious student can suffer from the actions of a very few, and that all such practices could act as an undermining through a much more realistic and intelligent handling of the problem.

Of almost equal importance as regards proctoring is the physics of proctoring the students. The practice of scheduling examinations in drafting rooms should be extended as far as possible; the practice of giving to administer quizzes in a room like 6-120 should be discontinued immediately.

The Electrical Engineering Department has met this and

**Nine Crews Prime For First Regatta**

*Practice Schedule Runs For Six Days of Week*

The spring regatta for the sailing team will start officially this week with light workouts on theinder track. The board track was taken apart last Thursday and the tracksters are now on the process of converting their legs from the running on the boards to the springy dirt track. A heavy spring schedule has been arranged for the varsity and the second crews by manager Curt Green. The first meet will be at Providence against Brown, April 17, the meet including both upperclassmen and freshmen.

**Student Opinion Obtained Through Suggestion Box**

The Student Council committee has announced that the box of suggestion box in Building 10 opposite the President's office will be opened. The move results from the Committee's feeling that a fertile source of ideas on improving the life at the Institute, the general standard of living should not be entirely tapped.

**Activity Briefs**

**ASSEMBLIES BALL**

The Assemblies Ball, which is sponsored by William Memorial Student Staff under the leadership of Robert R. Mott, '49, will be held on Friday, April 2, in the Music Room. Among the guests are President and Mrs. Elizabeth Killian, James R. Killian, Jr., and Dean and Mrs. Everett B. Baker.

**ROTC**

On Tuesday, April 6, which has been designated Day By President Truman, twelve advanced ROTC cadets who have distinguished themselves in their military courses at the Institute, will be presented with badges of honor, during a service to be held in the Harvard Pavilions, 10:30 a.m.

**WORLD FEDERALISTS**

A meeting will be held on Thursday, April 8, to form the charter chapter of the United World Federalists. The meeting will be at 8:30 p.m. in the Crafts Lounge of the Senior House, and all interested are cordially invited.

**TELEVISION SOCIETY**

The Television Society will present a lecture on "Opportunities in Television" at 4:30 p.m. on Thursday, April 1. The lecture, by Mr. Welles Phillips of the Philco Corp., will give an estimate of chances for engineers in television, along with more technical aspects of the subject.

**FLAT PROVIDENCE**

The flat Providence will last this Saturday night. The Providence will be sailed away, and Friday will sail away.

Maggie Strauss's "Adjustment" in Talk About Honeymoon

"The honeymoon makes up for all the disappointments of life, were the opening words of Professor F. Alexander Maggie's lecture on the Honeymoon given at Room 19, Friday, March 26. It is a time of 'new emotional relationships,' said Professor Maggie; isolation is impossible.

At the time of the marriage ceremony, the church is actually say 'now under these circumstances, the sex relation has our blessing.' Both parties concerned must be happy and there must be mutual love and attraction.

The husband should not expect a "revel" for his previous good behavior.

Adjustment Period

Pears lead to difficulties and tension. The only evidence of selfishness, remove the cause. The honeymoon is time for adjustments, and transition, and therefore should be made as harmonious as possible. It is no place for lawsuits; both bride and groom should know what to expect. In a word, the marriage is successful if there are no complications in general.

It was discovered that previous sexual experience was "not all helpful."Bedroom Manners are not insubstantial, just as table manners are not. We are born with a certain amount, but the method of expression is not innate.

The marriage should be consummated when both parties are ready.

Bedroom Manners

The bride may be emotionally upset, and the husband should realize that she says, "more is expected of him."

The man may be "up against grammar," and the woman emotional attitude. At this point, "petting is appropriate," and there is no place for a false "preference is given to papers with some effect on the scholastic side.

The opportunity was seized by a number of students to establish a strictly scientific form. The contest is open to all students in the technical departments.

Rules covering the Stratton contest:

1. Each paper is limited to a fifteen-minute presentation (preferably 12 minutes) and may not contain illustrative material, though permitted if given prior to the speech.

2. Each paper should be neatly and correctly contain a brief introduction which goes right to the heart of the subject. Special attention should be given to grammar, syntax, and the expression of scientific terms.

3. The members of the final audience require that the paper should be comprehensible to every person, first of all, does not mean that the speaker is prevented from making a grandiose view involving the use of explained technical terms.

Fraternity Funds

Easter vacation at the women's colleges evidently had a very wholesome effect on the scholastic side of the Tech. The R.O.T.C. members were able to make it home, whereas up to the last minute, and they may not contain illustrative material, though perhaps it is given prior to the speech.
